## Catalog and Student Handbooks

- **00. Handbook Home**
  - Message from the Chancellor

- **01. About the Catalog & Student Handbook**

- **02. Academic Calendar**
  - Academic & Events Calendar

- **03. About the College**
  - TSTC Mission
  - Vision & Values
  - History of Texas State Technical College
  - Locations
  - Governance and Accreditation
  - Equal Opportunity Statement
  - Instructional Philosophy
  - The TSTC Foundation
  - Industry Advisory Committees

- **04. Student Recruitment**
  - Student Recruitment

- **05. Enrollment Information**
  - Eligibility Requirements
  - Academic Fresh Start
  - Registration for Classes
  - Restricted Admission Programs
  - Dual Enrollment Courses
  - Veteran Services
  - Texas Success Initiative (TSI) Requirements

- **06. Paying for College**
  - Tuition & Fees
  - Traditional Course Tuition Table
  - Performance-Based Education (PBE) Tuition Table
  - Fees
  - Waivers and Exemptions
  - Installment Payment Plan
  - Emergency Tuition Loan
  - Housing Fees
  - Student Insurance
  - Refunds
  - Financial Aid
  - Types of Financial Aid
  - Applying for Financial Aid
  - Satisfactory Academic Progress
  - Managing Student Debt
  - Veteran Benefits
  - Textbooks and Supplies

- **07. First Steps at TSTC**
  - Advising
  - Testing Center
  - New Student Orientation
  - First Year Seminar Courses (TSTC 1101 and TSTC 1102)
  - Nontraditional Services
  - Student Identification Cards

- **08. Scholastic Information**
  - Academic Integrity
  - Credentials
  - Degree and Certificate Plans
  - Change of Major
  - Institutional Awards
  - Course Load
  - Classification
  - Grading Standards

The 2022-2023 Catalog & Student Handbook includes chapters on Graduation and Commencement, Academic Planning, Student Services, Campus Security and Safety, Student Rights and Responsibilities, Faculty Listing, and Workforce Training & Continuing Education. The specific chapters for each section are listed in the table.
### 16. Essential Program Functions

- Aircraft Airframe and Powerplant Technology
- Aircraft Pilot Training Technology
- Auto Collision & Management Technology
- Automation and Controls Technology
- Automotive Technology
- Avionics Technology
- Biology
- Biomedical Equipment Technology
- Building Construction Technology
- Business Management Technology
- Chemical Dependency Counseling
- Computer Networking & Systems Administration
- Computer Programming Technology
- Computer Science
- Culinary Arts
- Cybersecurity
- Dental Hygiene
- Diesel Equipment Technology
- Digital Media Design
- Education and Training
- Electrical Lineworker & Management Technology
- Electrical Power & Controls
- Electromechanical Technology
- Emergency Medical Services (EMS)
- Engineering
- Health Information Technology
- HVAC Technology
- Industrial Systems
- Instrumentation Technology
- Mathematics
- Mechatronics Technology
- Nursing — ADN Transition Program
- Occupational Safety and Environmental Compliance Technology
- Physics
- Plumbing & Pipefitting Technology
- Precision Machining Technology
- Process Operations
- Robotics & Industrial Controls
- Solar Energy and Electrical Construction
- Surgical Technology
- Visual Communication Technology
- Vocational Nursing
- Welding Technology

*What are Essential Program Functions?*

<p>| 2022-2023 Catalog &amp; Student Handbook |

Texas State Technical College (TSTC) is not your typical kind of college, and I can’t resist telling people about that fact!

TSTC was established more than 50 years ago to help create a strong Texas. At the time, Governor John Connally predicted that we would become “the most sophisticated technical-vocational institute in the country.” TSTC is living true to that vision with 10 campuses in Abilene, Breckenridge, Brownwood, East Williamson County, Fort Bend County, Harlingen, Marshall, North Texas, Sweetwater and Waco.

Indeed, with a statewide role and mission, TSTC is doing what we were created to do. We are efficiently and effectively helping Texas meet the high-tech challenges of today’s global economy in partnership with business and industry, government agencies, and other educational institutions.

TSTC graduates are highly valued by business and industry for their work ethic, knowledge, and workplace skills. Whether a student is considering upgrading their skills or just starting on a new career path, one of the many TSTC campuses is a great place to prepare for a great-paying job in the vibrant Texas economy.

Regards,

Mike Reeser
Chancellor & CEO

01. About the Catalog & Student Handbook

About the Catalog & Student Handbook
The Texas State Technical College Catalog and Student Handbook includes everything you need to know about TSTC. This catalog is in effect for new students entering TSTC in the 2022-2023 academic year and for any TSTC student returning in the 2022-2023 academic year whose catalog has expired. It was prepared from existing policies and information obtained from the appropriate TSTC officials and is the document of authority for all students.

You may follow the degree plan requirements described in the catalog in effect at the time you first enrolled at TSTC. Or you may choose to follow the degree plan requirements of a later catalog in effect during your enrollment, as long as the program of study is still offered, the catalog is not more than five years old, and you have officially declared the corresponding major.

TSTC reserves the right to make changes in the regulations and offerings announced in this catalog as circumstances require. Each semester the College posts an online schedule listing courses to be offered. Not all courses listed in this catalog are offered each semester. This information is made available to students as early as possible prior to the beginning of each semester.

How to Use this Catalog

This catalog is a description of the academic programs, policies, and facilities of Texas State Technical College (TSTC). It also describes the many resources we provide to assist you with achieving your academic and career goals, including free advising and tutoring services.

TSTC maintains an open-admissions policy providing higher education to all persons who can benefit from its programs and courses. Complete an TSTC application at any time during the year. You will always have access to advisors and faculty members who can help you make good decisions for your future. We look forward to serving you as a TSTC student!

03. About the College

01. TSTC Mission

The Texas State Technical College mission is defined by the Texas State Legislature and published in Vernon’s Texas Education Code (TEC) Section 135.01:

Texas State Technical College System is a coeducational two-year institution of higher education offering courses of study in technical-vocational education for which there is a demand within the state of Texas.
The Texas State Technical College System shall contribute to the educational and economic development of the state of Texas by offering occupationally oriented programs with supporting academic coursework, emphasizing highly specialized advanced and emerging technical and vocational areas for certificates or associate degrees. The Texas State Technical College System is authorized to serve the state of Texas through excellence in instruction, public service, faculty and manpower research, and economic development. The system’s economic development efforts to improve the competitiveness of Texas business and industry include exemplary centers of excellence in technical program clusters on the system’s campuses and support of education research commercialization initiatives. Through close collaboration with business, industry, governmental agencies and communities, including public and private secondary and postsecondary educational institutions, the system shall facilitate and deliver an articulated and responsive technical education system.

In developing and offering highly specialized technical programs with related supportive coursework, primary consideration shall be placed on the industrial and technological manpower needs of the state. The emphasis of each Texas State Technical College System campus shall be on advanced or emerging programs not commonly offered by public junior colleges.

02. Vision & Values

Vision
Texas State Technical College is a leader in strengthening the competitiveness of Texas business and industry by building the state’s capacity to develop the highest-quality workforce.

Values

Excellence
Being held to and delivering a higher standard to our co-workers, ourselves, our students and Texas.

Accountability
Doing what needs to be done and being transparent about the resulting successes and failures.

Service
Delivering genuine experiences to fulfill the needs of our customers.

Integrity
Doing what is right and not wavering.

03. History of Texas State Technical College
Texas State Technical College (TSTC) was established in 1965 as the James Connally Technical Institute (JCTI) of Texas A&M University to meet the state’s evolving workforce needs. This college was located in Central Texas at the former James Connally Air Force Base in Waco. At the time, Gov. John Connally predicted that it would be “the most sophisticated technical-vocational institute in the country.”

In 1967, JCTI expanded to include a South Texas campus in Harlingen. In 1969, the colleges separated from Texas A&M University and became an independent state system, with the name Texas State Technical Institute (TSTI) and its own Board of Regents. An additional campus was created in 1970 in the Texas Panhandle and in Sweetwater in West Texas. As the demand for quality technical education continued to grow, campuses were established in Abilene (1985), Breckenridge (1989), Brownwood (1991), Marshall (1991), East Williamson County, North Texas (2013) and Fort Bend County (2016). In 1991, TSTI was renamed Texas State Technical College.

Today, serving as the state’s college for workforce and economic development, TSTC offers new, emerging and customized curriculum at 10 locations in Abilene, Breckenridge, Brownwood, East Williamson County, Fort Bend County, Harlingen, Marshall, North Texas, Sweetwater and Waco. In addition, programs and customized training are offered at partnership centers throughout the state.

TSTC’s statewide role and mission is to efficiently and effectively help Texas meet the high-tech challenges of today’s global economy in partnership with business and industry, government agencies and other educational institutions. TSTC has high graduation rates, exceptional postgraduate success rates, and an outstanding record in graduating individuals from diverse cultural and socioeconomic backgrounds. Students are served through traditional degree programs, short-term continuing education and corporate training programs.

Among TSTC’s strengths are its emphasis toward hands-on learning and its strong relationships with business and industry, state-of-the-art laboratories, residential campuses and student-centered philosophy.

TSTC believes in people and their desire to be responsible and productive citizens. TSTC believes that technology is a force to be explored and channeled by people in a productive and responsible manner for the benefit of all humankind. Therefore, TSTC believes that all people should be provided with the educational opportunity to learn the skills necessary to perform meaningful work and pursue their goals as responsible citizens contributing to the welfare and success of their families, communities, state, nation and world.

04. Locations

From north to south and everywhere in between, we have a campus that’s just right for you. With state-of-the-art technology training and the skills to lead you to your next career, TSTC has a location to fit your needs.

With 10 locations throughout Texas, TSTC is where you are. Come see for yourself.

05. Governance and Accreditation

Governance

Texas State Technical College is governed by a nine-member Board of Regents and operates under the leadership of the chancellor and chief executive officer, whom the board appoints. Board members are appointed by the governor to six-year staggered terms and are confirmed by the state Senate. The board meets a minimum of four times a year to enact policies and take actions that support the successful operation and management of the college.

Accreditation
Texas State Technical College (TSTC) is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award associate degrees and certificates of completion. Questions about the accreditation of TSTC may be directed in writing to the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, GA 30033-4097, by calling 404-679-4500, or by using information available on SACSCOC’s website (www.sacscoc.org).

As a regional accreditor, SACSCOC affirms the accreditation of an institution as a whole. Information about the accreditation status of TSTC can be found on the SACSCOC website. The procedure for filing a complaint against the College is detailed on SACSCOC’s Complaint Procedures Against SACSCOC or its Accredited Institutions Policy Statement. Filing a complaint with SACSCOC should only address significant, documented, alleged noncompliance with the SACSCOC accreditation standards, policies or procedures. SACSCOC expects individuals to attempt to resolve the issue through all means available to the complainant, including following the institution’s own published grievance procedures, before submitting a complaint to SACSCOC.

TSTC is a member of the American Association of Collegiate Registrars and Admissions Officers.

**The following programs are accredited by the:**
American Dental Association Commission on Dental Accreditation
- Dental Hygiene

Commission on Accreditation for Health Informatics and Information Management Education
- Health Information Technology

Accreditation Review Council on Education in Surgical Technology and Surgical Assisting in collaboration with Commission on Accreditation of Allied Health Education Programs
- Surgical Technology

North American Process Technology Alliance
- Process Operations Technology
Texas Skills Standards Board

- Biomedical Equipment Technology
- Cybersecurity
- Digital Media Design
- Electrical Lineworker Technology
- Process Operations
- Solar Energy Technology
- Wind Energy Technology

The following program is designated by the:
National Security Agency and Department of Homeland as a National Center of Academic Excellence in Cyber Defense

- Cybersecurity (Harlingen campus)

06. Equal Opportunity Statement

Equal opportunity shall be afforded within TSTC to all employees and applicants for admission or employment regardless of race, color, religion, sex (including pregnancy, gender identity, and sexual orientation), parental status, national origin, age, disability, genetic information (including family medical history), political affiliation, military service, or other non-merit based factors.

TSTC will make reasonable accommodations for individuals with disabilities upon self disclosure and request to the designated offices/personnel. TSTC’s policy is that, in all aspects of its operations, each person with a disability shall be considered for admission or access to or treatment or employment in its programs and activities in accordance with Part 84 of Title 45, the regulation implementing Section 504 of the Rehabilitation Act of 1973.

TSTC reserves the right to limit the enrollment of any program and to make any changes in the provisions of this catalog when such action is deemed to be in the best interest of the student or TSTC. TSTC reserves the right to change any of this catalog's provisions, without notice or obligation, in keeping with the policies of the Board of Regents and in conformance with the laws of the State of Texas. This catalog is not a legal document and does not constitute a contract between TSTC and the user.

07. Instructional Philosophy

TSTC trains students to be employees for tomorrow’s careers, helping to strengthen the economic competitiveness of Texas and improve the lives of its people. TSTC believes in “learning by thinking and doing.” Its curricula prepares students with the technical knowledge, skills and abilities they need to be successful in their chosen careers. TSTC's faculty is highly qualified, with years of business and industry experience in their respective fields. And its facilities and equipment provide students with significant opportunities to apply what they learn.

08. The TSTC Foundation

The TSTC Foundation supports TSTC’s 10 campus locations, its students, career programs, faculty and staff. Its purpose is to support the critical needs of students through scholarships, hardships, tools and equipment and to provide funds to enhance TSTC's ability to provide new and emerging technical programs to support the Texas workforce. This support is used to help improve student success, strengthen the technology in labs and provide flexibility to the priorities of the college to support the state’s growing workforce demands. The TSTC Foundation is a 501(c)3 not-for-profit organization for the sole benefit of TSTC and its students.
09. Industry Advisory Committees

Industry Advisory Committees are an essential component of TSTC’s graduate success. Their members guide curriculum development by advising faculty on the latest skills, knowledge, and abilities that employees need. They help to create and equip facilities so students gain experiences that enhance their value to employers. Their on-going involvement ensures that TSTC students receive the right kind of education.

04. Student Recruitment

01. Student Recruitment

Campus Tours

Prospective students, applicants and their families are strongly encouraged to visit TSTC before registering for classes.

To schedule a tour visit: tstc.edu/visit-campus-form

05. Enrollment Information

01. Eligibility Requirements

General Requirements

It is the policy of Texas State Technical College (TSTC) that the College admit applicants who declare their intention to enroll in the College. Applicants are allowed to enroll in their selected program upon satisfactory completion of all enrollment and program entrance requirements.

Equal opportunity shall be afforded within Texas State Technical College to all employees and applicants for admission or employment without regard to race, color, religion, gender, national origin, age, genetic information, disability or veteran status.

Categories

Prospective students shall be admitted to TSTC as regular students under the following conditions:

A. **High School Graduate** - A student shall be admitted upon proof of graduation from an accredited high school with submission of an official high school transcript. A student who graduated from a homeschool shall be admitted once a notarized record of the completed high school equivalent work and the date of successful completion is submitted. This work shall be consistent with TEA minimums for high school completion.

B. **College Transfer** - A student shall be admitted who had prior attendance at a regionally accredited college or university. A transfer student shall be admitted upon receipt of official transcripts from all previously attended institutions of higher education. Official high school transcripts may also be required for financial aid purposes. Transcripts shall be considered official only when they are signed by the registrar and bear the seal of that college or university and have been received through the mail, hand delivered in a sealed envelope, or received through Standardization of Postsecondary Education Electronic Data Exchange (SPEEDE).

C. **General Education Development Test (GED)** - A student shall be admitted upon successful completion of the GED or a recognized equivalent as certified by a state education agency or a state authorized examination that the state recognizes as the equivalent of a high school diploma. A student shall be admitted upon receipt of official GED score report or scores from a state-authorized examination that the state recognizes as the equivalent of a high school diploma.
Individual Approval Categories/Exceptional Admissions

Prospective students may be granted exceptional admission if they do not qualify under one of the previous categories for regular admission. Students may be admitted under one of the two following Individual Approval Categories:

A. Individual Approval A:
   i. Students age 16 or older who are graduates of an unaccredited high school may be admitted through exceptional admission.
   ii. Students age 17 or older who are attending a course of instruction to prepare for the high school equivalency examination and/or who are considered to be concurrently enrolled in high school or homeschool may be admitted through exceptional admission. High school counselor or parent recommendations shall be required.
   iii. Students 18 or older without a high school diploma or CHSE/GED may be admitted through exceptional admission.

B. Individual Approval B:
   i. Dual enrollment students who are currently attending a high school and do not have a diploma or GED may be admitted through exceptional admission.

Enrollment Procedures

A. Submit an Application for Admissions form, which includes core residency questions and a declaration of intent to enroll as a degree-seeking or non-degree-seeking student. All applicants applying for admissions to the College shall be required to complete the information regarding felony charges on the Application for Admissions form. Applicants who answer “Yes” will be required to complete a “Supplemental form” and may be required to submit additional documentation.

B. Submit applicable documents based on the appropriate admission category.

C. Comply with applicable testing requirements:
   i. Submitting TSI Assessment test results; or
   ii. Submitting documentation of TSI exemption or waiver; or
   iii. Taking the TSI Assessment test.

D. Submit compliance with any immunization-related requirements as specified by law.

E. Submit proof of compliance with any established and approved program entry level standards.

Note: All new students are encouraged to attend New Student Orientation.

All documents submitted by applicants who do not register for the term indicated on the admission application will be retained for one year in the Office of the Registrar. At the end of one year, all records are discarded unless the applicant has notified the Enrollment Center of continued interest in attending TSTC. All documents become the property of TSTC and are not returned to the students.

Former TSTC Students

College credit students who were previously enrolled at TSTC, but have not attended TSTC for more than one year, must reapply by completing the admission enrollment procedures and providing the appropriate required documents.

A. Reapplying for admission after an interruption of enrollment of more than one year prior;
B. Comply with applicable testing requirements;
C. Comply with any immunization related requirements as specified by law;
D. Submissions of official transcripts for any College/University previously attended, TxCHSE or High School transcript.

Note: Students who have an interruption or break in the enrollment of more than one year at TSTC and return later to complete their program of study may be required to update their program of study due to changes in the curriculum or modality.

Campus Immunizations

Students who will be attending classes on campus and are ages 22 or younger are required by Texas state law to obtain the Bacterial Meningitis vaccination. Additional vaccinations or boosters may be required for admission into specific programs. Students are encouraged to contact their programs of interest for further details.

02. Academic Fresh Start

Texas Senate Bill 1321, entitled “Right to an Academic Fresh Start,” allows a person who is a resident of Texas to apply for admission and not have coursework completed 10 or more years prior to the date of anticipated enrollment included as consideration in the admission decision. This allows the student to begin a new course of study with a clear academic record.
2022-2023 Catalog & Student Handbook

A. This is an all-or-nothing option. Students are not able to pick and choose which courses to ignore and which courses to count. This option clears only the student’s academic record. If the student chooses the “Academic Fresh Start” option, the student does not receive any credit for any courses taken 10 or more years prior to the re-enrollment. This means that:
   i. Courses taken previously cannot be used to fulfill new prerequisite requirements.
   ii. Courses taken previously cannot be counted toward a new degree.
   iii. Courses taken previously will not be counted in the student’s GPA calculation.
B. The student must still complete the usual admissions process, including providing information on all colleges or universities previously attended and provide official copies of transcripts from all schools attended.
C. Once the “Right to an Academic Fresh Start” provision has been claimed, and the student has enrolled, the provision cannot be reversed.

Note: “Academic Fresh Start” does not apply to the Standards of Academic Progress for Financial Aid. Therefore, students may not qualify for financial aid based on prior academic performance.

03. Registration for Classes

After the requirements are met and the required procedures completed, students may register for credit classes. Consult with your faculty advisor or enrollment coach to review the TSTC course schedule for more information on these classes. Registration for Workforce Training and Continuing Education programs are different from those described in this section. Contact the Workforce Training and Continuing Education Office for more information.

TSTC reserves the right to cancel a scheduled class due to insufficient enrollment, instructional capacity or other institutional need. TSTC will notify students of cancellations and issue refunds for canceled classes.

Change of Personal Information

Students are responsible for maintaining accurate personal information on their educational records to ensure communication with college departments. Official changes to personal information are made at the Enrollment Center on a data change form -- although changes of address, email address and telephone numbers may be made online through WebAdvisor. Some changes require additional documentation, as outlined below. All changes are processed immediately upon receipt.

- Name changes can be submitted to the Enrollment Center. Students must provide legal documentation, such as an original marriage license or certificate, passport, court order, divorce decree, birth certificate or naturalization papers. A driver’s license or Social Security card will not be accepted. Name changes for graduation candidates must be completed by the census date of the semester the student is eligible for graduation.
- Social Security number changes must also be completed in person at the Enrollment Center. The student must present an original Social Security card as documentation.

04. Restricted Admission Programs

The following programs at TSTC have additional application requirements, such as additional immunizations, occupational licenses (HB1508), exams, criminal background checks, drug screenings and prerequisite courses. Visit the program website for more information.

- Aircraft Pilot Training Technology
- Automotive Technology Specializations - Chrysler, Tesla & Toyota
- Chemical Dependency Counseling
- Dental Hygiene
- Electrical Lineworker Technology
- Emergency Medical Services
- Health Information Technology
- HVAC Technology
- Nursing
- Surgical Technology

05. Dual Enrollment Courses

The TSTC Dual Enrollment program provides an opportunity for high school students to earn college and high school credit simultaneously while still in high school. High school partners must have an official partnership with TSTC by way of a memorandum of understanding and meet applicable eligibility requirements for students to enroll in courses. Active dual enrollment students are to abide by the rules and regulations set forth in the TSTC Catalog and Student Handbook. Contact the Dual Enrollment Office for more information.
06. Veteran Services

Veteran Services will serve as a centralized point of contact to assist prospective and current veterans, veteran dependents and active duty military students with navigating college resources to ensure a successful college experience. The Veteran Services staff serve as advocates for student veterans and act as liaisons between the student and other college offices, community resources and the Veteran Affairs Department.

The following services are provided by Veteran Services:

- Application support for FAFSA, admissions, Hazlewood and GI Bill®.
- TSTC Portal and WebAdvisor training.
- College policies and procedures support.
- On-campus job information and referral.
- Veteran benefits information and assistance.
- Referrals for veterans and their dependents.
- Educationally related printing and faxing support for veterans and their dependents.
- Assistance with scholarship searches and application process.
- Referral to campus Advocacy and Resource Center.
- Tutoring support and referral.
- Computer lab access and support.
- Academic advisement support.
- College credit evaluation support.

Veterans Guide For Success

**Step 1:**

**Apply for admissions and complete the required admissions process.**

Veterans are recommended to check their residency status with the Enrollment Center.

If your home of record is Texas and you have been discharged within 12 months, please submit a copy of your DD214 (member 4) to the Enrollment Center. Please visit [www.collegeforalltexans.com](http://www.collegeforalltexans.com) to view other residency waivers available for service members, veterans and/or their dependents.

An acceptance letter containing your student ID number will be mailed to you.

**Step 2:**

**Apply for your GI Bill® and/or Texas Hazlewood Act.**
Apply for your GI Bill® benefits online at www.va.gov.

- Form 22-1990 for veterans using (Chapter 30, 33, 1606).
- Form 22-1990e for dependents and spouses using Post 9/11 GI Bill® (Chapter 33) transfer of entitlement.
- Form 22-5490 for dependents and spouses using Dependents' Education Assistance (Chapter 35).

You will receive a Certificate of Eligibility letter from the Veterans Administration in four to six weeks. Please submit a copy of your Certificate of Eligibility to the Veteran Services Office.

NOTE: If you have previously used your GI Bill® benefits at another school, then you will have to complete a transfer form. Please visit Veteran Services for assistance with the forms below. An updated Certificate of Eligibility will be required by Veteran Services.

- Form 22-1995 for veterans
- Form 22-5495 for dependents or spouses.

Step 3:
Submit all required documentation.

Veterans are required to submit the following documentation to Veteran Services:

2. DD Form 214 (member 4).
3. Official military transcripts (request official military transcripts from the Joint Service Transcript System, or Community College of the Air Force (CCAF)) and university/college transcripts (submit to the Enrollment Center).
4. VA Form 22-1995 when changing major field of study or incoming transfer students.
5. Valid State ID.

Dependents using GI Bill® Chapter 35 or Chapter 33 transfer of entitlements must submit the following documents:

2. DD Form 214 (member) - Chapter 33 transfer of entitlement is exempt if the veteran is on active duty.
3. Veterans service-connected compensation claim, decision letter (Chapter 35).
4. University/College transcripts (submit to the Enrollment Center).
5. VA Form 22-5495 - (Chapter 35) when changing degree plan or incoming transfer student.

Step 4:
Apply for Financial Aid

Service members, veterans and their dependents are encouraged to apply for Financial Aid using the Free Application for Federal Student Aid. To learn more about financial assistance, please visit our Financial Aid website.

For information on veteran benefits, visit the Paying for College section.

Step 5:
Register with VA eBenefits

Create an eBenefits PREMIUM account to check your deposits from VA along with the history of your enrollment certification status and months of benefits remaining. You can set up a direct deposit or update your address with VA.

To contact Veterans Services in your area:
Notes:

- Chapter 33 Veterans who are eligible for Hazlewood can use Hazlewood to “stack” on top of their 33 benefits to pay any remainder of tuition and fees only not paid by Chapter 33 benefits.
- All students must apply for Hazlewood each semester they intend to use the tuition exemption.
- You MUST be enrolled in classes in order for the exemption to be posted. Please do not submit the application before enrolling.

Hazlewood Tuition Exemption

TSTC is authorized to grant tuition and fee waivers to qualified resident and nonresident students based on Texas Higher Education Coordinating Board rules. For details, see “Tuition Waivers and Exemptions” in the Tuition and Fees section of this catalog.

Please visit the Texas Veterans Commission (www.tvc.texas.gov) website for more information and eligibility requirements.

All Hazlewood Tuition Exemption Application must be submitted to the Veteran Services office for processing.

*NOTE: Effective Fall 2014, a law has been adopted by State Legislation (SB 1210, passed in 2013). The law requires that students must meet the Financial Aid Standards of Academic Progress for certain waivers and exemptions such as the Hazlewood Tuition Waiver. These standards are outlined under the TSTC Satisfactory Academic Progress (SAP policy for Financial Aid).

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government website at www.benefits.va.gov/gibill.

07. Texas Success Initiative (TSI) Requirements

In the fall 2013 semester, the Texas Success Initiative (TSI) established college readiness standards for incoming students who have declared a certificate level II or associate degree program (42 hours or more) and are not otherwise exempt from testing. The TSI Assessment 2.0 (TSIA2) is designed to help higher education institutions determine if students are ready for college-level coursework in the general areas of reading, writing and mathematics. If the student does not meet testing requirements, the assessment will also help with student placement in courses that will aid in the preparation of student skills for college-level classes. For the latest exemptions, visit the TSI Testing and Exemptions webpage.

TSI Advisement

Students who do not meet TSI standards must meet with the identified enrollment coaches at each campus. Enrollment coaches will work with students to establish an individualized Academic Success Plan. The Academic Success Plan is developed for individual students according to their specific needs and may include enrollment in developmental courses, tutorials, laboratories and/or other non-course-based activities to prepare the student for college-level coursework. The plan will specify the appropriate measure for determining a student’s college readiness. Academic Success Plans may include provisions for students to retake the TSIA2, subject to availability. For a list of identified enrollment coaches, please visit the Enrollment Center.

TSI College Readiness Standards

The following information provides the minimum passing scores on the TSI Assessment (TSIA) taken Aug. 26, 2013, to Jan. 10, 2021, that are valid for five years from the date of test.

Reading: 351 or higher

Writing: Essay score of 5 or higher; or essay score of 4 and multiple-choice score of 340 or higher
The following information provides the minimum passing scores on the TSI Assessment 2.0 (TSIA2) taken Jan. 11, 2021, or after, which are valid for five years from the date of test.

ELAR: Essay score of 5 or higher and multiple-choice score of 945 or higher; or essay score of 5 or higher and multiple-choice score of 910-944 and diagnostic score of 5 or higher
Math: 950 or higher; or 910-949 and diagnostic score of 6

TSI Testing Schedule
The TSIA2 is administered at the Testing Center. Check with the Testing Center for specific dates and times at each campus. The TSIA2 is computer-based and can only be offered in a paper format for those with documented disabilities. To arrange a disability accommodation, please contact Access and Learning Accommodations at adarequest@tstc.edu at least two weeks before your test date. Late requests will be considered but cannot be guaranteed.

Exemptions from TSI Requirements
1. Students who meet the score standards for ACT, SAT, STAAR, TAKS or TAAS tests may be exempt in a specific skill area if the tests have been taken within the approved time frame. Students must provide official scores to the Enrollment Center prior to enrollment in order to qualify for this exemption. For a list of qualifying scores, visit the TSI Testing and Exemptions webpage.
2. A student who has graduated with an associate or baccalaureate degree from an institution of higher education.
3. A student who transfers to an institution from a private or independent institution of higher education or an accredited out-of-state institution of higher education and who has satisfactorily completed college-level coursework as determined by the receiving institution.
4. A student who has previously attended any institution and has been determined to have met readiness standards by that institution. For students meeting non-algebra-intensive readiness standards in mathematics as defined in §4.59(d)(1)(B) of title 19 part (relating to Determination of Readiness to Perform Entry-Level Freshman Coursework), institutions may choose to require additional preparatory coursework/interventions for algebra-intensive courses, including MATH 1314/1324/1414 (or their local equivalent).
5. A student who is enrolled in a certificate program of one year or less (Level-One certificates, 42 or fewer semester credit hours or the equivalent) at a public junior college, a public technical institute or a public state college.
6. A student who is serving on active duty as a member of the armed forces of the United States, the Texas National Guard or as a member of a reserve component of the armed forces of the United States and has been serving for at least three years preceding enrollment.
7. A student who on or after Aug. 1, 1990, was honorably discharged, retired or released from active duty as a member of the armed forces of the United States or the Texas National Guard or service as a member of a reserve component of the armed forces of the United States.
8. A student who successfully completes a college preparatory course under Texas Education Code §28.014 is waived for a period of 24 months from the date of high school graduation with respect to the content area of the course. This waiver applies only at the institution of higher education that partners with the school district in which the student is enrolled to provide the course. Additionally, an institution of higher education may enter into a memorandum of understanding with a partnering institution of higher education or program to accept the exemption for the college preparatory course.
9. A student who meets the college readiness benchmark on the state's approved high school equivalency (HSE) exam. The HSE exemption is valid up to five years from the date of testing.

College-Level Courses
TSTC has designated courses to satisfy requirements with TSI standards. Students who transfer from regionally accredited institutions of higher education with grades of D or higher in these courses (or equivalents) are determined to be “college ready.” Students must submit official transcripts indicating successful completion of the course(s). For more information, please visit the Enrollment Center.

06. Paying for College

01. Tuition & Fees
A college education is one of the most important investments a person can make. TSTC is committed to providing access to everyone who can benefit from such an education.

The cost of attending TSTC varies depending on a variety of factors, such as a student's residency status, whether or not
the student lives on campus, the program of study, and any other services that the student may need. The Financial Assistance section of this catalog defines the types of financial aid that may be available to help pay these costs. This assistance can help provide the financial support that students need for tuition, housing, books and other educational items. It is not intended to completely fund a student’s education.

The tuition and fees information in this catalog is subject to change without notice.

Tuition

A student’s tuition is determined by residency status, the number of hours taken, the type of course and/or program, and whether the courses are for college credit or for continuing education or workforce training. Tuition rates are subject to change on a semester-by-semester basis as approved by the Board of Regents.

Residency Classifications

**Texas Resident:** You have established a legal domicile in and have lived in Texas for the past 12 months.

**Nonresident:** You are a U.S. citizen who has not lived in Texas for the past 12 months.

Aircraft Pilot Training: Airplane Fees

The following are program fees in addition to tuition.

**Redbird/Simulator Fees:**

Private Pilot

$200: Unlimited time.

Instrument Pilot

$200: Unlimited time.

Intermediate Flight

$200: Unlimited time.

Commercial Flight

$200: Unlimited time.

Certified Flight Instructor Airplane OR Multi-Engine Flight

$200: Unlimited time.

Total Airplane Course Simulator Fees: $1,000

**Airplane (Fixed-Wing Rates):**

C-172 Solo

$121 per hour.

Fuel surcharge is $42 per hour.

PA28R Solo

$154 per hour.

Fuel surcharge is $42 per hour.
PA44-180 Solo
$192 per hour.
Fuel surcharge is $84 per hour.

Dual and Pre- and Post-Flight Review and Instruction: $65 per hour.

Fuel is based on (current price per gallon x gallons per hour) + 10 percent. Pre- and post-flight review is instructor and student time only; it is not flight time.

Note: FAA examiner fees for practical flight exams are typically $800 and charged by the examiner and are the responsibility of the applicant for payment, except for the instructor rating, which is typically $1,000. FAA written exams are currently $165 per test and the personal responsibility of the applicant for payment.

$1,000 Tuition Rebate for Certain Undergraduates
The tuition rebate program provides a financial incentive for students to complete a bachelor’s degree efficiently, taking as few courses outside their degree plan as possible. The program’s goal is minimizing the number of courses that students take -- saving money for the student, the student’s parents and the state of Texas.

Students must meet the following eligibility requirements:
- First college course after high school graduation must be taken in Fall 1997 or later;
- Student must have been a Texas resident at all times while pursuing the degree;
- Student must have been entitled to pay in-state tuition at all times while pursuing the degree; and
- Student must not have graduated yet.

For more information on this rebate program, go to www.collegeforalltexans.com.

Student Payments
Student charges for tuition and fees are due and payable by dates published each semester to ensure that the student’s schedule is not affected. All tuition and fees may be paid by cash, check or credit card at the Student Accounting office or online through the student's TSTC Portal account. Checks are not accepted online.

Note: TSTC may delete your classes for nonpayment, but several factors can prevent your classes from being deleted. Therefore, if you decide not to attend, it is your responsibility to drop your classes by submitting a Course Schedule Change form prior to the established deadline. Failure to drop by the established deadline can result in your being financially and academically responsible for those classes.

The Installment Payment Plan, Emergency Tuition Loan or Student Financial Aid constitute additional forms of payment; however, all payment arrangements must be completed by the published deadlines to avoid deregistration from classes.

To save time, please use WebAdvisor to make payments online.

If you want a payment plan, please enroll online through WebAdvisor. In the Financial Information section, click on “Online Payments.” Then log in again with your WebAdvisor credentials. On the top bar (just below the TSTC logo), click on “Payments” to pay in full, or click on “Payment Plan” to enroll in (or pay toward) a payment plan. You can also review your account information through this page. Please see cashiers if you need assistance or if paying with cash.

Past-Due Accounts
A student with a past-due unpaid balance is considered delinquent. A delinquent student may not register for subsequent terms, add classes in the current term or receive an official transcript. A delinquent account may be turned over to a collection agency, potentially affecting a student’s personal credit rating. A student with a delinquent account is responsible for the fees of any collection agency, which may be based on a percentage, with a maximum of 30 percent of the debt, and all costs and expenses, including reasonable attorney fees that TSTC incurs in such collection efforts after internal collection efforts have failed to result in the full payment of the student’s account. Student accounts may be sent
to an outside collection agency and may be reported to one or more credit bureau reporting service(s).

02. Traditional Course Tuition Table

Notice: The charges listed may change if the TSTC Board approves necessary updates during the academic year.

Returned-check fee: $50, which is applicable for all types of transactions.

### 04. Fees

Student fees are determined by a variety of factors. Not all of these fees apply to Workforce Training & Continuing Education programs. Contact Student Accounting for more information.

Fees for Fall 2022 are as follows:

**Nonresident E-Learning Fee**

$300 per semester credit hour.

For out-of-state residents enrolled in online learning credit courses. Courses are exempt from all other state and designated tuition.

**Testing Center Exam Fee**

Cost of exam.

Applies to tests taken at TSTC Testing Centers and to TSTC Challenge Exams; Includes fee for test administration.
Challenge Exam Fee
$150 per exam.
Fee charged per exam validate prior learning and accelerate through course.

Program-specific Fees and Costs
Varies.
For some credit programs.

Continuing Education/Workforce Training Fees and Costs
Varies.
For some courses.

Out-of-State Resident and Worker Continuing Education Tuition
At least twice the continuing education tuition rate for the associated course-section.
For nonresidents who are brought from outside the state by their employers to attend the course.

Credit Award Evaluation Fee
$25 per evaluation.
Applies to evaluation of CEUs and/or learning for the purpose of awarding TSTC semester credit.

External Certification of Specialty
Cost of exam

Student Medical Health and/or Accident Insurance
Cost of insurance.
Optional, unless required by program.

Library Fines
Book items–10 cents per day.
Non-book items–$1 per day (includes puppets, equipment and media).
Lost item–cost of replacement plus a 10% processing fee.

Locker Rental Fee
$25 per semester.
Voluntary fee to reserve a locker for a semester.

Background Security Check
Cost of security check.
Required for certain programs.
Student ID Replacement Fee
$10 per card.

Digital Materials Fee
Cost of materials, including administrative fee.
Varies by course.

Installment Plan Fee
$25 per semester per installment plan.

Installment Plan Late Fee
$25 after 7 business days grace period.

Returned-check Fee
$50 per check.

Audit Fee
Applicable tuition plus $25 per semester credit hour.

Concurrent Enrollment Fee
Regular tuition/fee charges apply.

Handicap Parking Violation
$100

Moving Violation
$40

Other Offenses
$25—First offense.
$50—Second offense.
$100—Third offense.

Other offenses include, but are not limited to, housing violations, code of conduct violation, smoking in a nonsmoking-designated area and other parking violations.

Allied Health Insurance
Cost of Insurance.
Required for certain Allied Health programs. Includes malpractice and/or needlestick insurance.

Dental Hygiene Clinical Fee
$100 per clinical course.
This section describes tuition waivers and exemptions for college credit courses. Students classified as Texas Residents for purposes of tuition assessment may be eligible to have all or part of their state tuition and/or designated tuition waived if they qualify for one of the waivers or exemptions. Contact the appropriate office for additional information and to determine eligibility.

In Fall 2014, a law was adopted by State Legislation (SB 1210, passed in 2013). The law requires that students must meet the Financial Aid Standards of Academic Progress (SAP) for certain waivers and exemptions. These standards are outlined under the TSTC Satisfactory Academic Progress policy for Financial Aid. To request an appeal if you fail to meet SAP for a term, you will need to contact your enrollment coach.

Waivers & Exemptions for Residents

Students who are the highest-ranking graduate of their high school class (Valedictorian).

Contact: Student Accounting

High school graduates who received TANF (Temporary Assistance for Needy families) benefits while in high school.

Contact: Student Accounting

Children of POWs and MIAs as certified by the U.S. Department of Defense.

Contact: Veteran Services

Children of disabled Firefighters or Peace Officers as certified by the Texas Higher Education Coordinating Board.

Contact: Student Accounting

Blind or Deaf Students as certified by the Texas Health and Human Services – Blind and Deaf-Blind Services, and Deaf and Hard of Hearing Services.

Contact: Student Accounting/Access and Learning Accommodations

Students in Foster or other residential care as certified by the Texas Department of Protective and Regulatory Services.

Contact: Student Accounting

Students classified as residents or nonresidents for purposes of tuition assessment may be eligible to have all or part of their state tuition and/or designated tuition waived if they qualify for one of the waivers or exemptions listed. Contact the appropriate office for additional information and to determine eligibility.

Waivers & Exemptions for Residents or Nonresidents

High school students enrolled in class sections for dual high school and college credit may have state and designated tuition waived or reduced.

Contact: Dual Enrollment

Hazlewood Tuition Exemption for Veterans and their dependents (Hazlewood)

Contact: Veteran Services

Students enrolled in more than one Texas public institution of higher education at the same time may have a reduction in minimum state tuition charges.

Contact: Enrollment Center

Senior citizens 65 years of age or older may audit courses without payment of state and designated tuition.

Contact: Student Accounting
TSTC employees, their spouses and/or dependents have a reduction in state tuition and a waiver of designated tuition.
Contact: Human Resources

Students classified as nonresidents of Texas for purposes of tuition assessment may be eligible to pay resident rates if they qualify for one of the waivers or exemptions listed.
Contact: Enrollment Center

Waivers & Exemptions for Nonresidents
Military personnel stationed in Texas and their spouses and children.
Contact: Veteran Services

Veteran, spouse/dependent of a non-Texas member of the U.S. Armed Forces whose intent is to make Texas his/her new home.
Contact: Veteran Services

Contact: Veteran Services

Individuals employed at least half time as teachers or professors at Texas institutions of higher education and their spouses and children.
Contact: Student Accounting

Students whose families transferred to Texas as a part of the State’s plan for economic development. Employer company must be certified as eligible by the Texas Higher Education Coordinating Board.
Contact: Student Accounting

Students who receive a competitive scholarship of at least $1,000.
Contact: Enrollment Center

Students who reside in a county or parish of Arkansas, Louisiana, New Mexico, or Oklahoma, that is adjacent to Texas in the out-of-state county or parish where a current reciprocity agreement is in effect with a college or university.
Contact: Enrollment Center

Students from Mexico or Canada enrolled through a Texas Higher Education Coordinating Board approved Exchange Program.
Contact: Student Accounting

Students from Mexico who demonstrate financial need.
Contact: Student Accounting

Nonimmigrant aliens residing in Texas in accordance with NATO treaties and their spouses and children.
Contact: Student Accounting

Documentation should be submitted by the third class day of the semester.
06. Installment Payment Plan

College credit students may pay their registration charges (state tuition and designated tuition), campus housing (other than Harlingen family and Waco nonstudent housing) and meal plans on an installment payment plan. In accordance with state law, these students may pay their state and designated tuition in installments for the fall and spring semesters and for certain summer terms.

In order to validate the payment plan option, the initial payment and the signed Installment Agreement must be completed online through the TSTC Portal (or in person) prior to published deadlines.

The payments are due as follows:

**Fifteen-Week Term:**
- 1/3 prior to published deadlines plus the $25 installment plan fee.
- 1/3 prior to the sixth class week.
- 1/3 prior to the eleventh-class week.

**Twelve-Week Summer Term:**
- 1/3 prior to published deadlines plus the $25 installment plan fee.
- 1/3 prior to the fifth class week.
- 1/3 prior to the ninth class week.

**Less Than Twelve-Week Term:**
- 1/2 prior to published deadlines plus the $25 installment plan fee.
- Remainder 1/2 before the class week prior to the halfway point of the term.

A student who elects to pay in installments will:

1. Pay a $25 installment plan fee.
2. Be responsible for making payments on or before the due dates established at the time of registration.
3. Be charged a late fee of $25 for each payment made more than seven business days after the payment is due.
4. Not be able to obtain official copies of his/her student records until the debt is paid in full.
5. Be at risk of being dropped or barred from attending classes until the debt is paid or acceptable arrangements are made with Student Accounting.
6. And, be responsible for payment of any remaining balance upon withdrawal from the College.

07. Emergency Tuition Loan

College credit students who are unable to pay their state and designated tuition at the time of registration because of financial hardship may be eligible for emergency tuition loans. Funds are limited and the student must meet several qualifications. Emergency Tuition Loans are due in full approximately 30 days after first class day. Contact Student Accounting for more information.

08. Housing Fees

Required items include the Housing Application with the appropriate deposit, the Release of Background Information Form and the nonrefundable application fee.

Please see the Housing Office for information regarding room and board.

09. Student Insurance

Students may purchase accident insurance, malpractice (liability) insurance or needlestick insurance through Student Accounting (cashiers). Coverage is available each semester through the census date of the student’s class(es). Please see the cashiers for rates.

10. Refunds

Refunds for Changes in Enrollment
The following definitions apply when calculating refunds for changes in enrollment. Changes must occur by the published deadlines. Reduction in course load occurs when a student drops a course(s) having more credit hours than he/she adds, resulting in the student being enrolled in fewer credit hours overall. Withdrawal occurs when a student completely ends his/her enrollment at the College for the current term.

Credit courses are courses for which a student is eligible to earn semester credit hours toward an institutional award, certificate or associate degree. Credit courses also include support courses required for the student’s enrollment, such as developmental education, etc.

Refunds for Drops/Reduction in Course Load

Students who drop credit courses and reduce their course loads while remaining enrolled at the College will have their state and designated tuition refunded, based on the official drop date recorded by the enrollment coach according to the following schedule. Students who concurrently add and drop the same number of credit hours will not be charged or refunded for these simultaneous transactions if they occur by the published deadlines.

Refunds for semester credit courses are calculated using a formula based on the number of weeks scheduled for a term or class. Students who are enrolled in semester credit hour courses who drop a class or withdraw from school prior to the first class day will receive a 100 percent refund.

Students in semester credit hour courses who officially withdraw from school or drop a course after classes begin will have their state and designated tuition and fees refunded according to the following schedule unless the fees are specifically designated as nonrefundable. Class days are defined as calendar days during which classes are normally scheduled and not the specific days a particular class meets.

<table>

</tr>
</tbody>
</table>

A refund of normally nonrefundable fees could be approved in cases when the student is not accepted for enrollment by TSTC or when a class is canceled. TSTC reserves the right to withhold refunds when a student is suspended for disciplinary reasons. No refunds will be processed until time has elapsed for a check to clear the bank. Refunds are given to a student after receipt of the withdrawal notice from the Student Enrollment Center. Cash refunds are not permitted. Financial aid balances and other credit balances are disbursed via the BankMobile Card on the date announced at registration.

Refunds for Federal Financial Aid Recipients

Special refund requirements apply to students who receive federal aid that is classified as “Title IV” funds. Title IV funds include awards such as Federal Pell Grant, Federal Supplemental Educational Opportunity Grant (FSEOG), William D. Ford Federal Direct Loans, PLUS loans and other federal awards. Students must attend classes to remain eligible for federal financial aid. Students who consider withdrawing from all classes before completing 60 percent of the semester should contact the Enrollment Center to learn how this will affect their financial aid.

If a student reduces a course load or withdraws from TSTC, the College and/or the student may be required to return federal funds awarded to the student. The student may be eligible for a refund of a portion of the state and designated tuition paid to TSTC for that term.
An unofficial withdrawal is when the student stops participating in all the classes during the semester, and all final grades are F’s. Students will be responsible for repaying federal aid determined by a return of Title IV calculation, based on the last date of participation, unless an instructor certifies and documents that the student was participating in at least one class after the 60 percent point of the term or until the end of the term. A term may consist of one or more blocks or modules.

If the student received financial assistance, the refund is returned to the grant, scholarship or loan sources from which the assistance was received.

A federal formula dictates the amount of Title IV aid that must be returned to the federal government by the College and the student. This formula applies to a student who is receiving Title IV funds if the student withdraws from the College before the 60 percent point in time of the term. The percentage of Title IV aid to be returned is equal to the number of calendar days remaining in the term divided by the number of calendar days in the term. Scheduled breaks of five consecutive days or more are excluded from this calculation.

If any funds are to be returned after the refund of Title IV aid, they are used to repay TSTC funds, state funds and other private sources. If there is an unpaid balance, then all aid sources are repaid before any funds are returned to the student. Funds released to a student due to a credit balance on the student’s account do not relieve the student’s obligation to repay Title IV funds when the student withdraws.

**Order of Return of Title IV Funds**

A school must return the Title IV funds to the programs for which the student received aid during the payment period or period of enrollment as applicable, in the following order, up to the net amount disbursed from each source:

1. William D. Ford Unsubsidized Federal Direct Loan (other than PLUS loans).
2. William D. Ford Subsidized Federal Direct Loan.
3. Federal Pell Grant for which a return of funds is required. Federal Supplemental Educational Opportunity Grant (FSEOG) for which a return of funds is required.
4. State, Institutional, Scholarship or other program requiring a refund for enrollment changes.

For more detailed information on the entire refund procedures for Financial Aid students or about the calculation of refund amounts, contact the Student Enrollment Center.

**Campus Store Refunds**

For restocking fees and return deadlines, contact your local Campus Store.

Textbooks returned must be in saleable condition without broken packaging and original receipt provided by the customer.

Tools, supplies and consumables are nonrefundable, unless they are defective. If they are defective, the items must be returned within three weeks of purchase and must be accompanied by the sales receipt in order to receive a refund.

**Housing Refunds**

Upon completion and authorization of College Housing clearance documents, refunds will be based on the following TSTC approved fee schedule:

- Refundable portion of security deposit or remaining balance after charges.
- No refunds of rental fee will be given during the last 10 school days of the semester.
- Rent refunds are based on a pro-rated formula.

**Refund of Other Fees**

No refunds are given for installment plan fees. No refunds are given for health insurance, malpractice insurance, and other miscellaneous student-requested fees after expenses have been incurred by the College.

**11. Financial Aid**

TSTC offers a variety of financial assistance programs to help eligible students with the cost of attending TSTC. The funds provided through these programs can be in the form of a grant, payment for part-time employment (Federal or State Work-Study), Federal Direct Loan, scholarship or a combination of these programs.
A grant is a gift that does not need to be repaid.

The Work-Study Program is part-time employment that allows students to earn money and provides them with the opportunity to gain work experience.

Scholarships are funds that are awarded to students to help them with the cost of their education, and scholarships do not have to be repaid. A student may receive a scholarship based on academic merit, financial need or for other criteria set forth by scholarship donors.

A Federal Direct Loan is borrowed money and must be repaid with interest.

TSTC’s philosophy is to provide financial assistance to students who would otherwise be unable to pursue a postsecondary education.

See the Financial Aid web page for a complete listing of financial assistance programs.

12. Types of Financial Aid

A variety of resources are available for financial assistance at TSTC. Some of these are included in the following list. Visit the Financial Aid web page for more complete information.

Federal Pell Grant: This federal aid program provides financial assistance for obtaining a postsecondary education. It is intended to be the base of a student’s financial aid package. Eligibility is based on the student’s FAFSA need analysis results, the cost of attendance and enrollment status. Students are only eligible to receive six academic years (600%) of Pell Grant funds, which is referred to as Lifetime Eligibility Used.

Federal Supplemental Educational Opportunity Grant (FSEOG): This federal aid program helps college students who have exceptional need. The amount of the FSEOG varies according to the availability of other grants, scholarships, loans and student employment. FSEOG funds are limited and are awarded on a first-come first-served basis.

Texas Public Education Grant (TPEG): This state program provides financial assistance in obtaining a postsecondary education. Eligibility is based on a student’s financial need.

Texas Educational Opportunity Grant (TEOG): These state awards pay state and designated tuition for students who are Texas residents, show financial need and do not have an Estimated Family Contribution greater than the amount determined by the Texas Higher Education Coordinating Board. They must be enrolled in a TSTC certificate or degree-seeking program (Academic Core and non-degree-seeking students are not eligible). Students must be within the first 30 credit hours for consideration. TEOG funds are limited and are offered to students on a first-come first-served basis.

Federal and State Work-Study Program: The Federal College Work-Study Program is funded under the authority of the Economic Opportunity Act of 1964 and subsequent amendments. This program is jointly funded by the federal government under Title IV. In addition, the Texas College Work-Study Program provides eligible, financially needy students with jobs, which are partly funded by the state of Texas. All students considered for employment under the Work-Study Program are ensured equal employment opportunities without regard to race, color, religion, gender, national origin, age, genetic information, disability or veteran status.

Federal and Texas Work-Study Programs allow students to work part time to help them pay for educational expenses. The programs encourage community service jobs as well as work related to the student’s chosen program of study. At all times, the priority should be given to the student’s academics. Therefore, the Work-Study Program is not intended to interfere with the student’s education. Student Work-Study employees cannot work during scheduled class time.

Students who are interested in applying for the Work-Study Program must complete the Free Application for Federal Student Aid (FAFSA) and must apply online for specific jobs at www.tstc.edu/work-at-tstc. Students must be meeting the Financial Aid Standards of Academic Progress and be enrolled at least half-time in their program of study in order to be eligible to participate in the Work-Study Program. Funds awarded are subject to change due to enrollment status or failure...
to meet program requirements. A background check and drug screening are required for all Work-Study positions. Some positions (depending on position and location of hire) may require a fingerprint check. Applicants that apply for a position may be selected for an interview. If a student is selected for an interview by the supervisor of the department for which the student applied, they will be notified by phone and/or email. A selected student will meet with Human Resources staff to complete employment forms.

**Texas Workforce Commission-Vocational Rehabilitation Services (TWC-VRS):** The Texas Workforce Commission-Vocational Rehabilitation Services (TWC-VRS) provides financial assistance to eligible students whose disability may result in substantial vocational limitations. In order to provide training assistance, TWC-VRS must determine that such training is necessary for employment and that the individual has a good chance of success in the chosen program. Contact your local TWC-VRS office for more information.

**Workforce Innovation and Opportunity Act (WIOA):** The Workforce Development board in your area may offer payment of tuition and/or other expenses to students who qualify for this program. Interested applicants should contact the nearest Workforce Center or call 1-800-457-5600 or 1-800-457-5633. Applications for the program should be made as far in advance of registering as possible.

**Federal Loans:** Various types of federal loans are available, including the Federal Direct Subsidized, Federal Direct Unsubsidized and Federal Direct Parent Loan. To be certified for a loan, students must first complete the Free Application for Federal Student Aid (FAFSA), as described earlier in the Financial Assistance section. First-time Federal Direct Loan borrowers will need to complete an online entrance counseling and electronically sign a Master Promissory note before completing the loan process at https://studentaid.gov.

**Private Loans:** Private loans are made by private organizations such banks, credit unions, and state-based or state-affiliated organizations, and have terms and conditions that are set by the lender. Private student loans are generally more expensive than federal student loans. For a comparison of the different type of loans see https://studentaid.gov/understand-aid/types/loans/federal-vs-private.

To be eligible for a loan, students must have a current Free Application for Federal Student Aid (FAFSA) on file, must be enrolled for six credit hours, not be on financial aid suspension or in default, and must meet any other current eligibility requirements. The student will need to meet satisfactory academic progress guidelines.

TSTC candidates for graduation who have borrowed a direct loan are required to complete a loan exit counseling session at https://studentaid.gov. This should be done before graduation in order to avoid graduation holds.

**NOTE:** Awards may be adjusted accordingly if a student has a sponsorship, scholarship and/or a waiver to prevent an overaward of aid.

### 13. Applying for Financial Aid

**When to Apply**

The key to obtaining financial assistance is to apply early. In order to ensure that an aid package is available and ready, TSTC recommends that the completed file be received in the Enrollment Center according to the following schedule:

**Priority Deadlines**

- **Fall Term:** May 1
- **Spring Term:** Oct. 1
- **Summer Term:** March 1

Applications completed by these deadlines are processed on a first-come, first-served basis. Late applications may not have funds available on registration (payment) day, when payment for state and designated tuition is due.

Since financial assistance is not always available by the payment deadline, it is recommended that students make
alternative arrangements to pay registration expenses. Contact Student Accounting for information on installment plans or information on emergency tuition loans.

To be eligible for assistance, a student must:

- Complete the Free Application for Federal Student Aid (FAFSA). Be sure to complete the correct application for the year that you will be attending TSTC.
  - For the spring 2022 and summer 2022 semesters, complete the 2021-2022 FAFSA.
  - For the fall 2022, spring 2023 and summer 2023 semesters, complete the 2022-2023 FAFSA.
  - Verification documents and other forms may need to be submitted after the office reviews the application.
- Complete the admissions requirements, be accepted for enrollment, and enroll in an eligible program.
- Meet the TSTC financial aid standards of academic progress.
- Be a United States citizen or an eligible noncitizen.
  - Other rules for foreign students and noncitizens may apply.
- Be registered with the U.S. Selective Service (if you are a male born after December 31, 1959). All males residing in the United States are required to register for Selective Service immediately following their 18th birthday. For Selective Service information, go to [www.sss.gov](http://www.sss.gov).
- Must have a high school diploma or a GED (effective after July 1, 2012).
- Not be in default on an educational loan or owe a refund on any federal grants.
- Be registered each semester and pay tuition no later than the 11th class day of the 15-week semester, the ninth class day of the 12-week semester, or by the census date for the class/classes registered for. Students registering after the 11th class day of the 15-week semester, the ninth class day of the 12-week semester or after census date may not be eligible for financial aid for that semester. Other rules apply to short summer sessions and online education courses.
- Your eligibility for federal student aid can be affected by incarceration and/or type of conviction you have.

Note to prospective students, students and parents of students: All loan information will be submitted to the National Student Loan Data System (NSLDS) and will be accessible by guaranty agencies, lenders and institutions determined to be authorized users of the data system.

Note: When the student is reported as not attending class prior to census, the student’s financial aid eligibility may be affected. Awards are based on full-time enrollment and will be reduced when students register for less than 12 credit hours.

### Determination of Award

TSTC attempts to meet the educational financial needs of students. Financial need is determined by subtracting the parent(s)’ and/or student’s expected family contribution (EFC), as determined by the Free Application for Federal Student Aid, known as FAFSA, from the total estimated cost of attendance, or COA. Educational Financial Need = COA - EFC.

Students are awarded aid based on financial need and the availability of funds. Financial aid programs have limited funds. Therefore, the Financial Aid Processing Center may not be able to meet the student’s financial aid packaging expectations, but it will try to meet the direct educational needs. Students are responsible for notifying the financial aid office about any additional resources provided to them.

### Student Cost of Attendance Budget (included in COA budget)

Cost of Attendance (COA) at TSTC is based on the number of credit hours that are eligible for financial aid funding. The initial calculation of a student’s COA is based on full-time enrollment. The COA is adjusted based on a student’s actual enrollment level on the latest census date for courses in which the student is enrolled within the term.

Transportation and housing costs will be based on the housing code reported on the student’s FAFSA.

- Adjustments to the cost of attendance may be considered on a case-by-case basis for child care expenses, excessive transportation costs, purchase of a computer, etc.
- TSTC employees and their eligible dependents are charged the adjusted tuition rate approved by the TSTC Board of Regents, if approved by Human Resources.

### How to Apply

These are the first steps in applying for financial assistance.

   or
   - If you would like for the TSTC Enrollment Center to assist you in submitting your FAFSA electronically, please have the following available:
     a. You will need records of income earned in the year prior to when you will start school. You may also need
records of your parents' income information if you are a dependent student.

b. For the 2021-2022 school year, you will need financial information from 2019. For the 2022-2023 school year, you will need financial information from 2020. You will need to refer to:

i. Your Social Security Number (can be found on Social Security card).

ii. Your driver's license (if any).

iii. Your W-2 forms and other records of money earned.

iv. Your (and your spouse's, if you are married) U.S. Individual Income Tax Return, foreign tax return, or tax return for Puerto Rico, Guam, American Samoa, the U.S. Virgin Islands, the Marshall Islands, or the Federated States of Micronesia.

v. Your parents' Federal Income Tax Return (if you are a dependent student).

vi. Your untaxed income records -- Social Security, Temporary Assistance to Needy Families, welfare or Veterans Service-Connected Compensation records.

vii. Your current bank statements.

viii. Your current business and investment mortgage information, business and farm records, stocks, bonds and other investment records.

ix. Your alien registration card (if you are not a U.S. citizen).

2. Officially declare a major to the TSTC Enrollment Center and complete the admissions process. Undeclared majors are not eligible for financial aid.

3. Preregister according to college registration dates and guidelines. Please keep in mind that financial aid will only cover courses that are within your degree plan.

Due to time constraints, the student may not receive immediate notification of the adjustments; therefore, students should monitor their awards and balances on Self-Service.

If your awards are cleared and you register early, your financial aid will be credited to your student account prior to the start of classes. Additional steps may be required for some types of financial assistance. For example, loans need promissory notes and entrance counseling. Certain programs require additional documentation before grant processing. Contact the Enrollment Center for more information and assistance.

You may also find the Estimated Cost of Attendance on the website at https://www.tstc.edu/admissions/tuition/.

Packaging Philosophy

The Federal Pell Grant is initially awarded based on full-time enrollment status. Adjustments are made based on a student's actual enrollment level; students enrolled for 12 or more credit hours receive the maximum Pell entitlement, nine to 11 credit hours receive three-fourths, and six to eight credit hours receive half the award. Less than half-time students who qualify receive the Pell amount determined for enrollment between one and five financial aid credit hours. TSTC uses the student’s latest census date for all classes enrolled for within the term as the official lock date for the term. Adjustments will be made to Pell awards if classes are dropped prior to that date. Other grants, loans and scholarships may be canceled if the student is enrolled for one to five credits.

Additional financial aid is awarded on a first-come, first-served basis or based on program eligibility. Due to limited funds, preference may be given to full-time students who meet priority deadlines. Students who are enrolled at least half-time may request to be considered for additional assistance.

Denial of Aid and/or Repayment

Financial assistance may be reduced, denied or canceled, and students may owe repayment, if they:

- Purposely give false or misleading information (they may be fined $20,000, sent to prison, or both);
- Are on academic/financial aid suspension;
- Owe money to TSTC or the Department of Education;
- Fail to report any changes in circumstances that may affect the award, such as assistance from Workforce Innovation and Opportunity Act (WIOA), Department of Assistive and Rehabilitative Services (DARS), outside scholarships, child care assistance, and other programs of assistance;
- Withdraw from TSTC or drop below half-time at any time of the semester, or fail to meet eligibility requirements;
- Fail to begin attendance in one or all classes between the first day and census day;
- Are awarded Federal Pell Grant for more than one school for the same period of time;
- Stop attending classes without officially dropping or withdrawing;
- Fail to notify TSTC about aid awarded at other institutions;
- Default on a student loan; or
- Owe overpayment of grants.

Change in Circumstances
Financial aid awards are based on information reported on the financial aid application and the student’s enrollment status. Any financial situation that has recently changed because of, but is not limited to, loss of job or benefits, death or other hardship may qualify a student for a Special Circumstances Evaluation.

The document is available at the Enrollment Center or can be emailed to you.

Reapplying/Renewal Applications

Financial aid is not automatically renewable. The FAFSA must be submitted each academic year. Applications for the following academic year are available each prior year on Oct. 1. The priority application deadline for the fall semester is May 1. An academic year includes three semesters: fall, spring and summer.

Verification of Information

All applications and forms must be completed carefully and accurately. The Department of Education or TSTC may select your application for verification. Visit the TSTC Portal at portal.tstc.edu to complete the required documents or request them at the Enrollment Center. Parent and/or student/spouse's Federal Income Tax Transcripts, W-2’s, Social Security, unemployment, child support paid or received, or other income and benefit documentation may be required. Students are responsible for submitting accurate information in order to prevent a delay in the processing of the application. Failure to complete the verification process will prevent financial aid awarding.

Note: Documents submitted should be official documents from agencies such as the IRS, Social Security, Office of Attorney General or other agencies.

15. Satisfactory Academic Progress

Maintaining Eligibility for Financial Aid

Texas State Technical College's Standards of Academic Progress (SAP) are adopted for the purpose of determining continuing eligibility for students who are receiving or applying for financial aid. Academic progress will be reviewed at the end of each term to determine that the student is making satisfactory progress. This review will include all periods of the student’s enrollment, even those for which the student did not receive financial aid. Students are expected to be continually aware of their grades and can use tools such as www.calculator.net/gpa-calculator.html.

Financial Aid Standards of Academic Progress

TSTC evaluates all parts of the SAP at the end of each term of enrollment.

Students who receive financial aid must be enrolled in an eligible program and must have a declared major in a degree or eligible certificate program. Students are required to maintain the following standards of academic progress. These standards of measurements shall be used to determine eligibility for all federal Title IV aid, as well as state and institutional aid, and for other sources of financial assistance unless the requirements of a particular grant or funding source require additional terms. Some aid programs require higher standards, such as a higher grade point average (GPA) or a specific enrollment status. Students are expected to be continually aware of their progress toward their completion. A student who fails to meet the SAP will be notified by email at the email address on the student record. However, failure to receive the notification will not change the SAP status.

Qualitative Progress Measure: Minimum Cumulative Grade Point Average (GPA)

To continue receiving financial aid, the student is expected to successfully complete their classes with passing grades. Students must have at least a 2.00 cumulative GPA (based on all terms of enrollment) and at least a 2.00 term GPA during each period of enrollment. All courses that a student has taken, including transfer credits accepted toward their certificate or degree at TSTC, college level courses and developmental courses, will be evaluated.

Quantitative Progress Measure #1: The Pace of Progression or Completion Rate Each Semester

TSTC will use standard rounding rules when calculating percentages under the quantitative measurement.

For example, 66.5% will be rounded up to 67%. Rounding can also apply to the qualitative measure.

When you enroll in classes and receive financial aid to pay for those classes, you are expected to successfully complete those classes. Effective July 1, 2011, you must complete at least 67% of the credit hours in which you enrolled during each term. You must also achieve a minimum cumulative completion rate of 67% of all courses attempted during your
enrollment. Only passing grades count as successful completions. Incomplete, in progress, failing grades and drop/withdrawals are not considered completed courses, but are considered attempted courses, and will be calculated in the 67% completion requirement. Pass/fail courses will not be counted in the quantitative calculations. All other courses, including remedial courses, are included in the calculation.

Quantitative Progress Measure #2: Maximum Time to Complete a Degree/Program

To ensure that you complete your program in a reasonable amount of time, a limit set by 34 CFR 668.34 has been placed on the number of hours that you can attempt. The limit is 150% of the minimum number of hours required to complete your program. For example, if your degree program requires 60 credit hours for completion, you must complete your degree or certificate program within a maximum of 90 attempted credit hours. Once you reach the 150% limit or the Financial Aid Processing Center determines that you cannot complete your program within the 150% limit, you will no longer be able to receive financial aid. Several variables are considered when calculating the 150% limit and the satisfactory progression rules. These variables include, but are not limited to:

- All attempted credit hours are counted even if you were not receiving aid to pay for them. Attempted hours are the hours in which you are enrolled, as of the census date, in every term.
- Any transfer hours that are accepted from other colleges and applied toward the completion of your program are counted in the maximum time frame. If you have previously attended any college, you must submit official transcripts from all previous colleges prior to any financial aid being released.
- If you repeat a course, both attempts will be counted in the maximum credit hours and progression calculation, even if you did not receive aid for both attempts. Financial aid will only pay for two attempts in a college level course. Separate rules apply for developmental courses.
- Pass/fail courses will not be counted in the quantitative calculations.
- If you withdraw from a course(s) after the census date for that course, it is still counted as an attempted course and is included in the SAP calculation.
- All periods of enrollment and attempted credits will be evaluated, as they apply to the current program of study, whether or not financial aid was awarded during prior enrollment periods.

When you receive financial aid to help pay for a program of study, you are expected to complete that program within the specified time frame for that program. You should not enroll in classes that are not required for your chosen program of study. Classes not required for your degree plan are not eligible for financial aid. Additionally, audit courses, continuing education courses, previously passed courses and courses for which you enroll after the census date are also not eligible for financial aid.

COVID-19 Procedures

Effective May 11, 2020, Texas State Technical College exercises the exceptions under the Coronavirus Aid, Relief, and Economic Security Act (CARES Act) for courses the student does not complete, including pass/fail courses the student does not complete. Per the CARES Act, “[I]n determining whether a student is maintaining satisfactory academic progress, an institution of higher education may, as a result of a qualifying emergency, exclude from the quantitative component of the calculation any attempted credits that were not completed by such student without requiring an appeal by such student.” As a result, pass/no pass courses will be ignored from spring 2020 to summer 2021 SAP calculations and those courses taken during the spring 2020 through summer 2021 terms will not count toward subsequent SAP calculations. Courses that are dropped or not completed due to COVID-19 related circumstances during the spring 2020 through summer 2021 terms will not be counted as either attempted or completed courses for purposes of determining quantitative progress, which includes both maximum time frame and pace calculations; and those courses taken during the spring 2020 through summer 2021 terms will not count toward subsequent SAP calculations. Since TSTC temporarily ceased operations during the spring 2020 term for COVID-19 related reasons, the college exercises the exception to consider all dropped and incomplete courses to be for COVID-19 related circumstances.

Waivers and Exemptions

Effective fall 2014, a new law was adopted by State Legislation (SB 1210, passed in 2013). The law requires that students must meet the Financial Aid Standards of Academic Progress for certain waivers and exemptions.

Change of Major and Transfer Credits

Students receiving financial aid must declare a major in an eligible certificate or degree program. Students should only register for courses approved for their designated degree plan/catalog year.

Change of Major requests will be considered. Change of Major request forms must be submitted to the student’s Enrollment Coach. The Enrollment Center personnel will change the student major to ensure that the student’s new program is tracked for SAP.
Transfer credits that are applicable to the student's degree plan will be counted in both the attempted and completed credits.

Additional Certificates and Degrees

The student must be meeting SAP requirements. Changing programs will not change a student’s current status. The student’s time frame and continued eligibility will be re-evaluated at the time of the review.

Additional SAP Rules: Remedial or Developmental Coursework

You may be able to take up to 27 hours of remedial or developmental course work and receive financial aid to pay for those costs. These courses will be included in the qualitative and quantitative measurements for SAP. All courses, including failures, incompletes, in progress or drop/withdrawal are counted toward the maximum 27 credit hour limit. Once you have attempted 27 credit hours of remedial or developmental classes, you will not be able to receive additional financial aid to pay for those courses. Enrollment in these courses is indicated by testing or as recommended by an Enrollment Coach.

Financial aid will not pay for the following courses:

- Courses taken by audit.
- Courses taken outside of your degree plan requirements.
- Courses attempted more than two times (except remedial/developmental courses).
- Credits exceeding the 27 maximum credits for developmental courses.
- Courses previously passed, unless that course grade failed the minimum grade requirement for the program of study. In this case, there must be documentation that specifies the minimum course grade required.
- A third attempt to take a previously passed course. Starting July 1, 2011, only two attempts will be approved if a course was previously passed.
- Credit hours earned by placement tests.
- Continuing education courses.
- Courses for which you register after the official census date of the class or for which you begin attendance after the official census date of the class.
- Time frame and/or credit hours in excess of the 150% maximum program limit.
- Courses taken without having a declared eligible program (enrolled as undeclared, undecided or non-degree seeking).

Failure to Meet the Financial Aid Standards of Academic Progress

Warning

The first time that a student fails to meet the qualitative (minimum 2.0 semester or cumulative GPA) or quantitative requirements (minimum 67% of courses completed for the term or cumulatively), the student will be placed on financial aid warning. The only exception is for exceeding maximum hours, which results in immediate suspension. Students on warning status may receive financial aid without completing an appeal.

Failing to meet any one of the SAP measurements during the warning period will place a student on suspension.

Suspension

There are several conditions that may place a student on Financial Aid Suspension. The student is responsible for paying all expenses during any enrollment period(s) while on suspension. Students can be placed on suspension after a warning or probation status.

- Reaching the maximum time frame for the program of study can place a student on suspension.
- A student who fails to meet any of the SAP measurements during a warning period will be placed on Financial Aid Suspension and will lose eligibility for all financial aid until all SAP measurements have been met. It may take several terms of enrollment to regain eligibility.
- A student who is on Financial Aid Probation and fails to meet the Academic or Success Plan measurements will be placed on Financial Aid Suspension.

Other types of Financial Aid Suspension:

Maximum Time Frame

A student who has reached the maximum time frame for their program of study will be placed on a Maximum Time Frame...
status, which is a type of financial aid suspension. The maximum time frame is calculated by multiplying the number of hours required for the program by 1.5.

If the college mathematically determines that you cannot complete your program within the 150% limit, you will immediately be placed on Maximum Time Frame.

Once the 150% limit has been met, you cannot regain satisfactory progress or financial aid eligibility for that program of study.

**Maximum Time Frame Suspension**

A student who has reached the maximum time frame for their program of study and has also failed to comply with another SAP measurement, such as having a term or cumulative GPA below 2.0 or a term or cumulative completion rate below 67%, will be placed on maximum time frame suspension.

**Reinstatement of Financial Aid Eligibility**

If you are on financial aid suspension for reasons other than reaching the maximum time frame, you may have your aid reinstated in one of the following manners:

1. Continue to attend TSTC without financial aid until you are able to achieve both:
   i. A cumulative GPA of 2.0 or higher along with 2.0 GPA for your last term of enrollment.
   ii. A 67% cumulative completion rate along with a 67% completion rate for your last term of enrollment.

   Once you have met both of these standards, you will once again be eligible to receive aid as long as you continue to maintain academic progress. It may require multiple terms for students with an extremely low GPA and or completion rate to regain financial aid eligibility.

2. File a SAP appeal demonstrating mitigating circumstances and be approved.

3. If you have reached the maximum time frame for your program of study (150%), you may not regain eligibility to receive additional financial aid unless a SAP appeal or a Time Frame Extension is granted.

**Appeal Process**

Students who are placed on financial aid suspension, maximum time frame, or maximum time frame suspension may file an appeal based on mitigating circumstances.

Note: Appeals should include supporting documentation.

The student is responsible for any payments and meeting payment deadlines during the appeal process. The student should not miss payment deadlines while waiting for a response. Failure to pay for tuition and fees may result in deregistration. The student is responsible for balances due, if the student withdraws before or after an appeal is denied.

Appeals will only be granted for conditions causing extenuating hardship to the student, such as the death of a family member, illness or injury of the student, or other mitigating circumstances. The appeal should include supporting documentation regarding your mitigating circumstance, such as medical statements, death certificates or other supporting documentation. Appeals for mitigating circumstances will be considered during a student’s enrollment at TSTC on a case-by-case basis. Submitting an appeal does not guarantee approval of the appeal. Sitting out a semester or more does not change the SAP calculation result. Appeals will be reviewed by enrollment coaches and may be appealed to the assistant director of the Enrollment Center, whose decision is final.

A suspension appeal must include the following:
- A completed Satisfactory Academic Progress Appeal Form.
- A written description of the mitigating circumstances.
- Documentation to support any claims.
- A description of the steps you have taken to remedy the situation.
- A Success Plan showing a plan of action you intend to take for academic success.

A maximum time frame appeal must include the following:
- A completed Federal Time Frame Extension form.
A maximum time frame suspension appeal must include the following:

- A completed Satisfactory Academic Progress Appeal form.
- A written description of the mitigating circumstances.
- Documentation to support any claims.
- A degree plan showing the number of hours remaining until graduation.
- A description of the steps you have taken to remedy the situation.
- A Success Plan showing a plan of action you intend to take for academic success.

Once you are notified of not being eligible for financial aid (financial aid suspension), you have five working days to submit an appeal or up to the subsequent semester census date, whichever comes first.

COVID-19

Effective May 11, 2020, circumstances related to an outbreak of COVID-19, including, but not limited to, the illness of a student or family member, compliance with a quarantine period, or the general disruption resulting from such an outbreak may form the basis of a student’s SAP appeal. Documentation for these appeals may consist of the student’s statement except in cases requiring proof of illness of student or family member.

Appeal Decisions

**Maximum Time Frame Appeal Approved**

The student will be placed on an academic plan and their progress will be reviewed at the end of each term. Failure to meet both GPA and completion rate standards will result in suspension from aid.

**Maximum Suspension Appeal Approved**

The student will be placed on an academic plan and their progress will be reviewed at the end of each term. Failure to meet both GPA and completion rate standards will result in suspension from aid.

**Probation**

A student will be placed on probation if it is determined that he or she should be able to reach both the 2.0 term and cumulative GPA and 67% term and cumulative completion rate requirements at the end of the next term of enrollment. If the student fails to meet any of these standards, he or she will be placed on suspension.

**Academic Plan**

A student may be placed on an academic plan under which they are able to achieve a 2.0 GPA by the end of their second year of enrollment so that they will be eligible for graduation. While in this status, a student must be making progress according to an academic plan which dictates that a student must achieve a term GPA of 2.0 or higher and a term completion rate of at least 67% in order to continue to retain aid eligibility. The first term that a student is under an academic plan will be a probationary term. If the student complies with the terms of the academic plan, he or she will be making academic progress and can continue to receive aid as long as they meet the conditions of the plan. Failure to achieve these conditions will result in suspension.

**Appeal Denied**

The student will not be eligible to receive financial aid until he or she meets the SAP standards as listed above and both a cumulative 2.0 GPA and a cumulative completion rate of 67%. It may take several semesters in order for a student to regain aid eligibility.

**Repayment of Federal Funds: Return of Title IV**

If a student receives federal financial aid and stops attending or withdraws from all courses at or before 60% of the term is completed, the student will be required to repay all or a portion of the federal aid received, including aid used to pay for college expenses. If the student received a grade of F in all courses for any term, the student will be required to repay a portion of the federal aid received, based on last date of participation, unless an instructor certifies and documents that the...
student was participating in at least one class after the 60% point of the term or until the end of the term. A term may consist of one or more blocks or modules.

For information on the return of Title IV funds, go to tstc.edu/financialaid/returnoffunds.

16. Managing Student Debt

TSTC, along with other colleges and universities throughout the country, is concerned about student debt and financial literacy. There are many reports and statistics that indicate having high debt affects a student’s enrollment, retention, and graduation. Students can meet with an Advocacy Resource Center Coach for information on financial planning and assistance with budgeting.

Students can learn about financial planning, saving, and investing at www.financialliteracy101.org/financial-literacy.

17. Veteran Benefits

TSTC is approved for training service members, veterans and their eligible dependents under the provisions of various laws commonly called the GI Bill®. The student is responsible for tuition and fees not covered by GI Bill® or the Hazlewood Tuition Exemption. A spouse or child of a veteran may receive benefits under certain conditions. The DD form 214 and all official college, university and military transcripts are required. Veterans who are eligible for assistance under any of the Department of Veterans Affairs programs should contact Veteran Services.

Service members, Veterans and dependents are encouraged to review all benefits at benefits.va.gov/gibill before applying for educational benefits. Texas Veterans and their dependents may be eligible for benefits under the Texas Hazlewood Act. The Texas Hazlewood Act encompasses many different tuition exemptions and/or waivers for eligible Veterans and their dependents. Please visit www.tvc.texas.gov to view all eligibility requirements. Texas Veterans interested in using the Hazlewood Tuition Exemption must submit the proper application and all supporting documentations to the Veterans Services Office.

NOTE: All active-duty, reservist or National Guard Service members are encouraged to speak with their educational service officer (ESO) or counselor within their military service prior to enrolling at TSTC.

No Show Status

Veterans/Dependents reported as a No Show will have their enrollment certification interrupted and may impact the student’s VA education benefits. Overpayment due to a No Show Status is the Veteran’s responsibility, and money may be owed to TSTC and/or VA Education Department.

Enrollment Certification

Only classes that earn credit toward the Veteran’s VA approved signed degree plan will be certified to VA. Veterans will not be certified for repeat courses that are considered completed. It is the Veteran’s responsibility to meet with their enrollment coach and register for the required classes. You may request a printout of your program evaluation from your program advisor, Veteran Services or print the Program Evaluation that is available in the TSTC Portal.

Pending Payment Compliance

In accordance with Title 38 US Code 3679(e), Texas State Technical College adopts the following additional provisions for any student using U.S. Department of Veterans Affairs (VA) Post-9/11 G.I. Bill® (Ch. 33) or Vocational Rehabilitation & Employment (Ch. 31) benefits, while payment to the institution is pending from VA. Texas State Technical College will not:

- Prevent the student’s enrollment.
- Assess a late penalty fee to the student.
- Require the student to secure alternative or additional funding.
- Deny the student access to any resources (access to classes, libraries, or other institutional facilities) available to other students who have satisfied their tuition and fee bills to the institution.

However, to qualify for this provision, such students may be required to:

- Produce the VA Certificate of Eligibility (COE) by the first day of class.
- Provide a written request to be certified.
- Provide additional information needed to properly certify the enrollment as described in other institutional policies.

18. Textbooks and Supplies
The Campus Store offers a wide selection of books, technology tools, and supplies required for classes and labs. Visit your Campus Store to buy new and used books or to sell back your textbooks at the end of the semester.

07. First Steps at TSTC

01. Advising

Texas State Technical College recognizes advisement as an essential contributor to the educational experience, student learning, and student success. TSTC provides strong institutional support and has developed a comprehensive advisement program to support student success. In support of student success, advisement services are designed to guide students through the various levels of the college experience to enable them to realize their personal, career, and educational goals, as well as prepare them for lifelong learning. Advisement services are available to all degree and non-degree-seeking prospective and current students.

TSTC students are responsible for:
- seeking advisement;
- understanding assessments and Texas Success Initiative (TSI) requirements for their program of study;
- enrolling in courses in the appropriate sequence to ensure progress and success toward their educational objectives; and
- understanding and adhering to all policies and procedures.

Each TSTC campus provides faculty program advisors and Enrollment Coaches to assist with TSI advisement.

New Student Advising

During the admissions process an Enrollment Center staff member acts as a guide for new students to make sure all admissions requirements are met. All new students are encouraged to contact an enrollment coach to begin the advising process prior to or upon completing the admissions requirements.

Faculty Program Advisor

Program advisement will continue throughout the student’s enrollment. All students are assigned a faculty program advisor based on their major and an enrollment coach. Students are responsible for scheduling an appointment with a faculty program advisor, prior to registering for the subsequent semester. Faculty program advisors or enrollment coaches will inform students of any restrictions that may prevent them from registering. It is the student’s responsibility to clear all restrictions.

Faculty program advisors can assist with:
- Program admission requirements, if applicable.
- Degree and certificate completion, program changes.
- Licenses or certification for job placement.
- TSI compliance, as needed.
- Program completion time, course transfer, and substitutions.
- Time commitment to lecture and lab.
- Opportunities for career assessment and advisement.
- First Year seminar (TSTC 1101/TSTC 1102) requirement.
- Maintaining academic and Financial Aid Standards of Progress.
- Departmental participation policy.
- Dropping/adding class(es) or withdrawing from the College.
- Job placement, gainful employment information, and job market expectations.
- Applying for graduation.

Students will meet with the program advisor each semester to make sure that the student is meeting all of the requirements to successfully graduate from the program.

Enrollment Center

Current/Returning Student Advising
Enrollment coaches in the Enrollment Center assist in the retention and advising of current and returning students.
02. Testing Center

The Testing Centers offer placement exams (TSI Assessment 2.0, CLEP), admission exams (TEAS, HESI), accommodated proctored exams, and professional certification and licensure exams.

Hours of Operation

Please contact a Testing Center near you for test dates and times. Hours are subject to change and appointments are required. Walk-ins may be accommodated depending on seat availability and office hours.

Testing Center Policies

Acts of misconduct or academic dishonesty will be reported. Students will be continuously monitored by video surveillance, walkthroughs, and/or the observation windows during testing. For more information on the policies, visit the Testing Center webpage.

Testing Accommodation

To arrange a disability accommodation, please contact Access & Learning Accommodations adarequest@tstc.edu at least two weeks before your test date. Late requests will be considered but cannot be guaranteed.

TSI Assessment 2.0 (TSIA2)

The TSIA2 is designed to help higher education institutions determine if students are ready for college-level coursework in the general areas of English Language Arts and Reading (ELAR) and Mathematics. An Enrollment Coach will help you determine whether you need to take the assessment. Before you take the TSIA2, you must participate in a mandatory Pre-Assessment Activity (PAA) unless you have already completed a PAA at TSTC or another institution. The PAA provides practice test questions, developmental education options, and available campus and community resources.

College-Level Examination Program (CLEP)

The CLEP tests allow you to move ahead in your coursework based on your previous knowledge. The tests cover a variety of subject areas including business, science and mathematics, history and social sciences, foreign languages, and composition and literature. The CLEP exam is currently offered at our Abilene, Harlingen, and Waco locations. Eligible DANTES funded test takers attempting a CLEP test for the first time will have their exam fee funded by DANTES and the administration fee waived.

TSTC awards course credit for the following CLEP Subject Exams providing the minimum score has been obtained on the specific test. TSTC does not award credit for the CLEP General Exams. CLEP Scores are valid for 10 years from the test date.

Additional Testing

The Testing Centers offer additional testing services to assist students and the community in assessing their knowledge and skills. Not all tests are available at each Testing Center. For a complete list of assessments and tests please visit the Testing Center web page.

03. New Student Orientation

After the registration process, students receive information on the New Student Orientation (NSO) schedule for in-person sections or an online option. New Student Orientation is a great way to begin your TSTC journey. You will be introduced to campus resources and learn how to get involved with campus activities. For NSO details click here.

04. First Year Seminar Courses (TSTC 1101 and TSTC 1102)
All current TSTC students and all transfer students with fewer than 24 Semester Credit Hours (SCH) are required to take a first year seminar course, TSTC 1101 or TSTC 1102. The course catalog degree plans identify which degrees and certificates require TSTC 1101 and which require TSTC 1102. These one-credit-hour, student-success courses will present students with the essential knowledge to accomplish their goals at TSTC. The First Year Seminar course is the most important class a student will take at the college and provides a strong foundation for a student's academic and professional career by focusing on student development, utilizing campus resources and building lifelong learning skills for academic and workplace success.

Students with less than 24 credit hours earned must enroll in the First Year Seminar (TSTC 1101 or TSTC 1102) course required for their program. Only one successfully completed TSTC 1101 or TSTC 1102 is required.

Dual enrollment students are exempt from taking the First Year Seminar course. Students who intend to attend TSTC for one semester only may request a one-time exemption from the First Year Seminar course from the Office of Student Learning.

Transfer students who have successfully completed more than 24 credit hours may be exempted from taking a required First Year Seminar course. All students are responsible for providing official transcripts to the Enrollment Center to receive the exemption. Transcripts should be received no later than one week prior to the start of the semester. Students are responsible for updating their schedules after providing transcripts that show 24 or more hours of successfully completed credit or after an exemption has been approved.

The following programs require TSTC 1102:

- Architectural Design and Engineering Graphics Technology
- Architectural/Civil Drafting Technology
- Auto Collision and Management Technology
- Automotive Technology
- Biomedical Equipment Technology
- Building Construction Technology
- Business Management Technology
- Chemical Dependency Counseling
- Computer Networking and Systems Administration
- Computer Programming Technology
- Culinary Arts
- Cybersecurity
- Diesel Equipment Technology
- Digital Media Design
- Electromechanical Technology
- Engineering Graphics and Design Technology
- Health Information Technology
- HVAC Technology
- Industrial Systems
- Medical Imaging Systems Technology
- Occupational Safety and Environmental Compliance Technology
- Plumbing and Pipefitting Technology
- Solar Energy Technology
- Visual Communication Technology
- Web Design and Development
- Wind Energy Technology

05. Nontraditional Services

Nontraditional occupations for females and males are defined as “a field in which either gender comprises less than 25 percent of the current enrollment.” Each TSTC campus provides services to assist qualifying students that are enrolled full-time in a declared nontraditional program of study leading to an associate degree, certificate or occupational skills award.

For more information on services provided to nontraditional students, please consult the following individuals:

East Williamson County
Campus Enrollment Executive
512-759-5907
Services are funded through the Carl D. Perkins Vocational & Applied Technology Act and are contingent upon the availability of funds during the pertinent semester and the adherence to program policies.

**06. Student Identification Cards**

All new college credit students are required to obtain TSTC identification (ID) cards when they register. ID cards are optional for students in Workforce Training & Continuing Education, depending on the course or program.

Students should carry these cards at all times. They must be presented for various purposes, such as cashing checks, paying fees, checking out library books, or as requested by authorized officials. Misuse of ID cards may result in disciplinary action.

**08. Scholastic Information**

**01. Academic Integrity**

TSTC expects all students to engage in scholastic pursuits in a manner that is beyond reproach. Students are expected to maintain complete honesty and integrity. Any student found guilty of academic dishonesty is subject to disciplinary action. Academic dishonesty includes, but is not limited to, cheating on academic work, plagiarism and collusion.

**Cheating:** Activity that includes, but is not limited to:

- Copying from another student’s assignment, test or other academic work.
- Possessing material, such as class notes or textbooks, during a test that is not authorized by the instructor of record.
- Collaborating, without authority, or seeking aid from another student during an examination or assignment, or in preparing academic work.
- Using, buying, selling, stealing, transporting or soliciting, in whole or in part, the contents of an unadministered test, test key, homework solution or computer program.
- Substituting for another student or permitting another student to substitute for oneself to take a test or prepare other academic work.
- Paying, offering money or other valuables, or coercing another person to obtain an unadministered test, test key, homework solution or computer program, or to obtain information about an unadministered test, test key, homework solution or computer program.
- Falsifying laboratory reports and/or other academic work offered for credit.
Taking, keeping, misplacing or damaging property of the college, or of another individual student, if the student knows or reasonably should know that an unfair academic advantage would be gained by such conduct.
Willfully failing to comply with instructions given by a person administering a test.
Discussing, without express permission from the instructor of record, the contents of an examination with another student who will take the examination.
Divulging the contents of an examination for the purpose of preserving questions for use by another when the instructor has designated that the examination is not to be removed from the examination room or not to be returned to the student.
Misrepresenting facts, including providing false grades or resumes, for the purpose of obtaining academic or financial benefit or for the purpose of injuring another student academically or financially.

**Plagiarism** means claiming another’s work as one’s own without acknowledging its origin and doing so for credit.

**Collusion** means unauthorized collaboration with another person in preparing a written work offered for credit.

For more information and procedures regarding a violation, see the [Code of Student Conduct](#), Section J, Violations of Academic Integrity.

### 02. Credentials

TSTC offers programs of study leading to stackable credentials. Students may earn an Occupational Skills Award (OSA), Level 1 Certificates, Level 2 Certificates, Core Curriculum Completer institutional certificate (CCC), Associate of Applied Science degrees (AAS), Associate of Science (AS) degrees, or Advanced Technical Certificates (ATC). High school students, who attend participating partnering high schools, may participate and complete dual enrollment pathways, while enrolled in high school. All programs are approved by the Texas Higher Education Coordinating Board.

**Associate of Science Degree** programs are designed specifically for students who reside in the Rio Grande Valley and are planning to pursue a bachelor's degree in the areas of biology, computer science, engineering, mathematics and/or physics who reside in the Rio Grande Valley. Programs may include the institution's approved academic core curriculum and prerequisites for a seamless transition into a baccalaureate program. Associate degree programs must incorporate TSTC's approved core curriculum unless an exemption exists. Exemptions, defined by the Texas Higher Education Coordinating Board, to offer specialized academic associate degrees are maintained by the Curriculum Department. Graduates of these programs will receive an Associate of Science degree. TSTC Harlingen participates in the Texas Common Course Numbering System ([TCCNS](#)) to facilitate transfer work for freshman and sophomore level general academic coursework. ([AS curriculum contains 60 Semester Credit Hours (SCH)]

**Associate of Applied Science Degree** programs are designed to train technicians who work with professionals. The AAS is awarded for technical programs of study. These programs prepare technicians who are in demand in today's industry to work on a level between engineers and skilled craftsmen. Because technicians must be able to understand the profession and translate ideas into actual processes, the technical programs combine theory and laboratory classes with laboratory and shop experience. All graduates of associate degree programs must show they are competent in communication and the use of computers by satisfactorily completing at least one course in which communication and basic computer skills are covered. Graduates of these programs receive Associate of Applied Science degrees. ([AAS curriculum contains 60 SCH, other than Dental Hygiene AAS 68 SCH]

**Advanced Technical Certificate** programs are comprised of 16-45 semester credit hours. A student must have an associate degree, baccalaureate degree, or junior status in a baccalaureate degree program.

**Certificate of Completion** awards are offered for skill development programs. These programs are designed to produce the skilled workers needed by modern industry. Skill programs emphasize laboratory and shop experience rather than theory. Certificate programs teach students specific skills for entry-level careers. All graduates of certificate programs show that they are competent in oral communication and the use of computers by satisfactorily completing at least one course in which oral communications and basic computer skills are covered. Graduates of these programs receive certificates of completion.

**Certificate 3** certificates include Enhanced Skills and Occupational Skills Certificates, generally 9-15 SCH.

**Certificate 2** programs are comprised of a minimum of 30 SCH and a maximum of 51 SCH.
Certificate programs are comprised of at least 15 SCH and a maximum of 42 SCH.

Core Curriculum Completer Certificate is awarded upon satisfactory completion of all elements and courses in the TSTC approved 42 SCH Core Curriculum.

Occupational Skills Award is a sequence of courses that meet the minimum standard for a program length specified by the Texas Workforce Commission for the Federal Workforce Innovation and Opportunity Act (WIOA) program. These short-term, skills-focused courses provide students with the basic technical skills needed to start an entry-level career. OSA awards consist of 9-14 SCH for credit courses and 144-359 contact hours for workforce continuing education courses.

03. Degree and Certificate Plans

A degree or certificate plan includes a set of courses that are required to earn a specific degree or certificate. Electives are approved by the student’s faculty advisor and indicated in the plan. Course credit may be earned at TSTC, transferred from another college or university or awarded through examination.

Courses may be substituted if they are approved by the department designee or subject matter expert. No condition guarantees that a course substitution will be approved. Each request is decided on its own merit.

Transfer credit shall be processed by the Office of the Registrar using the Texas Common Course Numbering System (TCCNS) Transfer Guide for courses offered at state institutions. Transfer coursework must be assigned a grade of “D” or better. Grades lower than a “C” shall not be accepted for transfer toward major or major-related courses in the student’s program. Credits earned at other colleges and universities must be approved for transfer credit by the subject matter expert in the student’s major field of study. Credit for courses in related areas may also require approval from the subject matter expert of that program area.

A student is certified for graduation only when credit has been earned for all courses in the degree or certificate plan and any appropriate course substitution and/or transfer credit authorizations are on file. Although advisors are available to assist them, students are responsible for keeping track of their progress toward meeting program requirements. Contact the Enrollment Coach for assistance.

Additional Degrees and Certificates

Credit hours may be applied toward more than one degree and/or certificate, as long as those hours meet requirements of those credentials.

04. Change of Major

A student may change majors only between terms or prior to the 11th class day of a 15-week semester, the fifth class day of a 12-week semester, or the fourth class day of a 6-week session. Students who wish to change programs should meet with an enrollment coach or a program advisor. Students must meet the entry requirements if specified. Students receiving financial aid should meet with the Enrollment Center before changing their major.

To change majors, students must follow these procedures.

1. Complete the change of major form, including obtaining all required signatures. Students may be required to meet additional admission criteria for the new major.
2. Return the completed form to the enrollment coach for processing.

05. Institutional Awards

TSTC offers technical training in defined skill sets which can be grouped in various combinations to meet specific job requirements for business or industry. These pathways are designed to allow students and/or incumbent workers to enter, exit and re-enter TSTC training while they continue to work or pursue further training.

Credits earned in these pathways may be applied to a college credit for an Occupations Skills Award, Certificate of Completion and/or Associate of Applied Science degree. TSTC also offers Associate of Science Degree’s at the Harlingen location only.
06. Course Load

Students in good standing may register for course loads equivalent to those specified in their instructional programs.

Students may register for less than normal loads but must register for a minimum of 12 credits to be considered full-time. Students who are making unsatisfactory progress or carrying excessive outside work may be required by department chairs or faculty advisors to register for less than normal loads.

Students may register for up to 18 credits with the approval of the faculty advisor. Enrollment for more than 18 credits requires approval of the appropriate department designee.

07. Classification

Students are classified as freshmen if they have earned less than 30 hours of college credit. They are classified as sophomores if they have earned 30 to 72 hours of college credit.

08. Grading Standards

TSTC measures student achievement of skills, knowledge and competencies through a system of grading standards. Four grades (A, B, C, D) indicate that credit was received and a grade was awarded. One mark (CR) indicates that credit was received but no grade was awarded. One grade (F) and various other marks indicate that no credit was received and no grade points were awarded.

The following system of final grades and marks applies to courses offered in a traditional format. Grades or marks are used by TSTC to report student performance for each course attempted and/or credited toward graduation.

Traditional Grading Standards

Note: Grading standards listed below do not apply to Performance-Based Education (PBE).

NC: Not Calculated
Note: Students who have transcribed courses from a traditional program and move into a PBE program will receive credit for their previously transcribed courses. Grades Received in the original course(s) will transfer into the PBE program as determined by the program administrator.

Notification of Grades

Students are expected to monitor their academic progress. Student grades are available upon course completion and students can view grades by accessing WebAdvisor. Students should review the grade reports for accuracy. All requests for review or correction must be submitted to the enrollment coach within 12 months of the close of the semester in which the course was taken.

Grade Changes

Student grades are among the most important records kept by the College. Policies and procedures ensure the privacy and integrity of student grade records and, at the same time, provide students a process to appeal final course grade decisions.

The following policies and procedures must be followed to request a grade change.

- A grade change must be requested within 12 months of the issuance of a grade.
- A grade may be changed due to an error, a student completing course work previously graded “IP” (In Progress), or a fact-supported finding by appropriate members of the administration or appeal committee operating in accordance with established college procedures.
- A grade cannot be changed to a “W” (Withdrawal) unless doing so is in conjunction with an administrative drop or withdrawal from the College that is approved in accordance with college procedures.
- A change of grade form must be completed, noting the reason for the grade change and signed by the student’s instructor, appropriate department designee and the Office of the Registrar.
- Upon receipt of the completed and signed grade change form, the Office of the Registrar makes the official change to a student’s transcript record.
- A copy of the change of grade form is placed in the student’s permanent file for audit purposes.

09. Grade Point Averages

Grade points earned for each course are determined by multiplying the number of points for each grade by the number of credit hours the course carries. For example, a student who takes a three-hour course and earns an “A” accumulates 12 grade points for that course (3 hours X 4 points for an A = 12 points). A student’s grade point average is computed by adding the grade point values for all college-level courses for which grade point values may be computed (A, B, C, D, F, FA, U, WF), and dividing this total by the number of credit hours attempted during the same period. Only hours for which grades are awarded are used in calculating the grade point average (GPA).

Term Grade Point Average

The Term GPA is computed for all TSTC college-level courses with grades of A, B, C, D and F recorded during a specific term. Developmental education courses are excluded from the Term GPA calculation.

Cumulative Grade Point Average

The Cumulative GPA is computed for all TSTC college-level courses using all grades and grade points earned since enrolling at TSTC. Developmental education courses are excluded from the Cumulative GPA calculation. The Cumulative GPA is used to qualify students for graduation and for graduation honors.

Standards of Progress Grade Point Average

A Term and Cumulative Standards of Progress GPA is computed using all TSTC college-level and developmental education courses. The Standards of Progress GPAs are used for determining scholastic standing, term scholastic honors and financial aid eligibility. See “Financial Aid Standards of Academic Progress” in the Financial Aid section for more information.

10. Scholastic Standing

TSTC’s scholastic standards are based on a philosophy of advancing student progress toward successful course and program completion. The criteria for scholastic standing are designed to monitor student progress so that faculty and staff can intervene and assist students who have difficulty meeting minimum requirements. Scholastic standing is computed at the end of each enrollment period and is based on the Standards of Progress (SOP) Term and Cumulative GPAs.
Good Standing
A student who maintains minimum 2.00 standards of progress cumulative and term grade point averages will be in good academic standing.

Scholastic Probation
A student whose standards of progress cumulative and or term grade point average is below 2.00 at the end of an enrollment period is placed on scholastic probation. A student may continue on scholastic probation by achieving a minimum standard of progress term grade point average of 2.00 at the end of the enrollment period. A student is removed from scholastic probation when the standards of progress cumulative and term grade point averages are 2.00 or higher.

Scholastic probation is a serious warning that the quality of the student’s work must improve in order for the student to continue enrollment in the College. Students on scholastic probation are required to meet with a program advisor or enrollment coach prior to registration and may be required to enroll in special programs or courses in order to improve grade point average. After meeting with a program advisor or enrollment coach prior, the student may be permitted to enroll in a new program while on scholastic probation.

Scholastic Suspension
A student on scholastic probation who fails to achieve a Standards of Progress Term GPA of 2.00 or higher may be suspended for a time period designated by the College (a minimum of one semester). A suspended student may obtain an application for a waiver of a suspension from a designated the Helping a TSTC Student Succeed (HATSS) representative and file it on each local campus. At the end of the suspension period, the student shall be permitted to reapply for admission. A student who re-enters the College after having been suspended shall be placed on scholastic probation status and shall be subject to the minimum requirements governing scholastic probation.

11. Scholastic Honors

Term Scholastic Honors
Full-time students as of the end of term who earn a standards of progress term grade point average of 3.50-3.99 shall be recognized with the notation of Scholastic Excellence on the official transcript.

Full-time students as of the end of term who earn a standards of progress term grade point average of 4.00 shall be recognized with the notation of Chancellor’s Honor Roll on the official transcript.

Graduation Scholastic Honors
Graduation honors will be awarded to students who graduate with an Associates or Certificate credit based program based on the following cumulative grade point averages:
Board of Regents Honors: 4.00
With Honors: 3.50-3.99

Graduation honors will be listed on the official transcript.

12. Transcript of Credit
The transcript of credit is an official statement of the student’s complete academic record accumulated at TSTC. Upon a written or Web request to any TSTC campus, the Enrollment Center will release official transcripts to the student or to a third-party that is authorized by the student to receive the transcript. Normally, the minimum time for processing such requests is 24 hours; however, transcripts requested at the end of a term or during holidays may take longer for processing.

Students who request transcripts prior to the end of a term, with current courses and grades to be included in the transcripts, must clearly note the current work as part of the request. Official transcripts may be withheld due to any financial debt, pending disciplinary process or if official transcripts have not been received from previously attended institutions. Students who have not complied with all exit requirements will not be provided with transcripts.

13. Repeat Courses
It is the policy of Texas State Technical College to allow students to repeat a course only when the initial grade earned was below a grade of "A."
When a student repeats a course in which the grade earned was below an "A," the first grade earned will not be calculated into the cumulative grade point average. The last grade issued (regardless of whether higher or lower than the first grade) will be calculated into the cumulative grade point average. See SOS ES 4.15 - Repeat Courses and GPA Calculation

09. Graduation and Commencement

01. Graduation Requirements

Within five years of initial enrollment in credit courses at Texas State Technical College, a student may graduate with a degree or certificate according to the catalog requirements in effect at the time of first enrollment at Texas State Technical College provided the degree, certificate, the program and requisite courses are still being offered.

If a student fails to complete within five years all requirements of the catalog in effect at the time of initial enrollment, the student will be required to graduate under a catalog not older than five years.

Exception to this requirement may be approved in extenuating circumstances by the campus academic officer.

02. Graduation Procedures

The registrar or designee will certify that the student has met graduation criteria and requirements.

Students are notified of their eligibility for graduation when they achieve the following requirements for the applicable degree or certificate:

1. All required coursework is satisfactorily completed.
2. At least 25% of the total required credit hours for the program earned at TSTC.
3. The student’s cumulative grade point average is 2.0 or higher.
4. Grading requirements:
   a. Course taught in traditional format: The student’s grades in all major courses are C or better. Courses with a grade of "Pass" may be counted in satisfaction of degree requirements. This minimum grade requirement may vary for some TSTC health-related programs.
   b. Course taught in PBE format: The student's grades in all major courses are B or better.
      Note: Students who have transcripted courses from a traditional program and move into a PBE course will receive credit for their previous transcripted course, if applicable, as determined by the program administrator.
5. All transfer credits accepted by TSTC and applied to the degree or certificate have been credited according to approved procedures for evaluation and award of credit.
      Note: All transfer credits are evaluated by the Office of the Registrar using the Texas Common Course Numbering System (TCCNS) Transfer Guide for courses offered at state institutions. Courses that are not listed in the TCCNS, that are from an out-of-state institution or that are from a foreign institution shall be forwarded to the appropriate department/subject-matter experts for further review and approval. Students shall be responsible for providing the necessary documentation about the transfer course(s). In the case of a transfer credit dispute or appeal, the senior vice president of Student Learning (SVPSL) or designee who oversees the department in which the course is taught shall have final authority for awarding transfer credit. See SOS ES 3.12 Transfer and Substitution of Credit for additional information.
6. The student has no pending disciplinary issues as defined in the TSTC Catalog and Student Handbook.

Note: Settlement of all financial obligations to TSTC must be made prior to graduation. If any business is pending with TSTC by commencement, TSTC withholds the official TSTC transcript until clearance approval.

03. Graduation Honors

Students receiving associate degrees or certificates of completion who earn Cumulative GPAs of 4.0 receive TSTC Board of Regents’ Honors.
Students receiving associate degrees or certificates of completion who earn Cumulative GPAs of 3.50 to 3.99 receive Honors.

04. Commencement Ceremonies

Participation is voluntary; however, candidates for graduation are encouraged to celebrate their accomplishments by participating in commencement ceremonies. Students not planning to attend the commencement ceremony may pick up their diplomas, covers, cords and/or Board of Regent medallions at the Enrollment Center once certification of degrees has been completed. There is also an option to have their graduation items mailed to them at the address in the College's administrative database after certification.

Candidates for graduation participating in the commencement ceremony must wear only TSTC designated regalia (cap, gown, tassel) which may be purchased at the TSTC Campus Store.

Students requiring accommodations for commencement will need to make arrangements with Access and Learning Accommodations prior to the ceremony.

05. Diploma Reprint Request

Students must complete the diploma reorder form and submit for processing to the Office of the Registrar at registrars@tstc.edu for processing.

06. Graduate Guarantee

If an associate degree or certificate of completion graduate, or marketable skills achievement award completer is judged by his/her employer to be lacking in technical job skills identified as exit competencies for the program under which the student graduated or completed, TSTC will provide the graduate with up to 9 tuition-free semester credit hours of additional skill training, in accordance with the following.

1. The graduate must have earned the degree, certificate or award in a technical or occupational program or pathway published in the TSTC catalog.

2. The graduate must have earned at least 75 percent of the total credits of the associate degree or certificate of completion at TSTC, and must have completed the degree or certificate of completion within five years of initial enrollment.

3. The graduate must be employed full-time in an area directly related to the program concentration, as certified by the Chief Academic Officer or designee.

4. The employment must have commenced within 12 months of graduation or completion.

5. The Graduate Guarantee process must be initiated in writing to the TSTC Office of the Chancellor and CEO, by either the graduate or the employer.

6. The employer must certify in writing that the employee is lacking entry-level skills identified by TSTC as program exit competencies and must specify the areas of deficiency within 90 days of the graduate’s initial employment.

7. The employer, the graduate, career counselor and appropriate chairperson will develop a written educational plan for retraining.

8. Retraining will be limited to 9 semester credit hours related to the identified skill deficiency and to those classes regularly scheduled during the period covered by the retraining plan.

9. All retraining must be completed within one calendar year from the time the educational plan is agreed upon.

10. The graduate and/or employer will be responsible for the cost of books, insurance, uniforms, fees and/or other
11. The guarantee does not imply that the graduate will pass any licensing or qualifying examination for a particular career.

A student’s sole remedy against TSTC and its employees for skill deficiencies shall be limited to 9 semester credit hours of tuition-free education, as described above.

07. The TSTC Foundation Alumni Network

The TSTC Foundation Alumni Network serves and supports Texas State Technical College, its students and alumni. Through the Alumni Network, students and alumni can connect with job opportunities (hireTSTC) and job fairs.

Being a part of the Alumni Network comes at no cost and gives alumni access to the following benefits:

- The TSTC Foundation Alumni Job Network.
- The hireTSTC job portal, including job alerts, interview tips and invitations to upcoming job fairs.
- Semesterly e-newsletters.

More than 67,000 alumni are already part of The TSTC Foundation Alumni Network. Sign up today by visiting our website at tstc.edu/alumni, or contact us at tstc.alumni@tstc.edu or 254-867-3980.

10. Academic Planning

01. Areas of Study

With more than 40 programs in a wide range of industries, we’ve got the high-demand skills training for the career you want.

- Academics
- Allied Health
- Arts & Design
- Aviation
- Business & Professional Office
- Computer & Information Technology
- Construction & Maintenance
- Engineering & Manufacturing
- Environmental & Safety
- Hospitality
- Transportation

02. Degree & Certificate Options

Associate of Science

The Associate of Science degree is specifically designed for the benefit of students transferring to a four-year university. TSTC offers this degree in the areas of biology, computer science, engineering, math and physics.

Associate of Applied Science

Technical programs of study offered at TSTC award the Associate of Applied Science degree. These programs prepare technicians who are in demand in today’s industry to work on a level between engineers and skilled craftsmen.

Certificates of Completion

Skill development programs offered at TSTC award certificates of completion. These programs are designed to teach
students specific skills needed for entry-level jobs. This is accomplished through specialized training in the particular skills area.

**Advanced Technical Certificate**
An advanced technical certificate is generally designed for individuals who have already completed a two-year Associate of Applied Science degree and are seeking advanced, specialized preparation in a particular career to supplement their degree.

**Occupational Skills Award**
TSTC offers an occupational skills award. These short-term, skills-focused courses provide students with the basic technical skills needed to start an entry-level career.

**Core Curriculum Completion Certificate**
A core curriculum completion certificate is awarded to all students completing the TSTC general education core. The state of Texas guarantees acceptance by a public four-year university of any complete general education core transferred from any other Texas public college.

**03. Money-Back Guarantee**
TSTC's Money-Back Guarantee (MBG) program reinforces our commitment to prepare and place highly skilled, technically competent students in the workforce.

**Programs eligible for the MBG program include:**
- Diesel Equipment (Heavy Truck, John Deere Construction & Forestry, and Off-Highway)
- Electrical Lineworker
- Electrical Power & Controls
- Industrial Systems
- Instrumentation
- Precision Machining
- Process Operations
- Robotics
- Welding

**Enroll in the Program**
Students are eligible to enroll if they are in their first semester at TSTC, in an MBG-approved program working toward their Certificate or Associate of Applied Science degree (AAS), and eligible to work in the U.S. Go to the Career Services office to enroll during the first semester of the program.

**Refund Amount**
Only tuition dollars paid out of pocket are eligible. If a student used any student loans, TSTC will reimburse the student’s lending agency.

**04. Course Information**

**Developmental Education Courses**
TSTC provides courses and learning activities for students who need assistance with basic academic skills. Developmental education courses are not counted as credit toward graduation, but rather are used along with credit courses for determining course load and satisfactory academic progress for financial aid.

**General Education Courses**
Associate of Applied Science (AAS) degree programs must contain a basic core of general education courses. This basic core must contain a minimum of 15 semester credit hours and include at least one course from each of the following areas:
Humanities/Fine Arts, Social/Behavioral Sciences and Natural Sciences/Mathematics. In addition, TSTC requires all AAS programs to include one course from the Communication/Writing component. Specific core course requirements are included within each associate degree plan.

Associate of Science degree programs must incorporate the college’s approved core curriculum unless an exemption exists. A list of exemptions defined by the Texas Higher Education Coordinating Board to offer specialized academic associate degrees is maintained by the Curriculum Department.

General education is an integral component of a degree program through which students encounter the basic content and methodology of the principal areas of knowledge: humanities and fine arts, social and behavioral sciences, and math and natural sciences. Courses in each of these specific areas introduce a breadth of knowledge and reinforce cognitive skills and effective learning opportunities for students. Such general education courses do not focus on skills, techniques and procedures specific to a student's occupation or profession.

**Purpose**

The general education courses are basic to the purpose of TSTC and represent a commitment to offer breadth as well as depth to a student’s technical education program of study. TSTC’s inventory of general education courses offers a comprehensive general education program because:

1. Employers are interested in hiring technically trained graduates who, with an appropriate grounding in science (natural, behavioral and social), mathematics, and technology, can communicate effectively, work well with others, make appropriate decisions, adapt to change, and in many cases, continue their education.
2. The general education courses provide foundational and thorough education that do not focus on specific skills, techniques, procedures or vocations.
3. General education courses assist in developing the ability to think critically, use logical reasoning in analyzing and solving problems, and appreciate cultural diversity.
4. Many of our students need assistance in becoming prepared for college studies in the technical and general education components of their studies.
5. The general education courses are required to meet accreditation standards of regional, state and occupational groups requiring a broad range of knowledge when obtaining a degree or certification, and they fulfill the requirements agreed upon in articulation agreements with other colleges and universities.

The general education departments strive to deliver courses that impart common knowledge, intellectual concepts and attitudes every person should have for career and life roles in addition to providing some of the basic competencies needed by technical students. General education departments seek to provide students in:

- Degree programs with instruction in knowledge and skills designed to impart common knowledge, intellectual concepts and appropriate attitudes for work and life. These courses assist the student’s participation in social, technological and cultural environments. These courses contain college-level content in areas of communication, social and behavioral sciences, humanities, mathematics, and natural science. Their common course numbers are recognized by the Texas Higher Education Coordinating Board in the Lower Division Academic Course Guide Manual and meet all requirements for transfer to other accredited colleges and universities.
- Certificate programs with instruction in knowledge, skills and attitudes appropriate for and in support of the technical programs of study. These college-level courses are in the areas of communications, human relations, mathematics, natural science, social and behavioral sciences, business and humanities. These related studies courses in the certificate programs have numbers from the Workforce Education Course Manual as recognized by the Texas Higher Education Coordinating Board and typically are transferable for courses in occupational programs of study at other colleges or as part of an articulation agreement with another college. Additional courses come from the Lower Division Academic Course Guide Manual and meet all requirements for transfer to other accredited colleges and universities.
- Developmental education provides courses that strengthen academic skills, teach positive study habits, develop basic skill competencies necessary for major program success, and allow students to explore career options of the college’s major programs. These courses seek to make students better prepared to complete their studies in their major programs of study. Finally, these courses support skills that must be acquired for students to successfully meet the requirements of TSTC’s Texas Success Initiative.

**Humanities Electives**

Credits for humanities and fine arts electives are based upon the definition of the Shared Vision Task Force of the National Council for Occupational Education and the Community College Humanities Association:

“Humanities in associate degree occupational programs are studies which expand the student’s awareness of the human condition and appreciation of human needs, values and achievements. The humanities assist in developing insights,
2022-2023 Catalog & Student Handbook

capacities and well-reasoned convictions essential for a fulfilled public and private life, as well as a success in a career. They include studies of literature and all languages, history, philosophy and religion, and the history and appreciation of the fine arts. They do not include the development of basic communication skills in any human language."

Provided is a list of general education courses by category, and minimum hours per category, that will satisfy the 15 semester hour basic core requirement for any TSTC AAS degrees. These courses are taught by TSTC General Education Academic departments.

**Humanities/Fine Arts: (choose 3 hrs.=one course)**
- ARTS 1301 Art Appreciation
- ENGL 2321 British Literature
- ENGL 2326 American Literature
- ENGL 2331 World Literature
- ENGL 2341 Forms of Literature
- HUMA 1301 Introduction to Humanities
- HUMA 2323 World Cultures
- MUSI 1306 Music Appreciation
- PHIL 1304 Introduction to World Religions
- PHIL 2306 Introduction to Ethics

**Behavioral/Social Sciences: (choose 3 hrs.=one course)**
- ECON 2301 Principles of Macroeconomics
- ECON 2302 Principles of Microeconomics
- GOVT 2305 Federal Government
- GOVT 2306 Texas Government
- HIST 1301 United States History I
- HIST 1302 United States History II
- PSYC 2301 General Psychology
- PSYC 2314 Lifespan Growth & Development
- SOCI 1301 Introductory Sociology

**Math/Natural Sciences: (choose 3 hrs.=one course)**
- BIOL 1306 Biology for Science Majors I
- BIOL 1307 Biology for Science Majors II
- BIOL 1308 Biology for Non-Science Majors I
- BIOL 1309 Biology for Non-Science Majors II
- BIOL 2301 Anatomy & Physiology I
- BIOL 2302 Anatomy & Physiology II
- CHEM 1305 Introductory Chemistry I
- CHEM 1311 General Chemistry I
- CHEM 1312 General Chemistry II
- MATH 1314 College Algebra
- MATH 1316 Plane Trigonometry
- MATH 1332 Contemporary Mathematics
- MATH 1342 Elementary Statistics
- PHYS 1315 Physical Science I
- PHYS 1317 Physical Science II

**Communication/Writing: (choose 3 hrs.=one course)**
- ENGL 1301 Composition I
- ENGL 2311 Technical & Business Writing

**General Education Electives: (choose 3 hrs.=one course. Choose a course that is not used to satisfy any of the above categories.)**
- ENGL 1301 Composition I
- ENGL 1302 Composition II
- ENGL 2311 Technical & Business Writing
- HIST 2321 World Civilizations I
- SPCH 1311 Introduction to Speech Communication
- SPCH 1315 Public Speaking
Note: Transfer courses not listed may be evaluated on an individual basis. Not all courses may be offered on all TSTC campus locations. Additional General Academic courses to be determined by program advisor and campus location.

More Information
Anyone with questions regarding transfer credit should contact the Enrollment Center and those with questions regarding special partnerships should contact the Educational Partnerships Office.

Additional courses may be accepted on transfer from other colleges.

Questions on the transferability of outside courses to meet the Humanities/Fine Arts elective, the Natural Sciences/Mathematics elective, Behavioral/Social Science elective, Communication/Writing elective, or General Education elective requirements should be addressed to the lead instructor of the Academic Core certificate of completion.

Academic Core Courses
The following is a list of General Education courses offered by TSTC General Education Academic Core departments used to satisfy the 42 semester hour Academic Core certificate of completion and the general education core courses for Associate of Science degrees.

TSTC's Harlingen campus offers the Texas Core Curriculum, a core package of transferable academic courses defined by the Texas Higher Education Coordinating Board that will transfer to any college or university in the state of Texas. More information on course content and lecture and lab hours is included in the Course Descriptions section of this catalog.

Selection of courses within each category must be based upon the student’s demonstrated abilities, desired major and intentions for graduation. Not all courses are offered every semester. Students must attain a “C” or better in all Academic
The categories and minimum hours for the basic core are as follows:

**Communication (6 hours)**
- ENGL 1301 Composition
- ENGL 1302 Composition II

**Mathematics (3 hours)**
- MATH 1314 College Algebra
- MATH 1316 Plane Trigonometry
- MATH 1332 Contemporary Mathematics
- MATH 2312 Pre-Calculus Math (3 SCH version)

**Life and Physical Sciences (6 hours)**
- BIOL 1306 Biology for Science Majors I (Lecture)
- BIOL 1307 Biology for Science Majors II (Lecture)
- BIOL 1308 Biology for Non-Science Majors I (Lecture)
- BIOL 1309 Biology for Non-Science Majors II (Lecture)
- BIOL 2301 Anatomy & Physiology I (Lecture)
- BIOL 2302 Anatomy & Physiology II (Lecture)
- CHEM 1311 General Chemistry I (Lecture)
- CHEM 1312 General Chemistry II (Lecture)
- PHYS 1301 College Physics I (Lecture)
- PHYS 1302 College Physics II (Lecture)
- PHYS 1315 Physical Science I (Lecture)
- PHYS 1317 Physical Science II (Lecture)

**Language, Philosophy & Culture (3 hours)**
- ENGL 2321 British Literature
- ENGL 2331 World Literature
- ENGL 2326 American Literature
- PHIL 1304 Introduction to World Religions

**Creative Arts (3 hours)**
- ARTS 1301 Art Appreciation
- MUSI 1306 Music Appreciation

**American History (6 hours)**
- HIST 1301 U.S. History I (to 1877)
- HIST 1302 U.S. History II (since 1877)

**Government/Political Science (6 hours)**
- GOVT 2305 Federal Government
- GOVT 2306 Texas Government

**Social/Behavioral Science (3 hours)**
- ECON 2301 Principles of Macroeconomics
- ECON 2302 Principles of Microeconomics
- PSYC 2301 General Psychology
- PSYC 2314 Life Span Growth & Development
- SOCI 1301 Introductory Sociology

**Component Area Option A (minimum of 3 hours)**
- BIOL 1106 Biology for Science Majors I (lab)
- BIOL 1107 Biology for Science Majors II (lab)
Component Area Option B (3 hours)
SPCH 1311 Introduction to Speech Communication
SPCH 1315 Public Speaking
SPCH 1318 Interpersonal Communication
SPCH 1321 Business & Professional Communication

Other Academic Transfer Courses
The Texas Higher Education Coordinating Board approves the following courses for academic credit. However, these courses are not part of the required basic general education core (15 hours) for AAS degrees nor part of the General Education Academic Core and will not satisfy the core requirements for graduation. Certain programs require these courses as part of their curricula, and the course may also be taken as an elective beyond requirements of the basic general education core for AAS degrees and the General Education Academic Core. The Texas Higher Education Coordinating Board does not permit that a Core course be substituted.

ACCT 2301 Principles of Accounting I - Financial
ACCT 2302 Principles of Accounting II - Managerial (ACCT 2301*)

GEOG 1303 World Regional Geography
HIST 2321 World Civilizations
MATH 2305 Discrete Mathematics (MATH 2413*)
TECA 1354 Child Growth and Development
(*Course Prerequisites)

Prerequisites and Corequisites
Students must complete designated prerequisite courses before registering for certain courses and must take corequisite courses during the same term. Such requirements are indicated as part of the course descriptions. Students are responsible for taking courses in sequence and at the proper level. Failure to adhere to prerequisite and corequisite requirements may result in the students being withdrawn from the courses.
Credit Award for Assessments and Training

Credit awards for TSTC courses based on credit by examination or nontraditional training and experiences is available to students who plan to enroll at TSTC and to currently enrolled students. TSTC awards credit for various examinations published by the College Board, including the College Board Advanced Placement Program (AP) and the College-Level Examination Program Subject Exams (CLEP-S). TSTC also awards credit for training received while in the United States Armed Services, for credit earned through the International Baccalaureate Diploma Program, and for credit earned in high school dual enrollment courses. Students may also be eligible to receive credit awards for other types of training and experience subject to review and approval by the appropriate college official.

General Rules and Regulations

The total number of semester credit hours awarded for Credit Awards may vary depending upon the student’s program of study; however, the total credit awarded (including transfer credits) cannot exceed 75% of the total credits required for the student’s declared program of study. At least 25% of the total credits in a TSTC student’s certificate or AAS degree plan must be earned through regular SCH instruction at a TSTC campus or at another institution of higher education in partnership with TSTC.

While credit may be awarded by TSTC for external exams and training, this credit may not satisfy requirements for a specific program of study. Students should check with program advisors to determine if accepted Credit Awards will meet program requirements.

A grade of CR (credit) will be assigned for any course in which Credit Awards are received. This grade is not computed in the grade point average, and the credit does not count toward calculation of student load for a term. The student is responsible for obtaining documentation of external exam scores and/or other training and submitting it to the Enrollment Center at a TSTC campus. Scores for the College Examination Program (CLEP) and Advanced Placement (AP) examinations, as well as other Credit Award documentation, should be received prior to enrollment for use in course advisement and placement.

Students must complete the appropriate Credit Award Request form with appropriate documentation to initiate the Credit Award process. Payment of any fees associated with Credit Award program must be received before credit can be posted to the student’s transcript.

Cooperative Education

Most certificate and degree programs offer students opportunities to participate in cooperative training with industry for at least one semester. Students in cooperative experiences earn up to 12 credit hours working at off-campus jobs related to their fields of study. This phase of training is a cooperative effort between the student, industry and TSTC to provide valuable work experience. Cooperative education is competitive, enabling some qualified students to earn income to help support their education. Students who are interested in participating in cooperative experiences should discuss the opportunities with their department chairpersons.

Advanced Placement

Advanced Placement (AP) exams are offered by the College Board to students who complete AP courses while enrolled in high school. The exams cover a variety of subject areas including business, science and mathematics, history and social sciences, foreign languages, and composition and literature. Approved exams may be found on the TSTC Admissions webpage.

Credit for Military Training

Students who received training while in the United States Armed Services may receive credit for that training, provided appropriate documentation is provided and the training is equivalent to a course or courses offered by TSTC. Credit awarded for military training is based on the recommendations from the American Council on Education (ACE) in its Guide to the Evaluation of Educational Experiences in the Armed Services and must be approved by the appropriate TSTC department chair for the specific subject area.

The Military Registries provide quality assurance and policy guidance to the U.S. Army, Navy and Marine Corps in support of the Army/ACE Registry Transcript Service (AARTS) and the Sailor/Marine/ACE Registry Transcript (SMART). More than 2,300 colleges and universities recognize these ACE-endorsed transcripts as official documentation of military experiences and accurate records of applicable ACE credit recommendations.

Students who wish to receive credit for military training should obtain a transcript from the Defense Activity for Non-
Traditional Education Support (DANTES). This agency maintains the educational records of the service members who have completed DANTES Subject Standardized Tests (DSSTs), CLEP examinations, USAFI (United States Armed forces Institute) and a high school equivalency exam.

Before July 1, 1974, the results of courses and tests taken under the auspices of USAFI (United States Armed Forces Institute, disestablished 1974) are also available from the DANTES Program:

DANTES Program
The Chauncey Group International

International Baccalaureate Diploma Program (IBD)

Students who have received an International Baccalaureate Diploma (IB) may receive TSTC course credit for the following exams with scores of four or higher on either standard level (SL) or higher level (HL) examinations. Students who have taken IB exams but do not have an IB diploma may receive credit for scores of five or higher on higher level (HL) examinations only.

Credit Award for Continuing Education and Experiential Learning

Students who have successfully completed continuing education (CE) courses offered by a TSTC campus are eligible to apply for semester credit hour technical course credit. CE coursework must be demonstrated to be substantially the same as the equivalent semester credit coursework. Students taking a CE training that leads to an industry-recognized credential, licensure or certification can utilize the credential to request college credit. Students must sign and submit a Continuing Education Hours Course Equivalency Evaluation form to the instructional administrator of the appropriate technical program in which the course(s) are managed.

Experiential learning allows students to receive college credit for equivalent educational experiences acquired through earlier schooling situations, work/on-the-job training or life experiences. Upon approval of the appropriate department chair and/or designated subject matter expert, a student may develop a petition for a course or courses offered by TSTC to gain college-level credit. Petitions are reviewed by the appropriate department chair and/or designated subject matter expert and submitted to the senior vice president of Student Learning for approval.

Students with applicable skills and knowledge may also receive credit for technical courses in which proficiency is determined by comprehensive examination. These challenge exams are designed and written by qualified faculty and may be administered in the technical department or testing center. Students must pay a Challenge Exam testing fee prior to the test. The Challenge Exam testing fee will be approved by the Board of Regents (BOR) and will not be refundable regardless of the outcome of the assessment.

More specific information on credit award for continuing education units and experiential learning may be obtained from
Audited Courses

Students may audit courses with permission from the course instructors. Students auditing courses must adhere to the same class requirements as those students taking the courses for credit. Audited courses are not considered when determining a credit hour load, and a grade of “AUD” is shown on the students’ grade reports. Students may take courses for credit after auditing them but may not receive credit by examination or use audited courses as course substitutions in degree or certificate plans. Students who audit courses will be charged state and designated tuition and an audit fee specified in the Tuition and Fees section of this catalog. Contact the Enrollment Center for more information.

Schedule Changes

The published academic calendar outlines the dates during which schedule changes may occur. Students may add or drop courses or change sections before classes begin by contacting their enrollment coach or program enrollment coach. After classes begin, all students may change their schedules by obtaining course schedule change forms available from the Enrollment Center, instructors and/or lead instructors. The completed forms must be submitted to the Enrollment Center by the deadline published in the TSTC college academic calendar. Changes are effective only when this process has been completed.

Drops and Withdrawals

Students may drop courses or withdraw from the college by completing a course schedule change form, obtaining the appropriate approval signatures, and submitting the form to the Enrollment Center. The effective date is the date that the course schedule change form is received by the Enrollment Center. Deadlines for course drops and withdrawals from the college are published in TSTC’s academic calendar.

See “Refunds for Changes in Enrollment” in the Refunds section for more information.

Courses that are dropped prior to the official census dates do not appear on the student’s transcript. After the official census dates, students who drop courses or withdraw from the institution receive marks of “W” (Withdrawal) provided that the forms are received on or before the published deadline. Students who withdraw from the institution may be asked to meet with a college representative.

Under section 51.907 of the Texas Education Code, “an institution of higher education may not permit a student to drop more than six courses, including any course a transfer student has dropped at another institution of higher education.” This statute was enacted by the state of Texas in spring 2007 and applies to students who enroll in a public institution of higher education as first-time freshmen in fall 2007 or later. Any course that a student drops is counted toward the six-course limit if “the student was able to drop the course without receiving a grade or incurring an academic penalty; the student’s transcript indicates or will indicate that the student was enrolled in the course; and the student is not dropping the course in order to withdraw from the institution.” Some exemptions for good cause could allow a student to drop a course without having it counted toward this limit, but it is the responsibility of the student to establish that good cause.

Students who have completed at least 75% of the term and who are called to active military service may request an excused absence rather than withdrawal from their courses. Students who request leave based on military service will be given grades of “IM” in all courses and will have two years from the end of the term to complete course work. Grades of “IM” awarded to students called to military service will be changed to “W” grades if the required course work is not completed by the end of the two-year period.

Students who withdraw from the college must ensure that all library books and laboratory equipment are returned and all financial obligations are settled before they leave.

Administrative withdrawals may be utilized by Student Learning or Administrative Offices as deemed necessary to withdraw a student. Students who are administratively withdrawn are subject to TSTC’s Refund and Grading Policy.

Student Participation

Students are responsible for their own class attendance and participation. Faculty members may establish requirements for student participation in specific learning activities both in and out of the classroom and may consider these requirements when determining final grades.

Faculty member or college administrator may submit a request to withdraw a student from one or more courses who is not...
meeting the required participation due to the development of unforeseen events beyond the student's control. These events may include serious illness, death in the immediate family, changes in condition of employment or military deployment. Administrative withdrawals are subject to TSTC's Refund and Grading Policy.

Student Absence and Religious Holidays

Under Texas Education Code 51.911, a student who is absent from class for the observance of a religious holiday is allowed to take an examination or complete an assignment scheduled for that day within a reasonable time period, as established by the faculty member. The student must give written notice by submitting a completed absence request form to the instructor within the first 10 days of the term. Contact the Enrollment Center for more information.

Transfer of Credit

The transfer of course credit from TSTC to other Texas colleges and universities is facilitated by the Texas Higher Education Coordinating Board (THECB) Academic Course Guide Manual and Workforce Education Course Manual. In general, students may submit an official TSTC transcript to another college or university for consideration of transfer credits. Acceptance of credits is at the discretion of the receiving institution. Contact the appropriate department chair for more information.

Resolution of Transfer Disputes for Lower Division Courses

The following procedures specified in Texas Higher Education Coordinating Board Rules (Chapter 4, Subchapter B, Section 4.27) shall be followed by institutions of higher education in the resolution of credit transfer disputes involving lower-division courses:

1. If an institution of higher education does not accept course credit earned by a student at another institution of higher education, the receiving institution shall give written notice to the student and to the sending institution that transfer of the course credit is denied, and shall include in that notice the reasons for denying the credit. Attached to the written notice shall be the procedures for resolution of transfer disputes for lower-division courses as outlined in this section, accompanied by clear instructions outlining the procedure for appealing the decision to the commissioner.

2. A student who receives notice as specified in paragraph 1 of this subsection may dispute the denial of credit by contacting a designated official at either the sending or the receiving institution.

3. The two institutions and the student shall attempt to resolve the transfer of the course credit in accordance with board rules and guidelines.

4. If the transfer dispute is not resolved to the satisfaction of the student or the sending institution within 45 days after the date the student received written notice of denial, the sending institution may notify the commissioner in writing of the request for transfer dispute resolution, and the institution that denies the course credit for transfer shall notify the commissioner in writing of its denial and the reasons for the denial.

The commissioner or the commissioner’s designee shall make the final determination about a dispute concerning the transfer of course credit and give written notice of the determination to the involved student and institutions.

Each institution of higher education shall publish in its course catalogs the procedures specified in all subsections of Section 4.27 in the Texas Higher Education Coordinating Board rules.

The board shall collect data on the types of transfer disputes that are reported and the disposition of each case that is considered by the commissioner or the commissioner’s designee.

If a receiving institution has cause to believe that a course being presented by a student for transfer from another school is not of an acceptable level of quality, it should first contact the sending institution and attempt to resolve the problem. In the event that the two institutions are unable to come to a satisfactory resolution, the receiving institution may notify the commissioner, who may investigate the course. If its quality is found to be unacceptable, the board may discontinue funding for the course.

05. Flexible Program Options

Performance-Based Education (PBE)

Some programs of study offer Performance-Based Education (PBE) the name of TSTC's course-based Competency-Based Education (CBE) initiative. In these programs, students may complete course requirements without set course times for lectures or laboratory sessions, but by completing coursework and attending laboratory sessions based on each individual student's schedule. Students enroll in an agreed-upon number of contact hours and are awarded credit when course objectives are met and, for hybrid courses, required laboratory sessions are attended. This allows students to advance through program requirements at a comfortable speed with the help of a pacing tool for a self-guided approach to education.
Online Learning

Online courses and programs offer students the opportunity to complete coursework via the internet on personal computers. Each TSTC online program may have specific program requirements.

While online courses do have deadlines for completion of course requirements, depending on the nature of the instructional modality, students may have the opportunity to work through some course requirements in a self-guided manner. Students who take online learning courses complete course requirements and communicate with instructors through the College’s Learning Management System (LMS). Some online courses may require specific software or proctored exams. Please refer to course syllabi for this information. Virtual tutoring, through TSTC’s Office of Student Success is offered for some online courses.

The Student Online Learning Orientation (SOLO) course is recommended for all students new to online instruction at TSTC. The course provides instructions on the College’s LMS and strategies for succeeding in the online environment. Contact the Office of Online Learning for information on the SOLO course.

Day, Evening and Weekend Courses

The majority of college credit courses are taught on weekdays during the day, with selected courses offered during the evenings and/or on weekends. Workforce Training and Continuing Education courses are scheduled throughout these time periods. Contact the Workforce Training Office for details.

06. Dual Enrollment

The TSTC Dual Enrollment program provides an opportunity for high school students to earn college credit while still in high school. High School partners must have a Memorandum of Understanding with TSTC and meet applicable eligibility requirements for students to enroll in courses. Active Dual Enrollment students are to abide by the rules and regulations set forth in the TSTC Catalog and Student Handbook. Contact the Dual Enrollment Office for more information.

07. Workforce Training & Continuing Education

TSTC offers a range of workforce training and continuing education courses (CE) and programs. Credit in these courses and programs is awarded as “Continuing Education Units” (CEUs), or Clock Hours, upon successful completion of course and program objectives. Courses may be offered to the general public or in a customized format for businesses and industries to meet specific workplace needs. Typical curriculum offerings include:

- Training and retraining programs that respond to requests or needs of business or other institutions and agencies
- Specialized customized training courses, workshops, seminars and clinics.
- Training for industrial start-up or expansion programs.
- Workforce training to train for new careers and to provide skill updates, professional development, personal improvement and recreation.

Admission and Registration

The majority of CE courses and programs have no admission requirements; however, all participants are required to complete a registration form with basic demographic information. Some specialized programs may require demonstrated skills, competencies and some program requirements prior to enrollment.

Tuition and Fees

CE courses vary in price depending on the length of the course, special equipment or labs used in training and other factors. Customized CE training courses may be billed directly to the sponsoring business or industry.

Unless the course or student is sponsored by a business or agency, payment of all tuition and fees is required three business days prior to the first class meeting.
Class Records and Certificates for CEU Programs

Students completing CE courses receive one CEU for every 10 hours of participation in a Workforce Training & Continuing Education course or program.

Grades of Satisfactory “S” or Unsatisfactory “U” are typically awarded in CE classes. Other types of grades may be awarded depending on the requirements of the course sponsor. Students who successfully complete CE courses may request a certificate certifying the number of CEUs awarded.

CEUs earned in classes taught by TSTC may be converted to semester hour (college) credit that is applicable to a certificate of completion or associate degree. Refer to the Credit Award for Assessments and Training section of this catalog for more information.

Class Records and Certificates for Clock Hour programs

Students completing CE courses receive one hour for every hour of participation in a Workforce Training & Continuing Education course or program.

The following is the grading scale used for clock hour programs:

A: 90–100
B: 80–89
C: 75–79
D: 70–74
F: 0–69

Hours earned in classes taught by TSTC may be converted to semester hour (college) credit that is applicable to a certificate of completion or associate degree. Refer to the Credit Award for Assessments and Training section of this catalog for more information.

SAP Policy

Students must complete each course with at least a C or better to successfully complete the program. Students who do not have acceptable classroom attendance or fail to meet learning objectives with a potential to not meet the grade requirement will be removed from the program.

SAP Standing

Good Standing = C or better.
Probation = less than C.
Suspension = 3rd attempt of same course not meeting C or better.

Refund Policy for CE Courses

A. Students who voluntarily terminate their enrollment prior to the first day of class will receive a 100% refund.
B. Students who voluntarily terminate their enrollment after the first day of class, but BEFORE the third day of class will receive a 70% refund and no credit will be issued for the course.
C. Students who voluntarily terminate their enrollment AFTER the third day of class will receive a 0% refund and no credit will be issued for the course.
D. Students that are forcefully terminated due to attendance and/or other authorized by administration will not receive a refund or credit for the course.

CE Attendance Policy

CE students must typically hold a minimum of 90% attendance per course in order to maintain satisfactory progress unless a program’s external governing agency requires differently. Such modification will be listed in the course syllabus.
Customized Training for Business and Industry

TSTC has a representative to respond to requests from businesses and other institutions or agencies to develop and offer specialized training for employees. Training may be provided at the College or at the sponsor’s site of choice. For more information on specialized business and industry training, contact the Workforce Training & Continuing Education Office.

08. Pre-College Programs

Pre-College Programs offers students the educational support needed to make the successful transition into college. Pre-College Programs offers Upward Bound and a variety of other summer programs. All students who participate in Pre-College Programs are expected to adhere to the rules and regulations set forth in this Catalog/Handbook. Specific programs may have additional policies and rules that participants must also abide by.

11. Student Services

01. Student Housing

The College considers housing an added service for its students.

Occupancy in student apartments is assigned on a first-come, first-served basis.

The facilities are conveniently located at the College within walking distance of classroom buildings, laboratories and recreation facilities.

Visit tstc.edu/campus-housing to view housing options, photos and room layouts.

Housing Reservations

Because facilities are limited, the prospective student should complete a campus housing application as soon as possible, at least one semester in advance of the expected enrollment date. The application must be completed and returned with deposit, the Release of Background Information Form and the nonrefundable application fee. The deposit can be made by cash, credit card, check or money order payable to Texas State Technical College.

The deposit must be paid before the student is placed on the housing assignment list. If the student decides not to enroll or live in campus housing, the deposit will be refunded. The deposit will be retained until the student properly clears/vacates housing.

All rates are subject to change without notice due to economic conditions beyond the control of the College.

Housing Assignments

Returning students have priority in housing assignments. However, they must reserve their own residence for future occupancy according to the policy of their assigned facility.

Confirmation of housing reservations for available spaces will be made in writing to each applicant. When capacity is reached, additional applicants will be notified in writing that spaces are not available.

The student may request a certain space and/or roommate, and all possible consideration will be given to each request. The college reserves the right to assign students to specific spaces.

Students must remain in the facilities assigned to them unless permission for change is obtained from Housing. Moving without permission may result in eviction from campus housing. Housing reserves the right to move students to another space in order to conserve energy, for safety reasons, to conduct repairs or remodel and for other reasons that are in the best interest of the College.

Missing Housing Resident Notification

If a member of the college community has reason to believe that a student who resides in on-campus housing is missing, he/she should immediately notify the TSTC police or security department. TSTC police will generate a missing person report and initiate an investigation.
Should TSTC Police determine that the student has been missing for more than 24 hours, they will notify the student's emergency contact or a confidentially identified individual.

In addition to registering an emergency contact, students in on-campus housing have the option to identify, confidentially, an individual to be contacted by TSTC in the event the student is determined to be missing for more than 24 hours.

If a student is less than 18 years old and is not an emancipated individual, federal law requires that TSTC notify a parent or guardian within 24 hours of when a student is confirmed missing.

**Housing Regulations**

Housing regulations are provided to each tenant in their contract and in Housing's Student Housing Handbook. Tenant may move into their assigned facilities in accordance with said facilities regulations. Move-in policy varies according to facility as well as campus. The tenant will terminate the lease and must vacate the residence if he/she ceases to be a TSTC student.

When the student properly vacates his or her assigned residence, the unused portion of advance rent will be refunded following inspection by Housing staff and return of all room keys. However, no refunds will be made during the last 10 school days of the semester.

A portion of the housing deposit will be withheld to defray costs of apartment repair or replacement of lost items where tenant liability is obvious. Remaining portions of the housing deposit will be withheld to defray the cost of any rent or fees due.

All rental rates are based on the TSTC approved fee schedule.

**Housing Accommodations for Students with Disabilities**

Students with disabilities that require accommodations for TSTC housing must contact Access & Learning Accommodations in a timely manner for further guidance on the accommodations process. Students with disabilities are encouraged to self-disclose when initiating the housing application process. Please see the Disabilities section to find contact information for these services.

**02. Access and Learning Accommodations**

**Students with Disabilities**

The TSTC Access and Learning Accommodations (ALA) office serves as a resource for students who may experience barriers due to a disability (long-term or short-term).

Students seeking accommodations or services should make contact with the ALA office in a timely manner to self-report and begin the interactive process with an ALA staff person. Students may also be asked to provide supporting documentation from an individual qualified to diagnose the disclosed disability.

ALA will then collaborate with college personnel to develop appropriate accommodations to ensure equal access to all programs, activities and services at TSTC.

ALA also coordinates with community assistance programs and serves as the liaison for Texas Workforce Solutions.

To make contact with the ALA office, please email adarequest@tstc.edu or a representative from your campus.

The goal of the Americans with Disabilities Act of 1990 (ADA) and the Amendments Act of 2008 (ADAAA) is to guarantee that individuals with disabilities are given equal opportunity for full participation, independent living and economic self-sufficiency. In post-secondary education, individuals with disabilities are provided reasonable and appropriate accommodations to ensure equality in obtaining an education. Accommodations are based on the need of the individual and are reviewed on a case-by-case basis. Such reasonable accommodations do not include: personal services, lack of preparation or lack of time management skills.

**Service and Emotional Support Animals on Campus Grounds**
Texas State Technical College allows individuals to bring animals on college property in accordance with federal laws and in other situations subject to the rules outlined below. At the same time, TSTC recognizes the health and safety risks potentially created by unrestrained animals on campus.

Definitions

Emotional Support Animal: An animal that is necessary to afford a person with a disability an equal opportunity to use and enjoy a dwelling when there is an identifiable relationship or nexus between the person’s disability and the assistance the animal provides.

Service Animal: A dog individually trained to do work or perform tasks for a person with a disability. Examples of such work or tasks include guiding people who are blind, alerting people who are deaf, pulling a wheelchair, and alerting/protecting a person who is having a seizure. The provision of emotional support, well-being, comfort or companionship does not constitute work or tasks for the purposes of defining a service animal.

Service Animal in Training: A dog undergoing training by an approved trainer who is an agent of a reputable organization and competent to provide training for assistance animals and/or their handlers.

Procedures

Animals brought on campus must be under the complete control of the owner at all times and present no hazard to people or property. The wearing of a muzzle by a dog shall not be regarded as control by its owner. Dogs and cats brought to campus must have a valid license as evidence of current rabies vaccinations and fulfill all local requirements applicable to animals or they may be subject to removal from campus. In all cases, the owner of the animal is responsible for the animal’s behavior.

In general, TSTC will not ask about the nature or extent of a person’s disability but may make two inquiries to determine whether an animal qualifies as a service animal. TSTC may ask:

◆ If the animal is required because of a disability and;
◆ What work or task the animal has been trained to perform.

Animals on campus grounds must be secured to a leash, cord, chain or similar direct physical control of a maximum length of 6 feet, the other end of which is restrained by a person. If this constraint interferes with a service animal’s work or if the individual’s disability prevents using these devices, the individual must maintain control of the animal through voice, signal or other effective controls. The physical constraint of the animal does not apply to service or support animals kept within an individual’s college housing assignment.

Animals must not be tethered to a stationary fixture or tree left unattended. TSTC may take reasonable efforts to remove an animal confined in a vehicle when there appears to be imminent danger to the animal due to temperature conditions or inadequate ventilation. TSTC is not liable for any associated repair/damage costs to the vehicle for this action and the animal’s owner assumes full responsibility.

TSTC retains the right to take action to remove any animal from the college premises if the safety of others, destruction of property or disturbance warrants such removal. The removal of any animal and any necessary cleaning, repairs and/or pest control will be done at the expense of the owner. The owner may also be subject to disciplinary action and this action may also extend to cases involving service and support animals. TSTC may not permit service animals when the animal poses a substantial and direct threat to health or safety or when the presence of the animal constitutes a fundamental alteration to the nature of the program or service. TSTC will make those determinations on a case-by-case basis.

Some people may have allergic reactions to animals that are substantial enough to qualify as disabilities.

TSTC will consider the needs of both persons in meeting its obligations to reasonably accommodate all disabilities and to resolve the problem as efficiently and expeditiously as possible. Students requesting allergy accommodations should contact Access and Learning Accommodations office.

Service Animals

The college permits service animals into campus buildings where other animals would typically not be permitted. This practice follows Titles II and III of the American with Disabilities Act Amendment Act (ADAAA).
The service animal must have been trained as a service animal in the work or tasks directly related to the person’s disability. Individuals are permitted to bring his or her service animal in all areas of the campus including any place of public accommodation. Individuals living in college housing will be permitted to have no more than one service or support animal. A student must seek registration for a service animal to reside in college housing space. Information and procedures to gain approval may be found at the housing office for your campus.

Service animals in training on campus are allowed if the individual is an approved trainer, who is an agent of an organization recognized as reputable and competent to provide such training, and the individual submits proof to the Access and Learning Accommodations Office that he or she is the approved trainer as required in Texas Human Resources Code Dec. 121.003. Individuals participating in an internship off campus must refer to the entity’s ADA designee for any inquiries regarding the requirements for service animals in training to enter their facility.

Emotional Support Animals

In accordance to the Fair Housing Act of 1988 and the U.S. Department of Housing and Urban Development, the college permits an individual with a disability to keep an emotional support animal within his or her college housing and on college grounds. The emotional support animal is not allowed to accompany the student into other public buildings on campus, including the dining area.

All animals must comply with the city code of ordinances of the campus where the student resides, and will be considered for approval on a case-by-case basis by the TSTC Access and Learning Accommodations Office.

Animals defined as “dangerous wild animals” in the Texas Health and Safety Code §822.101 (big cats, apes, bears, hybrids of these animals), primates, high-rabies-risk animals (bats, fox, raccoon, coyote), venomous animals and domestic animals with unknown health history are not allowed.

The Code says a “dangerous wild animal” means:

- A lion;
- A tiger;
- An ocelot;
- A cougar;
- A leopard;
- A cheetah;
- A jaguar;
- A bobcat;
- A lynx;
- A serval;
- A caracal;
- A hyena;
- A bear;
- A coyote;
- A jackal;
- A baboon;
- A chimpanzee;
- An orangutan;
- A gorilla; or
- Any hybrid of an animal listed in this subdivision.

In addition to above mentioned, the college reserves the right to remove an emotional support animal if:

- it poses a direct threat to the safety of others or causes significant property damage;
- its presence results in an undue burden or fundamental alteration of a college's program;
- it creates an unmanageable disturbance or interference with the college community, and/or
- the student does not comply with the conditions set forth by the Access and Learning Accommodations office and the Student Housing Office.

Criteria for Emotional Support Animals in Housing

Typically, an emotional support animal is recommended to an individual with a disability by a health care or mental health professional and is an integral part of a person’s treatment process. Individuals living in college housing will be permitted
to have no more than one service or support animal. The Access and Learning Accommodations office manages requests related to a support animal within the student’s college housing assignment. Requests made by faculty or staff residing in housing should be directed to the Housing Department and Human Resources office.

**Animal Etiquette**

To the extent possible, the handler should ensure that the animal does not: sniff people, restaurant tables or the personal belongings of others. Also, the animal should not display any behaviors or noises that are disruptive to others, unless part of the service being provided the handler. Furthermore, it is the handler’s responsibility that the animal does not block an aisle or passageway for fire egress. Violation of this on behalf of an individual may result in disciplinary action.

**Public Etiquette Toward Service or Emotional Support Animals**

It is OK to ask someone if she/he would like assistance if there seems to be confusion. However, faculty, staff, students, visitors and members of the general public should avoid the following: petting a service animal, as it may distract them from the task at hand; feeding the service animal; deliberately startling a service animal; and separating or attempting to separate a handler from his/her service animal. Individuals found in violation of this may be subject to disciplinary action.

**Waste Cleanup Rule**

Cleaning up after the animal is the sole responsibility of the handler. In the event that the handler is not physically able to clean up after the animal, it is then the responsibility of the handler to make arrangements to have someone available who is capable of cleaning up after the animal. The person cleaning up after the animal should abide by the following guidelines: always carry equipment sufficient to clean up the animal’s feces whenever the animal is on campus, and properly dispose of waste and/or litter in appropriate containers. TSTC may impose a financial responsibility on the handler in the event TSTC staff is needed to cleanup.

**Exemptions**

Animals involved in authorized research, K-9 animal (police dog), animals being temporarily held by Environmental Health and Safety, fish contained in aquariums, or animals used for performance on premises or involved in college sponsored activity.

**Appeal Process**

An individual may appeal the decision to the college ADA coordinator which can be found in SOS ES 3.26 Students with Disabilities.

**Grievance Procedure for ADA-Related Complaints**

Primary responsibility for ensuring compliance with the ADAAA rests with the college’s ADA/504 coordinator.

The release of and access to all student-related educational records will be in compliance with the Family Educational Rights and Privacy Act (FERPA).

TSTC students who believe that they have been denied equal access in the form of appropriate accommodations, modifications, auxiliary aids, effective communication or experienced discriminatory harassment as described in Section 504 of the Rehabilitation Act of 1973 or The Americans with Disabilities Act of 1990 have a right to file a grievance. The TSTC procedure for the filing of student-related grievances alleging violations of the ADAAA and Section 504 is as follows:

1. The student shall submit a written complaint to the Office of Access and Learning Accommodations or its designee as soon as the complainant becomes aware of the alleged violation, but no later than 10 working days after the alleged action occurred. The time for submitting a written complaint can be waived for good cause as determined by the Office of Access and Learning Accommodations or its designee. The written complaint must include the name and address of the person filing the complaint, a brief description of the alleged violation, and any documents supporting the complaint. The Office of Access & Learning Accommodations or its designee shall assist the student in the interactive process in an effort to clarify and resolve the issue. At times, the ALA Office or its designee may consult with the ADA coordinator, staff and/or other pertinent parties to assist in the resolution process.

2. The ALA office or its designee shall review the complaint and provide the student a response within 10 working days following receipt of the complaint. An extension of time may be made, not to exceed 15 working days, if the student is notified by the ALA office or its designee.

3. If the student is not satisfied with the decision of the ALA office or its designee, a written complaint may be submitted to the ADA coordinator within 10 working days of the decision provided in step two. The time for submitting a written complaint may be waived for good cause as determined by TSTC’s ADA coordinator. The written complaint must include the name and address of the person filing the complaint and a description of the
reason for the complaint. Upon receipt, TSTC’s ADA coordinator shall review the complaint within 10 working days. An extension of time may be made, not to exceed 15 working days, if the student is notified by the ADA coordinator. When necessary, the ADA coordinator shall consult with the ALA office and/or the ADA compliance committee to assist in the resolution.

The ADA coordinator’s decision shall be final at the college level.

If a complaint is not resolved at the college level, the student may choose to file a complaint with the Federal Office of Civil Rights. The Federal Office of Civil Rights will receive complaints and investigate as deemed appropriate.

Note: Accommodations can be requested at any time during the Student Appeals Process by contacting the Office of Access and Learning Accommodations.

03. Counseling Services

TSTC is committed to bolstering the wellness of its students and helping them find an optimal and safe environment in which to grow, develop and reach their full potential.

Counselors can promote positive mental health for improved personal, career and academic growth. In counseling, you can receive assistance from a caring professional who is not directly impacted by how you live your life or the choices you make. Regardless of what you share, our experienced counseling staff is on your side.

Counseling services are available for all currently enrolled TSTC students at all campus locations. Walk-ins are welcome, but having counseling sessions are dependent on availability. If another student has an appointment, they will take precedence over any walk-ins except in a crisis situation.

Drug and Alcohol Policy Statement

Texas State Technical College is a drug and alcohol free college and workplace. The unlawful manufacture, distribution, purchase, dispensation, possession or use of illegal drugs or alcohol by students and employees on college property, or as a part of any college-sponsored activity, is prohibited. Students violating any provision of the drug and alcohol policies are subject to disciplinary sanctions ranging from probation, suspension or expulsion to referral for prosecution. Employees who violate any provision of the drug and alcohol policies may be subject to disciplinary action up to termination.

Alcohol and Drug Use

Drug and alcohol use, misuse, and abuse are complex behaviors with many outcomes at both the cultural and the individual levels. Awareness of the dangerous effects of drug/alcohol use is imperative for an individual's well-being or survival. Negative consequences of drug/alcohol may be exhibited through: physical dependence (the body's learned requirement of a drug for functioning) or psychological dependence (the experiencing of persistent craving for the drug and/or a feeling the drug/alcohol is a requirement for functioning).

Abuse of any drug/alcohol whether licit or illicit may result in marginal to marked, temporary to permanent physical and/or psychological damage, even death. Since many of the illicit drugs are manufactured and sold illegally, their content varies and may contain especially harmful ingredients or amounts. Regardless of the types of drug/alcohol utilized, a perceived need for the continued use is likely to ensue, resulting in dependence. Dependence on drugs and/or alcohol alters the user's psychological functioning. The acquisition of drugs and alcohol becomes the primary focus of the drug dependent individual and often results in reduced job performance and jeopardized family and other interpersonal relationships. Criminal behavior is frequently the means for financing a drug habit. Behavior patterns often include violence and assault as the individual becomes increasingly drug/alcohol dependent. Social and psychological alienation and medical problems increase as the abuser becomes entrapped in drug/alcohol dependence. For more information on drug/alcohol counseling and referrals, please contact Counseling Services at your campus.

Possible Alcohol Sanctions
Possible Drug Sanctions

- Probation.
- Online drug education course.
- Community service.
- Removal from TSTC housing facilities.
- Suspension.
- Expulsion.

*The Conduct Officer has authority to sanction as seen fit for any violation of the Student Code of Conduct involving Drugs and Alcohol. For more information on the disciplinary process, go to the Code of Student Conduct.

The Family Educational Rights and Privacy Act (FERPA), permits colleges and universities to inform the parents/guardians of students less than 21 years of age when their son/daughter has been found in violation of university alcohol and drug regulations.

Students exhibiting signs of excessive drug/alcohol consumption will be transported via Emergency Medical Services (EMS) at the student’s expense for medical attention. Refusal to cooperate with EMS personnel may result in arrest (by local/campus police) in order to ensure the student's health and safety.

Health Risks Associated with Alcohol Abuse

- Increased risk of liver cancer.
- Increased risk of cirrhosis of the liver.
- Increased risk of heart disease.
- Adverse reactions when combined with many medications, including over-the-counter drugs.
- Overdose resulting in respiratory failure.
- Impaired concentration.
- Impaired coordination.
- Risk of permanent nerve damage from long-term abuse.

Health Risks Associated with Marijuana Use

- Lowered sperm counts in men.
- Decreased testosterone levels in men.
- Increased testosterone levels in women.
- Enhanced cancer risk.
- Impaired short-term memory.
- Psychological dependence.

Health Risks Associated with the Use of Cocaine and Crack

- Addiction.
- Heart attack.
- Stroke.
- Respiratory failure.
- Brain seizures.
- Hepatitis or AIDS through sharing needles.
- Decreased ability to combat infections.
- Violent, erratic or paranoid behavior.
- Anxiety, depression.
- Cocaine psychosis.
Health Risks Associated with the Use of Hallucinogens

- Sleeplessness and tremors.
- Convulsions.
- Heart and lung failure.
- Depression, anxiety and paranoia.
- Violent behavior.

For more information visit the Drug Free Schools and Campus Act page on TSTC's website.

04. Advocacy & Resource Center (ARC)

Texas State Technical College (TSTC) Advocacy & Resource Center (ARC) is dedicated to helping students develop transitional skills to help them achieve success in their academic, career and life goals in an inclusive environment that embraces the diversity of our students and community.

The ARC is designed to assist students with non-academic barriers and help the student to get back on the path toward graduation. The office functions as a resource and referral center. When life happens, we have resources that can help.

The ARC assists students who are food insecure by offering snacks, non-perishable food and personal hygiene items. This service is free for all students. We believe hunger should not be an obstacle in reaching your academic goal. Donations of nonperishable food and personal hygiene items are always welcome.

The ARC also provides referrals for child care. Some locations assist with child care stipends. Services are contingent to meeting the qualifications for each respective campus and child care servicing agency.

Transportation stipends are available at all campuses through ARC.
The ARC assists students with books from the Lending Library. Priority is given to Special Population students including: non-traditional, out-of-workforce individuals, single parents, Veterans and students who have a disability.

Each campus offers services unique to their specific student population. Please see the applicable college personnel on your campus to be directed to resources provided at your location.

Learn more about the ARC and TSTC's Culture of Caring on their [web page](#).

05. Student Success

The Office of Student Success

The Office of Student Success coordinates and implements student success initiatives that provide students with opportunities to achieve their academic, career and personal goals.

Student Success initiatives include:

- Supplemental Instruction and Tutoring services with tutoring sessions in academic and technical subject areas.
Tutoring services are provided face-to-face as well as virtually through the use of online tools and platforms, and MyTSTC Video Library. The video library consists of short video tutorials developed by our peer tutors and learning coaches on academic and technical courses.

- The HATSS Mentoring Program (Helping a TSTC Student Succeed) provides mentoring through guidance, academic support and the delivery of academic and financial aid policies critical to students on scholastic appeal and/or financial aid suspension appeal. The program includes interventions designed to improve student success.
- A referral system where students can be referred to campus and community resources.
- Seminars and workshops on academic policies, test-taking strategies, learning strategies, leadership qualities, time management, organization and related topics.
- GPA and completion rate forecasting to help students project where they stand academically at any point during the semester. This is especially helpful to students in the HATSS program, on scholastic probation and/or financial aid warning.

Helping a TSTC Student Succeed (HATSS) Mentoring Program

Students in the HATSS Mentoring Program are required to participate in all program interventions. HATSS Mentoring Program students who fail to participate in the program and fail to demonstrate academic progress risk being administratively withdrawn from all their classes. HATSS Mentoring Program students who are administratively withdrawn, who fail their classes or who drop all their classes on their own will be suspended for the following semester. Suspended students who wish to return to TSTC will again be required to appeal through the HATSS Mentoring Program. Past participation in HATSS Mentoring Program interventions, or lack thereof, will be considered for the appeal request. HATSS students who participate in the program interventions and who meet certain standards of academic progress by the end of the semester will be referred for consideration for financial aid assistance (when applicable) for the upcoming semester.

More information can be found on the Student Learning page on the Portal.

Supplemental Instruction and Tutoring

The Supplemental Instruction and Tutoring program at TSTC offers free tutoring in technical subject areas and academic support services to help students achieve their academic and career goals. Students can request tutoring services by clicking on the "Need Tutoring" icon located at the top of the Student Portal landing page. Students can also access the tutoring schedule, tutoring FAQs, the MyTSTC video library, Moodle reference videos and other resources by visiting the Portal and clicking on the Student Learning drop-down menu.

For more information, please contact Norma A. Salazar, statewide lead for Student Success, at 956-364-4557 or nasalazar@tstc.edu.

06. Career Services

TSTC provides job placement services to all students and graduates. Every effort is made to assist registered candidates as they seek full-time and part-time employment in business, industry and government. Career Services maintains information on employers, job listings and salaries. The staff schedules interview sessions, hosts industry job fairs for employers and coordinates communication between industry and the College. Students are able to search for jobs, communicate directly with employers and post their résumés by logging in to their hireTSTC account at www.hireTSTC.com. Students may access their hireTSTC account as early as their first semester.

Students may register as early as their first semester.

The College places a high priority on helping graduating students find employment in their chosen field of study. The philosophy of the College is that its job is not complete when the student finishes his or her studies, but continues with assistance in securing employment.

Career Services conducts follow-up studies which help to determine the effectiveness of TSTC’s curriculum and training and overall student success. Career Services is committed to equal opportunity in employment and does not discriminate on the grounds of race, color, gender, national origin, age, genetic information, disability, or veteran status. Facilities and placement services are available only to employers whose practices are consistent with this policy.

Some of the companies and government agencies which routinely employ TSTC graduates include: 3M, Brownwood Regional Medical Center, Phillips 66, Center Point Energy, Crown Lift Trucks, Eastman Chemical, Eastland Memorial Hospital, ICU Medical, Kirby Smith, Koenig & Bauer, National Field Services, NextEra Energy Resources, Oncor, Plastipak Packaging, Samsung, SEVEN Networks, TA Petro, Texas Instruments, Toyota Motor Manufacturing, Kalahari Resorts, and Valley Baptist Medical Center.

07. Student Leadership & Clubs
Clubs and Organizations

Students are encouraged to join or organize clubs with the guidance of a TSTC faculty or staff advisor. Some student clubs allow dual enrollment students to join. Clubs can be related to professional careers or nonacademic interests. The advisor is responsible for students’ actions in any activity sponsored by the organization or club. All clubs or professional organizations must be granted approval.

All officially recognized student organizations sponsoring social functions, fundraisers, and/or volunteer activities, either on or off campus, must coordinate and register such functions with the college. Student organizations and their advisors (sponsors) are responsible for compliance with TSTC policies and regulations and all applicable state and federal laws.

TSTC is judged by the actions of its students, on and off campus. Therefore, students will be responsible to college authorities for any questionable acts regardless of where they are committed.

Students interested in starting a new club or organization are encouraged to visit with the student club staff for further guidance.

Student Clubs/Organization Risk Management Policy

In accordance with Texas Education Code §51.9361, the advisor and president, or other designated officer, of each registered student organization shall attend a risk management program each academic year.

By law the training will include, but not be limited to, the following topics:

- Possession and use of alcoholic beverages and illegal drugs.
- Hazing.
- Sexual abuse and harassment.
- Fire and other safety issues.
- Student travel guidelines.
- Behavior at parties and other events held by the club or organization.
- Adoption of risk management policy.
- Issues regarding persons with disabilities.

Failure to comply may result in the student organization’s recognition being withdrawn, withheld or denied by the administration or Board of Regents of the college.

Free Speech

As an institution of higher learning, TSTC is dedicated to maintaining a college community that values and encourages the free exchange of ideas. The college will honor the rights of free speech, expression, petition and peaceful assembly as set forth in the U.S. Constitution.

Contact the Office of Retention Services about specific guidelines.

SkillsUSA

As a TSTC student you can participate in lots of intramural sports like football, softball and volleyball, but SkillsUSA is our technical “athletic program.” Our best compete at both the state and national competitions every year. We have a history of creating champions. For over 50 years, TSTC has more medal winners than all two- and four-year colleges in Texas combined.

Do you have a competitive spirit? Do you strive to be the best at what you do? Ask an enrollment coach which programs have SkillsUSA teams so you can join today.

Student Travel

Official student travel is defined as travel involving one or more students traveling to an event or activity that is organized or sponsored by TSTC and is located more than 25 miles from the college or during which the students will be staying overnight. International travel is not permitted at TSTC. The faculty/staff member or student club advisor is responsible for ensuring that all TSTC rules and regulations are followed. During any trips requiring an overnight stay, the advisor(s) and students must stay in the same hotel facility/complex. Students and advisor(s) must travel together during any off campus trips. The faculty/staff member or club advisor must complete and submit an official student travel packet at least 10 days
prior to the sponsored trip. For more information, please see the Student Organization Handbook.

Students in good standing, with at least a 2.0 GPA, and without holds on their account are eligible to travel. Each student will be evaluated on a case-by-case basis.

Students driving personal vehicles and/or transporting others in their personal vehicles on college trips must sign waivers and show proof of current liability insurance. Students will be required to ride in state vehicles or contracted transportation on long trips offered by the college. Those students traveling in a state vehicle sign a field trip release form. Students are not permitted to drive state vehicles. For more information, see Statewide Operating Standard (SOS) ES 3.22.

Student Leadership & Clubs Contact
Statewide
254-867-3608

08. Learning Resource Centers

The TSTC Learning Resource Center (LRC) serves as a central point for learning, exploration and community. The LRC provides the materials necessary to support the college’s curricula and programs, fostering information literacy and lifelong learning skills, while meeting the broad reading and informational needs of a multicultural campus.

The LRC provides resources for students and employees, including books, databases, e-books, media and serials. Electronic resources and databases are accessible 24/7. Trained staff are available to assist in locating and using library materials. Library services include but are not limited to: library tutorials and instruction videos, research help, program/subject LibGuides, and reference support available through chat and email. Physical library services, hours of operation, study spaces and collection availability vary by campus.

For more information, visit tstc.libguides.com, email asklibrary@tstc.edu or chat/submit questions at tstc.libanswers.com.

09. TSTC Café

TSTC provides food service at various campuses. Meals are not offered on weekends. Please contact your local food service
Meal plans are offered on the Harlingen, Sweetwater and Waco campuses. Purchase of a meal plan is required for housing residents under age 21. Visit tstc.edu/campuses for details.

12. Campus Security and Safety

01. Annual Security Report (Clery Report)

The Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act, originally known as the Student Right-to-Know & Campus Security Act, is a federal law that requires colleges and universities to publish an annual report by October 1 each year that contains data related to reports of crimes occurring on campus, at off-campus college facilities, residence halls and public property immediately adjacent to the campus. In addition, this report identifies specific policy statements.

The Campus Fire Safety Right-to-know Act became federal law with the passage of the Higher Education Opportunity Act of 2008. The new law requires colleges and universities that maintain on-campus housing facilities to compile an annual Fire Safety report that gives students, parents and the public current information about fires in on-campus housing.

The Texas State Technical College (TSTC) Police Department maintains a Crime Log with summary information about crimes reported to the College Police, and also maintains a Fire Log that records, by date reported, any fire that occurs in an on-campus student housing facility. The crime log and fire log are open for public inspection during normal business hours.

It is the policy of TSTC to fully comply with the federal mandates of the Clery Act by collecting and furnishing the Annual Security and Fire Safety Report.

The Clery Report contains data regarding specific criminal offenses that occurred on campus during the most recent calendar year and the two preceding calendar years, as well as the number of arrests for crimes occurring on campus. The Clery Report also includes geographical breakdown, expanded definition of campus, reporting of hate-crimes and a public crime log. TSTC’s Annual Clery Report is available online.

Information provided by the state of Texas concerning registered sex offenders may be obtained through the Department of Public Safety’s website. Additional information about college safety or information relating to state or federally mandated public information requirements, can be found on TSTC’s safety and security website.

02. Campus Carry

The unauthorized possession of any weapon in accordance with Title 10, Chapter 46.05 of the Texas Penal Code is prohibited on the physical premises of Texas State Technical College (TSTC) with the exception of a concealed handgun that a person is licensed to carry under Subchapter H, Chapter 411, Government Code in any area not properly designated as prohibited. TSTC is in compliance with SB11 of the 84th Texas Legislative session under the policies established by TSTC regarding the carrying of concealed handguns with a permit.

03. Racial Profiling Policy

It is the policy of the TSTC Police Department to police in a proactive manner and, to aggressively investigate suspected violations of law. Officers shall actively enforce state and federal laws in a responsible and professional manner, without regard to race, ethnicity or national origin. The right of all persons to be treated equally and to be free from unreasonable searches and seizures must be respected. Officers are strictly prohibited from engaging in racial profiling as defined in this policy. Racial profiling is an unacceptable patrol tactic and will not be condoned. This policy shall be applicable to all persons, whether drivers, passengers or pedestrians.

The prohibition against racial profiling does not preclude the use of race, ethnicity or national origin as factors in a detention decision. Race, ethnicity or national origin may be legitimate factors in a detention decision when used as part of an actual description of a specific suspect for whom an officer is searching. Detaining an individual and conducting an inquiry into that person’s activities simply because of that individual’s race, ethnicity or national origin is racial profiling.

Examples of racial profiling include, but are not limited to, the following:

- Citing a driver who is speeding in a stream of traffic where most other drivers are speeding because of the cited driver’s race, ethnicity or national origin.
- Detaining the driver of a vehicle based on the determination that a person of that race, ethnicity or national origin is
unlikely to own or possess that specific make or model of vehicle.

- Detaining an individual based upon the determination that a person of that race, ethnicity or national origin does not belong in a specific part of town or place.

The TSTC Police Department holds two basic principles based on the adoption of this definition of racial profiling:

- Police may not use racial or ethnic stereotypes as factors in selecting whom to stop and search, while police may use race in conjunction with other known factors of the suspect.
- Law enforcement officers may not use racial or ethnic stereotypes as factors in selecting whom to stop and search.

Racial profiling is not relevant as it pertains to witnesses, etc. Students who have questions or complaints about TSTC Police Department’s racial profiling policies or procedures may call the local campus office.

04. Parking & Transportation

Parking Permits
Parking permits will not be required this academic school year.

Vehicle and Parking on Campus
Students are to follow all federal, state and campus statutes pertaining to the operation or parking of any and all vehicles. Any damage caused by any unauthorized activities will be charged to the offender’s account. No repair work of any kind is to be done in any parking or common area. No vehicle may be left on jacks, logs, blocks, etc. Inoperable vehicles are not allowed on campus.

All vehicles are required to be in legal, operable condition to be parked on campus. Vehicles must have proper license, inspection, registration and parking permits (if applicable). Parking in the grass, on the sidewalk, in front of trash dumpsters or any area marked restricted is prohibited. Those in violation will be towed at the owner’s expense.

Eighteen-wheelers, trailers of any type, boats, recreational vehicles and all motorized off-road vehicles are prohibited on campus.

Any vehicle found in violation of these restrictions may be subject to a ticket, wheel lock or towing at the owner’s expense.
Operating any type of vehicle on campus is regulated by TSTC’s police department and requires your cooperation with all guidelines and safe-driving practices. As a TSTC student or employee, it is your responsibility to be familiar with these regulations and abide by them at all times. Read over the regulations carefully so you will avoid traffic and parking violations during your stay on campus. Additional information about parking and traffic rules and regulations can be found at tstc.edu/student-life/safety-and-security.

05. Making a False Alarm or Report

A person commits an offense under Section 42.06, Texas Penal Code, if he or she knowingly initiates, communicates or circulates a report of a present, past, or future bombing, fire, offense, or other emergency that he or she knows is false or baseless and that would ordinarily: (1) cause action by an official or volunteer agency organized to deal with emergencies; (2) place a person in fear of imminent serious bodily injury; or (3) prevent or interrupt the occupation of a building, room, place of assembly, place to which the public has access, or aircraft, automobile, or other mode of conveyance.

The offense under Section 42.06, Texas Penal Code, of making such a false alarm or report involving a public or private institution of higher education is a state jail felony. An individual adjudged guilty of a state jail felony shall be punished by confinement in a state jail for any term of not more than two years or less than 180 days and, in addition to confinement, an individual adjudged guilty of a state jail felony may be punished by a fine not to exceed $10,000.

06. Lost and Found

Lost and found items are turned over to the College Police Department or designated office, which makes every effort to return the items to the owner.

Provisions will be made for lost and found property to be reclaimed at the College Police Department, the Security Department or designated office for each campus from 8 a.m. to 5 p.m. Monday through Friday.

Proper identification, such as a Texas driver’s license, must be provided and the property must be sufficiently identified to be reclaimed.

If an owner cannot be contacted, the property will be held for 30 days. After 30 days unclaimed property will be disposed of in accordance with the Texas Code of Criminal Procedure Article 18.17.

07. Bicycle, Skateboard, Hoverboard (and other self-balancing boards/scooters) and Rollerblade Use Guidelines

Riding bicycles, roller skates, in-line skates, scooters, hoverboards, Swagways, Segways, IO Hawks, Skywalkers or other similar self-balancing boards/scooters, skateboards and similar coasting devices will be allowed as long as all safety precautions are taken. All transport devices must be operated in a safe manner that prevents or mitigates personal injuries and promotes active transportation on college property. They may not be utilized in buildings or left in hallways, staircases, classrooms, lounges or where otherwise prohibited by a campus rule, regulation or signage. Use of any of these items in a manner that damages property or endangers or inconveniences vehicles or pedestrians is prohibited.

08. Health Regulations

Students with Contagious Diseases

TSTC recognizes that contagious diseases are a serious threat to public health. We are committed to encouraging an informed and educated response to issues concerning infectious diseases. Individuals with HIV or hepatitis will not be discriminated against in admission to academic programs, health care or access to facilities. Students with HIV or hepatitis may attend any function or event if they are physically capable and do not pose health risks to others. All information regarding the medical status of students is confidential.

Bacterial Meningitis Notification

State law requires that information regarding bacterial meningitis be provided to college students. Bacterial meningitis is a serious, potentially deadly disease that can progress extremely fast. It is an inflammation of the membranes that surround the brain and spinal cord and can infect the blood. The disease can be treated, but those who survive may develop severe health problems and severe disabilities.

Vaccinations that are effective against 70% of the most common types of bacterial meningitis are available and required by those living in close quarters and by college students ages 21 or younger (22 and older are exempt). For more information, please contact your health care provider, the Texas Department of State Health Services or the Centers for Disease Control and Prevention.

09. Campus Assessment, Response and Education (CARE) Team

The TSTC CARE (Campus Assessment, Response and Education) Team strives to promote campus safety and student success throughout the TSTC community. The CARE Team meets on a weekly basis to ensure that students are connected to the resources they need and that appropriate steps are taken to keep all TSTC campuses safe. Any concerns about a
student should be reported to the CARE Team, whether it be a mental health concern, safety concern, behavioral concern, or any concern that may involve a student's well-being.

To submit a CARE Team report, fill out the form at https://cm.maxient.com/reportingform.php?TexasStateTC&layout_id=10. This form is located on the TSTC Portal homepage by clicking on the Maxient icon.

In case of an emergency, call your campus or local police/security department for immediate assistance. A CARE Team report can be filled out after immediate needs have been addressed.

10. **Pets on Campus**

Out of consideration for all members of the TSTC community and for reasons of health and cleanliness, pets are not allowed in college buildings, including offices as well as residential, recreational and academic buildings. TSTC permits service and approved emotional support animals in college facilities. See the Access and Learning Accommodations section for more details.

For more information, contact Access and Learning Accommodations (adarequest@tstc.edu) or the Housing Office.

13. **Student Rights and Responsibilities**

01. **Student Rights and Responsibilities**

As members of the college community, TSTC Students are entitled to certain rights associated with attending an institution of higher education. These rights are published online and found in SOS ES 3.23 Student Rights and Responsibilities.

Statement of TSTC Student Rights and Responsibilities

1. The right to freedom from discrimination on the basis of race, color, religion, gender, age, national origin, genetic information, sexual orientation, disability, veteran status, or any other class that may be specified by laws or the United States Constitution.
2. The right to develop one's individual potential.
02. Academic Student Responsibilities

1. Academic Freedom - Students and all other members of the College’s community are guaranteed the rights freely to study, discuss, investigate, teach, conduct research, and publish as appropriate to their respective roles and responsibilities. In the classroom and in conference, students have the right within the scope of the course of study to state divergent opinions, challenge ideas, and take reasoned exception to the data or the views offered. 
   **Responsibility** - Students and faculty share the responsibility to protect and to preserve conditions that are conducive to the learning process, including withholding judgment on matters of opinion, ensuring a fair hearing for divergent viewpoints, and observing rules of courtesy in the classroom.

2. Academic Standards - Students have the right to know the standards of academic performance established for each course in which they are enrolled. 
   **Responsibility** - Students are responsible for seeking clarification of any standard in question at the beginning of the term, for preparing assignments in advance of each class session, and for learning the content of any course of study for which they are enrolled. Rules applying to academic dishonesty must be followed, including those related to plagiarism and cheating.

3. Academic Evaluation - Students have the right to be evaluated solely on an academic basis, without regard to issues of diversity, opinions, or conduct in matters unrelated to academic standards. Students have the right to review tests and other written works after the instructor has evaluated them and are accorded protection through the Student Grievance Procedure against prejudiced or capricious academic evaluation.
   **Responsibility** - Students are responsible for bringing academic grievances to the attention of the instructor who performed the evaluation in an effort to resolve the issue. If the matter cannot be settled at this level, the grievance may be appealed in writing as outlined in the Student Grievance Procedure.

4. Confidentiality - Except when disclosure may be required by state or federal law, students have the right to confidentiality of information about views, beliefs, and political associations shared privately with instructors, advisers, or academic counselors. Judgment of a student’s ability and character may be provided under appropriate circumstances, normally with the knowledge and consent of the student.
   **Responsibility** - Students have the responsibility to state clearly what type of personal information should not be disclosed to others.

5. Academic Environment - Students have the right to pursue an education without disruption or interference and to expect enforcement of norms for acceptable classroom behavior that prevents disruption of the teaching/learning process.
   **Responsibility** - Students may not disrupt class or any other collegiate process by any means whatsoever (including sideline conversations, comments, arguments, intentional noisiness, or other activity which would hinder access to or utilization of academic information).

6. Non-Discrimination - Students have the right to learn in an environment where diversity is respected.
   **Responsibility** - Students are responsible for respecting diversity and for behaving courteously to faculty members and to other students in the classroom regardless of difference in sex, color, religion, gender, national origin, genetic information, disability, or veteran status.

7. Intellectual Property - Students have the right to expect that presentation of material in a class will be in compliance with copyright law and that their own creative work will not be disseminated or published without their permission.
Responsibility - Students who receive written notification from a faculty member that the information provided in his or her course is the faculty member's intellectual property shall not distribute, use for commercial purpose, or create derivative works of the intellectual property without obtaining the express permission of the faculty member. Students shall not assume permission absent written notification from a faculty member. Students shall also respect and treat in similar manner the intellectual property of other students.

03. Title IX

Prohibiting Sexual Misconduct and Gender-based Discrimination

To ensure and maintain a workplace and an educational environment free of, and protected from, sexual misconduct and discrimination based on gender. Texas State Technical College (TSTC) does not tolerate and expressly prohibits sexual misconduct which includes but is not limited to: sexual harassment, sexual assault, and/or sexual exploitation, stalking, dating and domestic violence. No person on the basis of sex, will be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity.

This practice applies to all members of the TSTC organization including all employees, students, and visitors. This practice and procedure includes incidents occurring on and off campus that would cause a substantial disruption in the learning environment. The procedures also include complaints filed by visitors on TSTC property. Respondents are subject to disciplinary action including possible suspension/expulsion from the College or separation of employment if found to be responsible.

Pertinent Information

Title IX of the Education Amendments of 1972 protects people from discrimination based on sex in education programs or activities which receive federal financial assistance. Title IX states, “No person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance.”

Definitions

Bullying: Repeated and/or aggressive physical or mental behavior that is intimidating or controlling.

Complainant: Individual making the complaint of sexual misconduct or gender discrimination.

Consent: Agreement to engage in sexual conduct or activity explicitly verbalized (saying “yes”) or given by active, willing participation by all parties involved.

Sexual consent cannot be given by anyone who is underage, who is under the influence of alcohol or drugs, or who is otherwise mentally impaired or incapable of giving knowledgeable, informed consent.

Cyber Bullying: Repeated and/or aggressive written, graphic, or verbal harassment that is transmitted through any electronic/digital device.

Domestic Violence: Violent or aggressive behavior within the home, typically involving the violent abuse of a spouse or partner.

Gender Discrimination: Discrimination based on sex, including discrimination based on pregnancy, childbirth, false pregnancy, termination of pregnancy, or recovery from any of these conditions. The federal Title IX regulation also prohibits a school from applying any rule related to a student’s parental, family, or marital status that treats students differently based on their sex.

Hazing: Acts related to the admission, initiation, or pledging of a formal or informal group that are likely to cause physical, psychological, or social harm.

Incapacitation: Lacking the ability or capacity to have a reasonable understanding of the situation one is in due to lack of sleep, disability, involuntary physical constraint, or consumption of alcohol or drugs.

Informal Resolution: An alternative to the grievance process that may be offered and facilitated by the College following the filing of a formal complaint and upon the voluntary, written consent of the parties.
Preponderance of the Evidence: The majority of the evidence which would cause a reasonable person to draw a conclusion.

Respondent: Individual against whom the complaint of sexual misconduct or gender discrimination is made.

Retaliation: An adverse action taken to try to keep someone from opposing a discriminatory practice.

Sexual Misconduct:

A. Sexual Harassment – includes unwelcomed gender based verbal or physical conduct that sufficiently severe, persistent, and pervasive. It has the effect of unreasonably interfering with, and/or denying or limiting someone’s ability to participate in or benefit from the College’s educational program and/or activities (hostile environment). It is based on power differentials (quid pro quo - “this for that”) and can be the creation of a hostile environment and/or that of retaliation.

B. Nonconsensual Sexual Contact (or Attempts) – intentional sexual touching, however slight, with an object and/or body part(s) by an individual towards another individual that is without consent or done so forcefully.

C. Nonconsensual Intercourse (or Attempts) – any form of sexual intercourse (vaginal, oral, or anal) regardless of how slight the penetration without consent. Also referred to as a sexual assault/rape.

D. Sexual Exploitation – obtaining a personal gain for one’s self or for another by taking advantage of an individual in a sexual nature. Examples include but are not limited to: invasion of sexual privacy, prostituting another person, nonconsensual video or audio taping of sexual activity, going beyond the boundaries of consent, engaging in voyeurism, knowingly transmitting a STD or HIV to another person, exposing one’s genitals in nonconsensual circumstances or inducing another to expose their genitals, and sexually based stalking and/or bullying.

E. Acquaintance Rape – nonconsensual sexual intercourse (rape/sexual assault) by someone known to the complainant.

F. Sexual Violence – act penetrated against someone’s will. Includes same sex violence/incidents.

G. Sexual Abuse – sexual interaction between an adult and a minor, including sexual intercourse, touching, or contact.

Stalking: Repetitive behavior that involves calling, texting, emailing, following, and/or otherwise communicating with an unwilling individual and which interferes with the peace of the individual and/or the individual’s community. It is behavior that is directed toward a specific individual or individuals that would cause a reasonable person to fear for his/her own or another’s safety and/or causes one to experience substantial emotional distress.

Complaints Involving Sexual Assault

TSTC recommends that victims of sexual assault report the offense immediately to TSTC Police Department/Security/Local Agency. Evidence of the assault should be preserved whenever possible. The victim should not bathe or shower and should not throw away or wash the clothes worn at the time of the assault. The victim will at all times be offered campus assistance in the reporting process and will, to the extent permitted by law, be offered anonymity if requested. Please see the section on “confidentiality” below to ensure complete anonymity.

Procedures For Complaints Made By Students

Students who believe they have been subjected to sexual misconduct or gender discrimination shall report to and consult with the designated Student Title IX Coordinator/Representative (available through any Student Rights and Responsibilities office).

Any employee, including Resident/Community Assistants (RA/CAs), who has received a report or complaint from a student relating to sexual misconduct or gender discrimination shall immediately notify and refer that student to the designated Student Title IX Coordinator/Representative and submit a report utilizing the Sexual Misconduct and Gender Based Discrimination form.

A. The complaint may be oral or in writing, utilizing the Sexual Misconduct and Gender Based Discrimination form. After receiving the complaint/report, the designated Student Title IX Coordinator/Representative shall initiate a thorough, prompt, and equitable investigation. Immediate interim actions may take place before the investigation is complete if determined necessary. These may include an interim suspension, no contact orders, or removal/change from campus housing. When issued, the involved parties shall be expected to adhere to the terms of the interim actions. Violations of interim measures shall not be tolerated and shall be addressed immediately. Students who violate such measures shall be subjected to further disciplinary action up to and including suspension and expulsion.

B. The Investigator shall follow the procedures outlined in the TSTC Code of Conduct under “Disciplinary Procedures.” The only exception shall be the formal review process for both parties which shall follow the steps outlined below under “Formal Review Process.” If the respondent is found responsible of the accusations, then the proper sanctions shall be imposed or mediation shall take place when it is acceptable to both parties. In incidents of sexual
Complainant's Rights

violence, mediation shall never be acceptable. If the complainant is found to have made a false accusation, then disciplinary sanctions may be imposed.

C. If the complaint involves actions of an employee at TSTC, the Investigator shall immediately notify the designated Employee Title IX Coordinator/Representative who shall initiate the employee investigation in accordance with the steps outlined in Operating Requirements No. 2 above.

D. In all cases, a prompt, fair, and impartial investigation and resolution shall be afforded.

E. The Investigator will report to the Title IX Coordinator/Representative for reporting purposes the date of the alleged misconduct, type of alleged misconduct, result of investigation, actions taken, if there was a formal review, results, and any other pertinent information. The complete investigation documentation shall be kept in the student’s disciplinary records for the duration of the records retention length.

Formal Review Process

A request for a formal review may be submitted in writing to the appropriate Title IX Coordinator/Representative by either the respondent or complainant within three working days of receipt of the notice of the outcome of the investigation. The Title IX Coordinator shall arrange a review panel of three TSTC employees who are appointed to serve as the Review Board.

A. The College shall convene the Review Board in a timely manner, usually within five business days, but in certain situations it may be longer. Both parties shall be notified in advance of the date, time, and location of the review and the panelists. Both parties shall be afforded an opportunity to object to any member of the Review Board. This assures that the Title IX requirement to afford both parties a fair, impartial, and objective review by unbiased decision makers.

B. Communication with both parties shall continue during this process. Within two business days prior to the date of the review, a list of witnesses and all documentation must be submitted to the Title IX Coordinator by both parties. The objective of the Review Board shall be to assess the findings and sanctions imposed. The Review Board may not impose more severe penalties.

C. Because these proceedings are not designed to be a legal or judicial hearing, the Review Board operates on the basis of “Preponderance of the Evidence.” The decision shall be made by majority vote.

D. If a student or employee brings an attorney for the review, he/she must provide sufficient notice (at least two business days) for TSTC to have an attorney present as well. Either attorney shall only serve in an advisory role and shall not be permitted to ask questions, present evidence, or make arguments before the Review Board. The presence of an attorney may cause a delay in the process. If an attorney refuses to follow these requirements, the Review Board may remove him or her.

E. All reviews shall be closed.

Retaliation

Any form of retaliation by either party will not be condoned by the College and the College will take immediate action to rectify the situation and additional disciplinary action may occur, including separation from the College. Retaliation includes but is not limited to: intimidation, discrimination, coercion, or threats to either party.

Confidentiality

Privacy of individuals and confidentiality of information given will be maintained to the extent permitted by law throughout all phases of these procedures. TSTC strongly supports a complainant’s interest in confidentiality in cases involving sexual misconduct. The College will try to honor this request except when the safety of the campus community is at risk or if it may create a nondiscriminatory environment for others. All employees, this includes Resident/Community Assistants (RA/CA’s), are considered responsible employees and have the duty to report sexual misconduct to the proper Title IX Coordinator/Representative and must report the name of the person disclosing the sexual misconduct, the alleged perpetrator, and all relevant facts regarding the incident, including date, time, and location. In cases involving minors, state mandatory laws may require disclosure. Steps to ensure the complainant’s protection will be taken.

Texas State Technical College will provide written notification to students and employees of dating violence, domestic violence, sexual assault/misconduct, or stalking (whether the offense occurred on or off campus) of their rights and options.

Complainant’s Rights

A. The right to a prompt and equitable resolution of sex discrimination complaints.

B. The right to present his/her case or have the College present. This includes the right to adequate, reliable, and impartial investigation of complaints, the right to have an equal opportunity to present witnesses and other evidence, and the right to the same review processes, for both parties.

C. The right to be notified of the time frame within which: (a) the College will conduct a full investigation of the complaint; (b) the parties will be notified of the outcome of the complaint; and (c) the parties may file a review, if applicable.

D. The right to be informed of and have access to campus resources, advisory services and information on counseling and medical resources/services.

E. The right for the complaint to be decided using a preponderance of the evidence standard (i.e., it is more likely than
not that sexual harassment or violence occurred).
F. The right to be notified, in writing, of the outcome of the complaint.
G. Right to not have irrelevant past sexual history admitted.

Respondent's Rights

A. The right to a prompt and equitable resolution of all credible complaints of sexual misconduct made in good faith to college officials against the accused.
B. The right to present his or her case. This includes the right to adequate, reliable, and impartial investigation of complaints, the right to have an equal opportunity to present witnesses and other evidence, and the right to the same review processes, for both parties.
C. The right to be notified of the time frame within which: (a) the College will conduct a full investigation of the complaint; (b) the parties will be notified of the outcome of the complaint; and (c) the parties may file a review, if applicable.
D. The right to be fully informed of the nature, rules and procedures of the campus conduct process and to timely written notice of all alleged violations within the complaint.
E. The right to be informed of and have access to campus resources, advisory services and information on counseling and medical resources/services.
F. Right to not have irrelevant past sexual history admitted in a hearing. (Unless previously known behavior is similar to the alleged in the current investigation and there is evidence of a pattern of behavior.)

Reduce the Risk of Being Sexually Assaulted

1. Know your sexual intentions and limits. You have the right to say “NO” to any unwanted sexual contact. If you are uncertain of what you want, ask your partner to respect your feelings.
2. Communicate with your partner. Do not assume that someone will automatically know how you feel or will eventually “get the message” without you having to say anything. Just as it’s okay to say “NO” to unwanted activities, it’s okay - and important - to give clear consent to activities you would like to engage in. Avoid giving “mixed messages”; back up your words with a firm voice and clear body language (e.g., if you consent, you can verbalize with “yes” or by your active participation).
3. Remember that some people think that drinking, dressing provocatively, or going to your or someone else’s room is saying you are willing to have sex. Be clear upfront about your limits in such situations.
4. Listen to your gut feelings. If you feel uncomfortable or think you might be at risk, leave the situation immediately and go to a safe place.
5. If you feel you are being pressured or coerced into sexual activity, you have a right to state your feelings and/or leave the situation. If you are concerned about the other person becoming angry, it is okay to make up an excuse to leave or create time to get help.
6. Attend large parties with friends you trust. Agree to “look out” for one another. Leave with the group, not alone. Avoid leaving with people that you don’t know very well.

Texas State Technical College will provide written notification to students and employees regarding community-related services, victim advocacy, legal assistance, visa and immigration assistance, student financial aid, and other services available for victims, both within the institution and in the community. In addition, the Title IX Coordinator/Representative will provide written notification to victims about options for, and available assistance in, changing academic, living, transportation, and working situations along with information on protective measures. This information will be provided regardless of whether the victim chooses to report the crime to campus police or local law enforcement. This request can be made to the Title IX Coordinator/Representative.

To report an incident of Sexual Misconduct or Gender-based Discrimination, or to obtain a list of available local, state, or federal victim services, please contact your local Title IX representative:

Bystander Intervention

Bystander Intervention is a philosophy and strategy for prevention of various types of violence, including bullying, sexual harassment, sexual assault, and intimate partner violence. Simply put, it’s when someone interrupts a potentially harmful situation. That includes stopping actions or comments that promote sexual violence.

TSTC encourages members of our community to speak up and say something if they see a potentially harmful situation.

Five Steps to Accountability

1. Notice the event.
2. Recognize it as a risky situation.
3. Take responsibility for helping in the situation.
4. Have the skills necessary to intervene.
5. Take Action!
Intervening in Any Situation

- Gather details about the situation.
- Ask for help from other bystanders or friends.
- Be sensitive and understanding.
- Intervene early and in a safe manner.
- Consider multiple options.
- Don’t be afraid to call for help! Resident Assistants (RA)/Community Assistants (CA), TSTC Police, local police at 911

Nonemergency Intervention

- Don’t make assumptions about the people involved or the situation.
- Keep your eyes open for red flags.
- Set a goal or a plan.
- In conversations, keep in mind that it is about mutual respect.

Emergency Intervention

- Try to keep everyone calm.
- Know your exit strategies.
- Understand that situations can escalate quickly.
- Be clear and concise when asking for help.
- Keep yourself and others safe.
- Tell whoever involved that you are committed to helping them.
- Encourage value-based decisions.

TSTC has an ongoing comprehensive prevention and awareness campaign and can be found on the TSTC website under Title IX.

04. Code of Student Conduct

Purpose
It is the practice of Texas State Technical College to encourage fair and efficient solutions for problems arising out of the student/college relationship. As responsible members of the college community, students and organizations/clubs are expected to maintain the highest level of academic and social conduct and are responsible for knowing TSTC’s policies and standards. The Code of Student Conduct (the code) is reviewed every academic year, but it is a living document that can be modified to comply with federal, state or local law.

Definitions

Board of Regents – governing body of TSTC, appointed by the governor of Texas.

Code of Student Conduct (the code) – standards of conduct and procedures established to provide a full and fair opportunity for review of alleged misconduct.

College – Texas State Technical College.

College Premises – all buildings, facilities, land, and other property that is owned, used, leased or controlled by the college.

Complaint – a statement of the essential facts constituting a violation of the code or policy of the college.

Conduct Officer – college official authorized to investigate alleged violations of the code and to administer the procedures and sanctions of the code.

Disciplinary Conference (Conference) – an informal conversation with the student to review the alleged violation(s) and give them an opportunity to respond directly and present relevant information including witnesses, documents, etc.

Drug Paraphernalia – any equipment, product or material that is used for making, using or concealing drugs, regardless of that item’s intended use at the time of its production.

Established Student Relationship – from the time of application for admissions to the college through an award of degree which will include breaks of enrollment if the student continues to have an association with the college.

Notice of Complaint – the initial document that identifies alleged misconduct in violation of the code.

Review – a request made by a student who disagrees with the conduct officer’s decision or sanction and requests that the Statewide Review Board Committee evaluate the decision.

Review Administrator – Chair/individual assigned to collect, schedule and be a liaison for the review process.

Preponderance of Evidence – the majority of the evidence would cause a reasonable person to support a conclusion (it is more likely than not it happened, 51% rule).
Residential Facilities – any facility operated by the college or under agreement by an outside agency, with sole purpose of providing housing for students.

Student – an individual who has established a relationship with the college for the purpose of taking a course or courses.

Statewide Review Board Committee – a group convened at the request of a student or student group to evaluate the conduct officer’s decision or sanction placed on an individual.

Working Day – Monday through Friday, except for official college holidays or college closings.

Application
- The code shall provide an educational and non-adversarial process designed to resolve matters concerning student conduct. It is not designed to be a legal or judicial process.
- The code is designed to be reliable, fair, and effective.
- Individuals who have established a student relationship with the college are subject to the code.
- The code shall apply to all aspects of campus life, including those in the classroom, on college property, in residential facilities and at an off-campus sponsored activity. It may also apply to conduct that occurs off-campus.
- The code shall operate by preponderance of evidence. (The majority of the evidence would cause a reasonable person to support a conclusion.)
- Disciplinary records shall be maintained by the conduct officer or designee of the local campus in accordance with the college’s records and retention policy.
- The college's disciplinary process shall proceed during the pendency of any related criminal or civil proceedings and shall not be subject to reconsideration even if related charges are dismissed or otherwise resolved.
- Student clubs/organizations shall be expected to conduct themselves in a manner consistent with the college’s function as an educational institution. Student clubs/organizations must observe all international, federal, state or local laws, as well as the college’s policies, including the code, both on-campus and off-campus.

Prohibited Conduct

The Conduct Officer may initiate disciplinary proceedings against a student for violations of the code. Specific examples of prohibited conduct subject to disciplinary action include, but are not limited to, the following:

A. Acts Violating Statewide Operating Standards (SOS) and College Policies.
B. Acts of Dishonesty
   1. Intentionally furnishing false or misleading information to the college or a college official.
   2. Forging, altering, falsifying or misusing any college document or instrument of identification.
   3. Intentionally interfering with any election process.
C. Acts Affecting the College Community
   1. Engaging in disruptive behavior or activity, including but not limited to such acts defined in the Texas Education Code.
   2. Failure to comply with the reasonable directive(s) of a college employee, which includes resident/community assistants.
   3. Failure to heed an official summons within the designated time or failure to identify oneself to an institutional representative in response to a request.
   4. Violation of a rule or regulation relating to residence life policies, a breach of a housing contract/lease or motor vehicle regulations.
   5. Gambling in any form.
   6. Failure to fulfill financial or contractual obligation(s) to the college.
   7. Engaging in or use of obscene, lewd or vulgar language, behavior and display regardless of the medium.
   8. Violating the TSTC Pet Policy
D. Acts Affecting Property or Service
   1. Theft or attempted theft of property or services.
   2. Possession of stolen or lost property.
   3. Destruction or damage to college property or the property of others.
   4. Unauthorized possession, duplication or use of access devices to college property or the property of others.
   5. Unauthorized entry onto or use of college or individual’s premises, equipment or resources.
E. Acts Affecting Computing Resources or Technology
   1. Unauthorized access, use or misuse of college computing resources, systems or data.
   2. Disrupting college computer operations or the availability of computing resources.
   3. Using another individual’s identification, password or other credential.
   4. Unauthorized use or sharing of copyrighted materials through electronic means.
   5. Initiating or contributing to attacks against external networks or college systems.
   6. Use of college computers to access lewd, offensive or pornographic material.
   7. Transporting copies of college programs, records or data to another person or computer without written authorization.
8. Using the college’s computer resources for personal gain.

F. Acts Affecting Health, Safety or Welfare
1. Engaging in physical or verbal abuse, domestic violence, threats, intimidation, harassment, bullying, coercion, physical/electronic stalking or any other conduct that threatens or endangers the health, safety or welfare of another person.
2. Possession, use, sale or distribution of any quantity, whether usable or not, of an illicit drug (including synthetic), narcotic, controlled substance, illegal drug paraphernalia or equipment. This includes medication not prescribed to oneself.
3. Public intoxication, use, possession or distribution of an alcoholic beverage(s).
4. Being under the influence of alcohol, an illicit drug, narcotic, synthetic or controlled substance.
5. Providing minors or any other individual intoxicating beverages in violation of any state, federal or local law.
6. Hazing, as defined by the Texas Education Code, including engaging in, soliciting, encouraging, directing, aiding or voluntarily submitting in behavior that could cause physical, mental or emotional harm to another or is considered humiliating or degrading.
7. Engaging in acts of gender discrimination, sexual misconduct, abuse, assault or harassment.
8. Engaging in speech, either orally or in writing, that is directed to incite, produce lawless action or intimidate another.
9. Possession or use of a dangerous weapon, defined as any instrument, device or object capable of inflicting physical harm. Examples of a dangerous weapon include unlicensed firearms, explosive, devices, dangerous chemicals, illegal length knives, fireworks, compressed air guns, pellet guns, stun or zip guns, tasers, BB guns, paintball guns, batons, nunchucks, etc.
10. Misuse or tampering of fire or other life safety equipment or interfering with any college or public safety function.
11. Reporting a false emergency or threat.
12. Smoking inside campus buildings or designated nonsmoking areas. Smoking means the lighting or carrying of a lighted cigar, cigarette, pipe or similar device, including an e-cigarette.
13. Engaging in acts which violate TSTC, Centers for Disease Control and Infection (CDC), and/or Occupational Safety and Health Administration (OSHA) safety and/or wellness guidelines.

G. Acts Violating Law
1. Engaging in conduct that constitutes a criminal offense under federal, state or local law whether convicted or not, and regardless of whether the incident happened on campus or off campus.
2. Breaching the peace or abetting or inciting another to breach the peace.
3. Disorderly conduct as defined by state law or any activity that includes, but may not be limited to, physical or verbal abuse, injury to another person, indecent displays or use of indecent language, nonconsensual acts of sexual contact/assault or disrespect for the rights and privileges of others.

H. Facilitating Acts of Misconduct
1. Planning or facilitating an act of misconduct.
2. Being present during the commission of an act of misconduct, supporting/encouraging the act or not reporting the act to the appropriate officials.

I. Acts interfering with the Disciplinary Process
1. Failure to comply with a request to schedule and attend a conference with the conduct officer within a designated time.
2. Failure to comply with sanction(s) imposed under the code or by the college.
3. Falsifying or misrepresenting information at any stage of the disciplinary process.
4. Knowingly initiating a false complaint to a college official.
5. Attempting to discourage a person’s participation in or use of the disciplinary process.
6. Harassment, intimidation, coercion, bribery or retaliation against a college official or person involved in the disciplinary process.

J. Violations of Academic Integrity
Includes, but is not limited to, cheating, plagiarism, collusion, falsifying academic records, any act designed to give unfair advantage to the student or any attempt to commit such an act.
1. Cheating: Activity that includes, but is not limited to:
   a. Copying from another student’s assignment, test, or other academic work.
   b. Possessing material, such as class notes or textbooks, during a test that is not authorized by the instructor of record.
   c. Collaborating, without authority, or seeking aid from another student during an examination or assignment, or in preparing academic work.
   d. Using, buying, selling, stealing, transporting, or soliciting, in whole or in part, the contents of an unadministered test, test key, homework solution or computer program.
   e. Substituting for another student or permitting another student to substitute for oneself to take a test or prepare other academic work.
   f. Paying, offering money or other valuables to or coercing another person to obtain an unadministered
2022-2023 Catalog & Student Handbook

**Misconduct**

test, test key, homework solution or computer program, or to obtain information about an unadministered test, test key, homework solution or computer program.
g. Falsifying laboratory reports and/or other academic work offered for credit.
h. Taking, keeping, misplacing or damaging property of the college, or of another, if the student knows or reasonably should know that an unfair academic advantage would be gained by such conduct.
i. Willfully failing to comply with instructions given by a person administering a test.
j. Discussing, without express permission from the instructor of record, the contents of an examination with another student who will take the examination.
k. Divulging the contents of an examination for the purpose of preserving questions for use by another when the instructor has designated that the examination is not to be removed from the examination room or not to be returned to the student.
l. Misrepresenting facts, including providing false grades or resumes, for the purpose of obtaining academic or financial benefit or for the purpose of injuring another student academically or financially.

2. Collusion: The unauthorized collaboration with another person in preparing academic or lab assignments offered for credit, or the collaboration with another person to commit a violation of academic integrity.

3. Falsifying Academic Records: Activity that includes, but is not limited to, the alteration of grades or other falsification of an academic record such as a grade report, test paper, registration material or reporting form used by the college.

4. Plagiarism: Activity that includes, but is not limited to, the appropriation, buying, receiving as a gift or obtaining by any means another’s work and the submission of another’s work as one’s own academic work offered for credit.

**Disciplinary Procedures**

The conduct officer or designee shall have primary authority and responsibility for administering student discipline. The Conduct Officer or designee shall assess all suspected and reported violations of the Code. Complaints regarding alleged misconduct must be submitted to the Student Rights and Responsibilities Office as soon as possible after the alleged violation.

After completing an initial inquiry, the Conduct Officer or designee may:

- Dismiss the allegations as unfounded.
- Summon the student for a conference.
- Dismiss, upon completion of the conference, the allegations or impose disciplinary sanctions.
- Impose immediate interim action if the continued presence of the student poses a danger or perceived threat to persons or property or a disruption of the academic process of the College.

**Notice of Complaint**

- The conduct officer or designee shall deliver a notice summarizing the alleged misconduct either by mail, hand delivery, or electronic means. All students are responsible for maintaining a current physical mailing address with the College. If documents are sent electronically, the student’s official TSTC email address shall be used.
- The conduct officer or designee shall give notification of a date by which the student has to complete the conference. If the conference is not completed by that date, the student automatically waives his/her right to a conference, and the Conduct Officer or designee shall make a decision based solely on the information at hand.

**Notice of Disciplinary Findings**

- If it is determined that the greater weight of evidence or preponderance of evidence indicates that a student engaged in a violation of the Code, then the Conduct Officer or designee shall deliver a Notice of Disciplinary Findings.
- The Notice of Disciplinary Findings shall include information regarding the Review process.
- This notice shall inform the student of the findings, any imposed sanctions or restrictions, and the student’s right to appeal, if applicable.

**Sanctions for Misconduct**

Admonition - Oral or written reprimand.

Discretionary sanctions - These include work assignments, service to the college, etc.

Disciplinary probation - Probation indicates that the student has engaged in unacceptable behavior and that a period of
observation is needed to substantiate that behavior has improved. Additional conditions may be imposed during the probationary period, such as counseling, educational seminars/courses, etc. An additional violation may result in more severe action.

Withholding of grades, official transcript, certificate of completion, or degree.

Suspension of rights and privileges – This type of suspension includes, but is not limited to, participation in intramurals/recreation center, participation in extracurricular activities, election to office, restrictive building or area access, revocation of housing or visitation privileges, etc.

Administrative withdrawal from course(s).

Bar against readmission – This action is for a specific period of time and/or may involve the student’s drop from current enrollment entirely or from enrollment in one or more courses.

Restitution – This action requires reimbursement for damages to property or for misappropriation of property. Restitution may be achieved either monetarily or by specific duties.

Failing grade or other academic penalty.

Denial of degree – A denial shall become part of the student’s permanent record.

Revocation of a degree, grade, or certification – A revocation shall become part of the student’s permanent record.

Suspension – A suspension shall result in the student’s removal from the college for a specified period of time. A suspended student shall be administratively withdrawn from TSTC, prohibited from entering the college’s premises, and blocked from future registration until approval is granted by the Conduct Officer or his/her designee. Suspension shall become a part of the student’s permanent record and may be removed at the completion of the sanction, at the student’s request.

Expulsion – This action results in permanent removal from the college. An expelled student shall be administratively withdrawn from TSTC and prohibited from entering the college’s premises. Expulsion shall become part of the student’s permanent record.

Other penalties as seen fit by the appropriate administrator at the college.

Non-Academic Transcript Notation – In accordance with Texas State law under House Bill 449, postsecondary educational institutions are required to include on the student’s transcript, official or unofficial, a disciplinary notation stating that the student has been expelled.

Review Process

- Only sanctions that include restrictions, loss of privileges, withholding/revocation of grades or degrees, suspension, or expulsion shall be reviewed by the Statewide Review Board Committee (Committee). All Title IX cases will follow the Sexual Misconduct Policy and the policies and procedures of the Title IX Review Board.
- A student shall have three working days to request a review from the Review Administrator.
- The student shall be notified within five working days of the time, date, and location of the review by the Review Administrator. Any delays due to extenuating circumstances shall be documented, and all parties shall be notified accordingly.
- At least two working days prior to the hearing, a list of witnesses and documentation must be provided to the Review Administrator.
- The Conduct Officer or designee shall present the College’s case followed by the student’s presentation. Each Party shall have the opportunity to present testimony and evidence in support of his position. The Committee shall be allowed to question both parties and request additional information or clarification. Review procedures shall be confidential and closed to the public.
The Committee shall consist of five (5) members of the campus community, to include a Chairperson who also serves as the Review Administrator, three (3) faculty/staff, and two (2) students. The Chairperson and the faculty and staff members shall be approved by the Executive Management Council. Designated students selected to serve on the Committee must be currently enrolled and must be in good disciplinary standing.

The Chairperson shall direct proceedings of the review and participate fully in all reviews to include voting. The objective of the Committee is to review the findings and sanctions originally imposed by the Conduct Officer or designee. The Committee may not impose more severe penalties. The decision shall be made by majority vote. All votes shall be recorded by secret ballot and tabulated by the Chairperson.

The Chairperson will have three (3) working days to provide written results of the review to all involved.

General Rules for Reviews

- Reviews are informal proceedings, and traditional rules of the courtroom evidence shall not apply. However, the conduct officer or his/her designee must show preponderance of evidence and that the sanction imposed was reasonable based upon the circumstances.
- An advisor, attorney, or support person for the student may be present for the review; however, the advisor, attorney, or support person may not make statements, represent the accused, or question witnesses.
- If an attorney accompanies a student for the review, the attorney shall not be permitted to present evidence before the Committee. The college reserves the right to counsel in the event it is deemed necessary. The time frame for scheduling a review may be extended if the college elects to retain counsel.

Academic Dishonesty Procedures

Procedures for discipline due to academic dishonesty will first be considered and reviewed by Student Learning.

Notice of Complaint

- The instructor of record shall give advance written notice to the student to inform of the alleged violation and to request a meeting at a designated date, time, and location. The instructor shall notify the student of the alleged violation and provide the student an opportunity for explanation.
- If student chooses not to attend the meeting, the student automatically waives his/her right to a conference, and the faculty member will make a decision based solely on the information at hand.

Notice of Disciplinary Findings

- The instructor shall assess and render academic sanctions by completing the Academic Integrity Discipline Report Form. The student shall receive a copy of the completed form.
- The completed Academic Integrity Discipline Report Form shall inform the student of the findings, any academic sanctions imposed, and the student’s right to a review if applicable. The faculty member shall report the violation and sanctions by submitting the form to the Student Conduct Officer via the official incident reporting system.

Academic Sanctions

- May include reduced or failing grade on an assignment or examination.
- May include reduced or failing grade in a course.
- May be rendered in addition to other disciplinary measures imposed by TSTC.
- Further disciplinary sanctions may occur if circumstances warrant or multiple academic dishonesty violations.

Review Process

Students may request a Review of the instructor’s decision to the Statewide Review Board Committee. A written, final decision will be provided to the student by the Associate Provost or designee within five working days of the Statewide Review Board Committee’s formal findings letter.

05. Amnesty for Alcohol and Drug Emergencies

Alcohol poisoning and drug overdose are serious and life threatening medical emergencies. Students may encounter this type of emergency during their time at Texas State Technical College. Sometimes students are afraid to seek emergency medical care when alcohol poisoning or drug overdose is suspected because they do not want to get themselves or others in trouble. In order to encourage students to seek emergency medical care, TSTC has instituted the Student Amnesty for Alcohol and Drug Emergencies.

Amnesty means current TSTC students can avoid formal college disciplinary action and the creation of a formal disciplinary
Student Amnesty for Alcohol and Drug Emergencies applies in the case of the following:

- Possession of alcohol or drugs by a minor (minor in possession).
- Unauthorized possession or use of alcohol or drugs on campus.
- Consumption of alcohol by a minor (minor in consumption).
- Use of drugs.
- Intoxication as the result of using alcohol (including public intoxication).

The Procedure

1. Call 911 when alcohol poisoning or drug overdose is present or suspected.
2. Stay with the person under the influence.
3. Cooperate with all emergency personnel.

After the Incident

1. Student(s) will be referred to the Student Rights and Responsibilities office and will be evaluated for amnesty.
2. Student(s) eligible for amnesty will still be required to participate in an educational component and may be referred for an individual consultation. However, they will not face formal disciplinary action.
3. Student(s) who decline or fail to attend the educational component or fail to comply will become subject to formal disciplinary action.

There are limitations to this program, and inclusion in the program is not automatic.

This program is separate, but in congruence with, the state amnesty policy, Senate Bill 1331 (Texas 911 Lifeline legislation), which provides amnesty against criminal citations for those seeking medical attention as the result of an illegal action, such as minor in consumption or possession of alcohol by a minor. Student Amnesty for Alcohol Emergencies provides protection against formal disciplinary action by the college, whereas the Texas 911 Lifeline legislation provides protection against legal action.

Amnesty for Victims of Sexual Misconduct (Title IX/VAWA)

The TSTC community encourages students to report violations involving sexual misconduct which includes sexual harassment, sexual assault, dating violence and stalking. Sometimes victims are hesitant to report to college officials because they fear that they themselves may be charged with policy violations. TSTC will not pursue disciplinary action against students (complainants or witnesses) for disclosure of personal consumption of alcohol or other drugs (underage or illegal) where the disclosure is made in connection with a good faith report or investigation of prohibited conduct and the personal consumption did not place the health or safety of any other person at risk. Refer to Title IX & Violence Against Women Act (VAWA) flyer for more information.

06. Compact With Texans

Texas State Technical College (TSTC) is a public coeducational institution of higher education offering courses of study in technical education leading to the award of Certificates and Associate of Applied Science Degrees. TSTC also provides workforce training to business and industry, continuing education to the public, and training programs for community and state economic development.

Compact With Texas Complaint Representatives:

chemese.armstrong@tstc.edu
512-759-5907
TSTC campuses are located at Abilene, Brownwood, Breckenridge, East Williamson County, Fort Bend County, Harlingen, Marshall, North Texas, Sweetwater and Waco. TSTC serves students from more than 220 counties in Texas, and TSTC graduates may begin their careers in high-paying jobs across the state or continue their education at colleges and universities.

TSTC graduates are highly valued by business and industry for their work ethic, knowledge and workplace skills.

**TSTC’s Customer Service Goal**

It is the goal of Texas State Technical College faculty and staff to provide a level of customer service that is beyond expectation. We pledge to be . . .

- Friendly to all we meet in our work,
- Helpful in all that we do,
- Courteous in all of our dealings,
- Responsive to customers’ needs, and
- Accountable for our actions.

We will deliver the highest quality services possible with the highest regard for honesty, integrity, and ethical behavior.

**TSTC’s Formal Written Complaint /Compact With Texans Complaint Handling Procedure**

It is the practice of Texas State Technical College to seek fair, efficient, and equitable solutions for problems that arise out of the student/college relationship and to allow any student to be heard when he/she feels that his/her rights have been violated or that an action taken by an employee of the College is unfair.

This procedure is available to all students to present complaints concerning disagreement or dissatisfaction arising out of the student/college relationship.

The filing of a student grievance is not to be interpreted as a way to change existing school policy or rules. The policy, rules or regulations of the College are of themselves not subject to a grievance process, only their implementation. This student grievance procedure is simply a way for the student to indicate that either:

1. An action taken by a school official or employee is inappropriate, improper, or too harsh; or
2. He/she is being treated differently from other students.
Most questions or complaints can be resolved through routine channels. Students are encouraged to discuss questions or complaints with the instructor or employee with whom the question or complaint has arisen. Complaints received verbally and resolved through routine channels are not considered official written complaints and are not subject to this procedure.

The right of a student to prompt an equitable resolution of the complaint filed shall not be impaired by the student's pursuit of other remedies, such as filing of a grievance with the responsible federal department or agency. The Student Grievance and Complaint Procedure is posted to the college website, see SOS ES 3.24 Student Grievances and Complaints.

**Nonacademic Grievance Procedures**

A. Initial Contact – The student must first contact the parties responsible for the action or decision that is the basis of the grievance. Students are encouraged to resolve the matter through discussions with the relevant College personnel most directly associated with the matter. College personnel with whom a concern is raised by a student shall address the matter in an open and professional manner and take reasonable and prompt action to resolve it informally. The initial contact should occur within 10 working days from the date of the action or decision that is the basis of the grievance.

B. Representative – If unsuccessful in resolving the problem, the student must contact the Representative at his/her local campus. The Representative's name is available online in the TSTC Catalog and Student Handbook. The Representative shall assist the student by:
   1. Reviewing the grievance policy with the student. The Representative shall also provide the student with a copy of or a link to this SOS ES 3.24 Student Grievances and Complaints
   2. Providing the student with the Effective Customer Service form (PDF), so that a formal written grievance may be submitted. The form is also available online in the TSTC Catalog and Student Handbook. The student shall include a summary of the nature of the grievance on the form or in an attached writing.
   3. Acknowledging receipt of the grievance in writing within five working days. The notice is intended to inform the student that the matter is receiving attention and to provide the student with an estimate of the length of time needed to resolve the issue.

C. The grievance shall be submitted to the immediate supervisor or designee of the party whose actions are being grieved. The immediate supervisor or designee shall propose a resolution consistent with TSTC policies and with applicable local, state, and federal laws. The immediate supervisor or designee shall notify the student and Representative of the resolution within 15 working days from receipt of the grievance. The immediate supervisor shall also provide the student with a written copy of the proposed resolution.

D. If dissatisfied with the proposed resolution, the student may request that the Statewide Review Board Committee review the grievance. This request must be made in writing to the Representative within three (3) working days of receipt of the letter outlining the proposed resolution and must specify what in the resolution is unsatisfactory. The committee shall meet within 10 working days of receiving the student's request to review all available documentation. The Statewide Review Board Committee shall provide its written decision to both the student and the employee within five (5) working days from the date of the review. In the event that extenuating circumstances prevent the Statewide Review Board Committee from completing its investigation and/or report within five (5) working days, the student shall be notified of a new time frame. The Statewide Review Board Committee's decision shall be final.

**Academic Grievance Procedures**

A. Initial Contact – The student must first contact the parties responsible for the action or decision that is the basis of the grievance. Students are encouraged to resolve the matter through discussions with the relevant College personnel most directly associated with the matter. College personnel with whom a concern is raised by a student shall address the matter in an open and professional manner and take reasonable and prompt action to resolve it informally. The initial contact should occur 10 working days from the date of the action or decision that is the basis of the grievance.

B. Representative – If unsuccessful in resolving the problem, the student must contact the Representative at his/her local campus. The Representative's name is available online in the TSTC Catalog and Student Handbook. The Representative shall assist the student by:
   1. Reviewing the grievance policy with the student. The Representative shall also provide the student with a copy of or a link to this SOS ES 3.24 Student Grievances and Complaints
   2. Providing the student with the Effective Customer Service form (PDF), so that a formal written grievance may be submitted. The form is also available online in the TSTC Catalog and Student Handbook. The student shall include a summary of the nature of the grievance on the form or in an attached writing.
   3. Acknowledging receipt of the grievance in writing within five working days. The notice is intended to inform the student that the matter is receiving attention and to provide the student with an estimate of the length of time needed to resolve the issue.

C. The grievance shall be submitted to the Provost or designee of the party whose actions are being grieved. The Provost or designee shall propose a resolution consistent with TSTC policies and with applicable local, state, and federal laws. The Provost or designee shall notify the student and Representative of the resolution within 15 working days from receipt of the grievance. The Provost or designee shall also provide the student with a written
copy of the proposed resolution.  
D. If dissatisfied with the proposed resolution, the student may request that the Statewide Review Board Committee review the grievance. This request must be made in writing to the Representative within three (3) working days of receipt of the letter outlining the proposed resolution and must specify what in the resolution is unsatisfactory. The committee shall meet within 10 working days of receiving the student's request to review all available documentation. The Statewide Review Board Committee shall provide its written decision to both the student and the employee within five (5) working days from the date of the review. In the event that extenuating circumstances prevent the Statewide Review Board Committee from completing its investigation and/or report within five (5) working days, the student shall be notified of a new time frame. The Statewide Review Board Committee's decision shall be final.

Review Procedures

1. The Chair of the Statewide Review Board Committee will be responsible for assembling the committee to hear the review.
2. The decision of the Statewide Review Board Committee is final.
3. In extenuating circumstances, the time frame(s) may take longer than expected and the student with the grievance will be notified with a new time frame.
4. The Statewide Review Board Committee has a maximum of five working days from the date of the review to respond to the student and employee with a decision in writing.

Compact With Texans Complaint Handling Procedures

A. The Effective Customer Service Form must be completed and submitted to the local Representative. The form and the Representative's name are available online in the TSTC Catalog and Student Handbook.
B. The Representative shall acknowledge receipt of the grievance in writing within five (5) working days. The notice is intended to let the student know the matter is receiving attention and to provide the student with an estimate of the length of time needed to resolve the issue.
C. The Representative shall contact the immediate supervisor about the complaint. The supervisor shall review the complaint and interview the employee and/or any witnesses, if applicable.
D. The immediate supervisor shall provide a letter within 15 working days to the complainant that addresses the complaint and what actions, if any, were taken by TSTC. This letter shall also acknowledge that the complaint has been addressed and resolved in a reasonable time period and in a manner consistent with TSTC policies and with applicable local, state, and federal laws.

Student disciplinary decisions that involve severe disciplinary penalties are not subject to the Student Grievance Policy, but should be run through the student conduct process.

Discrimination of a student or a Title IX grievance will be handled in accordance with 6OS 2.4.15 Prohibiting Sexual Misconduct and Gender-Based Discrimination

08. Family Educational Rights and Privacy Act (FERPA)

TSTC complies with the Family Educational Rights and Privacy Act and informs students of their rights under the act. Students' rights covered by the act are as follows:

1. The right to inspect and review the academic record within 45 days after the day Texas State Technical College receives a request for access.  
   A student should submit to the Office of the Registrar or other appropriate official a written request that identifies the record(s) the student wishes to inspect. The school official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the school official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.
2. The right of a student to petition to the college to amend or correct any part of his/her academic record that is believed to be inaccurate, misleading or in violation of the privacy or other rights of the student. When the college decides it will not amend or correct a student's record, the student has a right to a hearing to present evidence that the record is inaccurate, misleading or in violation of the privacy or other rights of the student.  
   A student who wishes to petition to amend or correct a record may submit a written statement to the custodian of student records identifying the part of the record the student wants changed and specifying why it should be changed. If the college decides not to amend the record as requested, the college will notify the student in writing of the decision and the student's right to a hearing regarding the request for amendment.
3. The right to provide written consent before the college discloses personally identifiable information contained in the student's education records, except to the extent that FERPA authorizes disclosure without consent.

Texas State Technical College discloses education records without a student's prior written consent under the exception for disclosure to school officials with legitimate educational interests. A school official is as a person employed by Texas State Technical College in an administrative, supervisory, academic or research, or support staff
position (including law enforcement unit personnel and health staff); a person approved by and under contract to TSTC in a faculty position; a person or company with whom the college has contracted (such as an attorney, auditor or collection agent); a person appointed by the governor and confirmed by the state Senate as a member of the Texas State College Board of Regents; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks.

A school official has a legitimate educational interest if the official needs to review an educational record in order to fulfill his or her professional responsibilities for Texas State Technical College.

Upon request, the college may also disclose educational records without student written consent to the following:

a. parents of an eligible student who claim the student as a dependent for income tax purposes (form available in the Enrollment Center);
b. in order to comply with a judicial order or a lawfully issued subpoena;
c. appropriate parties in a health or safety emergency;
d. an alleged victim of any crime of violence or non-forcible sex offense; the disclosure may only include the final results of any institutional disciplinary proceeding with respect to that alleged crime or offense, regardless of whether the institution concluded a violation was committed;
e. the general public if the institution determines as a result of disciplinary hearing that the student committed a crime of violence or non-forcible sex offense in violation of the institution’s rules or policy or state or federal law, as authorized by state law;
f. parents of a student under the age of 21 regarding a college’s determination that the student violated federal, state or local law or institutional policy governing the use or possession of alcohol or a controlled substance.

4. The right of a student to consent to release of semester credit hours taken at other institutions to the Texas Higher Education Coordinating Board.

5. The right of any person to file a complaint with the Family Education Rights and Privacy Act Office, Department of Education, Family Policy Compliance Office, 400 Maryland Ave. SW, Washington, DC 20202-4605, if TSTC violates the FERPA.

Directory Information

Under the Family Education Rights and Privacy Act of 1974, the following is designated by TSTC as directory information and may be made public unless the student desires to withhold all or any portion of it: name, preferred address, preferred telephone number, email address, classification of coursework level, enrollment status, major field of study, participation in officially recognized activities and sports, weight and height of members of athletic teams, dates of college attendance, photograph images, degrees, certificates and awards received and most recent previous educational agency or institution attended by the student. A currently enrolled student may prohibit the release of directory information by completing an appropriate request form in the Enrollment Center during registration or within the first five class days of each term. Under the Privacy Act of 1974, official records are not open to the public and will not be divulged without consent from the student. Minors attending the college have the same right regarding their records as adult students. If a student is still a legal dependent of a parent or guardian, the parent has the right to access the records of the dependent student provided the parent can establish this dependency as defined by the Internal Revenue Code of 1954, section 152. This request must be made in person at the Enrollment Center by providing a copy of the most recent federal income tax return and required picture identification.

If you have any questions concerning disclosure of information contact the Office of the Registrar

Student Privacy and FERPA updates are available at TSTC’s website.

Use of Student Photographs and Signatures for Publications

It is the policy of Texas State Technical College to utilize images or signatures of students for promotion or advertising purposes after obtaining the student's written permission to do so. A release form shall be obtained for each set of student images or signatures retained for use by the college. The release form shall be maintained in the student's permanent academic record file. Other copies may be maintained elsewhere at the college's decision.

14. Faculty Listing

01. Faculty

TSTC faculty bring to the classroom years of industry experience and education.

[link]

15. Workforce Training & Continuing Education

Basic Electrical Theory
The AC/DC Electrical course teaches fundamentals of AC/DC electrical systems used for power and controls in industrial, commercial, agricultural, and residential applications. Students learn industry-relevant skills included in subject areas such as basic electrical circuits, electrical measurements, circuit analysis, inductance and capacitance, combination circuits, and transformers. This course supports the SACA Core Micro-Credential Standard C-201. This course uses the Amatrol Trainer 990-ACDC1.

Modules included in the course:
- Basic Electrical Circuits.
- Electrical Measurements.
- Circuit Analysis.
- Inductance and Capacitance.
- Combination Circuits.
- Transformers.
- Fire and Electrical Safety.
- Types of PPE.
- Grounding Control Systems.

Program Information:
Prerequisite: Pre-course assessment evaluation (Recommended)
Course: Amatrol V11133-AA00UEN-E1 - AC/DC Electrical Systems (990-ACDC1)
Program Total: 48 hours
Tuition & Fees: $750

For more information, please contact:
workforcetraining@tstc.edu

Certified Nurse Assistant (CNA)
The CNA program is designed to assure the successful certification of the CNA student, by preparing the student in providing optimal patient care. The TSTC Workforce Training & Continuing Education department collaborates with the Medical Industry to assure the program exceeds standards and expectations. CNA students are prepared with the knowledge, skills, abilities, professionalism, team work and ethics to succeed and grow. Students should anticipate a course that is rigorous and fast paced. Students will complete 60 hours of lecture and skills practice (labs) and assignments, in addition students will complete 40 hours of clinicals at local facilities. After successful completion of the program students are registered to take the NNAAP Examination, which consists of a written and hands on skills test.

Supplies and Books
The program provides text book and student workbook and lab consumables. Students are required to purchase a few items: scrubs, stethoscope, second hand watch and appropriate shoes. Attendance is strictly monitored and students are required to make the commitment up front.

Program Information
Course: NURA 1001 - CNA
Program total: 100 hours
Tuition & Fees: $1,600

For more information, please contact:
workforcetraining@tstc.edu

Certified Production Technician

This program offers certified production technician training via a fully remote virtual reality Oculus equipment/licenses/soft skills delivery, ending in certification testing. This 100% remote training will also seek to provide participants with career guidance and connections to manufacturers and allow for a strategic shift to prioritize high-skilled, hands-on learning for in-person training while expanding current reach to the broader military veteran population with foundational training. Expanding our Heroes Make America partnership, via Heroes Connect, looks to be the natural next step in expanding our workforce footprint in manufacturing. Veterans with related experience and an industry certification are prepared to earn, on average, $20 per hour to start as a certified production technician.

Topics address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency. Learning outcomes/objectives are determined by local occupational needs and business and industry trends.

Student learning outcomes:
- Communicate effectively
- Integrate technology
- Learn effectively - use academics effectively
- Demonstrate cooperative/teamwork skills
- Apply safety in the workplace
- Think critically and creatively
- Demonstrate responsible work ethics

Program outcomes:
- Apply safe and productive practices in the workplace.
- Utilize quality control practices to meet production standards.
- Implement manufacturing processes and production methods.
- Recognize potential maintenance issues with production equipment.
CPT101 Safety in Manufacturing Production

It is important to be safe while you work. This course provides you with an overview of the Occupational Safety and Health Administration's General Industry Designated Training Topics. The course is intended to provide entry level general industry workers a broad awareness on recognizing and preventing hazards in a general industrial setting. The training covers a variety of safety and health hazards which a worker may encounter at a general industry site.

CPT102 Quality Practices and Measurement

In order to meet a customer's needs, quality consistent products must be produced. This is accomplished through the knowledge of the equipment operator. Each machine operator determines both the quality and quantity of production from his/her equipment. In this course you will learn basic quality practices and measurements that will enable you to produce high quality products.

CPT103 Manufacturing Processes and Production

Upon successful completion of this course, the student should be able to identify the job skills necessary to have a successful career. Topics include listening skills, oral communication, human relations, decision making/problem solving, how to work as a team, and resource management.

CPT104 Maintenance Training

Preventive maintenance and production housekeeping are very important aspects of equipment operations. In this course the student will learn how to monitor production equipment for both routine and preventive maintenance.

Program Information:

Total Program: 188.5 hours
Tuition & Fees: $2,500

For more information, please contact:

workforcetraining@tstc.edu

Commercial Driver's License

Overview of the State of Texas Class A Commercial Driver's License written test. Includes preparation for mastery of the Commercial Driver's License written examination, general truck-driving skills with hands-on component, and instruction coordinated with the Department of Transportation.

The Harlingen and Fort Bend County locations are third-party examining sites. Students completing this training will be able to:

- Describe basic inspection and testing techniques used for a pre-trip inspection.
- Describe basic air brakes inspection and test.
- Demonstrate proper shifting, double clutching, backing skills, coupling and uncoupling, and yard skills.
- Understand and pass commercial rules, general knowledge, combination and air brakes exams.
- Upon passing the course (70 percent), each student will receive a certificate of completion and obtain their
Prerequisites: Be at least 18 years of age, valid Class C Driver's License, obtain a driving record, pass a DOT physical and drug screen as required by the Department of Transportation.

The Commercial Driver's License program is available at the Fort Bend County, Harlingen and Marshall campuses.

**Program Information**

Course: CVOP 1013 - Professional Truck Driver  
Program total: 160 hours

Tuition & Fees:  
Fort Bend County: $3,900  
Harlingen: $4,500  
Marshall: $3,900

For more information, please contact:  
transportationtraining@tstc.edu

**Electrical Motor Control Systems**

Electric motor control teaches electric relay control of AC electric motors found in industrial, commercial, and residential applications. Learners gain understanding of the operation, installation, design, and troubleshooting of AC electric motor control circuits for many common applications. Develop skills in interpreting schematics, system design, motor start/stop circuits, motor sequence control, reversing motor control, and motor jogging. Safety is emphasized throughout, highlighting motor safety, lockout/tagout and safety interlocks. This course supports the SACA Core Micro-Credential Standard C-202.

Modules included in the course:
- Introduction to Electrical Motor Control.
- Manual Motor Control and Overload Protection.
- Control Transformers.
- Control Ladder Logic.
- Control Relays and Motor Starters.
- Reversing Motor Control.
- Automatic Input Devices.
- Basic Timer Control.

**Program Information:**

Prerequisite: Pre-course assessment evaluation (Recommended)  
Course: Amatrol V17401-CL00JEN-E2 - Electric Motor Control (85-MT5)  
Program Total: 40 hours  
Tuition & Fees: $625

For more information, please contact:  
workforcetraining@tstc.edu

**Electrical System Installation**

This course provides information on the wiring requirements, material identification, and the installation and splicing of...
wiring. There are hands-on exercises for wiring installation. Upon completion of this course, the participants will be able to properly identify wiring materials, determine the wire required for a given installation, and install and splice wiring. This course supports the SACA Core Micro-Credential Standard C-206.

Modules included in the course:
- Introduction to Electrical Control Wiring.
- Panel Wiring Fundamentals.
- Grounding Control Systems.
- Connecting Wires in Panels.
- Wiring a Motor.
- Electro-Pneumatic Valves.
- Electro-Pneumatic System Installation.

Program Information:
Prerequisite: Pre-course assessment evaluation (Recommended)
Course: Amatrol WX57206-AA00JEN-E1 - C-206 Electrical System Installation 1 Course (SACA)
Program Total: 40 hours
Tuition & Fees: $625

For more information, please contact:

workforcetraining@tstc.edu

Electrocardiography Technician (EKG)
The Electrocardiogram (EKG) program prepares the student in administering the 12 Lead EKG on patients. The course teaches the fundamentals of cardiovascular anatomy and physiology. Students will learn basic electrocardiography procedures, interpretation of basic dysrhythmias, and appropriate treatment modalities. EKG’s are critical in helping determine a patient’s heart health. EKGs check the electrical activity of the heart to access heart rhythm, rate, strength and timing and pointing to signs of heart disease. An EKG is one of the first assessments provided after a heart attack and helping prescribe treatment.

Employment or possible career opportunities are:
- Cardiology Assistant.
- Cardiology Technician.
- Electrocardiogram Technician.
- Cardiac Monitor Technician.
- EKG Technician.
- Hospitals.
- Physicians’ Offices.
- Clinical Laboratory.

Program Information
Course: ECRD 1011 - EKG
Program total: 96 hours
Tuition & Fees: $1,200
FAST Trac Airframe & Powerplant

The Texas State Technical College (TSTC) FAST Trac Airframe and Powerplant Program was developed to prepare veterans, active service personnel and civilian trainees to become well-rounded airframe and powerplant technicians with upward mobility potential. The curriculum is designed for experienced technicians and serves as a refresher program of study around FAA-required curriculum.

Students will focus on the study of Federal Aviation Administration (FAA) subject matter in the general, airframe and powerplant curricula with a focus on building knowledge of new materials, techniques and physical skills. This program is designed to refresh the knowledge and skills not provided by civilian or military training. Through hands-on labs, students will gain the experience that is required to obtain the civilian Aviation Maintenance Technician certificate.

The FAST Trac Airframe and Powerplant program is available at the Abilene campus.

The program runs four days per week, three hours per day over a 13-week period for a total of 160 hours of training.

Prerequisites: FAA authorization to take General and Airframe, General and Powerplant, or General, Airframe, and Powerplant written, oral and practical examinations.

General 40 hours  
Airframe: 60 hours  
Powerplant: 60 hours  
Total Program: 160 hours  
Tuition and Fees: $4,500

General and Airframe
Study of Federal Aviation Administration subject matter in the general and airframe curricula with a focus on building knowledge of new materials, techniques and physical skills. This training is designed to provide the knowledge and skills not provided by civilian or military training and experience that are required to obtain the civilian Aviation Maintenance Technician certificate. Upon completion of this course, students will be able to:

- Weigh aircraft, perform weight and balance checks, and record data and information derived from weight and balance checks.
- Write descriptions of work performed, including aircraft discrepancies, corrective actions using typical aircraft maintenance records and required maintenance forms, records and inspection reports.
- Apply information contained in FAA and manufacturers' aircraft maintenance specifications, data sheets, manuals, publications, and related FAA regulations, airworthiness directives and advisory material.
- Analyze technical data and exercise mechanic privileges within the prescribed limitations.
- Perform precision measurement procedures; identify and select nondestructive testing methods; perform nondestructive testing and heat-treating procedures; identify and select aircraft hardware and materials; fabricate and install fluid lines and fittings; and inspect welds.
- Identify principles of basic aerodynamics; identify design principles of aircraft structures; and describe the theory of flight.
- Start, ground operate, move, service and secure aircraft; identify typical ground operation hazards and safety;
inspect, identify, remove and treat aircraft corrosion.

- Calculate and measure electrical power, voltage, current, resistance and continuity; determine the relationship of voltage, current and resistance in electrical circuits; interpret aircraft electrical circuit diagrams, including solid-state devices and logic functions; inspect and service batteries.
- Repair and inspect aircraft electrical systems components; install, check and service airframe electrical wiring, controls, switches, indicators and protective devices; and inspect, check, troubleshoot, service and repair alternating- and direct-current electrical systems.
- Inspect, check, troubleshoot, service and repair heating, cooling, air conditioning, oxygen and pressurization systems and air cycle machines; airframe ice and rain control systems; smoke and carbon monoxide detection systems; and aircraft fire detection and extinguishing systems.
- Inspect, check, service, troubleshoot and repair aircraft fuel and management systems, fuel quantity-indicating systems, and hydraulic and pneumatic systems, and identify and select hydraulic fluids.
- Inspect, service and repair landing gear, retraction systems, shock struts, brakes, wheels, tires and steering systems, and service landing-gear systems.
- Select, install and remove special fasteners for metallic structures; inspect and repair sheet metal structures; install conventional rivets; form, lay out and bend sheet metal.
- Perform airframe conformity and airworthiness inspections.
- Rig fixed-wing aircraft; balance, rig and inspect movable primary and secondary flight control surfaces; and jack aircraft.

Prerequisites: FAA authorization to take General and Airframe written, oral and practical examinations.

Powerplant
Study of FAA subject matter in the General and Powerplant curricula with a focus on building knowledge of new materials, techniques and physical skills. This training is designed to provide the knowledge and skills not provided by civilian or military training and experience that are required to obtain the civilian Aviation Maintenance Technician certificate. Upon completion of this course, students will be able to:

- Weigh aircraft, perform weight and balance checks, and record data and information derived from weight and balance checks.
- Write descriptions of work performed, including aircraft discrepancies, corrective actions using typical aircraft maintenance records and required maintenance forms, records and inspection reports.
- Apply information contained in FAA and manufacturers' aircraft maintenance specifications, data sheets, manuals, publications and related FAA regulations, airworthiness directives and advisory material.
- Analyze technical data and exercise mechanic privileges within the prescribed limitations.
- Apply information contained in FAA and manufacturers' aircraft maintenance specifications, data sheets, manuals, publications and related FAA regulations, airworthiness directives and advisory material.
- Analyze technical data and exercise mechanic privileges within the prescribed limitations.
- Identify principles of basic aerodynamics; identify design principles of aircraft structures; and describe the theory of flight.
- Start, ground operate, move, service and secure aircraft; identify typical ground operation hazards and safety; inspect, identify, remove and treat aircraft corrosion.
- Calculate and measure electrical power, voltage, current, resistance and continuity; determine the relationship of voltage, current and resistance in electrical circuits; interpret aircraft electrical circuit diagrams, including solid-state devices and logic functions; inspect and service batteries.
- Inspect, check, service and repair propeller synchronizing systems, ice control systems, fixed-pitch, constant-speed and feathering propellers and propeller governing systems, and repair aluminum alloy propeller blades.
- Identify the components of a reciprocating engine; inspect, troubleshoot, check, service and repair engine instrument systems; inspect, service and repair lubrication and exhaust systems.
- Maintain powerplant electrical systems and components; maintain powerplant ignition, starting and fire protection systems.
- Inspect, check, service, troubleshoot and repair engine fuel systems and components, fuel metering systems and components, reciprocating and turbine engine fuel metering systems, engine ice and rain control systems, heat exchangers, superchargers, turbine engine airflow and temperature control systems.
- Overhaul reciprocating engines; inspect, check, service and repair reciprocating engines and engine installations.
- Overhaul turbine engines; inspect, check and repair turbine engines.
- Perform powerplant conformity inspections and powerplant airworthiness inspections.

For more information, please contact workforcetraining@tstc.edu.

FAST Trac Dental Assistant
The purpose of this program is to familiarize students with all areas of administrative and clinical dental assisting, focusing on the responsibilities required to function as an assistant in a dental practice. This course covers the following key areas and topics:

- Introduction to the dental office, and history of dentistry and dental assisting.
- Legal aspects of dentistry, including policies and guidelines.
- Introductory oral anatomy, dental operations and dental equipment.
- Introductory tooth structure, including primary and permanent teeth.
- The oral-related structures.
- Dental hand pieces, sterilization and other areas.

**Program Information:**

Course Contact Hours: 100 hours
Clinical Hours: 40 hours (Optional)

Tuition & Fees: $2,595

Tuition Includes:
- Textbooks
- TSBDE Exam Fee and Proctoring
- CPR Certification Course
- Clinical Externship Placement–40 hours

Tuition Does Not Include:
- DANB-RHS/ICE Exam Fees
- Immunizations
- Background Check
- Scrubs (Required)

NOTE: Enrolled students transferring out of state are eligible for the online course with clinical externship placement. Outside of Texas, most states and employers require DANB-RHS/ICE certification. The cost for taking the RHS and ICE exams together is $375.

**For more information, please contact:**

workforcetraining@tstc.edu

**FAST Trac Welding (GMAW & FCAW)**

The Welding program is a 160 clock-hour program that provides both didactic and experiential learning in fillet and groove welds 2F-4F and 2G-4G (GMAW & FCAW).

This course is designed to instruct welding and safety guidelines using the Flux Core Arc Welding process (FCAW) & Gas Metal Arc Welding process (GMAW) on carbon plate for fillet welds and Groove Welds.

It teaches the basics and intermediate of the craft, students start with safety, cutting, grinding and GMAW & FCAW welding on carbon steel for fillet welds. In addition, students will culminate their ability to weld in three positions (horizontal, vertical and overhead).

**Program Information:**
Nine weeks of training (160 clock hours)
Lab (108 Hours)
Online Instruction (52 hours)

Tuition & Fees: $2,706
Materials and labs included
Program Total: 320 hours

For more information, please contact:
workforcetraining@tstc.edu

FAST Trac Wind Energy Technician

The FAST Trac Wind Energy Technician program prepares students for an entry level position in the high-growth wind industry. This fast-paced 10-week program will provide you with the knowledge and certifications needed to work in the wind industry. Students will learn the essential skills through classroom and lab exercises that are required of entry level wind technicians. Students should be prepared for a course that is rigorous and fast paced. After successful completion of the Certified Electronics Technician Associate section, students will be registered to take the CET(a) Examination. Successful completion of the exam will provide students with an industry recognized certification as well as nine (9) credit hours that can be applied toward an Associate’s Degree Plan with Texas State Technical College.

Program Information:

Courses:
- CETT 1003 - DC Circuits (48 hours)
- TECM1003 - Technical Calculations (48 hours)
- WIND 1000 - Introduction to Wind Energy (32 hours)
- WIND 1002 - Wind Safety (16 hours)
- CETT 1005 - AC Circuits (48 hours)
- CETT 1025 - Digital Fundamentals (48 hours)
- ELMT 1005 - Basic Fluid Power (8 hours)
- ELMT 2035 - Certified Electronics Technician Training (48 hours)

Program Total: 296 hours
Tuition & Fees: $3,425
Materials & Test Fees: $175
(Books, Tools, and Labs Included)
Total Cost: $3,600

For more information, please contact:
workforcetraining@tstc.edu

Heavy Duty Diesel Engine Specialist
Diesel Technology students will acquire the knowledge and skills necessary for the repair of diesel engines and troubleshooting/diagnostic procedures through a combination of lecture and lab work over the course of six weeks. Our classrooms and labs are interactive and have a real-world setting. This program gives students knowledge and hands-on skills to prepare them for a rapidly growing industry that is requiring a growing number of qualified technicians.

The Heavy Duty Diesel Engine Specialist program is available at the Harlingen campus.

Program Information
Course: DEMR 1001 - Heavy Duty Diesel Engine Specialist
Program Total: 240 hours
Tuition & Fees: $4,500

For more information, please contact:
transportationtraining@tstc.edu

Industrial Maintenance Electrical and Instrumentation (IM E&I) Technician

The Industrial Maintenance Electrical and Instrumentation (IM E&I) Technician program serves to build connections with the manufacturing industry, providing transitioning service members, National Guard and reservists, veterans, military spouses, and civilians with the skills and certifications to find and excel in careers in manufacturing. Resources are also available to assist manufacturers with recruiting, hiring and retaining talent from the military community.

Certifications include:
NCCER - Industrial Maintenance Electrical and Instrumentation (IM E&I) Technician, Level 1

Program Information:

Courses:
- Electrical Safety for Qualified Electrical Personnel
- Motor Control and Troubleshooting
- Industrial Automation Principles
- Controller Technology and Programming
- Drive Configuration and Troubleshooting
- NCCER Core and Industrial Maintenance

Program Total: 347 hours
Tuition & Fees: $2,750
For more information, please contact:
workforcetraining@tstc.edu

Industrial Systems Training Program

Manufacturing is a diverse and rewarding high-growth career in all industry segments and sectors in nearly every community across Texas. It is the backbone of our state's economy, driving solutions and innovations while improving the quality of our lives.

Industrial systems is an emerging field that integrates electrical and mechanical engineering, advanced manufacturing and computer technology. This is a 12-week course of accelerated training for in-demand industry certifications.

Basic Electrical Theory (48 hours)
Prepares individuals to connect, adjust, operate, troubleshoot and analyze electrical circuits using basic electrical components such as resistors, capacitors, inductors, DC motors, solenoids, manual switches, relays, fuses, circuit breakers, transformers and indicators. Other key skills include adhering to electrical safety rules, reading electrical circuit diagrams, applying Ohm’s Law and Kirchoff’s Law, using digital multimeters, interpreting series/parallel circuits, and assessing power/circuit protection.

Electrical Motor Control Systems (40 hours)
Prepares individuals to connect, adjust and operate electrical motor control circuits using these electrical components: 3-phase AC motors, reversing magnetic motor starters with overloads, drum switches, control relays, timer relays, push-button switches, selector switches, limit switches, pressure switches and float switches. Other key skills include adhering to motor control safety rules, reading ladder logic circuit diagrams, checking for proper ground connections, wiring motors for high and low voltage, and interpreting common motor control application circuits.

Variable Frequency AC Drives (32 hours)
Prepares individuals to connect, configure, adjust and operate AC variable frequency motor drives using basic volts per hertz mode. Key skills include adhering to VFD safety rules, operating VFD in manual using keypad, performing normal VFD startup and shutdown, performing emergency shutdown, viewing and editing parameters, changing speed with potentiometer, interfacing/configuring external discrete I/O, interpreting error codes, resetting drive errors, and configuring for acceleration, deceleration and braking.

Electrical System Installation (40 hours)
Prepares individuals to install and test/commission electrical motor control circuits using these electrical components: control cabinet enclosures, 3-phase AC motors, reversing magnetic motor starters with overloads, control relays, timer relays, push-button switches, selector switches, limit switches, pressure switches, indicators, electro-pneumatic solenoid valves, safety disconnect switches, and circuit protection. Key skills include adhering to motor control installation safety rules, using proper PPE, reading electrical wiring installation diagrams, sizing circuit protection, installing components on DIN rails and cabinet panels, installing and testing ground systems, wiring motors for high and low voltage, selecting and preparing wire for installation, attaching of wire to terminal strips and components/motors, and routing of wire with raceways/conduits.

Mastering Basic PLCs (Compact Logix) (40 hours)
Prepares individuals to program, configuration, adjust, monitor and operate industrial programmable logic controller (PLC) systems. Key skills include adhering to PLC safety rules, performing normal startup/shutdown, operating PLC in different modes, performing emergency shutdown and reset, monitoring for proper operation through indicators and PC-based PLC software, configuring processor software drivers for communication to PC, configuring and loading of HMI programs, operating HMI with PLC, configuring PLC discrete I/O, transferring programs between PC and PLC processor, interpreting basic and intermediate level PLC ladder logic programs (with contacts, coils, timers, counters, math, comparison instructions), PLC project creation/editing, and interpreting common PLC program logic applications using electro-pneumatic actuators and on/off motor control systems.
Pneumatic Systems (40 hours)
Prepares individuals to connect, adjust, operate and analyze pneumatic circuits using these components: quick-connect fittings, tee and cross fittings, air compressors, filters, regulators, lubricators, gauges, rotameters, directional control valves, flow control valves, check valves, cylinders and motors. Other key skills include adhering to pneumatic safety rules, reading pneumatic circuit symbols and diagrams, applying the Force-Pressure-Area formula, converting absolute/gauge pressure units, performing reciprocating compressor startup/shutdown, applying Pascal’s Law, setting pressure switch, filter draining, setting lubricator rate, lubricator refilling, and measuring delta P.

Mechanical Power Systems (48 hours)
Prepares individuals to install, adjust, align, tension, operate and analyze basic mechanical power transmission drive systems using these components: motors, shafts, flexible jaw couplings, fractional horsepower (FHP) chain drives, FHP V-belt drives, spur gear drives, pillow block bearings and flange bearings. Other key skills include adhering to mechanical drive safety rules, mounting and leveling motors, testing and correcting for soft foot, installing components and shafts with keyways, sizing keys, aligning shafts using feeler gauge and straight-edge method, calculating speed and torque from component size ratios, interpreting rotary power specifications, determining mechanical efficiency, greasing bearings using a grease gun, refilling oil lubrication reservoirs, interpreting lubrication specifications, and identifying component given a model number.

Smart Automation Certification Alliance (SACA) certifications included in training:
- C 201 Electrical Systems
- C 202 Electric Motor Control Systems
- C 203 Variable Frequency Drive Systems
- C 206 Electrical System Installation
- C 207 Programmable Controller Systems
- C 209 Pneumatic Systems
- C 210 Mechanical Power Systems

Program Information:
Total Program: 288 hours
Tuition & Fees: $4,500

For more information, please contact:
workforcetraining@tstc.edu

Mastering Basic PLCs (CompactLogix)
Mastering Basic Programmable Logic Controllers – AB CompactLogix L16 (M40087): This course covers PLC operation and instructions, PLC Ethernet operation, HMI Ethernet operation, and component and system troubleshooting. (References 990-PABCL1F). This course supports the SACA Core Micro-Credential Standard C-207.

Modules included in the course:
- Introduction to Programmable Controllers
- PC - PLC Connections
- PLC Operation
- PanelView Plus Terminal PLC Connections
- PLC Program Operations
- PLC Memory Organization
- PLC Programs
- PLC Program Analysis
- PLC Motor Control
- PLC Program Interlocking
- PLC Timers
- PLC Counters
- PLC Event Sequencing
Program Information:
Prerequisite: Pre-course assessment evaluation (Recommended)

Course: Amatrol V40087-AA00UEN-E1 - Mastering Programmable Controllers (A-B CompactLogix L16) (990-PABCL1F) & W40085-BA00UEN-E1 - Portable PLC Learning System - Allen-Bradley CompactLogix L16 (990-PAB53A) Module 8 & 9
Program Total: 40 hours
Tuition & Fees: $625

For more information, please contact:
workforcetraining@tstc.edu

Mechanical Power Systems
This course covers vital knowledge related to mechanical drives training, such as motor mounting, key fasteners, power transmission systems, V-belt drives, chain drives, spur gear drives, and multiple shaft drives. Students will study specific objectives such as methods of measuring motor shaft speed, how to calculate rotary mechanical power, the operations of a flexible jaw coupling, methods of adjusting belt tension, allowable chain sag for various applications, the function of backlash, and the alignment procedure of a sleeve coupling. This course supports the SACA Core Micro-Credential Standard C-210.

Modules included in the course:
- Introduction to Mechanical Drive Systems.
- Motor Mounting.
- Key Fasteners.
- Torque, Power, Efficiency.
- Power Transmission Systems.
- Introduction to V-belt Drives.
- V-belt Operation.
- Introduction to Chain Drives.
- Chain Drive Operation.
- Chain Tensioning and Installation.
- Introduction to Spur Gear Drives.
- Spur Gear Drive Operation.
- Multiple Shaft Drives.

Program Information:
Prerequisite: Pre-course assessment evaluation (recommended)

Course: Amatrol W19146-XA00UEN-E1 - Mechanical Drives 1 (970-ME1)
Program Total: 48 hours
Tuition & Fees: $750

For more information, please contact:
workforcetraining@tstc.edu
Mechatronics

Mechatronics is an emerging field that integrates electrical and mechanical engineering, advanced manufacturing, and computer technology. The Mechatronics program serves to build connections with the manufacturing industry, providing transitioning service members, National Guard and Reservists, veterans, military spouses, and civilians with the skills and certifications to find and excel in careers in manufacturing. Resources are also available to assist manufacturers with recruiting, hiring and retaining talent from the military community.

Mechatronics program highlights:

- Department of Defense Approved SkillBridge Program.
- Includes seven certifications from the Smart Automation Certification Alliance (SACA).
- Specialist series that certify Industry 4.0 technical skills in troubleshooting, programming, maintaining, and integrating systems.

Essential Advanced Manufacturing Topics:

- Electrical Components and Schematics.
- Mechanical Components and Electric Drives.
- (Electro) Pneumatics and Hydraulics.
- Digital Fundamentals and Automation.
- Programmable Logic Controllers (PLCs).

Program Information:

Courses:

- NFPA 70E Arc Flash
- Basic Electrical Theory
- Alternating Current
- Wiring
- Electrical Print Reading
- Motor Theory
- Motor Controls and Troubleshooting
- Basic Programmable Logic Controllers (PLC)
- Intermediate Programmable Logic Controllers (PLC)
- Pumps, Compressors, and Mechanical Drives/Power
- Transmission – Belt Drives, Couplings, Chain Drives, Gearing
- Machinery Installation/Shaft and Coupling Alignment
- Lubrication
- Hydraulics and Pneumatics

Program Total: 288 hours
Tuition & Fees: $4,500

For more information, please contact:

workforcetraining@tstc.edu

NCCER Carpentry Level 1
Carpenters make up the largest building trades occupation in the industry, and those with all-around skills are in high demand.

**NCCER Core (73 hours)**
The NCCER Core Curriculum is a prerequisite and foundation to all other Level 1 craft curriculum. Its modules cover topics such as basic safety, communication skills, and introduction to construction drawings. Completing this curriculum gives the trainee the basic skills needed to continue education in any craft area he or she chooses.

**NCCER Basic Framing NCCER (48 hours)**
Knowledge and skills required to erect wood frame structures, with emphasis on layout and construction of floors, walls and roofs. Includes safety procedures for using hand and power tools and structural materials.

**Introduction to Carpentry NCCER (115 hours)**
An introduction to the carpentry trade, including safety, tools, equipment, terminology and methods.

**Safety Component (10 hours)**
OSHA General Industry/Construction Safety and Health provides an introduction to specific training techniques involving the safe handling of blood- and air-borne pathogens, as well as general safety and security on the premises. Addresses the right to know and MSDS. Outlines occupational Safety and Health Administration (OSHA) regulations, inspections, penalties and compliance. The trainee will be able to:

- Demonstrate proficiency in handling critical and safety situations.
- Explain the importance of performing tasks safely and correctly.
- Maintain a situation in compliance with OSHA regulations.

**Forklift Component (12 hours)**
- Safety awareness, components identification, and field driving exercises.
- Analyzing hydraulic and electrical components and safety precautions.
- Discussion of preventing maintenance and basic repairs.
- Variety of exercises, lifting techniques and additional criteria evaluation such as surface conditions.
- Successfully demonstrate maneuvering exercises around simulated obstacle course.

**Program Information**
Program total: 258 hours.
Tuition & Fees: $4,500.
Materials per student: $500.
Minimum of six students to make the course.
Books, tools and labs included.
Certifications: OSHA 10, Forklift, CPR.

The NCCER Carpentry Level 1 program is available at the Harlingen campus.

**For more information, please contact:**
workforcetraining@tstc.edu

**NCCER Electrical Level 1**
Electricians install electrical systems, wiring and other electrical components, as well as following blueprints and conforming to national, state and local codes.

**NCCER Core (73 hours)**
The NCCER Core Curriculum is a prerequisite and foundation to all other Level 1 craft curriculum. Its modules cover topics such as basic safety, communication skills, and introduction to construction drawings. Completing this curriculum gives the trainee the basic skills needed to continue education in any craft area he or she chooses.

**Basic Electrical Wiring NCCER (113 hours)**
Presentation of the theory of residential electric circuits. Topics include load calculations and safety in electrical work, installation of wiring, load protection, ground fault, and other devices commonly used in 110-volt household applications.

**Safety Component (14 hours)**
OSHA General Industry/Construction Safety and Health provides an introduction to specific training techniques involving the safe handling of blood- and air-borne pathogens, as well as general safety and security on the premises. Addresses the right to know and MSDS. Outlines occupational Safety and Health Administration (OSHA) regulations, inspections, penalties and compliance. The trainee will be able to:

- Demonstrate proficiency in handling critical and safety situations.
- Explain the importance of performing tasks safely and correctly.
- Maintain a situation in compliance with OSHA regulations.

**Forklift Component (12 hours)**
- Safety awareness, components identification and field driving exercises.
- Analyzing hydraulic and electrical components and safety precautions.
- Discussion of preventing maintenance and basic repairs.
- Variety of exercises, lifting techniques and additional criteria evaluation such as surface conditions.
- Successfully demonstrate maneuvering exercises around simulated obstacle course.

**CPR/AED/First Aid (12 hours)**
- Lifesaving skills of respiratory (choking and near-drowning) and cardiac emergencies involving adults, children and infants. Automated External Defibrillator inclusive. Instruction in first aid for injured and ill persons. Students will discuss and demonstrate assessment and management of injured and/or ill persons as recommended by the certifying agency. Students must meet requirements as specified by the certifying agency. Show proficiency according to current guidelines of the credentialing agency. Lab is required. Upon successful completion of the course, students will receive a certification card.

**Program Information:**
Course: NCCER Electrical Level 1
Program total: 224 hours.
Tuition & Fees: $4,500.
Materials per student: $500.
Minimum of six students to make the course.
Books, tools and labs included.
Certifications: OSHA 10, Forklift, CPR.
The National Center for Construction Education & Research (NCCER) Maritime Welding Level 1 curriculum is a 275 instruction-hour program that is the first course in a series of three courses that comprise the NCCER Maritime Welding curriculum. It is a basic introduction to the welding trade made up of 21 modules consisting of specific learning objectives and performance tasks and includes a nine-module core curriculum that is a prerequisite for all NCCER craft training. Completing this curriculum gives the trainee the basic entry-level skills needed for employment and to continue their education in the welding trade with an introduction to the maritime industry.

Certifications include:
NCCER Maritime Welding Level 1

Program Information:
Core Curriculum
- Basic Site Safety
- Introduction to Construction Math
- Introduction to Hand Tools
- Introduction to Power Tools
- Introduction to Construction Drawings
- Introduction to Basic Rigging
- Basic Communication Skills
- Basic Employability Skills
- Introduction to Material Handling
- Introduction to Maritime Industry
- NCCER Welding Level 1 Curriculum
- Welding Safety
- Oxy-Fuel Cutting
- Plasma Arc Cutting
- Air-Carbon Arc Cutting and Gouging
- Base Metal Preparation
- Weld Quality
- SMAW – Equipment and Setup
- SMAW Electrodes
- SMAW – Beads and Fillet Welds
- Joint Fit-Up and Alignment
- SMAW – Groove Welds with Backing
- SMAW – Open-Root Groove Welds - Plate

Program Total: 275 hours
Tuition & Fees: $4,500
Materials included.
Personal Protective Equipment (PPE) required.

Prerequisite: Trainees must have completed the NCCER core course prior to continuing in NCCER craft training.
NCCER Welding

A welding technician works in the area of fabrication, construction and manufacturing industries.

**NCCER Core (73 hours)**
The NCCER Core Curriculum is a prerequisite and foundation to all other Level 1 craft curricula. Its modules cover topics such as basic safety, communication skills, and introduction to construction drawings. Completing this curriculum gives the trainee the basic skills needed to continue education in any craft area he or she chooses.

**NCCER Fundamentals of Oxy-Fuel Welding and Cutting (40 hours)**
Oxy-fuel welding and cutting equipment. Includes equipment safety, setup and maintenance.

**NCCER Introduction (SMAW) (130 hours)**
An introduction to the shielded metal arc welding process. Emphasis placed on power sources, electrode selection and various joint designs.

**NCCER Intermediate (SMAW) (115 hours)**
A study of the production of various fillet and groove welds. Preparation of specimens for testing in various positions.

**Program Information:**
Program Total: 358 hours
Tuition & Fees: $4,500
Materials per student: $500
Books, tools and labs included
Total Cost: $5,000

For more information, please contact:
workforcetraining@tstc.edu

Phlebotomy Technician
The Phlebotomy course prepares the student in the various blood collection methods, using proper techniques and universal precautions. Recommended by NCCLS, students will be trained on vacuum collection devices, syringes, capillary skin puncture blood-culture and specimen collection. Students will learn medical terminology, related anatomy, physiology and utilization of laboratory equipment. High emphasis is placed on professionalism, ethics, proper patient identification, labeling of specimens, quality specimen handling and processing. Successful completion of the course will prepare students to challenge the ASCP National Registry Exam.

Employment of phlebotomist is projected to grow 25 percent by 2026, much faster than the average for all occupations. Hospitals, diagnostic laboratories, blood donor centers and other locations will need phlebotomist to perform blood work.

Employment or possible career opportunities:
- Hospitals and clinics.
- Diagnostic laboratories.
- Blood donor centers.
- Health maintenance organizations.
- Public health agencies.
- Nursing homes.
- Research institutions.

Program Information:
Courses
- PLAB 1060 - Phlebotomy

100 needle sticks required
Program Total: 86 hours
Tuition & Fees: $1,200

For more information, please contact:

workforcetraining@tstc.edu

Pneumatic Systems

Basic pneumatics prepares learners to work intelligently in industry with pneumatic applications. It introduces pneumatic schematics, the principles of pneumatic pressure and flow, and pneumatic speed control circuits. It covers pressure regulation, air filtration, how to connect pneumatics circuits, pneumatic cylinders, valves, and actuators, pressure and cylinder force, pneumatic leverage, pressure and volume, and air flow resistance. Students will gain industry relevant skills related to these new topics, including operation, installation, performance analysis, maintenance and design. Topics include cam operated valves, cylinder sequencing with cam valves, cylinder deceleration circuits, pilot operated DCVs, shuttle valves, air logic components, air logic design, air filters, filter selection, filter maintenance, water removal techniques, air dryers, after-coolers, water traps, air lubricators, and component maintenance. This course supports the SACA Core Micro-Credential Standard C-209.

Modules included in the course:
- Pneumatic power systems.
- Basic pneumatic circuits.
Principles of pneumatic pressure and flow.
- Pneumatic speed control circuits.
- Pneumatic DCV applications.
- Air logic.
- Pneumatic maintenance.

Program Information:
Prerequisite: Pre-course assessment evaluation (Recommended)
Course: Amatrol WB834-BB00XEN-E1 - Basic Pneumatics (85-BP) || WB835-BA00XEN-E2 - Intermediate Pneumatics (85-IP)
Program Total: 40 hours
Tuition & Fees: $625

For more information, please contact:
workforcetraining@tstc.edu

Professional Bus Driver Training

This course prepares students to take their written permit exam in order to receive a Class B CDL with Endorsements, including:
- Passenger.
- School Bus.

Students must pass the written CDL Permit with DMV. Students will not be permitted to drive on public roads until a CDL permit has been obtained. The Harlingen location is a third-party examining site.

Training covers topics in Basic Operations, Safe Operating Practices, Vehicle Maintenance, and other activities such as Railroad Crossings, Speed and Space Management, Documentation Regulations, Accident Procedures, and Extreme Conditions.

Requirements for admission to TSTC and the Commercial Bus Driver program are:
- Must be at least 18 years of age. The U.S. Department of Transportation (DOT) requires that all interstate drivers be at least 21 years of age.
- Must provide a driving record free of current serious violations.
- Must be able to pass a Department of Transportation (DOT) physical as required by federal & state agencies.
- Must be able to pass a drug screen when administered.
- No felony convictions in the past five (5) years. All criminal records are subject to review and may be required to provide a letter of intent to hire from a prospective employer.

Professional Bus Driver training is available at the Fort Bend County and Harlingen campuses.

Program Information:
Course: CVOP 1011 - Professional Bus Driver Training
Program Total: 120 hours
Variable Frequency AC Drives

Variable Frequency AC drives teaches variable frequency AC solid state control of 3 phase electric motors. Students develop knowledge in the operation, installation, performance analysis, troubleshooting, and design of AC solid state control using 2 wire, 3 wire, manual, and open-loop speed control, motor jogging and dynamic braking, programmable acceleration and deceleration. This course supports the SACA Core Micro-Credential Standard C-203.

Modules included in the course are:

- Introduction to Variable Frequency Drives.
- Introduction to Speed Control.
- Speed and Torque Control.
- Acceleration, Deceleration, and Braking.

Program Information:

Prerequisite: Pre-course assessment evaluation (Recommended).

Courses:

Amatrol WX57203-AA00JEN-E1 - C-203 AC Variable Frequency Drives Course (SACA)
Amatrol W17411-CH00JEN-E1 - Variable Frequency AC Drive (85-MT5C)

Program Total: 32 hours
Tuition & Fees: $500

For more information, please contact:

workforcetraining@tstc.edu

Welder Fabricator and Fitter

Knowledgeable. Efficient. Competent. Those words can describe you after you complete training in the Structural Metal Fabricator and Fitter program. Whether your objective is to gain additional skills or embark on a rewarding career, this program will give you the solid foundation necessary to achieve your goals. The curriculum encompasses basic welding and fabrication methods, as well as blueprint reading, to provide you with the essential knowledge and hands-on experience that you need to succeed.

Introduction to Welding Fundamentals (70 hours)

An introduction to the fundamentals of equipment used in oxy-fuel and arc welding, including welding and cutting safety, basic oxy-fuel welding and cutting, basic arc welding processes and basic metallurgy.
Introduction to Blueprint Reading for Welders (30 hours)
A study of industrial blueprints with an emphasis placed on terminology, symbols, graphic description, and welding processes. Training includes systems of measurement and industry standards. Also includes interpretation of plans and drawings used by industry to facilitate field application and production.

Introduction to Layout and Fabrication (120 hours)
A fundamental course in layout and fabrication related to the welding industry. Major emphasis on structural shapes and use in construction.

Safety Component (14 hours)
OSHA General Industry/Construction Safety and Health provides an introduction to specific training techniques involving the safe handling of blood and airborne pathogens as well as general safety and security on the premises. Addresses the right to know and MSDS. Outlines occupational Safety and Health Administration (OSHA) regulations, inspections, penalties, and compliance. The trainee will be able to:
- Demonstrate proficiency in handling critical and safety situations
- Explain the importance of performing tasks safely and correctly
- Maintain a situation in compliance with OSHA regulations

Fork Lift Component (12 hours)
- Safety awareness, components identification, and field driving exercises
- Analyzing the hydraulic and electrical components and safety precautions
- Discussion of preventing maintenance and basic repairs
- Variety of exercises, lifting techniques & additional criteria evaluation such as surface conditions
- Successfully demonstrate maneuvering exercises around simulated obstacle course

Program Information:
Materials Per Student: $500
Minimum of four students to make the course
Books, tools and labs included
Program Total: 246 hours
Tuition & Fees: $4,500

For more information, please contact:
workforcetraining@tstc.edu

Welding

Eight-Week Structural Welding Program
This program is designed to prepare the student for entry-level employment in the welding industry. The course content applies to manufacturing, fabrication, construction, maintenance and repair and shipbuilding.

The program teaches the student structural welding used for welding carbon steel plate. They will learn to set up oxy-fuel welding and cutting equipment, welding machines, gas flow meters and welding guns. Students will then practice welding plates in the fillet weld and v-groove positions.

Weld Processes Covered are:
Shielded Metal Arc Welding (SMAW).
Gas Metal Arc Welding (GMAW).
Flux Core Arc Welding (FCAW).
Gas Tungsten Arc Welding (GTAW).

Classroom topics include:

- Weld Theory.
- Inspection and Non-destructive Examination.
- Basic Metallurgy.
- Preheat and Post Heat Applications.
- Welding Codes and Standards.

Each lesson begins in weld safety and theory and concludes in lab practice application.

Upon successful completion of the program, the student should be able to qualify in tack, fillet, and groove welds on carbon steel plates to American Welding Society standards. This qualification is essential to gaining employment in the welding industry. Safe work practices are taught in both the classroom and welding lab.

Program Information:

Courses:

- WLDG 1028 Introduction to Shielded Metal Arc Welding (SMAW)
- WLDG 1007 Introduction to Welding Using Multiple Processes
- WLDG 1034 Introduction to Gas Tungsten Arc (GTAW) Welding

Program Total: 320 hours
Tuition & Fees: $4,500

For more information, please contact:

workforcetraining@tstc.edu

Welding Safety Technician

The Welding Safety Technician Program is a 198 clock-hour program that provides both didactic and experiential learning.

Introduction to Welding Fundamentals (96 hours)

An introduction to the fundamentals of equipment used in oxy-fuel and arc welding, including welding and cutting safety, basic oxy-fuel welding and cutting, basic arc welding processes and basic metallurgy. Demonstrate safety procedures associated with oxy-fuel and arc process; perform basic welds using oxy-fuel and arc welding equipment; and identify various metals.

Introduction to Flux Core Arc Welding (84 hours)

An overview of terminology, safety procedures, and equipment set-up. Practice in performing various joints using Flux Arc Welding (FCAW) equipment. Demonstrate equipment safety checks; identify Flux Core Arc Welding (FCAW) equipment parts and demonstrate the procedures of welding various joints in various positions.

OSHA 10 (10 hours)

Recognize and evaluate hazards in the workplace and implement control measures, including engineering, administrative, and personal protective equipment.
Forklift (8 hours)

Safety awareness, components identification, and field driving exercises. Analyzing the hydraulic and electrical components and safety precautions. Discussion of preventing maintenance and basic repairs. Variety of exercises, lifting techniques, and additional criteria evaluation such as surface conditions. Successfully demonstrate maneuvering exercises around a simulated obstacle course.

Program Information:
Total Program: 198 hours
Tuition & Fees: $4,500

For more information, please contact:
workforcetraining@tstc.edu

16. Essential Program Functions

Aircraft Airframe and Powerplant Technology
Robert Capps
rjcapps@tstc.edu

Cognitive Abilities

- Category Flexibility: The ability to generate or use different sets of rules for combining or grouping things in different ways.
- Deductive Reasoning: The ability to apply general rules to specific problems to produce answers that make sense.
- Flexibility of Closure: The ability to identify or detect a known pattern (a figure, object, word, or sound) that is hidden in other distracting material.
- Fluency of Ideas: The ability to come up with a number of ideas about a topic (the number of ideas is important, not their quality, correctness, or creativity).
- Inductive Reasoning: The ability to combine pieces of information to form general rules or conclusions (includes finding a relationship among seemingly unrelated events).
- Information Ordering: The ability to arrange things or actions in a certain order or pattern according to a specific rule or set of rules (e.g., patterns of numbers, letters, words, pictures, mathematical operations).
- Mathematical Reasoning: The ability to choose the right mathematical methods or formulas to solve a problem.
- Memorization: The ability to remember information, such as words, numbers, pictures, and procedures.
- Number Facility: The ability to add, subtract, multiply, or divide quickly and correctly.
- Oral Comprehension: The ability to listen to and understand information and ideas presented through spoken words and sentences.
- Oral Expression: The ability to communicate information and ideas in speaking so others will understand.
- Originality: The ability to come up with unusual or clever ideas about a given topic or situation, or to develop creative ways to solve a problem.
- Perceptual Speed: The ability to quickly and accurately compare similarities and differences among sets of letters, numbers, objects, pictures, or patterns. The things to be compared may be presented at the same time or one after the other. This ability also includes comparing a presented object with a remembered object.
- Problem Sensitivity: The ability to tell when something is wrong or is likely to go wrong. It does not involve solving the problem, only recognizing there is a problem.
- Selective Attention: The ability to concentrate on a task over a period of time without being distracted.
- Spatial Orientation: The ability to know your location in relation to the environment or to know where other objects are in relation to you.
- Speed of Closure: The ability to quickly make sense of, combine, and organize information into meaningful patterns.
- Time Sharing: The ability to shift back and forth between two or more activities or sources of information (such as speech, sounds, touch, or other sources).
- Visualization: The ability to imagine how something will look after it is moved around or when its parts are moved or rearranged.
- Written Comprehension: The ability to read and understand information and ideas presented in writing.
- Written Expression: The ability to communicate information and ideas in writing so others will understand.

Psychomotor Abilities
Arm-Hand Steadiness: The ability to keep your hand and arm steady while moving your arm or while holding your arm and hand in one position.

Control Precision: The ability to quickly and repeatedly adjust the controls of a machine or a vehicle to exact positions.

Finger Dexterity: The ability to make precisely coordinated movements of the fingers of one or both hands to grasp, manipulate, or assemble very small objects.

Manual Dexterity: The ability to quickly move your hand, your hand together with your arm, or your two hands to grasp, manipulate, or assemble objects.

Multi-limb Coordination: The ability to coordinate two or more limbs (for example, two arms, two legs, or one leg and one arm) while sitting, standing, or lying down. It does not involve performing the activities while the whole body is in motion.

Rate Control: The ability to time your movements or the movement of a piece of equipment in anticipation of changes in the speed and/or direction of a moving object or scene.

Reaction Time: The ability to quickly respond (with the hand, finger, or foot) to a signal (sound, light, picture) when it appears.

Response Orientation: The ability to choose quickly between two or more movements in response to two or more different signals (lights, sounds, pictures). It includes the speed with which the correct response is started with the hand, foot, or other body part.

Speed of Limb Movement: The ability to quickly move the arms and legs.

Wrist-Finger Speed: The ability to make fast, simple, repeated movements of the fingers, hands, and wrists.

Physical Abilities

Dynamic Flexibility: The ability to quickly and repeatedly bend, stretch, twist, or reach out with your body, arms, and/or legs.

Dynamic Strength: The ability to exert muscle force repeatedly or continuously over time. This involves muscular endurance and resistance to muscle fatigue.

Explosive Strength: The ability to use short bursts of muscle force to propel oneself (as in jumping or sprinting), or to throw an object.

Extent Flexibility: The ability to bend, stretch, twist, or reach with your body, arms, and/or legs.

Gross Body Coordination: The ability to coordinate the movement of your arms, legs, and torso together when the whole body is in motion.

Gross Body Equilibrium: The ability to keep or regain your body balance or stay upright when in an unstable position.

Stamina: The ability to exert yourself physically over long periods of time without getting winded or out of breath.

Static Strength: The ability to exert maximum muscle force to lift, push, pull, or carry objects.

Trunk Strength: The ability to use your abdominal and lower back muscles to support part of the body repeatedly or continuously over time without “giving out” or fatiguing.

Sensory Abilities

Auditory Attention: The ability to focus on a single source of sound in the presence of other distracting sounds.

Depth Perception: The ability to judge which of several objects is closer or farther away from you, or to judge the distance between you and an object.

Glare Sensitivity: The ability to see objects in the presence of glare or bright lighting.

Hearing Sensitivity: The ability to detect or tell the differences between sounds that vary in pitch and loudness.

Near Vision: The ability to see details at close range (within a few feet of the observer).

Night Vision: The ability to see under low light conditions.

Peripheral Vision: The ability to see objects or movement of objects to one’s side when the eyes are looking ahead.

Sound Localization: The ability to tell the direction from which a sound originated.

Speech Clarity: The ability to speak clearly so others can understand you.

Speech Recognition: The ability to identify and understand the speech of another person.

Aircraft Pilot Training Technology

Angel Newhart
adnewhart@tstc.edu

Cognitive Abilities

Category Flexibility: The ability to generate or use different sets of rules for combining or grouping things in different ways.

Deductive Reasoning: The ability to apply general rules to specific problems to produce answers that make sense.

Flexibility of Closure: The ability to identify or detect a known pattern (a figure, object, word, or sound) that is hidden in other distracting material.

Fluency of Ideas: The ability to come up with a number of ideas about a topic (the number of ideas is important, not
2022-2023 Catalog & Student Handbook

their quality, correctness, or creativity).

- Inductive Reasoning: The ability to combine pieces of information to form general rules or conclusions (includes finding a relationship among seemingly unrelated events).
- Information Ordering: The ability to arrange things or actions in a certain order or pattern according to a specific rule or set of rules (e.g., patterns of numbers, letters, words, pictures, mathematical operations).
- Mathematical Reasoning: The ability to choose the right mathematical methods or formulas to solve a problem.
- Memorization: The ability to remember information, such as words, numbers, pictures, and procedures.
- Number Facility: The ability to add, subtract, multiply, or divide quickly and correctly.
- Oral Comprehension: The ability to listen to and understand information and ideas presented through spoken words and sentences.
- Originality: The ability to come up with unusual or clever ideas about a given topic or situation, or to develop creative ways to solve a problem.
- Perceptual Speed: The ability to quickly and accurately compare similarities and differences among sets of letters, numbers, objects, pictures, or patterns. The things to be compared may be presented at the same time or one after the other. This ability also includes comparing a presented object with a remembered object.
- Problem Sensitivity: The ability to tell when something is wrong or is likely to go wrong. It does not involve solving the problem, only recognizing there is a problem.
- Spatial Orientation: The ability to know your location in relation to the environment or to know where other objects are in relation to you.
- Speed of Closure: The ability to quickly make sense of, combine, and organize information into meaningful patterns.
- Time Sharing: The ability to shift back and forth between two or more activities or sources of information (such as speech, sounds, touch, or other sources).
- Visualization: The ability to imagine how something will look after it is moved around or when its parts are moved or rearranged.
- Written Comprehension: The ability to read and understand information and ideas presented in writing.
- Written Expression: The ability to communicate information and ideas in writing so others will understand.

Psychomotor Abilities

- Arm-Hand Steadiness: The ability to keep your hand and arm steady while moving your arm or while holding your arm and hand in one position.
- Control Precision: The ability to quickly and repeatedly adjust the controls of a machine or a vehicle to exact positions.
- Finger Dexterity: The ability to make precisely coordinated movements of the fingers of one or both hands to grasp, manipulate, or assemble very small objects.
- Manual Dexterity: The ability to quickly move your hand, your hand together with your arm, or your two hands to grasp, manipulate, or assemble objects.
- Multi-limb Coordination: The ability to coordinate two or more limbs (for example, two arms, two legs, or one leg and one arm) while sitting, standing, or lying down. It does not involve performing the activities while the whole body is in motion.
- Rate Control: The ability to time your movements or the movement of a piece of equipment in anticipation of changes in the speed and/or direction of a moving object or scene.
- Reaction Time: The ability to quickly respond (with the hand, finger, or foot) to a signal (sound, light, picture) when it appears.
- Response Orientation: The ability to choose quickly between two or more movements in response to two or more different signals (lights, sounds, pictures). It includes the speed with which the correct response is started with the hand, foot, or other body part.
- Speed of Limb Movement: The ability to quickly move the arms and legs.
- Wrist-Finger Speed: The ability to make fast, simple, repeated movements of the fingers, hands, and wrists.

Physical Abilities

- Dynamic Flexibility: The ability to quickly and repeatedly bend, stretch, twist, or reach out with your body, arms, and/or legs.
- Dynamic Strength: The ability to exert muscle force repeatedly or continuously over time. This involves muscular endurance and resistance to muscle fatigue.
- Explosive Strength: The ability to use short bursts of muscle force to propel oneself (as in jumping or sprinting), or to throw an object.
- Extent Flexibility: The ability to bend, stretch, twist, or reach with your body, arms, and/or legs.
- Gross Body Coordination: The ability to coordinate the movement of your arms, legs, and torso together when the whole body is in motion.
- Gross Body Equilibrium: The ability to keep or regain your body balance or stay upright when in an unstable position.
- Stamina: The ability to exert yourself physically over long periods of time without getting winded or out of breath.
- Static Strength: The ability to exert maximum muscle force to lift, push, pull, or carry objects.
Trunk Strength: The ability to use your abdominal and lower back muscles to support part of the body repeatedly or continuously over time without "giving out" or fatiguing.

Sensory Abilities

- Auditory Attention: The ability to focus on a single source of sound in the presence of other distracting sounds.
- Depth Perception: The ability to judge which of several objects is closer or farther away from you, or to judge the distance between you and an object.
- Far Vision*: The ability to see details at a distance.
- Glare Sensitivity: The ability to see objects in the presence of glare or bright lighting.
- Hearing Sensitivity: The ability to detect or tell the differences between sounds that vary in pitch and loudness.
- Near Vision*: The ability to see details at close range (within a few feet of the observer).
- Night Vision: The ability to see under low light conditions.
- Peripheral Vision: The ability to see objects or movement of objects to one's side when the eyes are looking ahead.
- Sound Localization: The ability to tell the direction from which a sound originated.
- Speech Clarity: The ability to speak clearly so others can understand you.
- Speech Recognition: The ability to identify and understand the speech of another person.
- Visual Color Discrimination: The ability to match or detect differences between colors, including shades of color and brightness.

*Near and far vision ability can be achieved with corrective lenses

Additional Information

Students who wish to enter the APT program must pass an FAA Class II Flight Physical as defined at [https://www.faa.gov/about/office_org/headquarters_offices/avs/offices/aam/ame/guide/standards/](https://www.faa.gov/about/office_org/headquarters_offices/avs/offices/aam/ame/guide/standards/)

Students who wish to enter a career as an Airline Transport Pilot must pass an FAA Class I Flight Physical as defined at the same address above.

Auto Collision & Management Technology

Clint Campbell

cmcampbell@tstc.edu

Cognitive Abilities

- Category Flexibility: The ability to generate or use different sets of rules for combining or grouping things in different ways.
- Deductive Reasoning: The ability to apply general rules to specific problems to produce answers that make sense.
- Flexibility of Closure: The ability to identify or detect a known pattern (a figure, object, word, or sound) that is hidden in other distracting material.
- Fluency of Ideas: The ability to come up with a number of ideas about a topic (the number of ideas is important, not their quality, correctness, or creativity).
- Inductive Reasoning: The ability to combine pieces of information to form general rules or conclusions (includes finding a relationship among seemingly unrelated events).
- Information Ordering: The ability to arrange things or actions in a certain order or pattern according to a specific rule or set of rules (e.g., patterns of numbers, letters, words, pictures, mathematical operations).
- Mathematical Reasoning: The ability to choose the right mathematical methods or formulas to solve a problem.
- Memorization: The ability to remember information, such as words, numbers, pictures, and procedures.
- Number Facility: The ability to add, subtract, multiply, or divide quickly and correctly.
- Oral Comprehension: The ability to listen to and understand information and ideas presented through spoken words and sentences.
- Oral Expression: The ability to communicate information and ideas in speaking so others will understand.
- Originality: The ability to come up with unusual or clever ideas about a given topic or situation, or to develop creative ways to solve a problem.
- Perceptual Speed: The ability to quickly and accurately compare similarities and differences among sets of letters, numbers, objects, pictures, or patterns. The things to be compared may be presented at the same time or one after the other. This ability also includes comparing a presented object with a remembered object.
- Problem Sensitivity: The ability to tell when something is wrong or is likely to go wrong. It does not involve solving the problem, only recognizing there is a problem.
- Selective Attention: The ability to concentrate on a task over a period of time without being distracted.
- Spatial Orientation: The ability to know your location in relation to the environment or to know where other objects are in relation to you.
- Speed of Closure: The ability to quickly make sense of, combine, and organize information into meaningful patterns.
- Time Sharing: The ability to shift back and forth between two or more activities or sources of information (such as speech, sounds, touch, or other sources).
- Visualization: The ability to imagine how something will look after it is moved around or when its parts are moved or
Written Comprehension: The ability to read and understand information and ideas presented in writing.
Written Expression: The ability to communicate information and ideas in writing so others will understand.

Psychomotor Abilities

Arm-Hand Steadiness: The ability to keep your hand and arm steady while moving your arm or while holding your arm and hand in one position.
Control Precision: The ability to quickly and repeatedly adjust the controls of a machine or a vehicle to exact positions.
Finger Dexterity: The ability to make precisely coordinated movements of the fingers of one or both hands to grasp, manipulate, or assemble very small objects.
Manual Dexterity: The ability to quickly move your hand, your hand together with your arm, or your two hands to grasp, manipulate, or assemble objects.
Multi-limb Coordination: The ability to coordinate two or more limbs (for example, two arms, two legs, or one leg and one arm) while sitting, standing, or lying down. It does not involve performing the activities while the whole body is in motion.
Rate Control: The ability to time your movements or the movement of a piece of equipment in anticipation of changes in the speed and/or direction of a moving object or scene.
Reaction Time: The ability to quickly respond (with the hand, finger, or foot) to a signal (sound, light, picture) when it appears.
Response Orientation: The ability to choose quickly between two or more movements in response to two or more different signals (lights, sounds, pictures). It includes the speed with which the correct response is started with the hand, foot, or other body part.
Speed of Limb Movement: The ability to quickly move the arms and legs.
Wrist-Finger Speed: The ability to make fast, simple, repeated movements of the fingers, hands, and wrists.

Physical Abilities

Dynamic Flexibility: The ability to quickly and repeatedly bend, stretch, twist, or reach out with your body, arms, and/or legs.
Dynamic Strength: The ability to exert muscle force repeatedly or continuously over time. This involves muscular endurance and resistance to muscle fatigue.
Explosive Strength: The ability to use short bursts of muscle force to propel oneself (as in jumping or sprinting), or to throw an object.
Extent Flexibility: The ability to bend, stretch, twist, or reach with your body, arms, and/or legs.
Gross Body Coordination: The ability to coordinate the movement of your arms, legs, and torso together when the whole body is in motion.
Gross Body Equilibrium: The ability to keep or regain your body balance or stay upright when in an unstable position.
Static Strength: The ability to exert maximum muscle force to lift, push, pull, or carry objects.
Trunk Strength: The ability to use your abdominal and lower back muscles to support part of the body repeatedly or continuously over time without "giving out" or fatiguing.

Sensory Abilities

Auditory Attention: The ability to focus on a single source of sound in the presence of other distracting sounds.
Depth Perception: The ability to judge which of several objects is closer or farther away from you, or to judge the distance between you and an object.
Far Vision: The ability to see details at a distance.
Glare Sensitivity: The ability to see objects in the presence of glare or bright lighting.
Hearing Sensitivity: The ability to detect or tell the differences between sounds that vary in pitch and loudness.
Near Vision: The ability to see details at close range (within a few feet of the observer).
Night Vision: The ability to see under low light conditions.
Peripheral Vision: The ability to see objects or movement of objects to one's side when the eyes are looking ahead.
Sound Localization: The ability to tell the direction from which a sound originated.
Speech Clarity: The ability to speak clearly so others can understand you.
Speech Recognition: The ability to identify and understand the speech of another person.
Visual Color Discrimination: The ability to match or detect differences between colors, including shades of color and brightness.

Manual Dexterity: The ability to quickly move your hand, your hand together with your arm, or your two hands to grasp, manipulate, or assemble objects.
Multi-limb Coordination: The ability to coordinate two or more limbs (for example, two arms, two legs, or one leg and one arm) while sitting, standing, or lying down. It does not involve performing the activities while the whole body is in motion.
Rate Control: The ability to time your movements or the movement of a piece of equipment in anticipation of changes in the speed and/or direction of a moving object or scene.
Reaction Time: The ability to quickly respond (with the hand, finger, or foot) to a signal (sound, light, picture) when it appears.
Response Orientation: The ability to choose quickly between two or more movements in response to two or more different signals (lights, sounds, pictures). It includes the speed with which the correct response is started with the hand, foot, or other body part.
Speed of Limb Movement: The ability to quickly move the arms and legs.
Wrist-Finger Speed: The ability to make fast, simple, repeated movements of the fingers, hands, and wrists.

Physical Abilities

Dynamic Flexibility: The ability to quickly and repeatedly bend, stretch, twist, or reach out with your body, arms, and/or legs.
Dynamic Strength: The ability to exert muscle force repeatedly or continuously over time. This involves muscular endurance and resistance to muscle fatigue.
Extent Flexibility: The ability to bend, stretch, twist, or reach with your body, arms, and/or legs.
Gross Body Coordination: The ability to coordinate the movement of your arms, legs, and torso together when the whole body is in motion.
Gross Body Equilibrium: The ability to keep or regain your body balance or stay upright when in an unstable position.
Stamina: The ability to exert yourself physically over long periods of time without getting winded or out of breath.
Static Strength: The ability to exert maximum muscle force to lift, push, pull, or carry objects.
Trunk Strength: The ability to use your abdominal and lower back muscles to support part of the body repeatedly or continuously over time without 'giving out' or fatiguing.

Sensory Abilities

Auditory Attention: The ability to focus on a single source of sound in the presence of other distracting sounds.
Depth Perception: The ability to judge which of several objects is closer or farther away from you, or to judge the distance between you and an object.
Far Vision: The ability to see details at a distance.
Glare Sensitivity: The ability to see objects in the presence of glare or bright lighting.
Hearing Sensitivity: The ability to detect or tell the differences between sounds that vary in pitch and loudness.
Near Vision: The ability to see details at close range (within a few feet of the observer).
Night Vision: The ability to see under low light conditions.
Peripheral Vision: The ability to see objects or movement of objects to one's side when the eyes are looking ahead.
Sound Localization: The ability to tell the direction from which a sound originated.
Speech Clarity: The ability to speak clearly so others can understand you.
Speech Recognition: The ability to identify and understand the speech of another person.
Visual Color Discrimination: The ability to match or detect differences between colors, including shades of color and brightness.
Additional Information
Biomedical Equipment Technicians must be able to communicate with many different people while in stressful situations: patients, nurses, doctors, surgeons, technicians, administration, as well as supervisors and other technical persons.

Building Construction Technology

Tony Chaffin
abchaffin@tstc.edu

Cognitive Abilities

- Category Flexibility: The ability to generate or use different sets of rules for combining or grouping things in different ways.
- Deductive Reasoning: The ability to apply general rules to specific problems to produce answers that make sense.
- Flexibility of Closure: The ability to identify or detect a known pattern (a figure, object, word, or sound) that is hidden in other distracting material.
- Fluency of Ideas: The ability to come up with a number of ideas about a topic (the number of ideas is important, not their quality, correctness, or creativity).
- Inductive Reasoning: The ability to combine pieces of information to form general rules or conclusions (includes finding a relationship among seemingly unrelated events).
- Information Ordering: The ability to arrange things or actions in a certain order or pattern according to a specific rule or set of rules (e.g., patterns of numbers, letters, words, pictures, mathematical operations).
- Mathematical Reasoning: The ability to choose the right mathematical methods or formulas to solve a problem.
- Memorization: The ability to remember information such as words, numbers, pictures, and procedures.
- Number Facility: The ability to add, subtract, multiply, or divide quickly and correctly.
- Oral Comprehension: The ability to listen to and understand information and ideas presented through spoken words and sentences.
- Oral Expression: The ability to communicate information and ideas in speaking so others will understand.
- Originality: The ability to come up with unusual or clever ideas about a given topic or situation, or to develop creative ways to solve a problem.
- Perceptual Speed: The ability to quickly and accurately compare similarities and differences among sets of letters, numbers, objects, pictures, or patterns. The things to be compared may be presented at the same time or one after the other. This ability also includes comparing a presented object with a remembered object.
- Problem Sensitivity: The ability to tell when something is wrong or is likely to go wrong. It does not involve solving the problem, only recognizing there is a problem.
- Selective Attention: The ability to concentrate on a task over a period of time without being distracted.
- Spatial Orientation: The ability to know your location in relation to the environment or to know where other objects are in relation to you.
- Speed of Closure: The ability to quickly make sense of, combine, and organize information into meaningful patterns.
- Time Sharing: The ability to shift back and forth between two or more activities or sources of information (such as speech, sounds, touch, or other sources).
- Visualization: The ability to imagine how something will look after it is moved around or when its parts are moved or rearranged.
- Written Comprehension: The ability to read and understand information and ideas presented in writing.

Psychomotor Abilities

- Arm-Hand Steadiness: The ability to keep your hand and arm steady while moving your arm or while holding your arm and hand in one position.
- Control Precision: The ability to quickly and repeatedly adjust the controls of a machine or a vehicle to exact positions.
- Finger Dexterity: The ability to make precisely coordinated movements of the fingers of one or both hands to grasp, manipulate, or assemble very small objects.
- Manual Dexterity: The ability to quickly move your hand, your hand together with your arm, or your two hands to grasp, manipulate, or assemble objects.
- Multi-limb Coordination: The ability to coordinate two or more limbs (for example, two arms, two legs, or one leg and one arm) while sitting, standing, or lying down. It does not involve performing the activities while the whole body is in motion.
- Rate Control: The ability to time your movements or the movement of a piece of equipment in anticipation of changes in the speed and/or direction of a moving object or scene.
- Reaction Time: The ability to quickly respond (with the hand, finger, or foot) to a signal (sound, light, picture) when it appears.
- Response Orientation: The ability to choose quickly between two or more movements in response to two or more different signals (lights, sounds, pictures). It includes the speed with which the correct response is started with the hand, foot, or other body part.
- Speed of Limb Movement: The ability to quickly move the arms and legs.
- Wrist-Finger Speed: The ability to make fast, simple, repeated movements of the fingers, hands, and wrists.
Physical Abilities

- **Dynamic Flexibility**: The ability to quickly and repeatedly bend, stretch, twist, or reach out with your body, arms, and/or legs.
- **Dynamic Strength**: The ability to exert muscle force repeatedly or continuously over time. This involves muscular endurance and resistance to muscle fatigue.
- **Explosive Strength**: The ability to use short bursts of muscle force to propel oneself (as in jumping or sprinting), or to throw an object.
- **Extent Flexibility**: The ability to bend, stretch, twist, or reach with your body, arms, and/or legs.
- **Gross Body Coordination**: The ability to coordinate the movement of your arms, legs, and torso together when the whole body is in motion.
- **Gross Body Equilibrium**: The ability to keep or regain your body balance or stay upright when in an unstable position.
- **Static Strength**: The ability to exert maximum muscle force to lift, push, pull, or carry objects.
- **Trunk Strength**: The ability to use your abdominal and lower back muscles to support part of the body repeatedly or continuously over time without ‘giving out’ or fatiguing.

- Visual Color Discrimination: The ability to match or detect differences between colors, including shades of color and brightness.

Cybersecurity

Norma Colunga-Hernandez

ncolunga-herna@tstc.edu

Cognitive Abilities

- Category Flexibility: The ability to generate or use different sets of rules for combining or grouping things in different ways.
- Deductive Reasoning: The ability to apply general rules to specific problems to produce answers that make sense.
- Flexibility of Closure: The ability to identify or detect a known pattern (a figure, object, word, or sound) that is hidden in other distracting material.
- Fluency of Ideas: The ability to come up with a number of ideas about a topic (the number of ideas is important, not their quality, correctness, or creativity).
- Inductive Reasoning: The ability to combine pieces of information to form general rules or conclusions (includes finding a relationship among seemingly unrelated events).
- Information Ordering: The ability to arrange things or actions in a certain order or pattern according to a specific rule or set of rules (e.g., patterns of numbers, letters, words, pictures, mathematical operations).
- Mathematical Reasoning: The ability to choose the right mathematical methods or formulas to solve a problem.
- Memorization: The ability to remember information, such as words, numbers, pictures, and procedures.
- Number Facility: The ability to add, subtract, multiply, or divide quickly and correctly.
- Oral Comprehension: The ability to listen to and understand information and ideas presented through spoken words and sentences.
- Oral Expression: The ability to communicate information and ideas in speaking so others will understand.
- Originality: The ability to come up with unusual or clever ideas about a given topic or situation, or to develop creative ways to solve a problem.
- Perceptual Speed: The ability to quickly and accurately compare similarities and differences among sets of letters, numbers, objects, pictures, or patterns. The things to be compared may be presented at the same time or one after the other. This ability also includes comparing a presented object with a remembered object.
- Problem Sensitivity: The ability to tell when something is wrong or is likely to go wrong. It does not involve solving the problem, only recognizing there is a problem.
- Selective Attention: The ability to concentrate on a task over a period of time without being distracted.
- Spatial Orientation: The ability to know your location in relation to the environment or to know where other objects are in relation to you.
- Speed of Closure: The ability to quickly make sense of, combine, and organize information into meaningful patterns.
- Time Sharing: The ability to shift back and forth between two or more activities or sources of information (such as speech, sounds, touch, or other sources).
- Visualization: The ability to imagine how something will look after it is moved around or when its parts are moved or
Psychomotor Abilities

- Arm-Hand Steadiness: The ability to keep your hand and arm steady while moving your arm or while holding your arm and hand in one position.
- Control Precision: The ability to quickly and repeatedly adjust the controls of a machine or a vehicle to exact positions.
- Finger Dexterity: The ability to make precisely coordinated movements of the fingers of one or both hands to grasp, manipulate, or assemble very small objects.
- Manual Dexterity: The ability to quickly move your hand, your hand together with your arm, or your two hands to grasp, manipulate, or assemble objects.
- Reaction Time: The ability to quickly respond (with the hand, finger, or foot) to a signal (sound, light, picture) when it appears.
- Wrist-Finger Speed: The ability to make fast, simple, repeated movements of the fingers, hands, and wrists.

Physical Abilities

- Static Strength: The ability to exert maximum muscle force to lift, push, pull, or carry objects.
- Trunk Strength: The ability to use your abdominal and lower back muscles to support part of the body repeatedly or continuously over time without "giving out" or fatiguing.

Sensory Abilities

- Auditory Attention: The ability to focus on a single source of sound in the presence of other distracting sounds.
- Glare Sensitivity: The ability to see objects in the presence of glare or bright lighting.
- Hearing Sensitivity: The ability to detect or tell the differences between sounds that vary in pitch and loudness.
- Near Vision: The ability to see details at close range (within a few feet of the observer).
- Peripheral Vision: The ability to see objects or movement of objects to one's side when the eyes are looking ahead.
- Sound Localization: The ability to tell the direction from which a sound originated.
- Speech Clarity: The ability to speak clearly so others can understand you.
- Speech Recognition: The ability to identify and understand the speech of another person.
- Visual Color Discrimination: The ability to match or detect differences between colors, including shades of color and brightness.

Cognitive Abilities

- Category Flexibility: The ability to generate or use different sets of rules for combining or grouping things in different ways.
- Deductive Reasoning: The ability to apply general rules to specific problems to produce answers that make sense.
- Fluency of Ideas: The ability to come up with a number of ideas about a topic (the number of ideas is important, not their quality, correctness, or creativity).
- Inductive Reasoning: The ability to combine pieces of information to form general rules or conclusions (includes finding a relationship among seemingly unrelated events).
- Information Ordering: The ability to arrange things or actions in a certain order or pattern according to a specific rule or set of rules (e.g., patterns of numbers, letters, words, pictures, mathematical operations).
- Memorization: The ability to remember information, such as words, numbers, pictures, and procedures.
- Oral Comprehension: The ability to listen to and understand information and ideas presented through spoken words and sentences.
- Oral Expression: The ability to communicate information and ideas in speaking so others will understand.
- Originality: The ability to come up with unusual or clever ideas about a given topic or situation, or to develop creative ways to solve a problem.
- Problem Sensitivity: The ability to tell when something is wrong or is likely to go wrong. It does not involve solving the problem, only recognizing there is a problem.
- Selective Attention: The ability to concentrate on a task over a period of time without being distracted.
- Speed of Closure: The ability to quickly make sense of, combine, and organize information into meaningful patterns.
- Time Sharing: The ability to shift back and forth between two or more activities or sources of information (such as speech, sounds, touch, or other sources).
- Visualization: The ability to imagine how something will look after it is moved around or when its parts are moved or
rearranged.

- Written Comprehension: The ability to read and understand information and ideas presented in writing.
- Written Expression: The ability to communicate information and ideas in writing so others will understand.

**Psychomotor Abilities**

- Arm-Hand Steadiness: The ability to keep your hand and arm steady while moving your arm or while holding your arm and hand in one position.
- Control Precision: The ability to quickly and repeatedly adjust the controls of a machine or a vehicle to exact positions.
- Finger Dexterity: The ability to make precisely coordinated movements of the fingers of one or both hands to grasp, manipulate, or assemble very small objects.
- Manual Dexterity: The ability to quickly move your hand, your hand together with your arm, or your two hands to grasp, manipulate, or assemble objects.
- Multi-limb Coordination: The ability to coordinate two or more limbs (for example, two arms, two legs, or one leg and one arm) while sitting, standing, or lying down. It does not involve performing the activities while the whole body is in motion.
- Rate Control: The ability to time your movements or the movement of a piece of equipment in anticipation of changes in the speed and/or direction of a moving object or scene.
- Reaction Time: The ability to quickly respond (with the hand, finger, or foot) to a signal (sound, light, picture) when it appears.
- Response Orientation: The ability to choose quickly between two or more movements in response to two or more different signals (lights, sounds, pictures). It includes the speed with which the correct response is started with the hand, foot, or other body part.
- Speed of Limb Movement: The ability to quickly move the arms and legs.
- Wrist-Finger Speed: The ability to make fast, simple, repeated movements of the fingers, hands, and wrists.

**Physical Abilities**

- Dynamic Flexibility: The ability to quickly and repeatedly bend, stretch, twist, or reach out with your body, arms, and/or legs.
- Dynamic Strength: The ability to exert muscle force repeatedly or continuously over time. This involves muscular endurance and resistance to muscle fatigue.
- Extent Flexibility: The ability to bend, stretch, twist, or reach with your body, arms, and/or legs.
- Gross Body Equilibrium: The ability to keep or regain your body balance or stay upright when in an unstable position.
- Trunk Strength: The ability to use your abdominal and lower back muscles to support part of the body repeatedly or continuously over time without "giving out" or fatiguing.

**Sensory Abilities**

- Auditory Attention: The ability to focus on a single source of sound in the presence of other distracting sounds.
- Far Vision: The ability to see details at a distance.
- Near Vision: The ability to see details at close range (within a few feet of the observer).
- Peripheral Vision: The ability to see objects or movement of objects to one's side when the eyes are looking ahead.
- Speech Clarity: The ability to speak clearly so others can understand you.
- Speech Recognition: The ability to identify and understand the speech of another person.
- Visual Color Discrimination: The ability to match or detect differences between colors, including shades of color and brightness.

- Written Expression: The ability to communicate information and ideas in writing so others will understand.

Psychomotor Abilities

- Arm-Hand Steadiness: The ability to keep your hand and arm steady while moving your arm or while holding your arm and hand in one position.
- Control Precision: The ability to quickly and repeatedly adjust the controls of a machine or a vehicle to exact positions.
- Finger Dexterity: The ability to make precisely coordinated movements of the fingers of one or both hands to grasp, manipulate, or assemble very small objects.
- Manual Dexterity: The ability to quickly move your hand, your hand together with your arm, or your two hands to grasp, manipulate, or assemble objects.

Physical Abilities

- Dynamic Flexibility: The ability to quickly and repeatedly bend, stretch, twist, or reach out with your body, arms, and/or legs.
- Dynamic Strength: The ability to exert muscle force repeatedly or continuously over time. This involves muscular endurance and resistance to muscle fatigue.
- Extent Flexibility: The ability to bend, stretch, twist, or reach with your body, arms, and/or legs.
- Gross Body Coordination: The ability to coordinate the movement of your arms, legs, and torso together when the whole body is in motion.
- Gross Body Equilibrium: The ability to keep or regain your body balance or stay upright when in an unstable position.
Sensory Abilities

- Auditory Attention: The ability to focus on a single source of sound in the presence of other distracting sounds.
- Depth Perception: The ability to judge which of several objects is closer or farther away from you, or to judge the distance between you and an object.
- Hearing Sensitivity: The ability to detect or tell the differences between sounds that vary in pitch and loudness.
- Night Vision: The ability to see under low light conditions.
- Sound Localization: The ability to tell the direction from which a sound originated.
- Speech Clarity: The ability to speak clearly so others can understand you.
- Speech Recognition: The ability to identify and understand the speech of another person.
- Visual Color Discrimination: The ability to match or detect differences between colors, including shades of color and brightness.

Electromechanical Technology

Juan Alferez
jaalferez@tstc.edu

Cognitive Abilities

- Category Flexibility: The ability to generate or use different sets of rules for combining or grouping things in different ways.
- Deductive Reasoning: The ability to apply general rules to specific problems to produce answers that make sense.
- Flexibility of Closure: The ability to identify or detect a known pattern (a figure, object, word, or sound) that is hidden in other distracting material.
- Fluency of Ideas: The ability to come up with a number of ideas about a topic (the number of ideas is important, not their quality, correctness, or creativity).
- Inductive Reasoning: The ability to combine pieces of information to form general rules or conclusions (includes finding a relationship among seemingly unrelated events).
- Information Ordering: The ability to arrange things or actions in a certain order or pattern according to a specific rule or set of rules (e.g., patterns of numbers, letters, words, pictures, mathematical operations).
- Mathematical Reasoning: The ability to choose the right mathematical methods or formulas to solve a problem.
- Memorization: The ability to remember information such as words, numbers, pictures, and procedures.
- Number Facility: The ability to add, subtract, multiply, or divide quickly and correctly.
- Oral Comprehension: The ability to listen to and understand information and ideas presented through spoken words and sentences.
- Oral Expression: The ability to communicate information and ideas in speaking so others will understand.
- Originality: The ability to come up with unusual or clever ideas about a given topic or situation, or to develop creative ways to solve a problem.
- Perceptual Speed: The ability to quickly and accurately compare similarities and differences among sets of letters, numbers, objects, pictures, or patterns. The things to be compared may be presented at the same time or one after the other. This ability also includes comparing a presented object with a remembered object.
- Problem Sensitivity: The ability to tell when something is wrong or is likely to go wrong. It does not involve solving the problem, only recognizing there is a problem.
- Selective Attention: The ability to concentrate on a task over a period of time without being distracted.
- Spatial Orientation: The ability to know your location in relation to the environment or to know where other objects are in relation to you.
- Speed of Closure: The ability to quickly make sense of, combine, and organize information into meaningful patterns.
- Time Sharing: The ability to shift back and forth between two or more activities or sources of information (such as speech, sounds, touch, or other sources).
- Visualization: The ability to imagine how something will look after it is moved around or when its parts are moved or rearranged.
- Written Comprehension: The ability to read and understand information and ideas presented in writing.
- Written Expression: The ability to communicate information and ideas in writing so others will understand.

Psychomotor Abilities

- Arm-Hand Steadiness: The ability to keep your hand and arm steady while moving your arm or while holding your arm and hand in one position.
- Control Precision: The ability to quickly and repeatedly adjust the controls of a machine or a vehicle to exact positions.
- Finger Dexterity: The ability to make precisely coordinated movements of the fingers of one or both hands to grasp, manipulate, or assemble very small objects.
- Manual Dexterity: The ability to quickly move your hand, your hand together with your arm, or your two hands to grasp, manipulate, or assemble objects.
- Multi-limb Coordination: The ability to coordinate two or more limbs (for example, two arms, two legs, or one leg...
and one arm) while sitting, standing, or lying down. It does not involve performing the activities while the whole body is in motion.

- Rate Control: The ability to time your movements or the movement of a piece of equipment in anticipation of changes in the speed and/or direction of a moving object or scene.
- Reaction Time: The ability to quickly respond (with the hand, finger, or foot) to a signal (sound, light, picture) when it appears.
- Response Orientation: The ability to choose quickly between two or more movements in response to two or more different signals (lights, sounds, pictures). It includes the speed with which the correct response is started with the hand, foot, or other body part.
- Speed of Limb Movement: The ability to quickly move the arms and legs.
- Wrist-Finger Speed: The ability to make fast, simple, repeated movements of the fingers, hands, and wrists.

Physical Abilities

- Dynamic Flexibility: The ability to quickly and repeatedly bend, stretch, twist, or reach out with your body, arms, and/or legs.
- Dynamic Strength: The ability to exert muscle force repeatedly or continuously over time. This involves muscular endurance and resistance to muscle fatigue.
- Explosive Strength: The ability to use short bursts of muscle force to propel oneself (as in jumping or sprinting), or to throw an object.
- Extent Flexibility: The ability to bend, stretch, twist, or reach with your body, arms, and/or legs.
- Gross Body Coordination: The ability to coordinate the movement of your arms, legs, and torso together when the whole body is in motion.
- Gross Body Equilibrium: The ability to keep or regain your body balance or stay upright when in an unstable position.
- Stamina: The ability to exert yourself physically over long periods of time without getting winded or out of breath.
- Static Strength: The ability to exert maximum muscle force to lift, push, pull, or carry objects.
- Trunk Strength: The ability to use your abdominal and lower back muscles to support part of the body repeatedly or continuously over time without ‘giving out’ or fatiguing.

Sensory Abilities

- Auditory Attention: The ability to focus on a single source of sound in the presence of other distracting sounds.
- Depth Perception: The ability to judge which of several objects is closer or farther away from you, or to judge the distance between you and an object.
- Far Vision: The ability to see details at a distance.
- Glare Sensitivity: The ability to see objects in the presence of glare or bright lighting.
- Hearing Sensitivity: The ability to detect or tell the differences between sounds that vary in pitch and loudness.
- Near Vision: The ability to see details at close range (within a few feet of the observer).
- Night Vision: The ability to see under low light conditions.
- Peripheral Vision: The ability to see objects or movement of objects to one’s side when the eyes are looking ahead.
- Sound Localization: The ability to tell the direction from which a sound originated.
- Speech Clarity: The ability to speak clearly so others can understand you.
- Speech Recognition: The ability to identify and understand the speech of another person.
- Visual Color Discrimination: The ability to match or detect differences between colors, including shades of color and brightness.

- **Number Facility**: The ability to add, subtract, multiply, or divide quickly and correctly.
- **Oral Comprehension**: The ability to listen to and understand information and ideas presented through spoken words and sentences.
- **Oral Expression**: The ability to communicate information and ideas in speaking so others will understand.
- **Originality**: The ability to come up with unusual or clever ideas about a given topic or situation, or to develop creative ways to solve a problem.
- **Problem Sensitivity**: The ability to tell when something is wrong or is likely to go wrong. It does not involve solving the problem, only recognizing there is a problem.
- **Speed of Closure**: The ability to quickly make sense of, combine, and organize information into meaningful patterns.
- **Visualization**: The ability to imagine how something will look after it is moved around or when its parts are moved or rearranged.
- **Written Comprehension**: The ability to read and understand information and ideas presented in writing.
- **Written Expression**: The ability to communicate information and ideas in writing so others will understand.

**Sensory Abilities**

- **Auditory Attention**: The ability to focus on a single source of sound in the presence of other distracting sounds.

**Mechatronics Technology**

**Juan Alferez**  
jaalferez@tstc.edu

**Cognitive Abilities**

- **Category Flexibility**: The ability to generate or use different sets of rules for combining or grouping things in different ways.
- **Deductive Reasoning**: The ability to apply general rules to specific problems to produce answers that make sense.
- **Flexibility of Closure**: The ability to identify or detect a known pattern (a figure, object, word, or sound) that is hidden in other distracting material.
- **Fluency of Ideas**: The ability to come up with a number of ideas about a topic (the number of ideas is important, not their quality, correctness, or creativity).
- **Inductive Reasoning**: The ability to combine pieces of information to form general rules or conclusions (includes finding a relationship among seemingly unrelated events).
- **Information Ordering**: The ability to arrange things or actions in a certain order or pattern according to a specific rule or set of rules (e.g., patterns of numbers, letters, words, pictures, mathematical operations).
- **Mathematical Reasoning**: The ability to choose the right mathematical methods or formulas to solve a problem.
- **Memorization**: The ability to remember information, such as words, numbers, pictures, and procedures.
- **Number Facility**: The ability to add, subtract, multiply, or divide quickly and correctly.
- **Oral Comprehension**: The ability to listen to and understand information and ideas presented through spoken words and sentences.
- **Oral Expression**: The ability to communicate information and ideas in speaking so others will understand.
- **Originality**: The ability to come up with unusual or clever ideas about a given topic or situation, or to develop creative ways to solve a problem.
Perceptual Speed: The ability to quickly and accurately compare similarities and differences among sets of letters, numbers, objects, pictures, or patterns. The things to be compared may be presented at the same time or one after the other. This ability also includes comparing a presented object with a remembered object.

Problem Sensitivity: The ability to tell when something is wrong or is likely to go wrong. It does not involve solving the problem, only recognizing there is a problem.

Selective Attention: The ability to concentrate on a task over a period of time without being distracted.

Spatial Orientation: The ability to know your location in relation to the environment or to know where other objects are in relation to you.

Speed of Closure: The ability to quickly make sense of, combine, and organize information into meaningful patterns.

Time Sharing: The ability to shift back and forth between two or more activities or sources of information (such as speech, sounds, touch, or other sources).

Visualization: The ability to imagine how something will look after it is moved around or when its parts are moved or rearranged.

Written Comprehension: The ability to read and understand information and ideas presented in writing.

Written Expression: The ability to communicate information and ideas in writing so others will understand.

Psychomotor Abilities

Arm-Hand Steadiness: The ability to keep your hand and arm steady while moving your arm or while holding your arm and hand in one position.

Control Precision: The ability to quickly and repeatedly adjust the controls of a machine or a vehicle to exact positions.

Finger Dexterity: The ability to make precisely coordinated movements of the fingers of one or both hands to grasp, manipulate, or assemble very small objects.

Manual Dexterity: The ability to quickly move your hand, your hand together with your arm, or your two hands to grasp, manipulate, or assemble objects.

Multi-limb Coordination: The ability to coordinate two or more limbs (for example, two arms, two legs, or one leg and one arm) while sitting, standing, or lying down. It does not involve performing the activities while the whole body is in motion.

Rate Control: The ability to time your movements or the movement of a piece of equipment in anticipation of changes in the speed and/or direction of a moving object or scene.

Reaction Time: The ability to quickly respond (with the hand, finger, or foot) to a signal (sound, light, picture) when it appears.

Response Orientation: The ability to choose quickly between two or more movements in response to two or more different signals (lights, sounds, pictures). It includes the speed with which the correct response is started with the hand, foot, or other body part.

Speed of Limb Movement: The ability to quickly move the arms and legs.

Wrist-Finger Speed: The ability to make fast, simple, repeated movements of the fingers, hands, and wrists.

Physical Abilities

Dynamic Flexibility: The ability to quickly and repeatedly bend, stretch, twist, or reach out with your body, arms, and/or legs.

Dynamic Strength: The ability to exert muscle force repeatedly or continuously over time. This involves muscular endurance and resistance to muscle fatigue.

Explosive Strength: The ability to use short bursts of muscle force to propel oneself (as in jumping or sprinting), or to throw an object.

Extent Flexibility: The ability to bend, stretch, twist, or reach with your body, arms, and/or legs.

Gross Body Coordination: The ability to coordinate the movement of your arms, legs, and torso together when the whole body is in motion.

Gross Body Equilibrium: The ability to keep or regain your body balance or stay upright when in an unstable position.

Stamina: The ability to exert yourself physically over long periods of time without getting winded or out of breath.

Static Strength: The ability to exert maximum muscle force to lift, push, pull, or carry objects.

Trunk Strength: The ability to use your abdominal and lower back muscles to support part of the body repeatedly or continuously over time without “giving out” or fatiguing.

Sensory Abilities

Auditory Attention: The ability to focus on a single source of sound in the presence of other distracting sounds.

Depth Perception: The ability to judge which of several objects is closer or farther away from you, or to judge the distance between you and an object.

Far Vision: The ability to see details at a distance.

Glare Sensitivity: The ability to see objects in the presence of glare or bright lighting.

Hearing Sensitivity: The ability to detect or tell the differences between sounds that vary in pitch and loudness.

Near Vision: The ability to see details at close range (within a few feet of the observer).

Night Vision: The ability to see under low light conditions.
2022-2023 Catalog & Student Handbook

- Peripheral Vision: The ability to see objects or movement of objects to one’s side when the eyes are looking ahead.
- Sound Localization: The ability to tell the direction from which a sound originated.
- Speech Clarity: The ability to speak clearly so others can understand you.
- Speech Recognition: The ability to identify and understand the speech of another person.
- Visual Color Discrimination: The ability to match or detect differences between colors, including shades of color and brightness.

- **Visual Color Discrimination**: The ability to match or detect differences between colors, including shades of color and brightness.

Additional Information

- Ability to walk the equivalent of five (5) miles a day and climb two or more flights of stairs.
- Ability to reach above shoulder level.
- Ability to bend, stoop and lift from low area/floor to waist high level.
- Ability to lift, balance and carry up to fifty (50) pounds unassisted.
- Ability to grip 5-10 pounds of pressure and dexterity to pick up small items.
- Ability to sit or stand for long periods of time — three (3) or more hours at a time.
- Ability to perform CPR with compressions at a rate of 100 beats per minute.
- Ability to hear tape recorded transcriptions and distinguish emergency monitors/sounds.
- Ability to distinguish colors; good overall eyesight corrected with glasses if necessary.
- Ability to view small numbers on medication vials/ read small print.
- Ability to interpret written and oral forms of instructions (ENGLISH/abbreviations/ terminology).
- Ability to converse, interview/communicate with co-workers, patients and family members.
- Ability to read and document legibly in ENGLISH at or above the college level.
- Ability to work in high risk/high stress areas as is common to the profession.
- Ability to read and comprehend college level coursework including math calculations for pharmacology.

Occupational Safety and Environmental Compliance Technology

btmcmahan@tstc.edu

Cognitive Abilities

- Category Flexibility: The ability to generate or use different sets of rules for combining or grouping things in different ways.
- Deductive Reasoning: The ability to apply general rules to specific problems to produce answers that make sense.
- Flexibility of Closure: The ability to identify or detect a known pattern (a figure, object, word, or sound) that is hidden in other distracting material.
- Inductive Reasoning: The ability to combine pieces of information to form general rules or conclusions (includes finding a relationship among seemingly unrelated events).
- Mathematical Reasoning: The ability to choose the right mathematical methods or formulas to solve a problem.
- Number Facility: The ability to add, subtract, multiply, or divide quickly and correctly.
- Oral Comprehension: The ability to listen to and understand information and ideas presented through spoken words and sentences.
- Oral Expression: The ability to communicate information and ideas in speaking so others will understand.
- Originality: The ability to come up with unusual or clever ideas about a given topic or situation, or to develop creative ways to solve a problem.
- Problem Sensitivity: The ability to tell when something is wrong or is likely to go wrong. It does not involve solving the problem, only recognizing there is a problem.
- Selective Attention: The ability to concentrate on a task over a period of time without being distracted.
- Speed of Closure: The ability to quickly make sense of, combine, and organize information into meaningful patterns.
- Time Sharing: The ability to shift back and forth between two or more activities or sources of information (such as speech, sounds, touch, or other sources).
- Visualization: The ability to imagine how something will look after it is moved around or when its parts are moved or rearranged.
- Written Comprehension: The ability to read and understand information and ideas presented in writing.
- Written Expression: The ability to communicate information and ideas in writing so others will understand.

Psychomotor Abilities

- Arm-Hand Steadiness: The ability to keep your hand and arm steady while moving your arm or while holding your arm and hand in one position.
- Finger Dexterity: The ability to make precisely coordinated movements of the fingers of one or both hands to grasp, manipulate, or assemble very small objects.
- Manual Dexterity: The ability to quickly move your hand, your hand together with your arm, or your two hands to grasp, manipulate, or assemble objects.
- Multi-limb Coordination: The ability to coordinate two or more limbs (for example, two arms, two legs, or one leg and one arm) while sitting, standing, or lying down. It does not involve performing the activities while the whole body is in motion.
Physical Abilities

- Gross Body Equilibrium: The ability to keep or regain your body balance or stay upright when in an unstable position.

Sensory Abilities

- Auditory Attention: The ability to focus on a single source of sound in the presence of other distracting sounds.
- Depth Perception: The ability to judge which of several objects is closer or farther away from you, or to judge the distance between you and an object.
- Hearing Sensitivity: The ability to detect or tell the differences between sounds that vary in pitch and loudness.
- Near Vision: The ability to see details at close range (within a few feet of the observer).
- Peripheral Vision: The ability to see objects or movement of objects to one’s side when the eyes are looking ahead.
- Sound Localization: The ability to tell the direction from which a sound originated.
- Speech Clarity: The ability to speak clearly so others can understand you.
- Speech Recognition: The ability to identify and understand the speech of another person.
- Visual Color Discrimination: The ability to match or detect differences between colors, including shades of color and brightness.

Solar Energy and Electrical Construction

Cognitive Abilities

- Category Flexibility: The ability to generate or use different sets of rules for combining or grouping things in different ways.
- Deductive Reasoning: The ability to apply general rules to specific problems to produce answers that make sense.
- Flexibility of Closure: The ability to identify or detect a known pattern (a figure, object, word or sound) that is hidden in other distracting material.
- Fluency of Ideas: The ability to come up with a number of ideas about a topic (the number of ideas is important, not their quality, correctness or creativity).
- Inductive Reasoning: The ability to combine pieces of information to form general rules or conclusions (includes finding a relationship among seemingly unrelated events).
- Information Ordering: The ability to arrange things or actions in a certain order or pattern according to a specific rule or set of rules (e.g., patterns of numbers, letters, words, pictures, mathematical operations).
- Mathematical Reasoning: The ability to choose the right mathematical methods or formulas to solve a problem.
- Memorization: The ability to remember information such as words, numbers, pictures and procedures.
- Number Facility: The ability to add, subtract, multiply or divide quickly and correctly.
- Oral Comprehension: The ability to listen to and understand information and ideas presented through spoken words and sentences.
- Oral Expression: The ability to communicate information and ideas in speaking so others will understand.
- Perceptual Speed: The ability to quickly and accurately compare similarities and differences among sets of letters, numbers, objects, pictures or patterns. The things to be compared may be presented at the same time or one after the other. This ability also includes comparing a presented object with a remembered object.
- Problem Sensitivity: The ability to tell when something is wrong or is likely to go wrong. It does not involve solving the problem, only recognizing there is a problem.
- Selective Attention: The ability to concentrate on a task over a period of time without being distracted.
- Spatial Orientation: The ability to know your location in relation to the environment or to know where other objects are in relation to you.
- Speed of Closure: The ability to quickly make sense of, combine, and organize information into meaningful patterns.
- Time Sharing: The ability to shift back and forth between two or more activities or sources of information (such as speech, sounds, touch or other sources).
- Visualization: The ability to imagine how something will look after it is moved around or when its parts are moved or rearranged.
- Written Comprehension: The ability to read and understand information and ideas presented in writing.
- Written Expression: The ability to communicate information and ideas in writing so others will understand.

Psychomotor Abilities

- Arm-Hand Steadiness: The ability to keep your hand and arm steady while moving your arm or while holding your arm and hand in one position.
- Control Precision: The ability to quickly and repeatedly adjust the controls of a machine or a vehicle to exact positions.
- Finger Dexterity: The ability to make precisely coordinated movements of the fingers of one or both hands to grasp, manipulate or assemble very small objects.
- Manual Dexterity: The ability to quickly move your hand, your hand together with your arm, or your two hands to grasp, manipulate or assemble objects.
- Multi-limb Coordination: The ability to coordinate two or more limbs (for example, two arms, two legs or one leg and one arm) while sitting, standing, or lying down. It does not involve performing the activities while the whole body is
Physical Abilities

- Dynamic Flexibility: The ability to quickly and repeatedly bend, stretch, twist or reach out with your body, arms and/or legs.
- Dynamic Strength: The ability to exert muscle force repeatedly or continuously over time. This involves muscular endurance and resistance to muscle fatigue.
- Explosive Strength: The ability to use short bursts of muscle force to propel oneself (as in jumping or sprinting), or to throw an object.
- Extent Flexibility: The ability to bend, stretch, twist or reach with your body, arms and/or legs.
- Gross Body Coordination: The ability to coordinate the movement of your arms, legs and torso together when the whole body is in motion.
- Gross Body Equilibrium: The ability to keep or regain your body balance or stay upright when in an unstable position.
- Stamina: The ability to exert yourself physically over long periods of time without getting winded or out of breath.
- Strength: The ability to exert maximum muscle force to lift, push, pull or carry objects.
- Trunk Strength: The ability to use your abdominal and lower back muscles to support part of the body repeatedly or continuously over time without “giving out” or fatiguing.

Sensory Abilities

- Auditory Attention: The ability to focus on a single source of sound in the presence of other distracting sounds.
- Depth Perception: The ability to judge which of several objects is closer or farther away from you, or to judge the distance between you and an object.
- Far Vision: The ability to see details at a distance.
- Glare Sensitivity: The ability to see objects in the presence of glare or bright lighting.
- Hearing Sensitivity: The ability to detect or tell the differences between sounds that vary in pitch and loudness.
- Near Vision: The ability to see details at close range (within a few feet of the observer).
- Night Vision: The ability to see under low light conditions.
- Peripheral Vision: The ability to see objects or movement of objects to one’s side when the eyes are looking ahead.
- Sound Localization: The ability to tell the direction from which a sound originated.
- Speech Clarity: The ability to speak clearly so others can understand you.
- Speech Recognition: The ability to identify and understand the speech of another person.
- Visual Color Discrimination: The ability to match or detect differences between colors, including shades of color and brightness.

Spatial Orientation: The ability to know your location in relation to the environment or to know where other objects are in relation to you.

Speed of Closure: The ability to quickly make sense of, combine, and organize information into meaningful patterns.

Time Sharing: The ability to shift back and forth between two or more activities or sources of information (such as speech, sounds, touch, or other sources).

Visualization: The ability to imagine how something will look after it is moved around or when its parts are moved or rearranged.

Written Comprehension: The ability to read and understand information and ideas presented in writing.

Written Expression: The ability to communicate information and ideas in writing so others will understand.

Psychomotor Abilities

Arm-Hand Steadiness: The ability to keep your hand and arm steady while moving your arm or while holding your arm and hand in one position.

Control Precision: The ability to quickly and repeatedly adjust the controls of a machine or a vehicle to exact positions.

Finger Dexterity: The ability to make precisely coordinated movements of the fingers of one or both hands to grasp, manipulate, or assemble very small objects.

Manual Dexterity: The ability to quickly move your hand, your hand together with your arm, or your two hands to grasp, manipulate, or assemble objects.

Multi-limb Coordination: The ability to coordinate two or more limbs (for example, two arms, two legs, or one leg and one arm) while sitting, standing, or lying down. It does not involve performing the activities while the whole body is in motion.

Rate Control: The ability to time your movements or the movement of a piece of equipment in anticipation of changes in the speed and/or direction of a moving object or scene.

Reaction Time: The ability to quickly respond (with the hand, finger, or foot) to a signal (sound, light, picture) when it appears.

Response Orientation: The ability to choose quickly between two or more movements in response to two or more different signals (lights, sounds, pictures). It includes the speed with which the correct response is started with the hand, foot, or other body part.

Speed of Limb Movement: The ability to quickly move the arms and legs.

Wrist-Finger Speed: The ability to make fast, simple, repeated movements of the fingers, hands, and wrists.

Physical Abilities

Dynamic Flexibility: The ability to quickly and repeatedly bend, stretch, twist, or reach out with your body, arms, and/or legs.

Dynamic Strength: The ability to exert muscle force repeatedly or continuously over time. This involves muscular endurance and resistance to muscle fatigue.

Extent Flexibility: The ability to bend, stretch, twist, or reach with your body, arms, and/or legs.

Gross Body Coordination: The ability to coordinate the movement of your arms, legs, and torso together when the whole body is in motion.

Gross Body Equilibrium: The ability to keep or regain your body balance or stay upright when in an unstable position.

Stamina: The ability to exert yourself physically over long periods of time without getting winded or out of breath.

Static Strength: The ability to exert maximum muscle force to lift, push, pull, or carry objects.

Trunk Strength: The ability to use your abdominal and lower back muscles to support part of the body repeatedly or continuously over time without ‘giving out’ or fatiguing.

Sensory Abilities

Auditory Attention: The ability to focus on a single source of sound in the presence of other distracting sounds.

Depth Perception: The ability to judge which of several objects is closer or farther away from you, or to judge the distance between you and an object.

Far Vision: The ability to see details at a distance.
2022-2023 Catalog & Student Handbook

- Glare Sensitivity: The ability to see objects in the presence of glare or bright lighting.
- Hearing Sensitivity: The ability to detect or tell the differences between sounds that vary in pitch and loudness.
- Near Vision: The ability to see details at close range (within a few feet of the observer).
- Night Vision: The ability to see under low light conditions.
- Peripheral Vision: The ability to see objects or movement of objects to one's side when the eyes are looking ahead.
- Sound Localization: The ability to tell the direction from which a sound originated.
- Speech Clarity: The ability to speak clearly so others can understand you.
- Speech Recognition: The ability to identify and understand the speech of another person.
- Visual Color Discrimination: The ability to match or detect differences between colors, including shades of color and brightness.

Speech Recognition: The ability to identify and understand the speech of another person.
Visual Color Discrimination: The ability to match or detect differences between colors, including shades of color and brightness.

*What are Essential Program Functions?*

All students in a program are expected to perform certain essential functions based on industry requirements and standards for completion of all phases of the program. Essential functions as stated here are not conditions of admission to the program of study, but rather, reflect performance abilities that are necessary for a student to successfully complete the requirements of the specified program. Students should verify their ability to perform these essential functions with or without accommodations.

Any student who believes they may not be able to perform the functions listed may contact the Access and Learning Accommodations (adarequest@tstc.edu) office to discuss whether reasonable accommodations can be made without fundamental alteration to the requirements of the program.

- Spatial Orientation: The ability to know your location in relation to the environment or to know where other objects are in relation to you.
- Speed of Closure: The ability to quickly make sense of, combine, and organize information into meaningful patterns.
- Time Sharing: The ability to shift back and forth between two or more activities or sources of information (such as speech, sounds, touch, or other sources).
- Visualization: The ability to imagine how something will look after it is moved around or when its parts are moved or rearranged.
- Written Comprehension: The ability to read and understand information and ideas presented in writing.
- Written Expression: The ability to communicate information and ideas in writing so others will understand.

Psychomotor Abilities
Arm-Hand Steadiness: The ability to keep your hand and arm steady while moving your arm or while holding your arm and hand in one position.
Control Precision: The ability to quickly and repeatedly adjust the controls of a machine or a vehicle to exact positions.
Finger Dexterity: The ability to make precisely coordinated movements of the fingers of one or both hands to grasp, manipulate, or assemble very small objects.
Manual Dexterity: The ability to quickly move your hand, your hand together with your arm, or your two hands to grasp, manipulate, or assemble objects.
Multi-limb Coordination: The ability to coordinate two or more limbs (for example, two arms, two legs, or one leg and one arm) while sitting, standing, or lying down. It does not involve performing the activities while the whole body is in motion.
Rate Control: The ability to time your movements or the movement of a piece of equipment in anticipation of changes in the speed and/or direction of a moving object or scene.
Reaction Time: The ability to quickly respond (with the hand, finger, or foot) to a signal (sound, light, picture) when it appears.
Response Orientation: The ability to choose quickly between two or more movements in response to two or more different signals (lights, sounds, pictures). It includes the speed with which the correct response is started with the hand, foot, or other body part.
Speed of Limb Movement: The ability to quickly move the arms and legs.
Wrist-Finger Speed: The ability to make fast, simple, repeated movements of the fingers, hands, and wrists.

Physical Abilities

Dynamic Flexibility: The ability to quickly and repeatedly bend, stretch, twist, or reach out with your body, arms, and/or legs.
Dynamic Strength: The ability to exert muscle force repeatedly or continuously over time. This involves muscular endurance and resistance to muscle fatigue.
Explosive Strength: The ability to use short bursts of muscle force to propel oneself (as in jumping or sprinting), or to throw an object.
Extent Flexibility: The ability to bend, stretch, twist, or reach with your body, arms, and/or legs.
Gross Body Coordination: The ability to coordinate the movement of your arms, legs, and torso together when the whole body is in motion.
Gross Body Equilibrium: The ability to keep or regain your body balance or stay upright when in an unstable position.
Stamina: The ability to exert yourself physically over long periods of time without getting winded or out of breath.
Static Strength: The ability to exert maximum muscle force to lift, push, pull, or carry objects.
Trunk Strength: The ability to use your abdominal and lower back muscles to support part of the body repeatedly or continuously over time without “giving out” or fatiguing.

Sensory Abilities

Auditory Attention: The ability to focus on a single source of sound in the presence of other distracting sounds.
Depth Perception: The ability to judge which of several objects is closer or farther away from you, or to judge the distance between you and an object.
Far Vision: The ability to see details at a distance.
Glare Sensitivity: The ability to see objects in the presence of glare or bright lighting.
Hearing Sensitivity: The ability to detect or tell the differences between sounds that vary in pitch and loudness.
Near Vision: The ability to see details at close range (within a few feet of the observer).
Night Vision: The ability to see under low light conditions.
Peripheral Vision: The ability to see objects or movement of objects to one’s side when the eyes are looking ahead.
Sound Localization: The ability to tell the direction from which a sound originated.
Speech Clarity: The ability to speak clearly so others can understand you.
Speech Recognition: The ability to identify and understand the speech of another person.
Visual Color Discrimination: The ability to match or detect differences between colors, including shades of color and brightness.
Program Areas

Academic Core Curriculum

Description
TSTC's Academic Core can provide you with a broad general understanding of communication skills, critical thinking, inquiry and research, and multiple perspectives about an individual and the world that we live in. With Academic Core classes, you can transfer credits to another public college or university, complete an AAS or AS at TSTC and transfer all the classes as a block to another public college or university, and get your "basics" out of the way. After completing the Academic Core courses at TSTC, you'll receive an institutional certificate of completion.

Academic Core Curriculum - Academic Core

Locations
Harlingen

Program Requirements

Semester 1
12 Total Credits

- Complete the following:
  - ENGL1301 - Composition I (3)
  - GOVT2305 - Federal Government (Federal constitution & topics) (3)
  - ACGM3CAR - Creative Arts Elective (3)
  - ACGM3CAOB - Component Area Option (3)

Semester 2
15 Total Credits

- Complete the following:
  - ENGL1302 - Composition II (3)
  - GOVT2306 - Texas Government (Texas constitution & topics) (3)
  - HIST1301 - United States History I (3)
  - ACGM3LPS - Life and Physical Science Elective (3)
  - ACGM3CAOA - Component Area Option A (3)

Semester 3
15 Total Credits

- Complete the following:
  - ACGM3LPS - Life and Physical Science Elective (3)
  - HIST1302 - United States History II (3)
  - ACGM3MTH - Gen Ed Mathematics Elective (3)
  - ACGM3LPC - Language, Philosophy and Culture Elective (3)
  - ACGM3SBS - Gen Ed Social/Behavioral Science Elective (3)

Grand Total Credits: 42

Pre/Corequisites

- ENGL 1302 Prerequisite(s): ENGL 1301

Elective Options

- Complete at least 1 courses from the following:
  Creative Arts Elective
  - ARTS1301 - Art Appreciation
  - MUSI1306 - Music Appreciation
- Complete at least 1 courses from the following:
  Component Area Option B (for Academic Core Curriculum)
  - SPCH1311 - Introduction to Speech Communication
  - SPCH1315 - Public Speaking (3)
  - SPCH1318 - Interpersonal Communication
  - SPCH1321 - Business & Professional Communication
Complete at least 2 courses from the following:
Life & Physical Science Elective
- BIOL1306 - Biology for Science Majors I (lecture)(3)
- BIOL1307 - Biology for Science Majors II(3)
- BIOL1308 - Biology for Non-Science Majors I(3)
- BIOL1309 - Biology for Non-Science Majors II(3)
- BIOL2301 - Anatomy & Physiology I (lecture)(3)
- BIOL2302 - Anatomy & Physiology II (lecture)(3)
- CHEM1311 - General Chemistry I (lecture)(3)
- CHEM1312 - General Chemistry II (lecture)(3)
- PHYS1301 - College Physics I (lecture)(3)
- PHYS1302 - College Physics II (lecture)(3)
- PHYS1315 - Physical Science I (lecture)(3)
- PHYS1317 - Physical Science II(3)

Complete at least 1 courses from the following:
Component Area Option A (for Academic Core Curriculum)
- BIOL1106 - Biology for Science Majors Laboratory I (lab)(1)
- BIOL1107 - Biology for Science Majors II Lab(1)
- BIOL1108 - Biology Non-Science Majors Laboratory I(1)
- BIOL1109 - Biology for Non-Science Majors II Lab(1)
- BIOL2101 - Anatomy & Physiology I (lab)(1)
- BIOL2102 - Anatomy & Physiology II (lab)(1)
- CHEM1111 - General Chemistry I (lab)(1)
- CHEM1112 - General Chemistry II (lab)(1)
- ENGL2321 - British Literature
- ENGL2326 - American Literature (single-Semester Course)
- ENGL2307 - Creative Writing I
- PHYS1101 - College Physics Laboratory I(1)
- PHYS1102 - College Physics Lab II(1)
- PHYS1115 - Physical Science Lab I(1)
- PHYS1117 - Physical Science Lab II(1)
- PSYC2314 - Lifespan Growth & Development(3)

Complete at least 1 courses from the following:
Mathematics Elective (for Academic Core)
- MATH1314 - College Algebra (3 SCH version)(3)
- MATH1314 - College Algebra (3 SCH version)(3)
- MATH1332 - Contemporary Mathematics (Quantitative Reasoning)(3)
- MATH2312 - Pre-Calculus Math (3 SCH version)(3)

Complete at least 1 courses from the following:
Language, Philosophy & Culture Elective
- ENGL2321 - British Literature
- ENGL2326 - American Literature (single-Semester Course)
- ENGL2331 - World Literature
- PHIL1304 - Introduction to World Religions

Complete at least 1 courses from the following:
Social/Behavioral Science Elective (for Academic Core)
- ECON2301 - Principles of Macroeconomics(3)
- ECON2302 - Principles of Microeconomics (3)
- PSYC2301 - General Psychology(3)
- PSYC2314 - Lifespan Growth & Development(3)
- SOC1301 - Introduction to Sociology(3)

Complete all courses from the following:
Communication (for Academic Core)
- ENGL1301 - Composition I(3)
- ENGL1302 - Composition II(3)

Complete all courses from the following:
Government/Political Science
- GOVT2305 - Federal Government (Federal constitution & topics)(3)
- GOVT2306 - Texas Government (Texas constitution & topics)(3)

Complete all courses from the following:
American History
- HIST1301 - United States History I(3)
- HIST1302 - United States History II(3)
**Aircraft Airframe Technology**

**Description**

Aviation maintenance technicians are a vital part of the aerospace industry workforce, inspecting, servicing and maintaining aircraft worldwide. The Aircraft Airframe specialty trains students specifically in major airframe components and structures such as hydraulics/pneumatics, landing gear systems, sheet metal and composite technology. Airframe technicians are employed by repair stations, contract maintenance facilities, general aviation maintenance, and regional and national airlines. For quicker entry into the industry, an Aircraft Airframe Technician certificate is also available.
Aircraft Airframe Technology - Aircraft Airframe Technician CER2

Locations

Program Requirements

Semester 1
15 Total Credits

- Complete all of the following
  - Complete at least 3 credits from the following:
    - AERM1107 - Aviation Mathematics (1)
    - AERM1109 - Aviation Physics (1)
    - AERM1112 - Aviation Drawings (1)
    - AERM1315 - Aviation Science (3)
  - Complete the following:
    - AERM1203 - Shop Practices (2)
    - AERM1205 - Weight and Balance (2)
    - AERM1208 - Federal Aviation Regulations (2)
    - AERM1210 - Ground Operations (2)
    - AERM1414 - Basic Electricity (4)

Semester 2
13 Total Credits

- Complete the following:
  - AERM1347 - Airframe Auxiliary Systems (3)
  - AERM1345 - Airframe Electrical Systems (3)
  - AERM1350 - Landing Gear Systems (3)
  - AERM1449 - Hydraulic, Pneumatic, and Fuel Systems (4)

Semester 3
7 Total Credits

- Complete the following:
  - AERM1241 - Wood, Fabric, and Finishes (2)
  - AERM1243 - Instruments and Navigation/Communication (2)
  - AERM1153 - Aircraft Welding (1)
  - AERM1254 - Aircraft Composites (2)

Semester 4
10 Total Credits

- Complete the following:
  - AERM1352 - Aircraft Sheet Metal (3)
  - AERM2230 - FAA Review - Airframe (2)
  - AERM2231 - Airframe Inspection (2)
  - AERM2333 - Assembly and Rigging (3)

Degree Plan Credits 45

Capstone

- Complete the following:
  - AERM2230 - FAA Review - Airframe (2)

Pre/Corequisites

- AERM 1347 Prerequisite(s): (AERM 1109 OR AERM 1315) AND (AERM 1314 OR AERM 1414)
- AERM 1345, AERM 1243 Prerequisite(s): AERM 1314 OR AERM 1414
- AERM 1350 Prerequisite(s): (AERM 1203, AERM 1315) OR (AERM 1203, AERM 1109)
- AERM 1449, AERM 2333 Prerequisite(s): AERM 1109 or AERM 1315
- AERM 1352 Prerequisite(s): (AERM 1107, AERM 1112, AERM 1203) or (AERM 1315, AERM 1203)

Aircraft Pilot Training Technology

Description
With aviation experience dating back more than 50 years, TSTC has been a proud provider of professional pilots throughout the aviation industry. Our students get a first-class education with hands-on training in the world’s most popular training aircraft along with classroom and one-on-one ground instruction with industry professionals. Students spend most of their time learning by doing while training to become industry professionals. All Aircraft Pilot Training students must submit an application to the program after being accepted as TSTC students. The application includes providing evidence of a Class II flight physical and a current Class II medical record. All new students must successfully complete a Texas Success Initiative evaluation (or equivalent) and any necessary remedial academic courses before registering for classes in this program. Flight hours and costs vary per term and are subject to change due to variables such as weather, maintenance, fluctuating fuel costs, and flight-time costs.

Program Requirements

Semester 1
12 Total Credits

- Complete the following:
  - AIRP1215 - Private Flight (2)
  - AIRP1301 - Air Navigation (3)
  - AIRP1307 - Aviation Meteorology (3)
  - AIRP1417 - Private Pilot Ground School (4)

Semester 2
13 Total Credits

- Complete the following:
  - AIRP1343 - Aerodynamics (3)
  - AIRP2355 - Propulsion Systems (3)
  - AIRP1345 - Aviation Safety (3)
  - AIRP1175 - Intermediate Flight (1)
  - ACGM3MTH - Gen Ed Mathematics Elective (3)

Semester 3
12 Total Credits

- Complete all of the following
  - Complete the following:
    - AIRP1451 - Instrument Ground School (4)
    - AIRP2250 - Instrument Flight (2)
    - ACGM3GED - Gen Ed Elective (3)
  - Complete at least 3 credits from the following:
    - ENGL1301 - Composition I (3)
    - ENGL2311 - Technical & Business Writing (3)

Semester 4
11 Total Credits

- Complete the following:
  - AIRP2357 - Turbine Aircraft Systems Ground School (3)
  - AIRP2337 - Commercial Ground School (3)
  - AIRP2239 - Commercial Flight (2)
  - ACGM3SBS - Gen Ed Social/Behavioral Science Elective (3)

Semester 5
12 Total Credits

- Complete all of the following
  - Complete 1 of the following
    - Complete the following:
      - AIRP2236 - Certified Flight Instructor - Flight (2)
    - Complete the following:
      - AIRP2251 - Multiengine Flight (2)
  - Complete the following:
    - AVIM2337 - Aviation Law (3)
    - AIRP2449 - Instructor Ground School (4)
    - ACGM3HFA - Gen Ed Humanities/Fine Arts Elective (3)

- Complete the following:
  - AIRP1301 - Air Navigation (3)
  - AIRP1307 - Aviation Meteorology (3)
  - AIRP1417 - Private Pilot Ground School (4)
  - AIRP1345 - Aviation Safety (3)
  - AVIM1391 - Special Topics in Aviation Management (3)

Grand Total Credits: 16

Capstone
- Complete the following:
  - AVIM1391 - Special Topics in Aviation Management (3)

Aircraft Powerplant Technology

Description
Aircraft Powerplant Technology students learn basic aviation knowledge, shop practices, aircraft engines and electrical, troubleshooting and overhaul. Graduates from this program can seek positions in engine maintenance, contract maintenance, general aviation operations and regional and national airline technicians specializing in powerplant accessories, components, and reciprocating and turbine engine technology. For quicker entry into the industry, an Aircraft Powerplant Technology certificate is available.

Program Requirements

Semester 1
15 Total Credits

- Complete all of the following
  - Complete at least 3 credits from the following:
    - AERM1107 - Aviation Mathematics (1)
    - AERM1109 - Aviation Physics (1)
    - AERM1112 - Aviation Drawings (1)
    - AERM1315 - Aviation Science (3)
  - Complete the following:
    - AERM1203 - Shop Practices (2)
    - AERM1205 - Weight and Balance (2)
    - AERM1208 - Federal Aviation Regulations (2)
    - AERM1210 - Ground Operations (2)
    - AERM1414 - Basic Electricity (4)

Semester 2
13 Total Credits

- Complete the following:
  - AERM1351 - Aircraft Turbine Engine Theory (3)
  - AERM1357 - Fuel Metering and Induction Systems (3)
  - AERM1444 - Aircraft Reciprocating Engines (4)
  - AERM1356 - Aircraft Powerplant Electrical (3)

Semester 3
8 Total Credits

- Complete the following:
  - AERM1240 - Aircraft Propellers (2)
  - AERM2341 - Powerplant and Auxiliary Power Units (3)
  - AERM2351 - Aircraft Turbine Engine Overhaul (3)

Semester 4
9 Total Credits

- Complete the following:
  - AERM2234 - FAA Review - Powerplant (2)
  - AERM2352 - Aircraft Powerplant Inspection (3)
  - AERM2447 - Aircraft Reciprocating Engine Overhaul (4)

Degree Plan Credits 45

Capstone

- Complete the following:
  - AERM2234 - FAA Review - Powerplant (2)

Pre/Corequisites

- AERM 1351, AERM 1357, AERM 1444, AERM 1240, AERM 2341 Prerequisite(s): AERM 1109 or AERM 1315
- AERM 1356 Prerequisite(s): AERM 1314 or AERM 1414
- AERM 2351 Prerequisite(s): AERM 1351
- AERM 2447 Prerequisite(s): AERM 1444

**Architectural Design & Engineering**

**Description**

The Architectural Design & Engineering Graphics Technology program works with designers and engineers to convert their ideas and concepts for new products and designs into accurate drawings that specify size, shape, materials and specifications. These drawings are then used by professionals in manufacturing, consulting and construction to produce the desired product or structure. Designs are created using computer-aided drafting (CAD) equipment. Solid modeling and parametric concepts are introduced and utilized early in the program and throughout the curriculum.

**Architectural/Civil Drafting Technology**

**Description**

Whether it’s as large as a high-rise building or as small as a shed, nothing can be built without first envisioning a plan — a blueprint, sketch or drawing detailing everything a project needs for completion. Drafting is a universal language; it is the common language used in many major industries as a first step to bringing this vision to life. TSTC Architectural/Civil Drafting students prepare for drafting applications in commercial architecture; building structures; mechanical, electrical and plumbing systems for buildings; site work; and many other areas of construction-related drafting. During your educational training at TSTC, you will use the latest in computer software and hardware to gain valuable experience utilizing today’s most popular drafting tool — Computer-Aided Drafting, or CAD, systems.

Semester 2
9 Total Credits

- Complete the following:
  - ARCE1303 - Architectural Materials and Methods of Construction (3)
  - DFTG1317 - Architectural Drafting - Residential (3)
  - DFTG1330 - Civil Drafting 1 (3)

Semester 3
9 Total Credits

- Complete the following:
  - DFTG2328 - Architectural Drafting - Commercial (3)
  - DFTG2321 - Topographical Drafting (3)
  - ARCE1342 - Codes, Specifications, and Contract Documents (3)

Semester 4
9 Total Credits

- Complete the following:
  - ARCE2352 - Mechanical and Electrical Systems (3)
  - ARCE1352 - Structural Drafting (3)
  - DFTG1393 - Special Topics in Civil Drafting Civil Engineering CAD/CADD (3)

Degree Plan Credits 36

Capstone

- Complete the following:
  - ARCE1352 - Structural Drafting (3)

Pre/Corequisites

- ARCE 1303, DFTG 1330 Prerequisite(s): DFTG 1309
- DFTG 1317 Prerequisite(s): ARCE 1321
- DFTG 2328 Prerequisite(s): DFTG 1317
- DFTG 2321 Prerequisite(s): DFTG 1330
- ARCE 1342 Prerequisite(s): ARCE 1303 (Prerequisite or Corequisite)
- ARCE 2352 Prerequisite(s): DFTG 2328 (Prerequisite or Corequisite)
- ARCE 1352 Prerequisite(s): DFTG 2328
- DFTG 1393 Prerequisite(s): DFTG 2321
Architectural/Civil Drafting Technology - Basic Architectural/Civil Drafting OSA

Locations
Online - TSTC Connect

Program Requirements
Semester 1
9 Total Credits

- Complete all of the following
  - Complete the following:
    - DFTG1309 - Basic Computer-Aided Drafting (3)
    - DFTG1325 - Blueprint Reading and Sketching (3)
  - Complete at least 3 credits from the following:
    - SRVY1341 - Land Surveying (3)
    - ARCE1321 - Architectural Illustration (3)

Degree Plan Credits 9

Associate Degree in Nursing

Description
Registered nurses (RNs) make up the largest health care occupation in the United States. Statistics show that there are almost 3 million jobs available and over 100,000 vacant positions. Nurses are a critical and essential resource in patient care. They consider the patient as a “whole,” which includes emotional, mental and physical needs. They work to restore health and wellness, prevent disease, provide and coordinate patient care, and educate patients and the public about various health conditions.

RNs can work in hospitals, physicians’ offices, home health care services, nursing care facilities, correctional facilities, schools, the military and more. TSTC nursing students participate in an active learning environment, including simulation learning labs that are led by instructors with multiple medical/surgical backgrounds.

The Associate Degree in Nursing (ADN) program at TSTC is a fast-paced associate degree nursing program. TSTC works hand in hand with health care industry leaders to train highly qualified nurses. There is a significant and growing need for registered nurses throughout the state of Texas and all over the United States.

The program includes three semesters of nursing-related courses and clinicals. The entire program requires 60 credits, taking approximately three years to complete from start to finish (including one full year in the Vocational Nursing program).

Students scoring less than 80% as a final course average in nursing courses will not progress to the next level or graduate from the program. Otherwise, they will be dismissed and given the option to reapply and repeat the program in full. If students fail more than one course with less than an 80%, they will be dismissed from the program without the opportunity to apply for readmission to the TSTC RN program.

The 80% passing rate in the TSTC RN program is based on preparation of our students to pass the Texas Board of Nursing NCLEX Exam. The NCLEX Exam, which is required to become a registered nurse, requires 80% to pass.

Program Requirements

Semester 1
13 Total Credits

- Complete all of the following
  - Complete at least 4 credits from the following:
    - BIOL2401 - Anatomy & Physiology I (lecture + lab) (4)
    - BIOL2301 - Anatomy & Physiology I (lecture) (3)
    - BIOL2101 - Anatomy & Physiology I (lab) (1)
  - Complete the following:
    - ENGL1301 - Composition I (3)
  - Complete the following:
    - PSYC2314 - Lifespan Growth & Development (3)
    - ACGM3HFA - Gen Ed Humanities/Fine Arts Elective (3)

Semester 2
11 Total Credits

- Complete all of the following
  - Complete at least 4 credits from the following:
    - BIOL2402 - Anatomy & Physiology II (lecture + lab) (4)
    - BIOL2302 - Anatomy & Physiology II (lecture) (3)
    - BIOL2102 - Anatomy & Physiology II (lab) (1)
  - Complete at least 4 credits from the following:
    - BIOL2420 - Microbiology for Non-Science Majors (lecture + lab) (4)
    - BIOL2320 - Microbiology for Non-Science Majors (lecture) (3)
    - BIOL2120 - Microbiology for Non-Science Majors Laboratory (lab) (1)
  - Complete the following:
    - PSYC2301 - General Psychology (3)

Semester 3
12 Total Credits

- Complete the following:
  - RNSG1210 - Introduction to Community-Based Nursing (2)
  - RNSG1227 - Transition to Professional Nursing (2)
  - RNSG1261 - Clinical - Registered Nursing/Registered Nurse (2)
  - RNSG1300 - Health Assessment Across the Lifespan (3)
  - RNSG1301 - Pharmacology (3)

Semester 4
12 Total Credits

- Complete the following:
  - RNSG1343 - Complex Concepts of Adult Health (3)
  - RNSG1412 - Nursing Care of the Childbearing and Childrearing Family (4)
  - RNSG2162 - Clinical - Registered Nursing/Registered Nurse (1)
  - RNSG2213 - Mental Health Nursing (2)
  - RNSG2262 - Clinical - Registered Nursing/Registered Nurse (2)

Semester 5
12 Total Credits

- Complete the following:
  - RNSG1463 - Clinical - Registered Nursing/Registered Nurse (4)
  - RNSG2221 - Professional Nursing: Leadership and Management (2)
  - RNSG2230 - Professional Nursing Review and Licensure Preparation (2)
  - RNSG2432 - Enhanced Concepts of Adult Health (4)

Degree Plan Credits 60

Capstone

- Complete the following:
  - RNSG2230 - Professional Nursing Review and Licensure Preparation (2)
**Elective Options**

- Complete at least 1 courses from the following:
  - Humanities/Fine Arts Elective
    - HUMA1301 - Introduction to Humanities I
    - HUMA2319 - American Minority Studies (3)
    - HUMA2323 - World Cultures
    - PHIL1301 - Introduction to Philosophy
    - PHIL1304 - Introduction to World Religions
    - PHIL2303 - Introduction to Formal Logic
    - PHIL2306 - Introduction to Ethics
    - ARTS1301 - Art Appreciation
    - ARTS2326 - Sculpture I (3)
    - ARTS2326 - Sculpture I (3)
    - MUSI1306 - Music Appreciation

**Auto Collision & Management Technology**

**Description**

According to autonews.com, auto collision repair is a $35 billion-a-year business in the United States. That’s why the auto body industry is a great career choice for those seeking a relatively stable job with above-average wages. At TSTC, you’ll get the crucial hands-on experience that can make you irresistible to employers. The Auto Collision program offers a specialization in auto body refinishing, collision repair and sheet metal fabrication. For quicker entry into the industry, certificate programs are available. Advanced certificate programs are also available.

Waco
Program Requirements

Semester 1 First Session
11 Total Credits

- Complete the following:
  - ABDR1215 - Vehicle Trim and Hardware (2)
  - ABDR1349 - Automotive Plastic and Sheet Molded Compound Repair (3)
  - ABDR1371 - Basic Paint Techniques, Equipment & Environmental Practices (3)
  - ENGL1301 - Composition I (3)

Semester 1 Second Session
2 Total Credits

- Complete the following:
  - ABDR1280 - Cooperative Education - Autobody/ Collision and Repair Technology/Technician (2)

Semester 2 First Session
12 Total Credits

- Complete the following:
  - ABDR1307 - Collision Repair Welding (3)
  - ABDR2255 - Collision Repair Estimating (2)
  - ABDR2435 - Structural Analysis and Damage Repair IV (4)
  - ACGM3MNS - Gen Ed Math/Natural Science Elective (3)

Semester 2 Second Session
3 Total Credits

- Complete the following:
  - ABDR2380 - Cooperative Education - Autobody/ Collision and Repair Technology/Technician (3)

Semester 3 First Session
14 Total Credits

- Complete the following:
  - ABDR1419 - Basic Metal Repair (4)
  - ABDR2447 - Advanced Collision Repair Welding (4)
  - ACGM3GED - Gen Ed Elective (3)
  - ACGM3HFA - Gen Ed Humanities/Fine Arts Elective (3)

Semester 3 Second Session
3 Total Credits

- Complete the following:
  - ABDR2381 - Cooperative Education - Autobody/Collision and Repair Technology/Technician (3)

Semester 4 First Session
4 Total Credits

- Complete the following:
  - ABDR1481 - Cooperative Education - Autobody/ Collision and Repair Technology/Technician (4)

Semester 4 Second Session
11 Total Credits

- Complete the following:
  - ABDR2359 - Structural Sectioning (3)
  - ABDR2502 - Auto Body Mechanical and Electrical Service (5)
  - ACGM3SBS - Gen Ed Social/Behavioral Science Elective (3)

Grand Total Credits: 60

Capstone

- Complete the following:
  - ABDR1481 - Cooperative Education - Autobody/ Collision and Repair Technology/Technician (4)
  - ABDR2359 - Structural Sectioning (3)
  - ABDR2502 - Auto Body Mechanical and Electrical Service (5)
Pre/Corequisites

- ABDR 1307, ABDR 2435 Prerequisite(s): ABDR 1215
- ABDR 2447 Prerequisite(s): ABDR 1307
- ABDR 2359, ABDR 2502 Prerequisite(s): ABDR 1307, ABDR 1419, ABDR 2435

Elective Options

- Complete at least 1 courses from the following:
  - Math/Natural Science Elective
    - MATH1314 - College Algebra (3 SCH version)(3)
    - MATH1316 - Plane Trigonometry(3)
    - MATH1325 - Calculus for Business & Social Sciences(3)

  - ABDR2551 - Specialized Refinishing Techniques (5)
  - ACGM3HFA - Gen Ed Humanities/Fine Arts Elective (3)

Semester 4
12 Total Credits

- Complete all of the following
  - Complete at least 2 credits from the following:
    - ABDR2270 - Advanced Application Processes of Refinishing (2)
    - ABDR2281 - Cooperative Education - Autobody/Collision and Repair Technology/Technician (2)
  - Complete the following:
    - ABDR2357 - Collision Repair Shop Management (3)
    - ABDR2453 - Color Analysis and Paint Matching (4)
    - ACGM3GED - Gen Ed Elective (3)

Grand Total Credits: 60

Capstone

- Complete at least 2 credits from the following:
  - ABDR2270 - Advanced Application Processes of Refinishing (2)
  - ABDR2281 - Cooperative Education - Autobody/Collision and Repair Technology/Technician (2)
- Complete the following:
  - ABDR2453 - Color Analysis and Paint Matching (4)

Pre/Corequisites

- ABDR 1431, ABDR 1458 Prerequisite(s): ABDR 1371
- ABDR 2371, ABDR2449, ABDR 2551 Prerequisite(s): ABDR 1458, ABDR 1431
- ABDR 2270, ABDR 2281, ABDR 2453 Prerequisite(s): ABDR 2449, ABDR 2551
- ABDR 2357 Prerequisite(s): ABDR 2255

Elective Options

- Complete at least 1 courses from the following:
  - Math/Natural Science Elective
    - MATH1314 - College Algebra (3 SCH version)(3)
    - MATH1316 - Plane Trigonometry(3)
    - MATH1325 - Calculus for Business & Social Sciences(3)
    - MATH1332 - Contemporary Mathematics (Quantitative Reasoning)(3)
2022-2023 Catalog & Student Handbook

- MATH1342 - Elementary Statistical Methods (3)
- MATH1350 - Math - Teachers I Fundamentals of Math I (3)
- MATH1351 - Fundamentals of Mathematics II (3)
- MATH2312 - Pre-Calculus Math (3 SCH version) (3)
- MATH2313 - Calculus I (3)
- MATH2318 - Linear Algebra (3)
- MATH2320 - Differential Equations (3 SCH version) (3)
- MATH2342 - Elementary Statistical Methods (3)
- MATH2412 - Calculus I (4 SCH version) (4)
- MATH2414 - Calculus II (4 SCH version) (4)
- MATH2415 - Calculus III (4 SCH version) (4)
- BIOL1106 - Biology for Science Majors Laboratory I (lab) (1)
- BIOL1107 - Biology for Science Majors II Lab (1)
- BIOL1108 - Biology Non-Science Majors Laboratory I (1)

◆ Complete at least 1 courses from the following:
  Social/Behavioral Science Elective
  - HIST1301 - United States History I (3)
  - HIST1302 - United States History II (3)
  - HIST2312 - Western Civilization II (3)
  - DHYG1301 - Orofacial Anatomy, Histology & Embryology (3)
  - GOVT2305 - Federal Government (Federal constitution & topics) (3)
  - GOVT2306 - Texas Government (Texas constitution & topics) (3)
  - ANTH2346 - General Anthropology
  - ECON1301 - Introduction to Economics (3)
  - ECON2301 - Principles of Macroeconomics (3)
  - ECON2302 - Principles of Microeconomics (3)
  - GEOG1302 - Human Geography
  - GEOG1303 - World Regional Geography
  - PSYC1100 - Learning Framework (1)
  - PSYC2301 - General Psychology (3)
  - PSYC2314 - Lifespan Growth & Development (3)

◆ Complete at least courses from the following:
  Humanities/Fine Arts Elective
  - HUMA1301 - Introduction to Humanities I
  - HUMA2319 - American Minority Studies (3)
  - HUMA2323 - World Cultures
  - PHIL1301 - Introduction to Philosophy
  - PHIL1304 - Introduction to World Religions
  - PHIL2303 - Introduction to Formal Logic
  - PHIL2306 - Introduction to Ethics
  - ARTS1301 - Art Appreciation
  - ARTS2326 - Sculpture I (3)
  - ARTS2326 - Sculpture I (3)
  - MUSI1306 - Music Appreciation
Auto Collision & Management Technology - Auto Collision Refinishing CER1

Locations
Waco
Harlingen

Program Requirements
Semester 1
13 Total Credits

- Complete the following:
  - ABDR1203 - Vehicle Design and Structural Analysis (2)
  - ABDR1215 - Vehicle Trim and Hardware (2)
  - ABDR1349 - Automotive Plastic and Sheet Molded Compound Repair (3)
  - ABDR1371 - Basic Paint Techniques, Equipment & Environmental Practices (3)
  - TECM1303 - Technical Calculations (3)

Semester 2
17 Total Credits

- Complete the following:
  - ABDR1419 - Basic Metal Repair (4)
  - ABDR1431 - Basic Refinishing (4)
  - ABDR1458 - Intermediate Refinishing (4)
  - POFT1301 - Business English (3)
  - ABDR2255 - Collision Repair Estimating (2)

Grand Total Credits: 30

Capstone

- Complete the following:
  - ABDR1458 - Intermediate Refinishing (4)

Pre/Corequisites

- ABDR 1431, ABDR 1458 Prerequisite(s): ABDR 1371
Auto Collision & Management Technology - Auto Collision Refinishing CER2

Locations
Waco
Harlingen

Program Requirements
Semester 1
13 Total Credits
◆ Complete the following:
  ◆ ABDR1203 - Vehicle Design and Structural Analysis (2)
  ◆ ABDR1215 - Vehicle Trim and Hardware (2)
  ◆ ABDR1349 - Automotive Plastic and Sheet Molded Compound Repair (3)
  ◆ ABDR1371 - Basic Paint Techniques, Equipment & Environmental Practices (3)
  ◆ TECM1303 - Technical Calculations (3)

Semester 2
15 Total Credits
◆ Complete the following:
  ◆ ABDR1419 - Basic Metal Repair (4)
  ◆ ABDR1431 - Basic Refinishing (4)
  ◆ ABDR1458 - Intermediate Refinishing (4)
  ◆ POFT1301 - Business English (3)

Semester 3
14 Total Credits
◆ Complete the following:
  ◆ ABDR2255 - Collision Repair Estimating (2)
  ◆ ABDR2371 - Refinishing Process I (3)
  ◆ ABDR2449 - Advanced Refinishing (4)
  ◆ ABDR2551 - Specialized Refinishing Techniques (5)

Grand Total Credits: 42

Capstone
◆ Complete the following:
  ◆ ABDR2449 - Advanced Refinishing (4)

Pre/Corequisites
◆ ABDR 1431, ABDR 1458 Prerequisite(s): ABDR 1371
◆ ABDR 2371, ABDR 2449, ABDR 2551 Prerequisite(s): ABDR 1458, ABDR 1431

Auto Collision & Management Technology - Auto Collision Repair CER2

Locations
Waco
Harlingen
Program Requirements

Semester 1
13 Total Credits

- Complete the following:
  - ABDR1203 - Vehicle Design and Structural Analysis (2)
  - ABDR1215 - Vehicle Trim and Hardware (2)
  - ABDR1349 - Automotive Plastic and Sheet Molded Compound Repair (3)
  - ABDR1371 - Basic Paint Techniques, Equipment & Environmental Practices (3)
  - TECM1303 - Technical Calculations (3)

Semester 2
12 Total Credits

- Complete the following:
  - ABDR1307 - Collision Repair Welding (3)
  - ABDR1359 - Sheet Metal Fabrication I (3)
  - ABDR2255 - Collision Repair Estimating (2)
  - ABDR2435 - Structural Analysis and Damage Repair IV (4)

Semester 3
10 Total Credits

- Complete the following:
  - ABDR1323 - Front and Rear Wheel Alignment (3)
  - ABDR1419 - Basic Metal Repair (4)
  - POFT1301 - Business English (3)

Semester 4
12 Total Credits

- Complete all of the following
  - Complete the following:
    - ABDR2359 - Structural Sectioning (3)
    - ABDR2502 - Auto Body Mechanical and Electrical Service (5)
  - Complete at least 4 credits from the following:
    - ABDR1442 - Structural Analysis and Damage Repair II (4)
    - ABDR1481 - Cooperative Education - Autobody/Collision and Repair Technology/Technician (4)

Grand Total Credits: 47

Capstone

- Complete 1 of the following
  - Complete the following:
    - ABDR1442 - Structural Analysis and Damage Repair II (4)
  - Complete the following:
    - ABDR1481 - Cooperative Education - Autobody/Collision and Repair Technology/Technician (4)

- Complete the following:
  - ABDR2359 - Structural Sectioning (3)

Pre/Corequisites

- ABDR 1307, ABDR 2435 Prerequisite(s): ABDR 1215
- ABDR 1323 Prerequisite(s): ABDR 2435
- ABDR 1442, ABDR 2359, ABDR 2502 Prerequisite(s): ABDR 1323, ABDR 1419, ABDR 2435

Automation & Controls Technology

Description

Automation and Controls Technology students learn how to automate the industrial world. Be on the cutting edge of the automation technologies that companies are using to upgrade their systems. Students will learn how to troubleshoot, calibrate, implement, service, repair and replace analog and electromechanical instruments, putting the automation basics to work. Add in computerized control, robotic control, robotic assembly devices and computer-controlled manufacturing systems like Programmable Logic Controllers (PLCs) and Human Machine Interface (HMIs), and students know how to automate and control most industrial processes. Students will receive in-depth classroom instruction followed by real-world, hands-on training in labs to gain the solid foundation necessary in this high-tech field. Training begins with basic electrical concepts, motors and motor control application. Students then advance to solid state electronic principles, electrical codes, measurements, calibration and automation control schemes. Enhance your automation skills and knowledge with extensive, industry-driven, hands-on exercises in PLC concepts, design, maintenance and troubleshooting on state-of-the-art lab equipment that includes robotics interfacing. Be a part of our automation nation.

Automation & Controls Technology - Automation & Controls Technology AAS

Locations

Marshall
Program Requirements

Semester 1
12 Total Credits

- Complete the following:
  - AACT1371 - Electronics Fundamentals in Automation (3)
  - AACT1372 - Automation Safety and Compliance (3)
  - AACT1373 - Administrative Skills for Technicians (3)
  - ACGM3MTH - Gen Ed Mathematics Elective (3)

Semester 2
12 Total Credits

- Complete the following:
  - AACT1374 - Electronics Fundamentals in Automation II (3)
  - AACT1375 - Principles of Motion, Measurement and Position I (3)
  - AACT1376 - Intro to Process Control Devices (3)
  - ENGL1301 - Composition I (3)

Semester 3
12 Total Credits

- Complete the following:
  - AACT2371 - Automation Control Systems Interfacing I (3)
  - AACT2376 - PLC Automation I (3)
  - INTC1343 - Application of Industrial Automatic Controls (3)
  - ACGM3HFA - Gen Ed Humanities/Fine Arts Elective (3)

Semester 4
12 Total Credits

- Complete the following:
  - AACT2374 - PLC Automation II (3)
  - AACT2372 - Automation Control Systems Interfacing II (3)
  - AACT2375 - Principles of Motion, Measurement and Position II (3)
  - INTC2339 - Instrument and Control Review (3)

Semester 5
12 Total Credits

- Complete the following:
  - AACT2373 - Factory I/O (3)
  - INTC2330 - Instrumentation Systems Troubleshooting (3)
  - ACGM3MNS - Gen Ed Math/Natural Science Elective (3)
  - ACGM3SBS - Gen Ed Social/Behavioral Science Elective (3)

Grand Total Credits: 60

Capstone

- Complete the following:
  - AACT2373 - Factory I/O (3)

Pre/Corequisites

- AACT 1374, AACT 1375, AACT 1376 Prerequisite(s): AACT 1371
- AACT 2371 Prerequisite(s): AACT 1376
- AACT 2376 Prerequisite(s): AACT 1375
- AACT 2374 Prerequisite(s): AACT 2376
- AACT 2372 Prerequisite(s): AACT 2371
- AACT 2375 Prerequisite(s): AACT 2371
- INTC 2339 Prerequisite(s): INTC 1343
- AACT 2373 prerequisite(s): ELPT 2319
- INTC 2330 Prerequisite(s): INTC 1343

Elective Options

- Complete at least 1 courses from the following:
  - Mathematics Elective
    - MATH1314 - College Algebra (3 SCH version)(3)
2022-2023 Catalog & Student Handbook

- MATH1316 - Plane Trigonometry (3)
- MATH1325 - Calculus for Business & Social Sciences (3)
- MATH1332 - Contemporary Mathematics (Quantitative Reasoning) (3)
- MATH1342 - Elementary Statistical Methods (3)
- MATH1350 - Math - Teachers I Fundamentals of Math I (3)
- MATH1351 - Fundamentals of Mathematics II (3)
- MATH2312 - Pre-Calculus Math (3 SCH version) (3)
- MATH2313 - Calculus I (3)
- MATH2318 - Linear Algebra (3)
- MATH2320 - Differential Equations (3 SCH version) (3)
- MATH2342 - Elementary Statistical Methods (3)
- MATH2351 - Fundamentals of Mathematics II (3)
- MATH2414 - Calculus II (4 SCH version) (4)
- MATH2415 - Calculus III (4 SCH version) (4)

- Complete at least 1 course from the following:
  Humanities/Fine Arts Elective
  - HUMA1301 - Introduction to Humanities I
  - HUMA2319 - American Minority Studies (3)
  - HUMA2323 - World Cultures
  - PHIL1301 - Introduction to Philosophy
  - PHIL1304 - Introduction to World Religions
  - PHIL2303 - Introduction to Formal Logic
  - PHIL2306 - Introduction to Ethics
  - ARTS1301 - Art Appreciation
  - ARTS2326 - Sculpture I (3)
  - ARTS2326 - Sculpture I (3)
  - MUSI1306 - Music Appreciation

- Complete at least 1 course from the following:
  Math/Natural Science Elective
  - MATH1314 - College Algebra (3 SCH version) (3)

Automotive Technology

Description

The Automotive Technology program at TSTC features approximately $3 million worth of the latest equipment and laboratories. The program is accredited by Automotive Service Excellence Program Accreditation (ASE), and instructors are certified by ASE and bring years of industry experience to the classroom. Students receive intensive, hands-on training, spending more than 60% of their time in labs, learning by doing. The curriculum is guided by an advisory board of industry leaders, helping to ensure that the training that students receive is on target with what the industry needs.

Automotive Technology offers specializations in Chrysler, Tesla START and Toyota T-TEN. For quicker entry into the field, certificates and an occupational skills award are available.
Automotive Technology - Automotive Maintenance & Light Repair CER1

Locations
Harlingen
Sweetwater

Program Requirements

Semester 1
10 Total Credits

- Complete the following:
  - AUMT1305 - Introduction to Automotive Technology (3)
  - AUMT1307 - Automotive Electrical Systems (3)
  - AUMT1416 - Automotive Suspension and Steering Systems (4)

Semester 2
14 Total Credits

- Complete the following:
  - AUMT1310 - Automotive Brake Systems (3)
  - AUMT1345 - Automotive Climate Control Systems (3)
  - AUMT1419 - Automotive Engine Repair (4)
  - AUMT2413 - Automotive Drive Train and Axles (4)

Semester 3
10 Total Credits

- Complete all of the following
  - Complete at least 3 credits from the following:
    - AUMT1312 - Basic Automotive Service (3)
    - AUMT1380 - Cooperative Education - Automobile/Automotive Mechanics Technology/Technician (3)
  - Complete the following:
    - AUMT2321 - Automotive Electrical Diagnosis and Repair (3)
    - AUMT2417 - Automotive Engine Performance Analysis I (4)

Degree Plan Credits 34

Capstone

- Complete 1 of the following
  - Complete the following:
    - AUMT1312 - Basic Automotive Service (3)
  - Complete the following:
    - AUMT1380 - Cooperative Education - Automobile/Automotive Mechanics Technology/Technician (3)

Pre/Corequisites

- AUMT 1345 Prerequisite(s): AUMT 1201 or AUMT 1305, AUMT 1307 (Prerequisite or Corequisite)
- AUMT 1419 Prerequisite(s): AUMT 1305
- AUMT 1380 Prerequisite(s): AUMT 1310 (Prerequisite or Corequisite)
- AUMT 2417 Prerequisite(s): AUMT 1201 or AUMT 1305, AUMT 1307, AUMT 1419 (Prerequisite or Corequisite)

Semester 1
10 Total Credits
- Complete the following:
  - AUMT1305 - Introduction to Automotive Technology (3)
  - AUMT1307 - Automotive Electrical Systems (3)
  - AUMT1416 - Automotive Suspension and Steering Systems (4)

Semester 2
10 Total Credits
- Complete the following:
  - AUMT1310 - Automotive Brake Systems (3)
  - AUMT1345 - Automotive Climate Control Systems (3)
  - AUMT1419 - Automotive Engine Repair (4)

Semester 3
11 Total Credits
- Complete the following:
  - AUMT2321 - Automotive Electrical Diagnosis and Repair (3)
  - AUMT2413 - Automotive Drive Train and Axles (4)
  - AUMT2417 - Automotive Engine Performance Analysis I (4)

Semester 4
14 Total Credits
- Complete all of the following
  - Complete at least 3 credits from the following:
    - AUMT2302 - Automotive Compression Ignition Engines & Fuel Systems (3)
    - AUMT2328 - Automotive Service (3)
    - AUMT2357 - Automotive Alternative Fuels (3)
    - AUMT2380 - Cooperative Education - Automobile/Automotive Mechanics Technology/Technician (3)
  - Complete the following:
    - AUMT2337 - Automotive Electronics (3)
    - AUMT2425 - Automotive Automatic Transmission and Transaxle (4)
    - AUMT2434 - Automotive Engine Performance Analysis II (4)

Degree Plan Credits 45

Capstone
- Complete the following:
  - AUMT2337 - Automotive Electronics (3)
  - AUMT2425 - Automotive Automatic Transmission and Transaxle (4)
  - AUMT2434 - Automotive Engine Performance Analysis II (4)

Pre/Corequisites
- AUMT 1345 Prerequisite(s): AUMT 1201 or AUMT 1305, AUMT 1307 (Prerequisite or Corequisite)
- AUMT 2417 Prerequisite(s): AUMT 1201 or AUMT 1305, AUMT 1307, AUMT 1419 (Prerequisite or Corequisite)
- AUMT 2302 Prerequisite(s): AUMT 2417
- AUMT 2328, AUMT 2380 Prerequisite(s): AUMT 2413, AUMT 2417, AUMT 2321
- AUMT 2337 Prerequisite(s): AUMT 2321 (Prerequisite or Corequisite)
- AUMT 2425, AUMT 2434 Prerequisite(s): AUMT 2417 (Prerequisite or Corequisite), AUMT 2321

Program Requirements

Semester 1
13 Total Credits

- Complete all of the following
  - Complete the following:
    - AUMT1305 - Introduction to Automotive Technology (3)
    - AUMT1307 - Automotive Electrical Systems (3)
    - AUMT1416 - Automotive Suspension and Steering Systems (4)
  - Complete at least 3 credits from the following:
    - ENGL1301 - Composition I (3)
    - ENGL2311 - Technical & Business Writing (3)

Semester 2
16 Total Credits

- Complete the following:
  - AUMT1310 - Automotive Brake Systems (3)
  - AUMT1345 - Automotive Climate Control Systems (3)
  - AUMT1419 - Automotive Engine Repair (4)
  - ACGM3MNS - Gen Ed Math/Natural Science Elective (3)
  - ACGM3SBS - Gen Ed Social/Behavioral Science Elective (3)

Semester 3
17 Total Credits

- Complete the following:
  - AUMT2321 - Automotive Electrical Diagnosis and Repair (3)
  - AUMT2413 - Automotive Drive Train and Axles (4)
  - AUMT2417 - Automotive Engine Performance Analysis I (4)
  - ACGM3GED - Gen Ed Elective (3)
  - ACGM3HFA - Gen Ed Humanities/Fine Arts Elective (3)

Semester 4
14 Total Credits

- Complete all of the following
  - Complete at least 3 credits from the following:
    - AUMT2302 - Automotive Compression Ignition Engines & Fuel Systems (3)
    - AUMT2328 - Automotive Service (3)
    - AUMT2357 - Automotive Alternative Fuels (3)
    - AUMT2380 - Cooperative Education - Automobile/Automotive Mechanics Technology/Technician (3)
  - Complete the following:
    - AUMT2337 - Automotive Electronics (3)
    - AUMT2425 - Automotive Automatic Transmission and Transaxle (4)
    - AUMT2434 - Automotive Engine Performance Analysis II (4)

Degree Plan Credits 60

Capstone

- Complete the following:
  - AUMT2337 - Automotive Electronics (3)
  - AUMT2425 - Automotive Automatic Transmission and Transaxle (4)
  - AUMT2434 - Automotive Engine Performance Analysis II (4)
2022-2023 Catalog & Student Handbook

Pre/Corequisites

- AUMT 1345 Prerequisite(s): AUMT 1201 or AUMT 1305, AUMT 1307 (Prerequisite or Corequisite)
- AUMT 1419 Prerequisite(s): AUMT 1305
- AUMT 2417 Prerequisite(s): AUMT 1201 or AUMT 1305, AUMT 1307, AUMT 1419 (Prerequisite or Corequisite)
- AUMT 2302 Prerequisite(s): AUMT 2417
- AUMT 2328, AUMT 2380 Prerequisite(s): AUMT 2413, AUMT 2417, AUMT 2321 (Prerequisite or Corequisite)
- AUMT 2337 Prerequisite(s): AUMT 2321 (Prerequisite or Corequisite)
- AUMT 2425, AUMT 2434 Prerequisite(s): AUMT 2417 (Prerequisite or Corequisite), AUMT 2321

Elective Options

- Complete at least 1 courses from the following:
  Math/Natural Science Elective
  - MATH1314 - College Algebra (3 SCH version)(3)
  - MATH1316 - Plane Trigonometry(3)
  - MATH1325 - Calculus for Business & Social Sciences(3)
  - MATH1332 - Contemporary Mathematics (Quantitative Reasoning)(3)
  - MATH1342 - Elementary Statistical Methods(3)
  - MATH1350 - Math - Teachers I Fundamentals of Math I(3)
  - MATH1351 - Fundamentals of Mathematics II(3)
  - MATH2312 - Pre-Calculus Math (3 SCH version)(3)
  - MATH2313 - Calculus I(3)
  - MATH2318 - Linear Algebra (3)
  - MATH2320 - Differential Equations (3 SCH version)(3)
  - MATH2342 - Elementary Statistical Methods(3)
  - MATH2413 - Calculus I (4 SCH version)(4)
  - MATH2414 - Calculus II (4 SCH version)(4)
  - MATH2415 - Calculus III (4 SCH version)(4)
  - BIOL1106 - Biology for Science Majors Laboratory I (lab)(1)
  - BIOL1107 - Biology for Science Majors Lab(1)
  - BIOL1108 - Biology Non-Science Majors Laboratory I(1)
  - BIOL1109 - Biology for Non-Science Majors II Lab(1)
  - BIOL1113 - General Zoology (lab)(1)

Program Requirements

Semester 1 First Session
9 Total Credits

- Complete the following:
  - AUMT1305 - Introduction to Automotive Technology (3)
  - AUMT1307 - Automotive Electrical Systems (3)
  - AUMT2321 - Automotive Electrical Diagnosis and Repair (3)

Semester 1 Second Session
1 Total Credits

- Complete the following:
  - AUMT1166 - Practicum (or Field Experience) - Automobile/Automotive Mechanics Technology/Technician (1)

Semester 2 First Session
10 Total Credits

- Complete the following:
  - AUMT1310 - Automotive Brake Systems (3)
  - AUMT1416 - Automotive Suspension and Steering Systems (4)
  - AUMT2337 - Automotive Electronics (3)

Semester 2 Second Session
1 Total Credits

- Complete the following:
  - AUMT1167 - Practicum (or Field Experience) - Automobile/Automotive Mechanics Technology/Technician (1)

Semester 3 First Session
1 Total Credits

- Complete the following:
  - AUMT2188 - Internship (or Field Experience) - Automobile/Automotive Mechanics Technology/Technician (1)

Semester 3 Second Session
7 Total Credits

- Complete the following:
  - AUMT1345 - Automotive Climate Control Systems (3)
  - AUMT1419 - Automotive Engine Repair (4)

Semester 4 First Session
1 Total Credits

- Complete the following:
  - AUMT2189 - Internship (or Field Experience) - Automobile/Automotive Mechanics Technology/Technician (1)

Semester 4 Second Session
8 Total Credits

- Complete the following:
  - AUMT2417 - Automotive Engine Performance Analysis I (4)
  - AUMT2434 - Automotive Engine Performance Analysis II (4)

Semester 5 First Session
3 Total Credits

- Complete the following:
  - AUMT1380 - Cooperative Education - Automobile/Automotive Mechanics Technology/Technician (3)

Semester 5 Second Session
8 Total Credits

- Complete the following:
  - AUMT2413 - Automotive Drive Train and Axles (4)
  - AUMT2425 - Automotive Automatic Transmission and Transaxle (4)

Grand Total Credits: 49
Capstone

- Complete the following:
  - AUMT2337 - Automotive Electronics (3)
  - AUMT2434 - Automotive Engine Performance Analysis II (4)
  - AUMT2425 - Automotive Automatic Transmission and Transaxle (4)

Pre/Corequisites

- AUMT 2337 Prerequisite(s): AUMT 2321 (Prerequisite or Corequisite)
- AUMT 1345 Prerequisite(s): AUMT 1201 or AUMT 1305, AUMT 1307 (Prerequisite or Corequisite)
- AUMT 1419 Prerequisite(s): AUMT 1305
- AUMT 2189, AUMT 2434, AUMT 2425 Prerequisite(s): AUMT 2417 (Prerequisite or Corequisite), AUMT 2321
- AUMT 2417 Prerequisite(s): AUMT 1201 or AUMT 1305, AUMT 1307, AUMT 1419 (Prerequisite or Corequisite)

Grand Total Credits: **13**
Avionics Technology

Description
Avionics is one of the most exciting and challenging careers in the aviation industry. Avionics technicians are responsible for installing, maintaining and repairing navigational and communication radios, transponders, digital audio systems, flight management computers and aircraft autopilot systems on all sizes of aircraft. TSTC’s Avionics program helps prepare students for the Federal Communication Commission’s General Radio-Telephone Operator’s License (FCC GROL) and the Aircraft Electronic Technician certification from the National Center for Aerospace and Transportation Technologies (NCATT AET). The curriculum includes college-transferable courses in science, mathematics and English required for the Associate of Applied Science degree, which prepares you to meet the expanding responsibilities of today’s avionics technician.

Avionics Technology - Avionics Installation Technician CER1

Locations
Waco

Program Requirements
Semester 1
9 Total Credits

- Complete the following:
  - AVNC1303 - Introduction to Aviation Electronic Systems (3)
  - AVNC1343 - Aviation Electrical and Electronic Systems Installation (3)
  - CETT1302 - Electricity Principles (3)

Semester 2
9 Total Credits

- Complete the following:
  - AVNC1353 - Operational Testing of Aviation Electronic Systems (3)
  - AVNC2308 - Aviation Electrical and Electronics Systems Installation II (3)
  - CETT1325 - Digital Fundamentals (3)

Semester 3
12 Total Credits

- Complete the following:
  - AVNC1306 - FAA Regulations for Avionics Certified Repair Station (3)
  - AVNC1391 - Installation & Operational Testing of Avionics & Pitot-Static Systems (3)
  - CSIR2301 - Communication Electronics Components (3)
  - CSIR1355 - Industry Certifications (3)

Grand Total Credits: 30

Capstone

- Complete the following:
  - AVNC1391 - Installation & Operational Testing of Avionics & Pitot-Static Systems (3)

Pre/Corequisites

- CETT 1325 Prerequisite(s): CETT 1302, CETT 1303, IEIR 1302, IEIR 1304, IEIR 1371 or CETT 1305
- CSIR 2301, CSIR 1355 Prerequisite(s): IEIR 1371 or CETT 1302

Avionics Technology - Avionics Technology AAS

Biology

Description

The Associate of Science degree in Biology provides the opportunity to complete the core curriculum of general education courses along with additional courses in the field of biology. With this degree, you can work in various fields of biology and health care, or transfer your credits to a four-year institution in order to further your education beyond an Associate of Science degree. The biology courses offered can also provide prerequisite coursework for various allied health programs including the nursing programs.

Semester 3
14 Total Credits

- Complete the following:
  - ACGM3SBS - Gen Ed Social/Behavioral Science Elective (3)
  - ACGM3CAR - Creative Arts Elective (3)
  - ACGM4BIO - BIO AS - Approved Elective (4)
  - ACGM4BIO - BIO AS - Approved Elective (4)

Semester 4
13 Total Credits

- Complete the following:
  - GOVT2305 - Federal Government (Federal constitution & topics) (3)
  - ACGM3LPC - Language, Philosophy and Culture Elective (3)
  - ACGM3BIO - BIO AS - Approved Elective (3)
  - ACGM4BIO - BIO AS - Approved Elective (4)

Semester 5
7 Total Credits

- Complete the following:
  - GOVT2306 - Texas Government (Texas constitution & topics) (3)
  - ACGM4BIO - BIO AS - Approved Elective (4)

Grand Total Credits: **60**

Capstone

- Complete the following:
  - BIOL2320 - Microbiology for Non-Science Majors (lecture) (3)
  - BIOL2120 - Microbiology for Non-Science Majors Laboratory (lab) (1)

Pre/Corequisites

- ENGL 1302 Prerequisite(s): ENGL 1301

Elective Options

- Complete at least 4 credits from the following course set:
  - Biology 4 Credit Approved Elective
    - BIOL1106 - Biology for Science Majors Laboratory I (lab)(1)
    - BIOL1306 - Biology for Science Majors I (lecture)(3)
    - BIOL1107 - Biology for Science Majors II Lab(1)
    - BIOL1307 - Biology for Science Majors II(3)
    - BIOL1108 - Biology Non-Science Majors Laboratory I(1)

PHIL1304 - Introduction to World Religions (3)

- Complete at least 3 credits from the following course set:
  - Biology 3 Credit Approved Elective
    - BIOL1322 - Nutrition & Diet Therapy (3)
    - MATH1342 - Elementary Statistical Methods (3)
    - MATH1316 - Plane Trigonometry (3)
    - MATH2312 - Pre-Calculus Math (3 SCH version) (3)
    - PSYC2314 - Lifespan Growth & Development (3)
    - PSYC2301 - General Psychology (3)
    - ANTH2346 - General Anthropology (3)
    - SOCI1301 - Introduction to Sociology (3)
    - GEOG1303 - World Regional Geography (3)
    - HIST2321 - World Civilizations I (3)

Biomedical Equipment Technology

Description

First-rate equipment, experienced staff and an advisory board that comprises top industry names are just a few of the benefits available at TSTC. Biomedical equipment technicians work on equipment such as defibrillators, heart monitors, medical imaging equipment (X-rays, CAT scanners and ultrasound equipment), voice-controlled operating tables and electric wheelchairs, so the industry needs sharp, professional technicians that can inspect, calibrate, maintain, troubleshoot and repair this critical medical equipment. Students in the program gain hands-on experience working with everything from the simplest suction pump to the most sophisticated laboratory equipment, cardiac monitors, and X-ray and ultrasound equipment.

Locations

- Waco
- Harlingen
Program Requirements

Semester 1
12 Total Credits

✓ Complete the following:
  ✓ BIOM1101 - Biomedical Equipment Technology (1)
  ✓ BIOM1270 - Shop Skills for Biomedical Equipment Technicians (2)
  ✓ BIOM1373 - Medical Software and Hardware (3)
  ✓ CETT1303 - DC Circuits (3)
  ✓ ACGM3MTH - Gen Ed Mathematics Elective (3)

Semester 2
15 Total Credits

✓ Complete all of the following
  ✓ Complete the following:
    ■ BIOM1309 - Applied Biomedical Equipment Technology (3)
  ✓ Complete at least 3 credits from the following:
    ■ BIOM1315 - Medical Equipment Networks (3)
    ■ ITNW1325 - Fundamentals of Networking Technologies (3)
  ✓ Complete the following:
    ■ CETT1305 - AC Circuits (3)
    ■ ENGL1301 - Composition I (3)
    ■ ACGM3NSC - Gen Ed Natural Science Elective (3)

Semester 3
15 Total Credits

✓ Complete the following:
  ✓ BIOM1341 - Medical Circuits/Troubleshooting (3)
  ✓ BIOM2301 - Safety in Health Care Facilities (3)
  ✓ BIOM2311 - General Medical Equipment I (3)
  ✓ BIOM2319 - Fundamentals of X-Ray and Medical Imaging Systems (3)
  ✓ CETT1325 - Digital Fundamentals (3)

Semester 4
12 Total Credits

✓ Complete all of the following
  ✓ Complete the following:
    ■ BIOM2215 - Physiological Instruments I (2)
    ■ BIOM2231 - Biomedical Clinical Instrumentation (2)
  ✓ Complete at least 2 credits from the following:
    ■ BIOM2239 - Physiological Instruments II (2)
    ■ BIOM1291 - Special Topics in Biomedical Engineering-Related Technology/Technician (2)
    ■ BIOM1250 - Diagnostic Ultrasound Imaging System (2)
  ✓ Complete at least 3 credits from the following:
    ■ BIOM2343 - General Medical Equipment II (3)
    ■ BIOM1355 - Medical Electronic Applications (3)
  ✓ Complete the following:
    ■ ACGM3SBS - Gen Ed Social/Behavioral Science Elective (3)

Semester 5
6 Total Credits

✓ Complete the following:
  ✓ BIOM2388 - Internship - Biomedical Technology/Technician (3)
  ✓ ACGM3HFA - Gen Ed Humanities/Fine Arts Elective (3)

Degree Plan Credits 60

Capstone

✓ Complete the following:
  ✓ BIOM2388 - Internship - Biomedical Technology/Technician (3)
Pre/Corequisites

- BIOM 1315 Prerequisite(s): BIOM 1373
- CETT 1305 Prerequisite(s): CETT 1303
- BIOM 1341, BIOM 2301, BIOM 2311, BIOM 2319 Prerequisite(s): CETT 1303, CETT 1305
- CETT 1325 Prerequisite(s): CETT 1302, CETT 1303, IEIR 1302, IEIR 1304, IEIR 1371 or CETT 1305 (Prerequisite or Corequisite)
- BIOM 2215 Prerequisite(s): BIOM 2301
- BIOM 2239 Prerequisite(s): BIOM 2301, BIOM 2215 (Corequisite)
- BIOM 2343, BIOM 1355 Prerequisite(s): CETT 1303

Elective Options

- Complete at least 1 courses from the following:
  **Mathematics Elective**
  - MATH1314 - College Algebra (3 SCH version)(3)
  - MATH1316 - Plane Trigonometry(3)
  - MATH1325 - Calculus for Business & Social Sciences(3)
  - MATH1332 - Contemporary Mathematics (Quantitative Reasoning)(3)
  - MATH1342 - Elementary Statistical Methods(3)
  - MATH1350 - Math - Teachers I Fundamentals of Math I(3)
  - MATH1351 - Fundamentals of Mathematics II(3)
  - MATH2312 - Pre-Calculus Math (3 SCH version)(3)
  - MATH2313 - Calculus I(3)
  - MATH2318 - Linear Algebra (3)
  - MATH2320 - Differential Equations (3 SCH version)(3)
  - MATH2342 - Elementary Statistical Methods(3)
  - MATH2313 - Calculus I(3)
  - MATH2414 - Calculus II (4 SCH version)(4)
  - MATH2415 - Calculus III (4 SCH version)(4)

- Complete at least 1 courses from the following:
  **Natural Science Elective**
  - BIOL1106 - Biology for Science Majors Laboratory I (lab)(1)
  - BIOL1107 - Biology for Science Majors II Lab(1)
  - BIOL1108 - Biology Non-Science Majors Laboratory I(1)
  - BIOL1109 - Biology for Non-Science Majors II Lab(1)
  - BIOL1113 - General Zoology (lab)(1)
  - BIOL1206 - Biology for Science Majors I (lecture)(3)
  - BIOL1307 - Biology for Science Majors II(3)
  - BIOL1308 - Biology for Non-Science Majors I(3)
  - BIOL1309 - Biology for Non-Science Majors II(3)
  - BIOL1313 - General Zoology (lecture)(3)
  - BIOL1307 - Biology for Science Majors II(3)
  - BIOL2101 - Anatomy & Physiology I (lab)(1)
  - BIOL2102 - Anatomy & Physiology II (lab)(1)
  - BIOL2116 - Genetics (lab)(1)
  - BIOL2120 - Microbiology for Non-Science Majors Laboratory (lab)(1)
  - BIOL2121 - Microbiology for Science Majors Lab(1)
  - BIOL2301 - Anatomy & Physiology I (lecture)(3)
  - BIOL2302 - Anatomy & Physiology II (lecture)(3)
  - BIOL2316 - Genetics (lecture)(3)
  - BIOL2320 - Microbiology for Non-Science Majors (lecture)(3)
  - BIOL2321 - Microbiology for Science Majors(3)
  - BIOL2401 - Anatomy & Physiology I (lecture + lab)(4)
  - BIOL2402 - Anatomy & Physiology II (lecture + lab)(4)
  - BIOL2404 - Anatomy & Physiology (specialized, Single-Semester Course, Lec + Lab)(4)
  - BIOL2416 - Genetics(4)
  - BIOL2420 - Microbiology for Non-Science Majors (lecture + lab)(4)
  - CHEM1105 - Introductory Chemistry Laboratory I (lab)(1)
  - CHEM1107 - Introductory Chemistry Laboratory II(1)
  - CHEM1111 - General Chemistry I (lab)(1)
  - CHEM1112 - General Chemistry II (lab)(1)
  - CHEM1305 - Introductory Chemistry I (lecture)(3)
  - CHEM1307 - Introductory Chemistry II
  - CHEM1311 - General Chemistry I (lecture)(3)
  - CHEM1312 - General Chemistry II (lecture)(3)

## Program Requirements

### Semester 1
12 Total Credits

- Complete the following:
  - BIOM1101 - Biomedical Equipment Technology (1)
  - BIOM1270 - Shop Skills for Biomedical Equipment Technicians (2)
  - BIOM1373 - Medical Software and Hardware (3)
  - CETT1303 - DC Circuits (3)
  - ACGM3MTH - Gen Ed Mathematics Elective (3)

### Semester 2
15 Total Credits

- Complete all of the following
  - Complete the following:
    - BIOM1309 - Applied Biomedical Equipment Technology (3)
  - Complete at least 3 credits from the following:
    - BIOM1315 - Medical Equipment Networks (3)
    - ITNW1325 - Fundamentals of Networking Technologies (3)
  - Complete the following:
    - CETT1305 - AC Circuits (3)
    - ENGL1301 - Composition I (3)
    - ACGM3NSC - Gen Ed Natural Science Elective (3)

### Semester 3
15 Total Credits

- Complete the following:
  - BIOM1341 - Medical Circuits/Troubleshooting (3)
  - BIOM2301 - Safety in Health Care Facilities (3)
  - BIOM2319 - Fundamentals of X-Ray and Medical Imaging Systems (3)
  - CETT1325 - Digital Fundamentals (3)
  - ACGM3SBS - Gen Ed Social/Behavioral Science Elective (3)

### Semester 4
12 Total Credits

- Complete the following:
  - BIOM1350 - Diagnostic Ultrasound Imaging System (3)
  - BIOM2333 - Digital Radiography (3)
  - BIOM2345 - Advanced Imaging Systems (3)
  - BIOM2347 - RF/X-Ray System (3)

### Semester 5
6 Total Credits

- Complete the following:
  - BIOM2389 - Internship-Biomedical Engineering Technician (3)
  - ACGM3HFA - Gen Ed Humanities/Fine Arts Elective (3)

**Degree Plan Credits** 60

### Capstone

- Complete the following:
  - BIOM2389 - Internship-Biomedical Engineering Technician (3)

### Pre/Corequisites

- BIOM 1315 Prerequisite(s): BIOM 1373
- CETT 1305 Prerequisite(s): CETT 1303
- BIOM 1341, BIOM 2301, BIOM 1350, BIOM 2319 Prerequisite(s): CETT 1303, CETT 1305
- CETT 1325 Prerequisite(s): CETT 1302, CETT 1303, IEIR 1302, IEIR 1304, IEIR 1371 or CETT 1305 (Prerequisite or Corequisite)
- BIOM 2333, BIOM 2345, BIOM 2347 Prerequisite(s): BIOM 2319

### Elective Options
Complete at least 1 course from the following:

Mathematics Elective
- MATH1314 - College Algebra (3 SCH version)(3)
- MATH1316 - Plane Trigonometry(3)
- MATH1325 - Calculus for Business & Social Sciences(3)
- MATH1332 - Contemporary Mathematics (Quantitative Reasoning)(3)
- MATH1342 - Elementary Statistical Methods(3)
- MATH1350 - Math - Teachers I Fundamentals of Math I(3)
- MATH1351 - Fundamentals of Mathematics II(3)
- MATH2312 - Pre-Calculus Math (3 SCH version)(3)
- MATH2313 - Calculus I(3)
- MATH2318 - Linear Algebra (3)
- MATH2320 - Differential Equations (3 SCH version)(3)
- MATH2342 - Elementary Statistical Methods(3)
- MATH2333 - Calculus II (4 SCH version)(4)
- MATH2414 - Calculus III (4 SCH version)(4)

Complete at least 1 course from the following:

Natural Science Elective
- BIOL1106 - Biology for Science Majors Laboratory I (lab)(1)
- BIOL1107 - Biology for Science Majors II Lab(1)
- BIOL1108 - Biology Non-Science Majors Laboratory I(1)
- BIOL1109 - Biology for Non-Science Majors II Lab(1)
- BIOL1113 - General Zoology (lab)(1)
- BIOL1306 - Biology for Science Majors I (lecture)(3)
- BIOL1307 - Biology for Science Majors II(3)
- BIOL1308 - Biology for Non-Science Majors I(3)
- BIOL1309 - Biology for Non-Science Majors II(3)
- BIOL1313 - General Zoology (lecture)(3)
- BIOL1307 - Biology for Science Majors II(3)
- BIOL2101 - Anatomy & Physiology I (lab)(1)
- BIOL2102 - Anatomy & Physiology II (lab)(1)
- BIOL2116 - Genetics (lab)(1)
- BIOL2120 - Microbiology for Non-Science Majors Laboratory (lab)(1)
- BIOL2121 - Microbiology for Science Majors Lab(1)
- BIOL2301 - Anatomy & Physiology I (lecture)(3)
- BIOL2302 - Anatomy & Physiology II (lecture)(3)
- BIOL2316 - Genetics (lecture)(3)
- BIOL2320 - Microbiology for Non-Science Majors (lecture)(3)
- BIOL2321 - Microbiology for Science Majors(3)
- BIOL2401 - Anatomy & Physiology I (lecture + lab)(4)
- BIOL2402 - Anatomy & Physiology II (lecture + lab)(4)
- BIOL2404 - Anatomy & Physiology (specialized, Single-Semester Course, Lec + Lab)(4)

Building Construction Technology

Description
TSTC’s Building Construction program offers several options that can help you specialize, brush up your skills or move you on a faster track to build a career in this field. Students in this technology get crucial, hands-on experience using the tools that they will encounter when entering the world of construction, backed by a knowledgeable staff and advisors in key positions within the industry.
Building Construction Technology - Building Construction Craftsman CER1

Locations
Waco
Harlingen

Program Requirements
Semester 1
12 Total Credits
- Complete the following:
  - CNBT1300 - Residential and Light Commercial Blueprint Reading (3)
  - CNBT1316 - Construction Technology I (3)
  - OSHT1307 - Construction Site Safety and Health (3)
  - CNBT1346 - Construction Estimating I (3)

Semester 2
14 Total Credits
- Complete the following:
  - CNBT1313 - Concrete I (3)
  - CNBT1315 - Field Engineering I (3)
  - CNBT1450 - Construction Technology II (4)
  - CNBT1453 - Construction Technology III (4)

Semester 3
6 - 7 Total Credits
- Complete 1 of the following
  - Complete at least 6 credits from the following:
    - CNBT1680 - Cooperative Education - Construction Engineering Technology/Technician (6)
    - CNBT1302 - Mechanical, Electrical & Plumbing Systems in Construction I (3)
    - CNBT2439 - Construction Technology IV (4)
  - Complete the following:
    - CNBT2439 - Construction Technology IV (4)
    - CNBT1302 - Mechanical, Electrical & Plumbing Systems in Construction I (3)

Degree Plan Credits 32 - 33

Capstone
- Complete all of the following
  - Complete 1 of the following
    - Complete the following:
      - CNBT1680 - Cooperative Education - Construction Engineering Technology/Technician (6)
    - Complete the following:
      - CNBT1302 - Mechanical, Electrical & Plumbing Systems in Construction I (3)
    - Complete the following:
      - CNBT2439 - Construction Technology IV (4)

Pre/Corequisites
- CNBT 1450, CNBT 1453, CNBT 2439 Prerequisite(s): CNBT 1316

Business Management Technology

**Description**
Every business needs professionals to manage an office, administer payroll, balance books and hire employees to run a business. Our students receive the training needed to succeed in a career in office management and accounting. You can expect to gain skills that include office software use, management techniques, business principles, accounting procedures, leadership methods and communication tools. This will prepare you to be a professional in any organization and give you the skills to be a successful business owner.

Chemical Dependency Counseling

Description

The Chemical Dependency Counseling program at TSTC facilitates the development of the skills necessary for success in the chemical dependency counseling services industry. The program focuses on clinical evaluations, treatment planning, referrals, service coordination, individual and group counseling, documentation, professional and ethical responsibilities, and client, family and community education. With this knowledge base, students will be prepared to work as counselor interns as they strive toward licensure requirements. Graduates of the program find work opportunities through the criminal justice system, substance abuse treatment centers, or hospitals.

Program Requirements
Semester 1
9 Total Credits
- Complete the following:
  - DAAC1319 - Substance-Related and Addictive Disorders (3)
  - PSYT1313 - Psychology of Personal Adjustment (3)
  - DAAC1305 - Co-Occurring Disorders (3)

Semester 2
12 Total Credits
- Complete the following:
  - DAAC2301 - Therapeutic Communities in a Criminal Justice Setting (3)
  - DAAC1317 - Basic Counseling Skills (3)
  - DAAC1309 - Assessment of Substance-Related and Addictive Disorders (3)
  - DAAC1304 - Pharmacology of Addiction (3)

Grand Total Credits: 21

Capstone
- Complete the following:
  - DAAC2301 - Therapeutic Communities in a Criminal Justice Setting (3)
Chemical Dependency Counseling - Chemical Dependency Counseling CER2

Program Requirements
Semester 1
12 Total Credits

* Complete the following:
  - DAAC1319 - Substance-Related and Addictive Disorders (3)
  - PSYT1313 - Psychology of Personal Adjustment (3)
  - DAAC1305 - Co-Occurring Disorders (3)
  - PSYC2301 - General Psychology (3)

Semester 2
12 Total Credits

* Complete the following:
  - DAAC1304 - Pharmacology of Addiction (3)
  - DAAC1309 - Assessment of Substance-Related and Addictive Disorders (3)
  - DAAC1317 - Basic Counseling Skills (3)
  - DAAC2301 - Therapeutic Communities in a Criminal Justice Setting (3)

Semester 3
12 Total Credits

* Complete the following:
  - DAAC2343 - Current Issues (3)
  - DAAC2341 - Counseling Alcohol and Other Drug Addictions (3)
  - DAAC2354 - Dynamics of Group Counseling (3)
  - DAAC1311 - Counseling Theories (3)

Semester 4
6 Total Credits

* Complete all of the following
  - Complete the following:
    - DAAC2366 - Practicum (or Field Experience) - Substance Abuse/Addiction Counseling (3)
  - Complete at least 3 credits from the following:
    - ENGL1301 - Composition I (3)
    - ENGL2311 - Technical & Business Writing (3)

Degree Plan Credits 42

Capstone

* Complete the following:
  - DAAC2366 - Practicum (or Field Experience) - Substance Abuse/Addiction Counseling (3)

**Computer Networking & Systems Administration**

**Description**

The Computer Networking & Systems Administration program produces dynamic, highly skilled IT professionals that today's industry demands. They have the expertise to build, secure and manage IT systems in the cloud and on-premise. They are in charge of keeping the infrastructure and services operational to ensure that everyone and everything stays connected.

In this program, you will engage with real equipment through hands-on labs and other interactive assessments designed to build knowledge and skills that are critical for success in high-demand fields. You will have the opportunity to learn how to configure and troubleshoot technology that is essential to any business, such as computers, switches, routers, servers and firewalls. All this will be through multiple pathway options and with many courses focused on industry certifications from Cisco, Amazon and CompTIA. The program is an official Cisco Network Academy and Amazon Web Services (AWS) Academy.

The advanced technical certificate is focused on cloud computing and offers specialized training in topics such as DevOps, infrastructure development/automation, programming, database management, security, configuration management and more. Students will leave with extensive knowledge of cloud computing.

Program Requirements

Semester 1
12 Total Credits

- Complete the following:
  - ITNW1308 - Implementing and Supporting Client Operating Systems (3)
  - ITNW1358 - Network+ (3)
  - ITSC1325 - Personal Computer Hardware (3)
  - ACGM3MTH - Gen Ed Mathematics Elective (3)

Semester 2
12 Total Credits

- Complete all of the following:
  - Complete the following:
    - ITCC1314 - CCNA 1: Introduction to Networks (3)
    - ITNW1345 - Implementing Network Directory Services (3)
    - ITSC1316 - Linux Installation and Configuration (3)
  - Complete at least 3 credits from the following:
    - ENGL1301 - Composition I (3)
    - ENGL2311 - Technical & Business Writing (3)

Semester 3
12 Total Credits

- Complete the following:
  - ITC1344 - CCNA 2: Switching, Routing, and Wireless Essentials (3)
  - ITNW1313 - Computer Virtualization (3)
  - ITSY1342 - Information Technology Security (3)
  - ACGM3GED - Gen Ed Elective (3)

Semester 4
12 Total Credits

- Complete the following:
  - ITC2320 - CCNA 3: Enterprise Networking, Security, and Automation (3)
  - ITNW2354 - Internet/Intranet Server (3)
  - ITSE1329 - Programming Logic and Design (3)
  - ACGM3HFA - Gen Ed Humanities/Fine Arts Elective (3)

Semester 5
12 Total Credits

- Complete all of the following:
  - Complete at least 1 of the following:
    - ITNW1309 - Fundamentals of Cloud Computing (3)
    - ITCC2343 - Network Security (3)
  - Complete the following:
    - ITNW2352 - Administering SQL Server (3)
  - Complete at least 1 of the following:
    - ITSC2370 - Final Project-Systems Administration (3)
    - ITSC2386 - Internship - Computer and Information Sciences, General (3)
  - Complete the following:
    - ACGM3SBS - Gen Ed Social/Behavioral Science Elective (3)

Degree Plan Credits 60

Capstone

- Complete at least 1 of the following:
  - ITSC2370 - Final Project-Systems Administration (3)
  - ITSC2386 - Internship - Computer and Information Sciences, General (3)
Pre/Corequisites

- ITSC 1316 Prerequisite(s): ITNW 1358 or ITCC 1314
- ITCC 1344 Prerequisite(s): ITCC 1314
- ITSY 1342 Prerequisite(s): ITNW 1345 or ITNW 1354
- ITCC 2320 Prerequisite(s): ITCC 1344
- ITNW 2354 Prerequisite(s): ITNW 1345, ITSC 1316

Elective Options

- Complete at least 1 courses from the following:
  Mathematics Elective
  - MATH1314 - College Algebra (3 SCH version)(3)
  - MATH1316 - Plane Trigonometry(3)
  - MATH1325 - Calculus for Business & Social Sciences(3)
  - MATH1332 - Contemporary Mathematics (Quantitative Reasoning)(3)
  - MATH1342 - Elementary Statistical Methods(3)
  - MATH1350 - Math - Teachers I Fundamentals of Math I(3)
  - MATH1351 - Fundamentals of Mathematics II(3)
  - MATH2312 - Pre-Calculus Math (3 SCH version)(3)
  - MATH2313 - Calculus I(3)
  - MATH2318 - Linear Algebra (3)
  - MATH2320 - Differential Equations (3 SCH version)(3)
  - MATH2342 - Elementary Statistical Methods(3)
  - MATH2313 - Calculus I(3)
  - MATH2414 - Calculus II (4 SCH version)(4)
  - MATH2415 - Calculus III (4 SCH version)(4)

- Complete 1 General Education Elective as recommended by program
- Complete at least 1 courses from the following:
  Humanities/Fine Arts Elective
  - HUMA1301 - Introduction to Humanities I
  - HUMA2319 - American Minority Studies(3)
  - HUMA2323 - World Cultures
  - PHIL1301 - Introduction to Philosophy
  - PHIL1304 - Introduction to World Religions
  - PHIL2303 - Introduction to Formal Logic
  - PHIL2306 - Introduction to Ethics
  - ARTS1301 - Art Appreciation
  - ARTS2326 - Sculpture I(3)
  - ARTS2326 - Sculpture I(3)
  - MUSI1306 - Music Appreciation

- Complete at least 1 courses from the following:
  Social/Behavioral Science Elective
  - HIST1301 - United States History I(3)
  - HIST1302 - United States History II(3)
  - HIST2312 - Western Civilization II(3)
  - DHYG1301 - Orofacial Anatomy, Histology & Embryology(3)
  - GOVT2305 - Federal Government (Federal constitution & topics)(3)
  - GOVT2306 - Texas Government (Texas constitution & topics)(3)
  - ANTH2346 - General Anthropology
  - ECON1301 - Introduction to Economics(3)
  - ECON2301 - Principles of Macroeconomics(3)
  - ECON2302 - Principles of Microeconomics (3)
  - GEOG1302 - Human Geography
  - GEOG1303 - World Regional Geography
  - PSYC1100 - Learning Framework (1)
  - PSYC2301 - General Psychology (3)
  - PSYC2314 - Lifespan Growth & Development(3)

Computer Programming Technology

Description
Some of the hottest careers in the job market these days are within the Information Technology sector. That's why Computer Programming Technology at TSTC makes sense for a great career choice. Students in this program get a practical, hands-on education that teaches them the technical skills required in the IT field. In addition to technical skills, the student's training centers on the development of logic, problem-solving and soft skills. CPT provides specialized training in business application, mobile development, and database functionality that focuses on career expectations leading to a variety of positions, from database developer, mobile app developer, to software development.

    - ITSE2386 - Internship - Computer Programming/Programmer, General (3)

Pre/Corequisites

- ITSE 2302 Prerequisite(s): ITSE 1311
- ITSE 2317 Prerequisite(s): ITSE 1302
- INEW 2338, ITSE 1333 Prerequisite(s): ITSE 2317
- ITSE 2343 Prerequisite(s): ITSE 1333
- ITSE 1330, ITSE 1373 Prerequisite(s): INEW 2338
- ITSE 2333 Prerequisite(s): ITSE 2309
- ITSE 2353 Prerequisite(s): ITSE 1330
- ITSE 2373 Prerequisite(s): ITSE 1373
- INEW 2332, ITSE 2380, ITSE 2386, ITSE 2359, INEW 2330 Prerequisite(s): (ITSE 2353 or ITSE 2373) and ITSE 2333
Elective Options

- Complete at least 1 courses from the following:
  Mathematics Elective
  - MATH1314 - College Algebra (3 SCH version)(3)
  - MATH1316 - Plane Trigonometry(3)
  - MATH1325 - Calculus for Business & Social Sciences(3)
  - MATH1332 - Contemporary Mathematics (Quantitative Reasoning)(3)
  - MATH1342 - Elementary Statistical Methods(3)
  - MATH1350 - Math - Teachers I Fundamentals of Math I(3)
  - MATH1351 - Fundamentals of Mathematics II(3)
  - MATH2312 - Pre-Calculus Math (3 SCH version)(3)
  - MATH2313 - Calculus I(3)
  - MATH2318 - Linear Algebra (3)
  - MATH2320 - Differential Equations (3 SCH version)(3)
  - MATH2342 - Elementary Statistical Methods(3)
  - MATH2313 - Calculus I(3)
  - MATH2414 - Calculus II (4 SCH version)(4)
  - MATH2415 - Calculus III (4 SCH version)(4)

- Complete at least 1 courses from the following:
  Social/Behavioral Science Elective
  - HIST1301 - United States History I(3)
  - HIST1302 - United States History II(3)
  - HIST2312 - Western Civilization II(3)
  - DHYG1301 - Orofacial Anatomy, Histology & Embryology(3)
  - GOVT2305 - Federal Government (Federal constitution & topics)(3)
  - GOVT2306 - Texas Government (Texas constitution & topics)(3)
  - ANTH2346 - General Anthropology
  - ECON1301 - Introduction to Economics(3)
  - ECON2301 - Principles of Macroeconomics(3)
  - ECON2302 - Principles of Microeconomics (3)
  - GEOG1302 - Human Geography
  - GEOG1303 - World Regional Geography
  - PSYC1100 - Learning Framework (1)
  - PSYC2301 - General Psychology (3)
  - PSYC2314 - Lifespan Growth & Development(3)

- Complete at least 1 courses from the following:
  Humanities/Fine Arts Elective
  - HUMA1301 - Introduction to Humanities I
  - HUMA2319 - American Minority Studies(3)
  - HUMA2323 - World Cultures
  - PHIL1301 - Introduction to Philosophy
  - PHIL1304 - Introduction to World Religions
  - PHIL2303 - Introduction to Formal Logic
  - PHIL2306 - Introduction to Ethics
  - ARTS1301 - Art Appreciation
  - ARTS2326 - Sculpture I(3)
  - ARTS2326 - Sculpture I(3)
  - MUSI1306 - Music Appreciation

- Complete 1 General Education Elective as recommended by program
Computer Science

Description

The computer science degree is planned for students who plan to transfer to a four-year degree program in computer science, or for students in mathematics, science, or technical areas who wish to obtain skills in computer software development for scientific and technical applications. The courses in the program provide the academic core of the theoretical concepts of computer science combined with the fundamentals of structured design and development techniques for computer programming.

As an Academic program, students are expected to demonstrate college-level skills in mathematics, English and fundamental programming. Upon completion of this program a student will be able to:

- Demonstrate proficiency in a high level programming language.
- Apply logical skills and mathematical concepts to analyze, design and implement computer algorithms and programs.
- Demonstrate proficiency in current design techniques, i.e. Object Oriented Design.

Computer Science - Computer Science AS

Locations

Harlingen
Program Requirements

Semester 1
12 Total Credits

- Complete all of the following
  - Complete the following:
    - COSC1336 - Programming Fundamentals I (3)
    - ENGL1301 - Composition I (3)
  - Complete at least 3 credits from the following:
    - MATH2312 - Pre-Calculus Math (3 SCH version) (3)
    - MATH1316 - Plane Trigonometry (3)
  - Complete the following:
    - ACGM3CAR - Creative Arts Elective (3)

Semester 2
13 Total Credits

- Complete the following:
  - COSC1337 - Programming Fundamentals II (3)
  - ENGL1302 - Composition II (3)
  - GOVT2305 - Federal Government (Federal constitution & topics) (3)
  - MATH2413 - Calculus I (4 SCH version) (4)

Semester 3
12 Total Credits

- Complete the following:
  - COSC2325 - Computer Organization (3)
  - GOVT2306 - Texas Government (Texas constitution & topics) (3)
  - ACGM3CAOB - Component Area Option (3)
  - ACGM3LPC - Language, Philosophy and Culture Elective (3)

Semester 4
10 Total Credits

- Complete the following:
  - COSC2336 - Programming Fundamentals III (3)
  - HIST1301 - United States History I (3)
  - PHYS1301 - College Physics I (lecture) (3)
  - PHYS1101 - College Physics Laboratory I (1)

Semester 5
13 Total Credits

- Complete the following:
  - HIST1302 - United States History II (3)
  - PHYS1302 - College Physics II (lecture) (3)
  - PHYS1102 - College Physics Lab II (1)
  - SPCHX3XX - Gen Ed Speech Elective (3)
  - ACGM3SBS - Gen Ed Social/Behavioral Science Elective (3)

Degree Plan Credits 60

Capstone

- Complete the following:
  - COSC2336 - Programming Fundamentals III (3)
**Pre/Corequisites**

- MATH 2312 Prerequisite(s): MATH 1314
- COSC 1337, COSC 2325 Prerequisite(s): COSC 1336
- ENGL 1302 Prerequisite(s): ENGL 1301
- MATH 2413 Prerequisite(s): MATH 1316 or MATH 2312 or MATH 2412
- COSC 2336 Prerequisite(s): COSC 1337
- PHYS 1301 Prerequisite(s): MATH 1314, MATH 1316 or MATH 2312 or MATH 2412 (Prerequisite), PHYS 1101 (Corequisite)
- PHYS 1101 Prerequisite(s): PHYS 1301 (Corequisite)
- PHYS 1302 Prerequisite(s): PHYS 1301, PHYS 1101 or PHYS 1401 (Prerequisite), PHYS 1102 (Corequisite)
- PHYS 1102 Prerequisite(s): PHYS 1302 (Corequisite)

**Elective Options**

- Complete at least 1 courses from the following:
  Creative Arts Elective
  - ARTS1301 - Art Appreciation
  - MUSI1306 - Music Appreciation
- Complete at least 1 courses from the following:
  Component Area Option A (for Computer Science AS)
  - ENGL2321 - British Literature
  - ENGL2326 - American Literature (single-Semester Course)
  - ENGL2331 - World Literature
  - PSYC2314 - Lifespan Growth & Development (3)
- Complete at least 1 courses from the following:
  Language, Philosophy & Culture Elective
  - ENGL2321 - British Literature
  - ENGL2326 - American Literature (single-Semester Course)
  - ENGL2331 - World Literature
  - PHIL1304 - Introduction to World Religions
- Complete at least 1 courses from the following:
  Speech Elective
  - SPCH1311 - Introduction to Speech Communication
  - SPCH1311 - Introduction to Speech Communication
  - SPCH1311 - Introduction to Speech Communication
  - SPCH1311 - Introduction to Speech Communication
- Complete at least 1 courses from the following:
  Social/Behavioral Science Elective
  - HIST1301 - United States History I (3)
  - HIST1302 - United States History II (3)
  - HIST2312 - Western Civilization II (3)
  - DHYG1301 - Orofacial Anatomy, Histology & Embryology (3)
  - GOVT2305 - Federal Government (Federal constitution & topics) (3)
  - GOVT2306 - Texas Government (Texas constitution & topics) (3)
  - ANTH2346 - General Anthropology
  - ECON1301 - Introduction to Economics (3)
  - ECON2301 - Principles of Macroeconomics (3)
  - ECON2302 - Principles of Microeconomics (3)
  - GEOG1302 - Human Geography
  - GEOG1303 - World Regional Geography
  - PSYC1100 - Learning Framework (1)
  - PSYC2301 - General Psychology (3)
  - PSYC2314 - Lifespan Growth & Development (3)

**Culinary Arts**

**Description**

As a Culinary Arts student at TSTC, you will be trained in a multitude of hands-on skill sets and talents. The chef-instructors of TSTC Culinary are all highly trained professional chefs with years of industry experience and knowledge that will guide you in your professional journey while in school and out in your career. The TSTC Culinary Arts program is based in classical cooking techniques, food preparation, meat and seafood fabrication, baking, pastry, American regional and international cuisines, dining room services, purchasing and cost analysis. It culminates with the associate degree capstone course that allow you to run the kitchen with your cuisine. The Culinary Arts department at TSTC also teaches food-related topics, including nutrition, sanitation and safety, food service equipment, supervision and culinary math. For quicker entry into the industry, Culinary Assistant, Culinary Specialist and Culinarian certificates are available.
Culinary Arts - Culinarian CER2

Locations
Waco
East Williamson County

Program Requirements

Semester 1
10 Total Credits

- Complete the following:
  - CHEF1205 - Sanitation and Safety (2)
  - IFWA1205 - Food Service Equipment and Planning (2)
  - IFWA1401 - Food Preparation I (4)
  - IFWA1218 - Nutrition for the Food Service Professional (2)

Semester 2
10 Total Credits

- Complete all of the following
  - Complete the following:
    - IFWA1427 - Food Preparation II (4)
    - PSTR1301 - Fundamentals of Baking (3)
  - Complete at least 3 credits from the following:
    - RSTO1304 - Dining Room Service (3)
    - RSTO1380 - Cooperative Education - Restaurant, Culinary, and Catering Management/Manager (3)

Semester 3
9 Total Credits

- Complete the following:
  - CHEF1340 - Meat Preparation and Cooking (3)
  - IFWA1217 - Food Production and Planning (2)
  - PSTR2431 - Advanced Pastry Shop (4)

Semester 4
11 Total Credits

- Complete the following:
  - CHEF1441 - American Regional Cuisine (4)
  - CHEF1445 - International Cuisine (4)
  - RSTO1313 - Hospitality Supervision (3)

Degree Plan Credits 40

Capstone

- Complete the following:
  - CHEF1441 - American Regional Cuisine (4)
  - CHEF1445 - International Cuisine (4)

Pre/Corequisites

- IFWA 1427, PSTR 1301, RSTO 1304 prerequisite: CHEF 1205, IFWA 1205, IFWA 1401
- CHEF 1340 prerequisite: IFWA 1427
- PSTR 2431 prerequisite: PSTR 1301
- CHEF 1441, CHEF 1445 prerequisite: CHEF 1340, PSTR 2431

Semester 2
13 Total Credits

- Complete all of the following
  - Complete the following:
    - IFWA1427 - Food Preparation II (4)
    - PSTR1301 - Fundamentals of Baking (3)
  - Complete at least 3 credits from the following:
    - RSTO1304 - Dining Room Service (3)
    - RSTO1380 - Cooperative Education - Restaurant, Culinary, and Catering Management/Manager (3)
  - Complete the following:
    - ACGM3SBS - Gen Ed Social/Behavioral Science Elective (3)

Semester 3
12 Total Credits

- Complete the following:
  - CHEF1340 - Meat Preparation and Cooking (3)
  - IFWA1217 - Food Production and Planning (2)
  - PSTR2431 - Advanced Pastry Shop (4)
  - ENGL2311 - Technical & Business Writing (3)

Semester 4
14 Total Credits

- Complete the following:
  - CHEF1441 - American Regional Cuisine (4)
  - CHEF1445 - International Cuisine (4)
  - RSTO1313 - Hospitality Supervision (3)
  - ACGM3GED - Gen Ed Elective (3)

Semester 5
8 Total Credits

- Complete all of the following
  - Complete at least 5 credits from the following:
    - RSTO2505 - Management of Food Production and Service (5)
    - RSTO1680 - Cooperative Education - Restaurant, Culinary, and Catering Management/Manager (6)
  - Complete the following:
    - ACGM3MNS - Gen Ed Math/Natural Science Elective (3)

Degree Plan Credits 60

Capstone

- Complete 1 of the following
  - Complete the following:
    - RSTO2505 - Management of Food Production and Service (5)
  - Complete the following:
    - RSTO1680 - Cooperative Education - Restaurant, Culinary, and Catering Management/Manager (6)
Pre/Corequisites

- PSTR 1301, RSTO 1304 prerequisite: CHEF 1205, IFWA 1205, IFWA 1401
- CHEF 1340 prerequisite: IFWA 1427
- PSTR 2431 prerequisite: PSTR 1301
- CHEF 1441, CHEF 1445 prerequisite: IFWA 1427, PSTR 2431
- RSTO 2505 prerequisite: CHEF 1441, CHEF 1445, PSTR 2431, RSTO 1313 (Prerequisite or Corequisite)

Elective Options

- Complete at least 1 courses from the following:
  Humanities/Fine Arts Elective
  - HUMA1301 - Introduction to Humanities I
  - HUMA2319 - American Minority Studies (3)
  - HUMA2323 - World Cultures
  - PHIL1301 - Introduction to Philosophy
  - PHIL1304 - Introduction to World Religions
  - PHIL2303 - Introduction to Formal Logic
  - PHIL2306 - Introduction to Ethics
  - ARTS1301 - Art Appreciation
  - ARTS2326 - Sculpture I (3)
  - ARTS2326 - Sculpture I (3)
  - MUSI1306 - Music Appreciation

Program Requirements
Semester 1
10 Total Credits
◆ Complete the following:
  ◆ CHEF1205 - Sanitation and Safety (2)
  ◆ IFWA1205 - Food Service Equipment and Planning (2)
  ◆ IFWA1401 - Food Preparation I (4)
  ◆ IFWA1218 - Nutrition for the Food Service Professional (2)

Semester 2
10 Total Credits
◆ Complete all of the following
  ◆ Complete the following:
    ❑ IFWA1427 - Food Preparation II (4)
    ❑ PSTR1301 - Fundamentals of Baking (3)
  ◆ Complete at least 3 credits from the following:
    ❑ RSTO1304 - Dining Room Service (3)
    ❑ RSTO1380 - Cooperative Education - Restaurant, Culinary, and Catering Management/Manager (3)

Degree Plan Credits 20

Capstone
◆ Complete the following:
  ◆ IFWA1401 - Food Preparation I (4)
  ◆ PSTR1301 - Fundamentals of Baking (3)

Pre/Corequisites
◆ IFWA 1427, PSTR 1301, RSTO 1304 prerequisite: CHEF 1205, IFWA 1205, IFWA 1401

◆ CHEF 1340 Prerequisite(s): IFWA 1427
◆ PSTR 2431 Prerequisite(s): PSTR 1301
Cybersecurity

Description

There’s a strong demand for those who understand the importance of protecting a company’s data. It takes specialized skills and in-depth knowledge of computer networking, operating systems and administration, encryption, firewalls and much more.

The Cybersecurity (CYS) program will provide students with the knowledge/skills required to:

- Implement, maintain, and securely administer infrastructure hardware and software.
- Implement security controls to aid in preventing, defending, detecting, and responding to cyberattacks and threats.
- Use cyber defense tools/techniques for continual monitoring and analysis of system activity to identify abnormal/malicious activity.
- Perform security reviews and identify security gaps in security implementations, resulting in recommendations for inclusion in a risk mitigation strategy.
- Identify, collect, examine, and preserve evidence using controlled and documented analytical and investigative techniques.

In addition, those who pursue the associate degree have the opportunity to further their skills in digital forensics with the Digital Forensics Advanced Technical Certificate. This certificate is for students who have previously completed an associate degree in security and provides advanced, specialized instruction in Digital Forensics.

    - ITSY2359 - Security Assessment and Auditing (3)  
    - ACGM3SBS - Gen Ed Social/Behavioral Science Elective (3)  

Degree Plan Credits **60**

**Capstone**

- Complete the following:  
  - ITNW2350 - Enterprise Network (3)  
  - ITSY2359 - Security Assessment and Auditing (3)

**Pre/Corequisites**

- ITNW 2321, ITNW 2312 Prerequisite(s): ITNW 1325  
- ITSY 1374 Prerequisite(s): ITNW 1354  
- ITNW 2355, ITSY 1342 Prerequisite(s): ITNW 1345 or ITNW 1354  
- ITSY 2343 Prerequisite(s): ITDF 1300  
- ITSY 2301 Prerequisite(s): ITNW 2312  
- ITSY 2330 Prerequisite(s): ITNW 2321, ITSY 1342  
- ITNW 2350 Prerequisite(s): ITSY 2301  
- ITSY 1375 Prerequisite(s): ITSY 1374, ITSY 1342  
- ITSY 2359 Prerequisite(s): ITSY 1342, ITSY 2301, ITSY 1374
## Elective Options

- Complete at least 1 courses from the following:
  - Mathematics Elective
    - MATH1314 - College Algebra (3 SCH version) (3)
    - MATH1316 - Plane Trigonometry (3)
    - MATH1325 - Calculus for Business & Social Sciences (3)
    - MATH1332 - Contemporary Mathematics (Quantitative Reasoning) (3)
    - MATH1342 - Elementary Statistical Methods (3)
    - MATH1350 - Math - Teachers I Fundamentals of Math I (3)
    - MATH1351 - Fundamentals of Mathematics II (3)
    - MATH2312 - Pre-Calculus Math (3 SCH version) (3)
    - MATH2313 - Calculus I (3)
    - MATH2318 - Linear Algebra (3)
    - MATH2320 - Differential Equations (3 SCH version) (3)
    - MATH2342 - Elementary Statistical Methods (3)
    - MATH2313 - Calculus I (3)
    - MATH2414 - Calculus II (4 SCH version) (4)
    - MATH2415 - Calculus III (4 SCH version) (4)

- Complete at least 1 General Education Elective as recommended by program

- Complete at least 1 courses from the following:
  - Humanities/Fine Arts Elective
    - HUMA1301 - Introduction to Humanities I
    - HUMA2319 - American Minority Studies (3)
    - HUMA2323 - World Cultures
    - PHIL1301 - Introduction to Philosophy
    - PHIL1304 - Introduction to World Religions
    - PHIL2303 - Introduction to Formal Logic
    - PHIL2306 - Introduction to Ethics
    - ARTS1301 - Art Appreciation
    - ARTS2326 - Sculpture I (3)
    - ARTS2326 - Sculpture I (3)
    - MUSI1306 - Music Appreciation

- Complete at least 1 courses from the following:
  - Social/Behavioral Science Elective
    - HIST1301 - United States History I (3)
    - HIST1302 - United States History II (3)
    - HIST2312 - Western Civilization II (3)
    - DHYG1301 - Orofacial Anatomy, Histology & Embryology (3)
    - GOVT2305 - Federal Government (Federal constitution & topics) (3)
    - GOVT2306 - Texas Government (Texas constitution & topics) (3)
    - ANTH2346 - General Anthropology
    - ECON1301 - Introduction to Economics (3)
    - ECON2301 - Principles of Macroeconomics (3)
    - ECON2302 - Principles of Microeconomics (3)
    - GEOG1302 - Human Geography
    - GEOG1303 - World Regional Geography
    - PSYC1100 - Learning Framework (1)
    - PSYC2301 - General Psychology (3)
    - PSYC2314 - Lifespan Growth & Development (3)
Cybersecurity - Cybersecurity CER1

Locations
Online - TSTC Connect

Grand Total Credits: 9
Dental Hygiene

Description
The Dental Hygiene program at TSTC prepares students for the industry of preventative dentistry with a well-rounded curriculum that includes preventative dental hygiene, pharmacology, periodontology, pathology, dental nutrition and more. Dental Hygiene students at TSTC are able to fulfill their clinical experiences at a beautiful, state-of-the-art dental clinic on campus. The students utilize the 14-chair clinic to receive over 600 hours of instruction in a 1-faculty-to-5-student ratio. External clinical experiences also allow a wide variety of patient treatment. Graduates of the program are well prepared to successfully complete the National Dental Hygiene Board and the Western Regional Board Examination, as well as the Texas Jurisprudence Examination for licensure.

Dental Hygiene - Dental Hygiene AAS

Locations
Harlingen
Program Requirements

Semester 1
14 Total Credits

◆ Complete the following:
  ◆ BIOL2101 - Anatomy & Physiology I (lab) (1)
  ◆ BIOL2301 - Anatomy & Physiology I (lecture) (3)
  ◆ CHEM1105 - Introductory Chemistry Laboratory I (lab) (1)
  ◆ CHEM1305 - Introductory Chemistry I (lecture) (3)
  ◆ ENGL1301 - Composition I (3)
  ◆ SPCHX3XX - Gen Ed Speech Elective (3)

Semester 2
12 Total Credits

◆ Complete the following:
  ◆ DHYG1227 - Preventive Dental Hygiene Care (2)
  ◆ DHYG1301 - Orofacial Anatomy, Histology & Embryology (3)
  ◆ DHYG1331 - Preclinical Dental Hygiene (3)
  ◆ BIOL2102 - Anatomy & Physiology II (lab) (1)
  ◆ BIOL2302 - Anatomy & Physiology II (lecture) (3)

Semester 3
14 Total Credits

◆ Complete the following:
  ◆ DHYG1211 - Periodontology (2)
  ◆ DHYG1260 - Clinical - Dental Hygiene/Hygienist (2)
  ◆ DHYG1304 - Dental Radiology (3)
  ◆ BIOL2120 - Microbiology for Non-Science Majors Laboratory (lab) (1)
  ◆ BIOL2320 - Microbiology for Non-Science Majors (lecture) (3)
  ◆ ACGM3HFA - Gen Ed Humanities/Fine Arts Elective (3)

Semester 4
10 Total Credits

◆ Complete the following:
  ◆ DHYG1235 - Pharmacology for the Dental Hygienist (2)
  ◆ DHYG1261 - Clinical - Dental Hygiene/Hygienist (2)
  ◆ DHYG1319 - Dental Materials (3)
  ◆ SOCI1301 - Introduction to Sociology (3)

Semester 5
12 Total Credits

◆ Complete the following:
  ◆ DHYG1215 - Community Dentistry (2)
  ◆ DHYG1239 - General and Oral Pathology (2)
  ◆ DHYG2201 - Dental Hygiene Care I (2)
  ◆ DHYG2360 - Clinical - Dental Hygiene/Hygienist (3)
  ◆ PSYC2301 - General Psychology (3)

Semester 6
6 Total Credits

◆ Complete the following:
  ◆ DHYG1207 - General and Dental Nutrition (2)
  ◆ DHYG2153 - Dental Hygiene Practice (1)
  ◆ DHYG2361 - Clinical - Dental Hygiene/Hygienist (3)

Grand Total Credits: 68

Capstone

◆ Complete the following:
  ◆ DHYG2361 - Clinical - Dental Hygiene/Hygienist (3)
Pre/Corequisites

- DHYG 1260 Prerequisite(s): DHYG 1331
- DHYG 1261 Prerequisite(s): DHYG 1260
- DHYG 2360 Prerequisite(s): DHYG 1261
- DHYG 2361 Prerequisite(s): DHYG 2360

Elective Options

- Complete at least 1 courses from the following:
  Speech Elective
  - SPCH1311 - Introduction to Speech Communication
  - SPCH1311 - Introduction to Speech Communication
  - SPCH1311 - Introduction to Speech Communication
  - SPCH1311 - Introduction to Speech Communication

- Complete at least 1 courses from the following:
  Humanities/Fine Arts Elective
  - HUMA1301 - Introduction to Humanities I
  - HUMA2319 - American Minority Studies (3)
  - HUMA2323 - World Cultures
  - PHIL1301 - Introduction to Philosophy
  - PHIL1304 - Introduction to World Religions
  - PHIL2303 - Introduction to Formal Logic
  - PHIL2306 - Introduction to Ethics
  - ARTS1301 - Art Appreciation
  - ARTS2326 - Sculpture I (3)
  - ARTS2326 - Sculpture I (3)
  - MUSI1306 - Music Appreciation

Diesel Equipment Technology

Description

TSTC's Diesel Equipment Technology program offers several avenues of entry into the workforce: Off-Highway Equipment, Heavy Truck, and John Deere Construction & Forestry. TSTC's field-experienced faculty members work closely with related diesel industries to develop curriculum that meets workforce demands. Diesel Equipment Technology students will learn diesel engine testing and repair, brake systems, HVAC troubleshooting and repair, electrical systems, hydraulics, failure analysis and more. Because of the vast uses of highly advanced pneumatic, hydraulic and electronic systems technology, industry needs quality-trained technicians to repair and maintain the equipment, and TSTC students learn from skilled craftsmen who have actual field experience. For quicker entry into the industry, certificates are also available.

North Texas

Program Requirements

Semester 1
14 Total Credits

- Complete the following:
  - DEMR1301 - Shop Safety and Procedures (3)
  - DEMR1317 - Basic Brake Systems (3)
  - DEMR1410 - Diesel Engine Testing and Repair I (4)
  - DEMR2412 - Diesel Engine Testing and Repair II (4)

Semester 2
12 Total Credits

- Complete the following:
  - DEMR1305 - Basic Electrical Systems (3)
  - DEMR1316 - Basic Hydraulics (3)
  - DEMR1321 - Power Train I (3)
  - DEMR1323 - Heating, Ventilation, and Air Conditioning (HVAC) Troubleshooting and Repair (3)

Semester 3
10 Total Credits

- Complete all of the following
  - Complete the following:
    - DEMR1327 - Tractor Trailer Service and Repair (3)
  - Complete at least 3 credits from the following:
    - DEMR1330 - Steering and Suspension I (3)
    - DEMR1329 - Preventative Maintenance (3)
  - Complete the following:
    - DEMR1447 - Power Train II (4)

Degree Plan Credits 36

Capstone

- Complete the following:
  - DEMR1327 - Tractor Trailer Service and Repair (3)

Pre/Corequisites

- DEMR 2412 Prerequisite(s): DEMR 1410
- DEMR 1327 Prerequisite(s): DEMR 1317
- DEMR 1447 Prerequisite(s): DEMR 1321 or DEMR 1421

14 Total Credits

- Complete the following:
  - DEMR1301 - Shop Safety and Procedures (3)
  - DEMR1410 - Diesel Engine Testing and Repair I (4)
  - DEMR2412 - Diesel Engine Testing and Repair II (4)
  - ENGL1301 - Composition I (3)

Semester 2
15 Total Credits

- Complete the following:
  - DEMR1305 - Basic Electrical Systems (3)
  - DEMR1316 - Basic Hydraulics (3)
  - DEMR1321 - Power Train I (3)
  - DEMR1323 - Heating, Ventilation, and Air Conditioning (HVAC) Troubleshooting and Repair (3)
  - PHYS1315 - Physical Science I (lecture) (3)

Semester 3
6 Total Credits

- Complete the following:
  - DEMR1680 - Cooperative Education - Diesel Mechanics Technology/Technician (6)

Semester 4
13 Total Credits

- Complete the following:
  - DEMR2335 - Advanced Hydraulics (3)
  - DEMR2344 - Automatic Power Shift and Hydrostatic Transmissions II (3)
  - HEMR1401 - Tracks and Undercarriages (4)
  - ACGM3HFA - Gen Ed Humanities/Fine Arts Elective (3)

Semester 5
12 Total Credits

- Complete the following:
  - DEMR2332 - Electronic Controls (3)
  - DEMR2348 - Failure Analysis (3)
  - ACGM3SBS - Gen Ed Social/Behavioral Science Elective (3)
  - ACGM3GED - Gen Ed Elective (3)

Grand Total Credits: 60

Capstone

- Complete the following:
  - DEMR2332 - Electronic Controls (3)

Pre/Corequisites

- DEMR 2412 Prerequisite(s): DEMR 1410
- DEMR 2335 Prerequisite(s): DEMR 1316 or DEMR 1416
- DEMR 2344 Prerequisite(s): DEMR 1321 or DEMR 2312 or DEMR 2412
- DEMR 2332 Prerequisite(s): DEMR 1305, DEMR 2412
Elective Options

- Complete at least 1 courses from the following:
  Humanities/Fine Arts Elective
  - HUMA1301 - Introduction to Humanities I
  - HUMA2319 - American Minority Studies (3)
  - HUMA2323 - World Cultures
  - PHIL1301 - Introduction to Philosophy
  - PHIL1304 - Introduction to World Religions
  - PHIL2303 - Introduction to Formal Logic
  - PHIL2306 - Introduction to Ethics
  - ARTS1301 - Art Appreciation
  - ARTS2326 - Sculpture I (3)
  - ARTS2326 - Sculpture I (3)
  - MUSI1306 - Music Appreciation

- Complete at least 1 courses from the following:
  Social/Behavioral Science Elective
  - HIST1301 - United States History I (3)
  - HIST1302 - United States History II (3)
  - HIST2312 - Western Civilization II (3)
  - DHYG1301 - Orofacial Anatomy, Histology & Embryology (3)
  - GOVT2305 - Federal Government (Federal constitution & topics) (3)
  - GOVT2306 - Texas Government (Texas constitution & topics) (3)
  - ANTH2346 - General Anthropology
  - ECON1301 - Introduction to Economics (3)
  - ECON2301 - Principles of Macroeconomics (3)
  - ECON2302 - Principles of Microeconomics (3)
  - GEOG1302 - Human Geography
  - GEOG1303 - World Regional Geography
  - PSYC1100 - Learning Framework (1)
  - PSYC2301 - General Psychology (3)
  - PSYC2314 - Lifespan Growth & Development (3)

- Complete 1 General Education Elective as recommended by program

- DEMR 2332 Prerequisite(s): DEMR 1305, DEMR 2412
- DEMR 2334 Prerequisite(s): DEMR 2412, DEMR 2312 or AUMT 2417

Digital Media Design

Description

While you watch commercials, do you think to yourself, "I could do that better"? When you pass by a billboard, do you say to yourself, "I can't even read that"? In the Digital Media Design program, our goal is to inspire and teach a new generation of media artists how to be employable in the print, photography, videography and web design industries. We'll show you the techniques necessary to produce quality media design, and equip you with tools to grow as creative thinkers and innovators. Students in this program will manipulate sound, still images, 3-D images, animations, UX/UI and digital video on computers. This program will provide training in desktop publishing, painting, drawing, color correction, solids modeling, animation, sound editing, nonlinear video editing web, page creating, photography, 3-D printing, marking and design.

Program Requirements
Semester 1
12 Total Credits

- Complete all of the following
  - Complete the following:
    - ARTC1302 - Digital Imaging I (3)
    - GRPH1359 - Vector Graphics for Production (3)
    - ARTC1313 - Digital Publishing I (3)
  - Complete at least 1 of the following:
    - ENGL1301 - Composition I (3)
    - ENGL2311 - Technical & Business Writing (3)

Semester 2
12 Total Credits

- Complete the following:
  - ARTC1317 - Design Communication I (3)
  - ARTC1327 - Typography (3)
  - ARTC2305 - Digital Imaging II (3)
  - ACGM3MNS - Gen Ed Math/Natural Science Elective (3)

Semester 3
12 Total Credits

- Complete the following:
  - ARTC2347 - Design Communication II (3)
  - PHTC1311 - Fundamentals of Photography (3)
  - ARTV1351 - Digital Video (3)
  - ACGM3HFA - Gen Ed Humanities/Fine Arts Elective (3)

Semester 4
12 Total Credits

- Complete all of the following
  - Complete the following:
    - ARTV2341 - Advanced Digital Video (3)
    - IMED1341 - Interface Design (3)
    - MRKG2349 - Advertising and Sales Promotion (3)
  - Complete at least 3 credits from the following:
    - MRKG2349 - Advertising and Sales Promotion (3)
    - ARTV1345 - 3-D Modeling and Rendering I (3)

Semester 5
12 Total Credits

- Complete the following:
  - ARTC2335 - Portfolio Development for Graphic Design (3)
  - IMED2359 - Interactive Web Elements (3)
  - IMED1345 - Interactive Digital Media I (3)
  - ACGM3GED - Gen Ed Elective (3)

Degree Plan Credits 60

Capstone
- Complete the following:
  - ARTC2335 - Portfolio Development for Graphic Design (3)
Pre/Corequisites

- ARTC 2305 Prerequisite(s): ARTC 1302
- ARTC 2347 Prerequisite(s): ARTC 1317
- PHTC 1311, MRKG 2349, ARTV 1345, Prerequisite(s): ARTC 1302
- ARTV 2341 Prerequisite(s): ARTV 1351
- IMED 2359, IMED 1345 Prerequisite(s): IMED 1341

Elective Options

- Complete at least 1 courses from the following:
  Math/Natural Science Elective
  - MATH1314 - College Algebra (3 SCH version)(3)
  - MATH1316 - Plane Trigonometry (3)
  - MATH1325 - Calculus for Business & Social Sciences (3)
  - MATH1332 - Contemporary Mathematics (Quantitative Reasoning)(3)

Education & Training

Description
The Education and Training program is designed to prepare students to meet the demands of an increasingly competitive and intellectually challenging future through educational and personal growth, practical skills development, academic courses and career preparation. The program is composed of educational classes with technical labs for hands-on learning and allows students to gain specialized training in one of the four developed educational areas of emphasis listed below: Bilingual Education, Early Childhood Education, Special Education, or General Education (emphasis in Reading and Writing). Students will require two courses from the correspondent Area of Emphasis as listed below. The students will create and develop instructional materials ready to be used in the school setting utilizing a variety of state-of-the-art media and technical resources. For quicker entry into the industry, a certificate is also available. It requires that the student take one course from their corresponding area of emphasis.

Program Requirements

Semester 1
12 Total Credits

- Complete the following:
  - EDTC1301 - Educational Systems (3)
  - EDTC1341 - Instructional Technology and Computer Applications (3)
  - ENGL1301 - Composition I (3)
  - HIST1301 - United States History I (3)

Semester 2
12 Total Credits

- Complete the following:
  - CDEC1359 - Children with Special Needs (3)
  - EDTC2311 - Instructional Practices and Effective Learning Environments (3)
  - HIST1302 - United States History II (3)
  - SPCH1315 - Public Speaking (3)

Semester 3
15 Total Credits

- Complete the following:
  - EDTC1307 - Introduction to Teaching Reading (3)
  - TEC1354 - Child Growth & Development (3)
  - GOVT2305 - Federal Government (Federal constitution & topics) (3)
  - MATH1314 - College Algebra (3 SCH version) (3)
  - WECM3WEC - Area of Emphasis Course (3)

Semester 4
12 Total Credits

- Complete the following:
  - EDTC1374 - Teaching Math & Science in the Elementary School (3)
  - EDTC2317 - Guiding Student Behavior (3)
  - ACGM3HFA - Gen Ed Humanities/Fine Arts Elective (3)
  - WECM3WEC - Area of Emphasis Course (3)

Semester 5
9 Total Credits

- Complete the following:
  - EDTC1364 - Practicum (or Field Experience) - Teacher Assistant/Aide (3)
  - CDEC1318 - Wellness of the Young Child (3)
  - ACGM3SBS - Gen Ed Social/Behavioral Science Elective (3)

Grand Total Credits: **60**

Capstone

- Complete the following:
  - EDTC1364 - Practicum (or Field Experience) - Teacher Assistant/Aide (3)
Elective Options

- Select 1 Area of Emphasis group. Complete 6 credits for that group.
- Area of Emphasis in Bilingual Education (2 courses required)
  - Complete the following:
    - EDTC1321 - Bilingual Education (3)
    - EDTC1325 - Multicultural Education (3)
- Area of Emphasis in Early Childhood Education (2 courses required)
  - Complete the following:
    - CDEC1321 - The Infant and Toddler (3)
    - CDEC1356 - Emergent Literacy for Early Childhood (3)
- Area of Emphasis in General Education (2 courses required)
  - Complete the following:
    - EDTC1373 - Writing Problems (3)
    - EDTC2305 - Reading Problems (3)
- Area of Emphasis in Special Needs Education (2 courses required)
  - Complete the following:
    - CDEC2340 - Instructional Techniques for Children with Special Needs (3)
    - EDTC1375 - Issues in Special Needs Education (3)

Complete a course from each of the following elective groups

- Complete at least 1 courses from the following:
  - Social/Behavioral Science Elective
    - HIST1301 - United States History I (3)
    - HIST1302 - United States History II (3)
    - HIST2312 - Western Civilization II (3)
    - DHYG1301 - Orofacial Anatomy, Histology & Embryology (3)
    - GOVT2305 - Federal Government (Federal constitution & topics) (3)
    - GOVT2306 - Texas Government (Texas constitution & topics) (3)
    - ANTH2346 - General Anthropology
    - ECON1301 - Introduction to Economics (3)
    - ECON2301 - Principles of Macroeconomics (3)

Electrical Construction

Description

The Electrical Construction certificate program offers specific coursework in residential and commercial wiring systems. The program also provides training opportunities to aid individuals interested in earning licenses specific to the electrical field. The program requires extensive hands-on work with electrical materials and equipment. Curriculum teaches students blueprint reading, technical calculations, electrical safety and theory, residential and commercial wiring, and more. Most graduates will begin their careers as assistants to experienced electricians, installing electrical wiring in new construction and servicing wiring in existing structures.

Program Requirements
Semester 1
15 Total Credits

- Complete all of the following
  - Complete at least 3 credits from the following:
    - CNBT1300 - Residential and Light Commercial Blueprint Reading (3)
    - DFTG1313 - Drafting for Specific Occupations (3)
  - Complete the following:
    - ELPT1329 - Residential Wiring (3)
    - ITSC1309 - Integrated Software Applications I (3)
    - TECM1303 - Technical Calculations (3)
    - SOLR1371 - Introduction to Solar and Alternative Energy Technologies (3)

Semester 2
15 Total Credits

- Complete the following:
  - ELPT1311 - Basic Electrical Theory (3)
  - ELPT1325 - National Electrical Code I (3)
  - ELPT1345 - Commercial Wiring (3)
  - OSHT1305 - OSHA Regulations - Construction Industry (3)
  - ELPT1357 - Industrial Wiring (3)

Semester 3
6 Total Credits

- Complete the following:
  - ELPT1681 - Cooperative Education - Electrical and Power Transmission Installation/ Installer, General (6)

Degree Plan Credits 36

Capstone

- Complete the following:
  - ELPT1681 - Cooperative Education - Electrical and Power Transmission Installation/ Installer, General (6)

Pre/Corequisites

- ELPT 1357 Prerequisite(s): ELPT 1329 or ELPT 1345

Electrical Lineworker & Management Technology

Description
Lineworker occupations are among the most physically demanding but highest paying careers in the nation, and Texas employs more than any other state. In TSTC’s Electrical Lineworker program, you will perform practical exercises on the safe use and operation of lineworker climbing gear, equipment and tools in an authentic utility training environment. To earn high wages in this exciting career, you must be able to work at elevated heights for long hours in all weather conditions. This industry is for those who want to reap the rewarding benefits of a high-demand career. Please note: Candidates for this program will be required upon entry to provide a valid Class C driver's license.

Electrical Power and Controls

Description
The Electrical Power & Controls program offers instruction in engineering and design; installation and calibration; maintenance, testing and troubleshooting; substation technician; and electric utility design. Through intensive classroom instruction and hands-on experience in high-tech labs, students gain a solid foundation in basic electrical concepts, motors and control applications, and then advance to electronics, measurement and calibration, electrical codes and automated control systems. Knowledge is developed through extensive work with equipment, including DC and AC motors, programmable logic controllers (PLCs), speed-drive systems, and computer software packages for engineering, designing and drafting.

Electromechanical Technology

Description
The Electromechanical Technology program is a merging of various systems and controls both mechanical and electrical. The program combines computers, control systems, electrical systems and mechanical systems, and gives students the opportunity to learn the principles and skills required to enter the industry. In the lab setting, students receive hands-on experience with top-notch equipment and systems. They learn to troubleshoot and repair industrial equipment and study the skills, tips and tricks to make them successful in this exciting field.
Electromechanical Technology - Electromechanical Technician CER2

Locations
Sweetwater

Program Requirements

Semester 1
9 Total Credits

◆ Complete all of the following
  ◆ Complete the following:
    ■ CETT1303 - DC Circuits (3)
    ■ ELMT1374 - Introduction to Electromechanical System (3)
  ◆ Complete at least 3 credits from the following:
    ■ TECM1303 - Technical Calculations (3)
    ■ MATH1314 - College Algebra (3 SCH version) (3)

Semester 2
12 Total Credits

◆ Complete the following:
  ◆ CETT1305 - AC Circuits (3)
  ◆ CETT1325 - Digital Fundamentals (3)
  ◆ ELMT1305 - Basic Fluid Power (3)
  ◆ ELMT1373 - Pumps and Compressors Control (3)

Semester 3
12 Total Credits

◆ Complete the following:
  ◆ ELMT1301 - Programmable Logic Controllers (3)
  ◆ CETT1329 - Solid State Devices (3)
  ◆ ENER2325 - SCADA and Networking (3)
  ◆ INMT1317 - Industrial Automation (3)

Semester 4
11 Total Credits

◆ Complete the following:
  ◆ ELMT2372 - Process Control Systems (3)
  ◆ ELMT2239 - Advanced Programmable Logic Controllers (2)
  ◆ ELMT2341 - Electromechanical Systems (3)
  ◆ ELMT2371 - Industrial Control Power Devic (3)

Degree Plan Credits 44

Capstone

◆ Complete the following:
  ◆ ELMT2341 - Electromechanical Systems (3)

Pre/Corequisites

◆ CETT 1305 Prerequisite(s): CETT 1303 or IEIR 1302 (Prerequisite or Corequisite)
◆ CETT 1325 Prerequisite(s): CETT 1302, CETT 1303, IEIR 1302, IEIR 1304, IEIR 1371 or CETT 1305 (Pre or Co)
◆ ELMT 1301 Prerequisite(s): CETT 1325
◆ CETT 1329 Prerequisite(s): CETT 1305, IEIR 1371 or IEIR 1304
◆ ENER 2325, INMT 1317 Prerequisite(s): CETT 1303, CETT 1305
◆ ELMT 2372 Prerequisite(s): ELMT 1373
◆ ELMT 2239 Prerequisite(s): ELMT 1301
◆ ELMT 2371 Prerequisite(s): CETT 1305
Locations
Sweetwater

Program Requirements
Semester 1
12 Total Credits

- Complete the following:
  - CETT1303 - DC Circuits (3)
  - ELMT1374 - Introduction to Electromechanical System (3)
  - ACGM3HFA - Gen Ed Humanities/Fine Arts Elective (3)
  - ACGM3MNS - Gen Ed Math/Natural Science Elective (3)

Semester 2
15 Total Credits

- Complete the following:
  - CETT1305 - AC Circuits (3)
  - CETT1325 - Digital Fundamentals (3)
  - ELMT1305 - Basic Fluid Power (3)
  - ELMT1373 - Pumps and Compressors Control (3)
  - ACGM3SB5 - Gen Ed Social/Behavioral Science Elective (3)

Semester 3
15 Total Credits

- Complete all of the following
  - Complete the following:
    - CETT1329 - Solid State Devices (3)
    - ELMT1301 - Programmable Logic Controllers (3)
    - ENER2325 - SCADA and Networking (3)
    - INMT1317 - Industrial Automation (3)
  - Complete at least 3 credits from the following:
    - ENGL1301 - Composition I (3)
    - ENGL2311 - Technical & Business Writing (3)

Semester 4
14 Total Credits

- Complete the following:
  - ELMT2239 - Advanced Programmable Logic Controllers (2)
  - ELMT2372 - Process Control Systems (3)
  - ELMT2341 - Electromechanical Systems (3)
  - ELMT2371 - Industrial Control Power Device (3)
  - ACGM3GED - Gen Ed Elective (3)

Semester 5
4 Total Credits

- Complete at least 4 credits from the following:
  - ELMT2480 - Cooperative Education - Electromechanical Technology/Electromechanical Engineering Technology (4)
  - ELMT1491 - Special Topics in Electromechanical Technology/Technician (4)

Degree Plan Credits 60

Capstone

- Complete 1 of the following
  - Complete the following:
    - ELMT2480 - Cooperative Education - Electromechanical Technology/Electromechanical Engineering Technology (4)
  - Complete the following:
    - ELMT1491 - Special Topics in Electromechanical Technology/Technician (4)
Pre/Corequisites

- CETT 1305 Prerequisite(s): CETT 1303, IEIR 1302, IEIR 1304, IEIR 1371 or CETT 1305 (Prerequisite or Corequisite)
- CETT 1325 Prerequisite(s): CETT 1303, IEIR 1302
- ELMT 1373 Prerequisite(s): CETT 1303
- CETT 1329 Prerequisite(s): CETT 1305, IEIR 1371 or IEIR 1304
- ELMT 1301, ENER 2325 Prerequisite(s): CETT 1325
- INMT 1317 Prerequisite(s): CETT 1303, CETT 1305
- ELMT 2239 Prerequisite(s): ELMT 1301
- ELMT 2372 Prerequisite(s): ELMT 1373
- ELMT 2341 Prerequisite(s): ELMT 1374
- ELMT 2371 Prerequisite(s): CETT 1305
- ELMT 2480, ELMT 1491 Prerequisite(s): ELMT 2239

Elective Options

- Complete at least 1 courses from the following:
  Humanities/Fine Arts Elective
  - HUMA1301 - Introduction to Humanities I
  - HUMA2319 - American Minority Studies (3)
  - HUMA2323 - World Cultures
  - PHIL1301 - Introduction to Philosophy
  - PHIL1304 - Introduction to World Religions
  - PHIL2303 - Introduction to Formal Logic
  - PHIL2306 - Introduction to Ethics
  - ARTS1301 - Art Appreciation
  - ARTS2326 - Sculpture I (3)
  - ARTS2326 - Sculpture I (3)
  - MUSI1306 - Music Appreciation

- Complete at least 1 courses from the following:
  Math/Natural Science Elective
  - MATH1314 - College Algebra (3 SCH version)(3)
  - MATH1316 - Plane Trigonometry(3)
  - MATH1325 - Calculus for Business & Social Sciences(3)
  - MATH1332 - Contemporary Mathematics (Quantitative Reasoning)(3)
  - MATH1342 - Elementary Statistical Methods(3)
  - MATH1350 - Math - Teachers I Fundamentals of Math I(3)
  - MATH1351 - Fundamentals of Mathematics II(3)
  - MATH2312 - Pre-Calculus Math (3 SCH version)(3)
  - MATH2313 - Calculus I(3)
  - MATH2318 - Linear Algebra (3)
  - MATH2320 - Differential Equations (3 SCH version)(3)
  - MATH2342 - Elementary Statistical Methods(3)

**Complete at least 1 courses from the following:**

**Social/Behavioral Science Elective**

- HIST1301 - United States History I (3)
- HIST1302 - United States History II (3)
- HIST2312 - Western Civilization II (3)
- DHYG1301 - Orofacial Anatomy, Histology & Embryology (3)
- GOVT2305 - Federal Government (Federal constitution & topics) (3)
- GOVT2306 - Texas Government (Texas constitution & topics) (3)
- ANTH2346 - General Anthropology
- ECON1301 - Introduction to Economics (3)
- ECON2301 - Principles of Macroeconomics (3)
- ECON2302 - Principles of Microeconomics (3)
- GEOG1302 - Human Geography
- GEOG1303 - World Regional Geography
- PSYC1100 - Learning Framework (1)
- PSYC2301 - General Psychology (3)
- PSYC2314 - Lifespan Growth & Development (3)

**Complete 1 General Education Elective as recommended by program**
Emergency Medical Services

Description
In TSTC's Emergency Medical Services program, you'll learn from experienced, certified instructors in an environment that combines hands-on labs with online lectures. You'll gain skills in medical procedures required to assess and treat victims at the scene and en route to the hospital, and you'll get to put your abilities to the test in a clinical learning environment to gain extensive, on-the-job experience. As a program, our goal is to prepare competent entry-level EMT's and paramedics in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains, with exit points at the Advanced Emergency Medical Technician, Emergency Medical Technician (Basic), and/or First Responder levels.

Students scoring less than 70 percent as a final course average in EMS will not progress to the next section. EMT students who fail EMSP 1501 will also fail EMSP 2237 and EMSP 1261, and would be required to repeat those courses in FULL. Should a student fail an advanced level course, the student will be dismissed and may be given the opportunity to reapply and repeat the program in FULL. Paramedic students are required to pass A&P (BIOL 2404) or equivalent to obtain a course completion. The 70 percent passing rate in the TSTC EMS Program is based on the preparation of our students to pass the National Registry Exam. The National Registry Exam is required to certify as a Registered EMT or Paramedic.

Students participating in clinical and field internships are required to purchase accident, needlestick and malpractice insurance.

Engineering

Description

The Engineering program supports and enhances the College's technical education mission by providing Texas industry with employees who perform well at the entry level by virtue of their competence in math and problem-solving techniques using engineering principles. The Engineering program prepares graduates for advancement in the workplace through superior science and mathematics-based problem-solving skills, and facilitates progress toward successful completion of further educational goals and/or lifelong learning experiences.

**Engineering Graphics & Design Technology**

**Description**

Demand for drafters varies by specialization, and nothing in the industry is more exciting than mechanical/electronic drafting. No longer are the pen and pencil the standard for drafters. Today in this field, student drafters are taught Computer-Aided Drafting (CAD) and can produce industrial drawings utilized in industry to produce all types of products. All students receive instruction in both two- and three-dimensional CAD systems. Students focus on drafting applications in mechanical, electro-mechanical, process piping, printed circuit board design, and many other areas of manufacturing and electronic-related drafting. Students will be exposed to the hottest newest drawing software on the market including AutoCad, Solid Works and Inventor.

Program Requirements
Semester 1
12 Total Credits

- Complete all of the following
  - Complete the following:
    - DFTG1309 - Basic Computer-Aided Drafting (3)
    - DFTG1325 - Blueprint Reading and Sketching (3)
    - DFTG1345 - Parametric Modeling and Design (3)
  - Complete at least 3 credits from the following:
    - ENGR1304 - Engineering Graphics I (3 Sch version) (3)
    - MATH1314 - College Algebra (3 SCH version) (3)

Semester 2
12 Total Credits

- Complete all of the following
  - Complete the following:
    - DFTG1329 - Electro-Mechanical Drafting (3)
    - DFTG1333 - Mechanical Drafting (3)
    - DFTG2323 - Pipe Drafting (3)
  - Complete at least 3 credits from the following:
    - ENGL1301 - Composition I (3)
    - ENGL2311 - Technical & Business Writing (3)

Semester 3
12 Total Credits

- Complete the following:
  - DFTG1358 - Electrical/Electronics Drafting (3)
  - DFTG2302 - Machine Drafting (3)
  - DFTG2357 - Advanced Technologies in Pipe Design and Drafting (3)
  - ACGM35B5 - Gen Ed Social/Behavioral Science Elective (3)

Semester 4
12 Total Credits

- Complete the following:
  - DFTG2335 - Advanced Technologies in Mechanical Design and Drafting (3)
  - DFTG2340 - Solid Modeling/Design (3)
  - DFTG2350 - Geometric Dimensioning and Tolerancing (3)
  - ACGM35PH - Gen Ed Speech Elective (3)

Semester 5
12 Total Credits

- Complete all of the following
  - Complete the following:
    - DFTG2306 - Machine Design (3)
  - Complete at least 3 credits from the following:
    - DFTG1395 - Special Topics in Mechanical Drafting and Mechanical Drafting Cad/Cadd (3)
    - DFTG2386 - Internship - Drafting and Design Technology/Technician, General (3)
  - Complete the following:
    - DFTG2332 - Advanced Computer-Aided Drafting (3)
    - ACGM3HFA - Gen Ed Humanities/Fine Arts Elective (3)

Degree Plan Credits 60

Capstone

- Complete the following:
  - DFTG2306 - Machine Design (3)
Pre/Corequisites

- ENGR 1304 Prerequisite(s): MATH 1314
- DFTG 1329, DFTG 1333, DFTG 2323, DFTG 2357, DFTG 2386 Prerequisite(s): DFTG 1309
- DFTG 1358 Prerequisite(s): DFTG 1329
- DFTG 2302 Prerequisite(s): DFTG 1333
- DFTG 2335, DFTG 2340, DFTG 2350 Prerequisite(s): DFTG 2302

Elective Options

- Complete at least 1 courses from the following:
  Social/Behavioral Science Elective
  - HIST1301 - United States History I (3)
  - HIST1302 - United States History II (3)
  - HIST2312 - Western Civilization II (3)
  - DHYG1301 - Orofacial Anatomy, Histology & Embryology (3)
  - GOVT2305 - Federal Government (Federal constitution & topics) (3)
  - GOVT2306 - Texas Government (Texas constitution & topics) (3)
  - ANTH2346 - General Anthropology
  - ECON1301 - Introduction to Economics (3)
  - ECON2301 - Principles of Macroeconomics (3)
  - ECON2302 - Principles of Microeconomics (3)
  - GEOG1302 - Human Geography
  - GEOG1303 - World Regional Geography
  - PSYC1100 - Learning Framework (1)
  - PSYC2301 - General Psychology (3)
  - PSYC2314 - Lifespan Growth & Development (3)

- Complete at least 1 courses from the following:
  Speech Elective
  - SPCH1311 - Introduction to Speech Communication
  - SPCH1311 - Introduction to Speech Communication
  - SPCH1311 - Introduction to Speech Communication
  - SPCH1311 - Introduction to Speech Communication

- Complete at least 1 courses from the following:
  Humanities/Fine Arts Elective
  - HUMA1301 - Introduction to Humanities I
  - HUMA2319 - American Minority Studies (3)
  - HUMA2323 - World Cultures
  - PHIL1301 - Introduction to Philosophy
  - PHIL1304 - Introduction to World Religions
  - PHIL2303 - Introduction to Formal Logic
  - PHIL2306 - Introduction to Ethics
  - ARTS1301 - Art Appreciation
  - ARTS2326 - Sculpture I (3)
  - ARTS2326 - Sculpture I (3)
  - MUSI1306 - Music Appreciation

- DFTG 2335, DFTG 2340, DFTG 2350 Prerequisite(s): DFTG 2302
Health Information Technology

Description
In the Health Information Technology program, students learn skills in collecting, analyzing and maintaining health data, as well as billing and coding. Physicians and other health care professionals need accurate records to treat their patients, and professionals in the health information technology industry make that possible. Health information technology careers are found in a variety of settings, including health care facilities, consulting firms, government agencies, insurance companies, health care IS/IT vendors and pharmaceutical companies, as well as many other environments. For quicker entry into the industry, a certificate program is available in Medical Office Specialist.

Program Requirements

Semester 1
12 Total Credits

- Complete all of the following
  - Complete the following:
    - HITT1204 - IT for Health Professions (2)
    - HITT1301 - Health Data Content and Structure (3)
    - HITT1305 - Medical Terminology I (3)
  - Complete at least 4 credits from the following:
    - BIOL2401 - Anatomy & Physiology I (lecture + lab) (4)
    - BIOL2301 - Anatomy & Physiology I (lecture) (3)
    - BIOL2101 - Anatomy & Physiology I (lab) (1)

Semester 2
12 Total Credits

- Complete all of the following
  - Complete the following:
    - HITT1253 - Legal and Ethical Aspects of Health Information (2)
    - HITT1341 - Coding and Classification Systems (3)
    - HITT1345 - Health Care Delivery Systems (3)
  - Complete at least 4 credits from the following:
    - BIOL2402 - Anatomy & Physiology II (lecture + lab) (4)
    - BIOL2302 - Anatomy & Physiology II (lecture) (3)
    - BIOL2102 - Anatomy & Physiology II (lab) (1)

Semester 3
12 Total Credits

- Complete the following:
  - HITT1311 - Health Information Systems (3)
  - HITT1342 - Ambulatory Coding (3)
  - MDCA1302 - Human Disease/Pathophysiology (3)
  - ACGM3HFA - Gen Ed Humanities/Fine Arts Elective (3)

Semester 4
13 Total Credits

- Complete the following:
  - HITT2335 - Coding and Reimbursement Methodologies (3)
  - HITT2339 - Health Information Organization and Supervision (3)
  - HITT2443 - Quality Assessment and Performance Improvement (4)
  - ACGM3SBS - Gen Ed Social/Behavioral Science Elective (3)

Semester 5
11 Total Credits

- Complete all of the following
  - Complete the following:
    - HITT2249 - RHIT Competency Review (2)
    - HITT2346 - Advanced Medical Coding (3)
    - HITT2360 - Clinical - Health Information/Medical Records Technology/Technician (3)
  - Complete at least 3 credits from the following:
    - ENGL1301 - Composition I (3)
    - ENGL2311 - Technical & Business Writing (3)

Degree Plan Credits 60

Capstone
- Complete the following:
  - HITT2366 - Practicum (or Field Experience) - Health Information/Medical Records Technology/Technician (3)
Pre/Corequisites

- HITT 2335 Prerequisite(s): HITT 1341
- HITT 2346 Prerequisite(s): HITT 1341, HITT 1342

Elective Options

- Complete at least 1 courses from the following: Humanities/Fine Arts Elective
  - HUMA1301 - Introduction to Humanities I
  - HUMA2319 - American Minority Studies (3)
  - HUMA2323 - World Cultures
  - PHIL1301 - Introduction to Philosophy
  - PHIL1304 - Introduction to World Religions
  - PHIL2303 - Introduction to Formal Logic
  - PHIL2306 - Introduction to Ethics
  - ARTS1301 - Art Appreciation
  - ARTS2326 - Sculpture I (3)
  - ARTS2326 - Sculpture I (3)
  - MUSI1306 - Music Appreciation

- Complete at least 1 courses from the following: Social/Behavioral Science Elective
  - HIST1301 - United States History I (3)
  - HIST1302 - United States History II (3)
  - HIST2312 - Western Civilization II (3)

Heating, Ventilation, & Air Conditioning Technology

Description
TSTC offers hands-on training to teach students of Heating, Ventilation & Air Conditioning Technology the skills needed to enter the industry. The program is backed by experienced faculty, many of whom are active members of professional organizations such as North American Technician Excellence and Air Conditioning Contractors of America, and is guided by an advisory board of current industry members, ensuring that students get the latest training available. The laboratory facilities at TSTC include high efficiency commercial and residential heating and air conditioning equipment, energy efficient heat pumps, commercial refrigeration equipment, direct digital and pneumatic controls, and a 200-ton chilled water system.
Heating, Ventilation, & Air Conditioning Technology - Basic Heating Ventilation Air Conditioning (HVAC) OSA

Locations
East Williamson County

Program Requirements
Semester 1
9 Total Credits

◦ Complete the following:
  ◦ HART1301 - Basic Electricity for HVAC (3)
  ◦ HART1307 - Refrigeration Principles (3)
  ◦ HART1310 - HVAC Shop Practices and Tools (3)

Grand Total Credits: 9

Heating, Ventilation, & Air Conditioning Technology - HVAC Residential Service Technician CER1

Locations
Waco
East Williamson County
Harlingen
Fort Bend County
North Texas

Program Requirements
Semester 1
15 Total Credits

◦ Complete the following:
  ◦ HART1301 - Basic Electricity for HVAC (3)
  ◦ HART1307 - Refrigeration Principles (3)
  ◦ HART1310 - HVAC Shop Practices and Tools (3)
  ◦ HART1345 - Gas and Electric Heating (3)
  ◦ HART1303 - Air Conditioning Control Principles (3)

Semester 2
12 Total Credits

◦ Complete the following:
  ◦ HART1341 - Residential Air Conditioning (3)
  ◦ HART2338 - Air Conditioning Installation and Startup (3)
  ◦ HART2336 - Air Conditioning Troubleshooting (3)
  ◦ HART2349 - Heat Pumps (3)

Grand Total Credits: 27

Capstone

◦ Complete the following:
  ◦ HART2336 - Air Conditioning Troubleshooting (3)

Pre/Corequisites

◦ HART 1345, HART 1303 Prerequisite(s): HART 1301 (Prerequisite or Corequisite)
◦ HART 1341 Prerequisite(s): HART 1301, HART 1307
◦ HART 2336 Prerequisite(s): HART 1303, HART 1345, HART 1341 (Prerequisite or Corequisite)
◦ HART 2349 Prerequisite(s): HART 1303, HART 1341 (Prerequisite or Corequisite)
Heating, Ventilation, & Air Conditioning Technology - HVAC Technician CER1

12 Total Credits

- Complete the following:
  - HART1301 - Basic Electricity for HVAC (3)
  - HART1307 - Refrigeration Principles (3)
  - HART1310 - HVAC Shop Practices and Tools (3)
  - HART1345 - Gas and Electric Heating (3)

Semester 2
12 Total Credits

- Complete the following:
  - HART1303 - Air Conditioning Control Principles (3)
  - HART1341 - Residential Air Conditioning (3)
  - HART2342 - Commercial Refrigeration (3)
  - ACGM3MNS - Gen Ed Math/Natural Science Elective (3)

Semester 3
12 Total Credits

- Complete the following:
  - HART2331 - Advanced Electricity for HVAC (3)
  - HART2336 - Air Conditioning Troubleshooting (3)
  - HART2341 - Commercial Air Conditioning (3)
  - HART2349 - Heat Pumps (3)

Semester 4
12 Total Credits

- Complete the following:
  - HART2343 - Industrial Air Conditioning (3)
  - HART2345 - Residential Air Conditioning Systems Design (3)
  - ENGL1301 - Composition I (3)
  - ACGM3SBS - Gen Ed Social/Behavioral Science Elective (3)

Semester 5
12 Total Credits

- Complete all of the following
  - Complete at least 3 credits from the following:
    - HART2334 - Advanced Air Conditioning Controls (3)
    - HART2350 - HVAC Zone Controls (3)
  - Complete at least 3 credits from the following:
    - HART2358 - Testing, Adjusting, and Balancing HVAC Systems (3)
    - HART2357 - Specialized Commercial Refrigeration (3)
  - Complete the following:
    - ACGM3HFA - Gen Ed Humanities/Fine Arts Elective (3)
    - ACGM3GED - Gen Ed Elective (3)

Degree Plan Credits 60

Capstone

- Complete the following:
  - HART2345 - Residential Air Conditioning Systems Design (3)

Elective Options
Complete at least 1 course from the following:
Math/Natural Science Elective
- MATH1314 - College Algebra (3 SCH version)(3)
- MATH1316 - Plane Trigonometry(3)
- MATH1325 - Calculus for Business & Social Sciences(3)
- MATH1332 - Contemporary Mathematics (Quantitative Reasoning)(3)
- MATH1342 - Elementary Statistical Methods(3)
- MATH1350 - Math - Teachers I Fundamentals of Math I(3)
- MATH1351 - Fundamentals of Mathematics II(3)
- MATH2312 - Pre-Calculus Math (3 SCH version)(3)
- MATH2313 - Calculus I(3)
- MATH2318 - Linear Algebra (3)
- MATH2320 - Differential Equations (3 SCH version)(3)
- MATH2342 - Elementary Statistical Methods(3)
- MATH2413 - Calculus I (4 SCH version)(4)
- MATH2414 - Calculus II (4 SCH version)(4)
- MATH2415 - Calculus III (4 SCH version)(4)
- BIOL1106 - Biology for Science Majors Laboratory I (lab)(1)
- BIOL1107 - Biology for Science Majors II Lab(1)
- BIOL1108 - Biology Non-Science Majors Laboratory I(1)
- BIOL1109 - Biology for Non-Science Majors II Lab(1)
- BIOL1113 - General Zoology (lab)(1)
- BIOL1305 - Introductory Chemistry Laboratory I (lab)(1)
- BIOL1307 - Introductory Chemistry Laboratory II(1)
- CHEM1305 - Introductory Chemistry I (lecture)(3)
- CHEM1311 - General Chemistry I (lecture)(3)
- CHEM1312 - General Chemistry II (lecture)(3)
- CHEM1405 - Introductory Chemistry I(4)
- CHEM1406 - Introductory Chemistry I(4)
- CHEM1411 - General Chemistry I(4)
- CHEM1412 - General Chemistry II(4)
- CHEM1414 - General Chemistry II(4)
- CHEM2125 - Organic Chemistry II Lab(1)

Semester 1
12 Total Credits

- Complete the following:
  - HART1301 - Basic Electricity for HVAC (3)
  - HART1307 - Refrigeration Principles (3)
  - HART1310 - HVAC Shop Practices and Tools (3)
  - HART1345 - Gas and Electric Heating (3)

Semester 2
12 Total Credits

- Complete the following:
  - HART1303 - Air Conditioning Control Principles (3)
  - HART1341 - Residential Air Conditioning (3)
  - HART2338 - Air Conditioning Installation and Startup (3)
  - HART2342 - Commercial Refrigeration (3)

Semester 3
12 Total Credits

- Complete the following:
  - HART2331 - Advanced Electricity for HVAC (3)
  - HART2336 - Air Conditioning Troubleshooting (3)
  - HART2341 - Commercial Air Conditioning (3)
  - HART2349 - Heat Pumps (3)

Semester 4
12 Total Credits

- Complete all of the following
  - Complete the following:
    - HART2343 - Industrial Air Conditioning (3)
    - HART2345 - Residential Air Conditioning Systems Design (3)
  - Complete at least 3 credits from the following:
    - HART2334 - Advanced Air Conditioning Controls (3)
    - HART2350 - HVAC Zone Controls (3)
  - Complete at least 3 credits from the following:
    - HART2358 - Testing, Adjusting, and Balancing HVAC Systems (3)
    - HART2357 - Specialized Commercial Refrigeration (3)

Degree Plan Credits 48

Capstone

- Complete the following:
  - HART2345 - Residential Air Conditioning Systems Design (3)

Pre/Corequisites

- HART 1345, HART 1303 Prerequisite(s): HART 1301 (Prerequisite or Corequisite)
- HART 1341 Prerequisite(s): HART 1301, HART 1307
- HART 2342 Prerequisite(s): HART 1307
- HART 2331 Prerequisite(s): HART 1303
- HART 2336 Prerequisite(s): HART 1303, HART 1345, HART 1341 (Prerequisite or Corequisite)
- HART 2341 Prerequisite(s): HART 1303, HART 1341
- HART 2349 Prerequisite(s): HART 1303, HART 1341 (Prerequisite or Corequisite)
- HART 2343, HART 2345, HART 2334, HART 2350, HART 2358, HART 2357 Prerequisite(s): HART 2336
Industrial Systems

Description
The Industrial Systems program is designed by industry experts and employers. The courses in this program are directed at cutting-edge mechanical and electrical operations, providing you with knowledge and skills in hydraulics, pneumatics, pumps and compressors, machinery installation and alignment, motor controls, machine shop, power transmissions and troubleshooting. The classroom learning is supplemented with hands-on training utilizing equipment to provide you with the skills and technical background needed to be successful in most industrial environments. Students can choose a general Industrial Systems track or specialize in Electrical Industrial Systems. For quicker entry into the industry, general and electrical industrial systems certificates are also available.

Industrial Systems - Basic Industrial Systems Electrical OSA

Locations
Marshall

Program Requirements
Semester 1
9 Total Credits

- Complete the following:
  - ELPT1311 - Basic Electrical Theory (3)
  - ELPT1341 - Motor Control (3)
  - ELPT1345 - Commercial Wiring (3)

Grand Total Credits: 9

Capstone
- ELPT 1341 Prerequisite(s): AACT 1371 or ELPT 1311 or CETT 1303 or IEIR 1371 OSA may be exempt from requisite. Consult with dept.

Industrial Systems - Industrial Manufacturing Processes (OSA)

Locations
Waco
East Williamson County
Harlingen
Marshall
North Texas
Fort Bend County

Program Requirements
Semester 1
10 Total Credits

- Complete the following:
  - WLDG1407 - Introduction to Welding Using Multiple Processes (4)
  - DFTG1325 - Blueprint Reading and Sketching (3)
  - MCHN2303 - Fundamentals of Computer Numerical Controlled (CNC) Machine Controls (3)

Grand Total Credits: 10

Industrial Systems - Industrial Systems - Electrical Specialization AAS
Program Requirements

Semester 1
15 Total Credits

- Complete the following:
  - DFTG1325 - Blueprint Reading and Sketching (3)
  - ELPT1311 - Basic Electrical Theory (3)
  - INMT1305 - Introduction to Industrial Maintenance (3)
  - WLDG1391 - Special Topics in Welder/Welding Technologist (3)
  - ACGM3SB5 - Gen Ed Social/Behavioral Science Elective (3)

Semester 2
15 Total Credits

- Complete the following:
  - ELPT1341 - Motor Control (3)
  - HART1356 - EPA Recovery Certification Preparation (3)
  - HYDR1305 - Basic Hydraulics (3)
  - INMT2303 - Pumps, Compressors & Mechanical Drives (3)
  - ACGM3MNS - Gen Ed Math/Natural Science Elective (3)

Semester 3
15 Total Credits

- Complete all of the following
  - Complete the following:
    - ELPT1345 - Commercial Wiring (3)
  - Complete at least 3 credits from the following:
    - ELPT2319 - Programmable Logic Controllers I (3)
    - INMT1371 - Industrial Manufacturing PLC Installation (3)
  - Complete the following:
    - INMT2301 - Machinery Installation (3)
    - RBTC1309 - Pneumatics (3)
    - ENGL1301 - Composition I (3)

Semester 4
15 Total Credits

- Complete the following:
  - ELPT1351 - Electrical Machines (3)
  - ELPT2331 - AC/DC Drives (3)
  - INMT2345 - Industrial Troubleshooting (3)
  - ACGM3HFA - Gen Ed Humanities/Fine Arts Elective (3)
  - ACGM3GED - Gen Ed Elective (3)

Grand Total Credits: 60

Capstone

- Complete the following:
  - INMT2345 - Industrial Troubleshooting (3)

Pre/Corequisites

- ELPT 1341 Prerequisite(s): AACT 1371 or ELPT 1311 or CETT 1303 or IEIR 1371
- INMT 2303, INMT 2301 Prerequisite(s): INMT 1305
- ELPT 2319, INMT 1371 Prerequisite(s): ELPT 1341 (Prerequisite or Corequisite)
- RBTC 1309 Prerequisite(s): HYDR 1305
- ELPT 1351, INMT 2345 Prerequisite(s): ELPT 1341

Elective Options

- Complete at least 1 courses from the following:
  - Social/Behavioral Science Elective
Complete at least 1 courses from the following:
Math/Natural Science Elective
- MATH1314 - College Algebra (3 SCH version)(3)
- MATH1316 - Plane Trigonometry(3)
- MATH1325 - Calculus for Business & Social Sciences(3)
- MATH1332 - Contemporary Mathematics (Quantitative Reasoning)(3)
- MATH1342 - Elementary Statistical Methods(3)
- MATH1350 - Math - Teachers I Fundamentals of Math I(3)
- MATH1351 - Fundamentals of Mathematics II(3)
- MATH2312 - Pre-Calculus Math (3 SCH version)(3)
- MATH2313 - Calculus I(3)
- MATH2318 - Linear Algebra (3)
- MATH2320 - Differential Equations (3 SCH version)(3)
- MATH2342 - Elementary Statistical Methods(3)
- MATH2413 - Calculus I (4 SCH version)(4)
- MATH2414 - Calculus II (4 SCH version)(4)
- MATH2415 - Calculus III (4 SCH version)(4)
- BIOL1106 - Biology for Science Majors Laboratory I (lab)(1)
- BIOL1107 - Biology for Science Majors II Lab(1)
- BIOL1108 - Biology Non-Science Majors Laboratory I(1)
- BIOL1109 - Biology for Non-Science Majors II Lab(1)
- BIOL1113 - General Zoology (lab)(1)
- BIOL1306 - Biology for Science Majors I (lecture)(3)
- BIOL1307 - Biology for Science Majors II(3)
- BIOL1308 - Biology for Non-Science Majors I(3)
- BIOL1307 - Biology for Science Majors II(3)
- BIOL1313 - General Zoology (lecture)(3)
- BIOL1322 - Nutrition & Diet Therapy(3)
- BIOL2101 - Anatomy & Physiology I (lab)(1)
- BIOL2102 - Anatomy & Physiology II (lab)(1)
- BIOL2116 - Genetics (lab)(1)
- BIOL2120 - Microbiology for Non-Science Majors Laboratory (lab)(1)
- BIOL2121 - Microbiology for Science Majors Lab(1)
- BIOL2301 - Anatomy & Physiology I (lecture)(3)
- BIOL2302 - Anatomy & Physiology II (lecture)(3)
- BIOL2316 - Genetics (lecture)(3)
- BIOL2320 - Microbiology for Non-Science Majors (lecture)(3)
- BIOL2321 - Microbiology for Science Majors(3)
- BIOL2401 - Anatomy & Physiology I (lecture + lab)(4)
- BIOL2402 - Anatomy & Physiology II (lecture + lab)(4)
- BIOL2404 - Anatomy & Physiology (specialized, Single-Semester Course, Lec + Lab)(4)
- BIOL2406 - Environmental Biology (4)
- BIOL2416 - Genetics (4)
- BIOL2420 - Microbiology for Non-Science Majors (lecture + lab)(4)
- CHEM1105 - Introductory Chemistry Laboratory I (lab)(1)
- CHEM1107 - Introductory Chemistry Laboratory II(1)
- CHEM1107 - Introductory Chemistry Laboratory II(1)
- CHEM1112 - General Chemistry II (lab)(1)
- CHEM1305 - Introductory Chemistry I (lecture)(3)
- CHEM1307 - Introductory Chemistry II
- CHEM1311 - General Chemistry I (lecture)(3)
- CHEM1312 - General Chemistry II (lecture)(3)
- CHEM1405 - Introductory Chemistry I(4)
Complete at least 1 courses from the following:

Humanities/Fine Arts Elective
- HUMA1301 - Introduction to Humanities I
- HUMA2319 - American Minority Studies (3)
- HUMA2323 - World Cultures
- PHIL1301 - Introduction to Philosophy
- PHIL1304 - Introduction to World Religions
- PHIL2303 - Introduction to Formal Logic
- PHIL2306 - Introduction to Ethics
- ARTS1301 - Art Appreciation
- ARTS2326 - Sculpture I (3)
- ARTS2326 - Sculpture I (3)
- MUSI1306 - Music Appreciation

Complete 1 General Education Elective as recommended by program

Program Requirements

Semester 1
15 Total Credits

- Complete the following:
  - DFTG1325 - Blueprint Reading and Sketching (3)
  - ELPT1311 - Basic Electrical Theory (3)
  - HYDR1301 - Rigging and Conveying Systems (3)
  - INMT1305 - Introduction to Industrial Maintenance (3)
  - ACGM35B5 - Gen Ed Social/Behavioral Science Elective (3)

Semester 2
15 Total Credits

- Complete the following:
  - PFPB2308 - Piping Standards and Materials (3)
  - ELPT1341 - Motor Control (3)
  - HYDR1305 - Basic Hydraulics (3)
  - INMT2303 - Pumps, Compressors & Mechanical Drives (3)
  - ACGM3MNS - Gen Ed Math/Natural Science Elective (3)

Semester 3
15 Total Credits

- Complete all of the following
  - Complete at least 3 credits from the following:
    - ELPT2319 - Programmable Logic Controllers I (3)
    - INMT1371 - Industrial Manufacturing PLC Installation (3)
  - Complete the following:
    - INMT1355 - Industrial Power Plant Systems (3)
    - INMT2301 - Machinery Installation (3)
    - RBTC1309 - Pneumatics (3)
    - ACGM3HFA - Gen Ed Humanities/Fine Arts Elective (3)

Semester 4
15 Total Credits

- Complete all of the following
  - Complete the following:
    - ENTC1349 - Reliability and Maintainability (3)
    - INMT2345 - Industrial Troubleshooting (3)
    - CBFM1303 - Boiler Maintenance (3)
  - Complete at least 3 credits from the following:
    - ENGL1301 - Composition I (3)
    - ENGL2311 - Technical & Business Writing (3)
  - Complete the following:
    - ACGM3GED - Gen Ed Elective (3)

Degree Plan Credits 60

Capstone

- Complete the following:
  - INMT2345 - Industrial Troubleshooting (3)

Pre/Corequisites

- ELPT 1341 Prerequisite(s): AACT 1371 or ELPT 1311 or CETT 1303 or IEIR 1371

Industrial Systems - Industrial Systems Mechanic - Electrical CER1

Locations
Marshall
North Texas

Program Requirements
Semester 1
9 Total Credits

◆ Complete the following:
  - DFTG1325 - Blueprint Reading and Sketching (3)
  - ELPT1311 - Basic Electrical Theory (3)
  - INMT1305 - Introduction to Industrial Maintenance (3)

Semester 2
9 Total Credits

◆ Complete the following:
  - ELPT1341 - Motor Control (3)
  - HYDR1305 - Basic Hydraulics (3)
  - INMT2303 - Pumps, Compressors & Mechanical Drives (3)

Semester 3
12 Total Credits

◆ Complete all of the following
  ◆ Complete the following:
    - ELPT1345 - Commercial Wiring (3)
  ◆ Complete at least 3 credits from the following:
    - ELPT2319 - Programmable Logic Controllers I (3)
    - INMT1371 - Industrial Manufacturing PLC Installation (3)
  ◆ Complete the following:
    - INMT2301 - Machinery Installation (3)
    - RBTC1309 - Pneumatics (3)

Degree Plan Credits 30

Capstone

◆ Complete the following:
  - INMT1371 - Industrial Manufacturing PLC Installation (3)

Pre/Corequisites

◆ ELPT 1341 Prerequisite(s): AACT 1371 or ELPT 1311 or CETT 1303 or IEIR 1371
◆ INMT 2303, INMT 2301 Prerequisite(s): INMT 1305
◆ ELPT 2319, INMT 1371 Prerequisite(s): ELPT 1341 (Prerequisite or Corequisite)
◆ RBTC 1309 Prerequisite(s): HYDR 1305

  - INMT2345 - Industrial Troubleshooting (3)

Pre/Corequisites

- ELPT 1341 Prerequisite(s): AACT 1371 or ELPT 1311 or CETT 1303 or IEIR 1371
- INMT 2303, INMT 1355, INMT 2301 Prerequisite(s): INMT 1305
- ELPT 2319, INMT 1371 Prerequisite(s): ELPT 1341 (Prerequisite or Corequisite)
- RBTC 1309 Prerequisite(s): HYDR 1305
- INMT 2345 Prerequisite(s): ELPT 1341

Instrumentation Technology

Description

Instrumentation is the science of measurement and control, including the variables of process control such as pressure, level, temperature and flow rates. These variables are used in all automated processes in power generation, oil refineries, chemical plants, food processing, pharmaceuticals, cosmetics, building environmental control, and more. Instrumentation is a vital part of any production or manufacturing plant, and it is the job of an instrument technician to keep these systems running. TSTC’s Instrumentation Technology graduates are field-ready and qualified to go to work with minimum on-the-job training.
### Instrumentation Technology - Instrumentation Technology AAS

#### Locations
- Waco

#### Program Requirements

##### Semester 1
12 Total Credits

- Complete the following:
  - CETT1303 - DC Circuits (3)
  - DFTG1313 - Drafting for Specific Occupations (3)
  - INTC1305 - Introduction to Instrumentation (3)
  - MATH1316 - Plane Trigonometry (3)

##### Semester 2
12 Total Credits

- Complete all of the following
  - Complete the following:
    - CETT1305 - AC Circuits (3)
  - Complete at least 3 credits from the following:
    - ELPT1341 - Motor Control (3)
    - INTC1357 - AC/DC Motor Control (3)
  - Complete the following:
    - INTC1341 - Principles of Automatic Control (3)
  - Complete at least 3 credits from the following:
    - ENGL1301 - Composition I (3)
    - ENGL2311 - Technical & Business Writing (3)

##### Semester 3
12 Total Credits

- Complete all of the following
  - Complete the following:
    - INTC1355 - Unit Operations (3)
    - INTC2336 - Distributed Control and Programmable Logic (3)
    - RBTC1301 - Programmable Logic Controllers (3)
  - Complete at least 3 credits from the following:
    - PHYS1310 - Elementary Physics (3)
    - PHYS1315 - Physical Science I (lecture) (3)

##### Semester 4
12 Total Credits

- Complete the following:
  - INTC1350 - Digital Measurement and Controls (3)
  - INTC1356 - Instrumentation Calibration (3)
  - INTC2333 - Instrumentation Systems Installation (3)
  - ACGM3HFA - Gen Ed Humanities/Fine Arts Elective (3)

##### Semester 5
12 Total Credits

- Complete the following:
  - INTC1348 - Analytical Instrumentation (3)
  - INTC2310 - Principles of Industrial Measurements II (3)
  - INTC2350 - Fieldbus Process Control Systems (3)
  - ACGM35BS - Gen Ed Social/Behavioral Science Elective (3)

**Degree Plan Credits 60**
Capstone

Complete the following:
- INTC2350 - Fieldbus Process Control Systems (3)

Pre/Corequisites

- INTC 1305 Prerequisite(s): CETT 1303 (Prerequisite or Corequisite)
- CETT 1305 Prerequisite(s): CETT 1303 or IEIR 1302
- ELPT 1341 Prerequisite(s): AACT 1371 or ELPT 1311 or CETT 1303 or IEIR 1371
- INTC 1355 Prerequisite(s): INTC 1341
- INTC 2336 Prerequisite(s): RBTC 1301 (Prerequisite or Corequisite)
- RBTC 1301, INTC 1348 Prerequisite(s): ELPT 1341
- INTC 1350 Prerequisite(s): RBTC 1301
- INTC 1356, INTC 2333, INTC 2310 Prerequisite(s): INTC 1355
- INTC 2350 Prerequisite(s): INTC 2333

Elective Options

Complete at least 1 courses from the following:

Humanities/Fine Arts Elective
- HUMA1301 - Introduction to Humanities I
- HUMA2319 - American Minority Studies (3)
- HUMA2323 - World Cultures
- PHIL1301 - Introduction to Philosophy
- PHIL1304 - Introduction to World Religions
- PHIL2303 - Introduction to Formal Logic
- PHIL2306 - Introduction to Ethics
- ARTS1301 - Art Appreciation
- ARTS2326 - Sculpture I (3)
- ARTS2326 - Sculpture I (3)
- MUSI1306 - Music Appreciation

Complete at least 1 courses from the following:

Social/Behavioral Science Elective
- HIST1301 - United States History I (3)
- HIST1302 - United States History II (3)
- HIST2312 - Western Civilization II (3)
- DHYG1301 - Orofacial Anatomy, Histology & Embryology (3)
- GOVT2305 - Federal Government (Federal constitution & topics) (3)
- GOVT2306 - Texas Government (Texas constitution & topics) (3)
- ANTH2346 - General Anthropology
- ECON1301 - Introduction to Economics (3)
- ECON2301 - Principles of Macroeconomics (3)
- ECON2302 - Principles of Microeconomics (3)
- GEOG1302 - Human Geography
- GEOG1303 - World Regional Geography
- PSYC1100 - Learning Framework (1)
- PSYC2301 - General Psychology (3)
- PSYC2314 - Lifespan Growth & Development (3)

Mathematics

Description

The Mathematics department supports and enhances TSTC's technical education mission. It helps to provide Texas industry with employees who perform well at entry level positions through their competence in mathematics and problem-solving techniques. Students learn the principles of physics and mathematics. They use this knowledge to prepare for advancement in the workplace through the acquisition of science- and mathematics-based problem-solving skills; and facilitates progress toward successful completion of further educational goals and/or lifelong learning experiences.

Mathematics - Mathematics AS
Program Requirements

Semester 1
9 Total Credits

- Complete the following:
  - MATH2312 - Pre-Calculus Math (3 SCH version) (3)
  - ENGL1301 - Composition I (3)
  - ACGM3CAR - Creative Arts Elective (3)

Semester 2
13 Total Credits

- Complete the following:
  - MATH2413 - Calculus I (4 SCH version) (4)
  - ENGL1302 - Composition II (3)
  - GOVT2305 - Federal Government (Federal constitution & topics) (3)
  - ACGM3LPS - Life and Physical Science Elective (3)

Semester 3
13 Total Credits

- Complete the following:
  - MATH2414 - Calculus II (4 SCH version) (4)
  - GOVT2306 - Texas Government (Texas constitution & topics) (3)
  - ACGM3LPS - Life and Physical Science Elective (3)
  - ACGM3LPC - Language, Philosophy and Culture Elective (3)

Semester 4
13 Total Credits

- Complete the following:
  - MATH2415 - Calculus III (4 SCH version) (4)
  - SPCHX3XX - Gen Ed Speech Elective (3)
  - HIST1301 - United States History I (3)
  - ACGM3CAO - Component Area Option (3)

Semester 5
12 Total Credits

- Complete the following:
  - HIST1302 - United States History II (3)
  - MATH2320 - Differential Equations (3 SCH version) (3)
  - MATH3MTH - Gen Ed Mathematics Elective (3)
  - ACGM3SBS - Gen Ed Social/Behavioral Science Elective (3)

Grand Total Credits: 60

Capstone

- Complete the following:
  - MATH2320 - Differential Equations (3 SCH version) (3)

Pre/Corequisites

- MATH 2312 Prerequisite(s): MATH 1314 or MATH 1316
- MATH 2413 Prerequisite(s): MATH 1316 or MATH 2312 or MATH 2412
- ENGL 1302 Prerequisite(s): ENGL 1301
- MATH 2414 Prerequisite(s): MATH 2413
- MATH 2415, MATH 2320 Prerequisite(s): MATH 2414
Elective Options

- Complete at least 1 courses from the following:
  Creative Arts Elective
    - ARTS1301 - Art Appreciation
    - MUSI1306 - Music Appreciation

- Complete at least 2 courses from the following:
  Life & Physical Science Elective
    - BIOL1306 - Biology for Science Majors I (lecture)(3)
    - BIOL1307 - Biology for Science Majors II(3)
    - BIOL1308 - Biology for Non-Science Majors I(3)

- Complete at least 1 courses from the following:
  Language, Philosophy & Culture Elective
    - ENGL2321 - British Literature
    - ENGL2326 - American Literature (single-Semester Course)
    - ENGL2331 - World Literature
    - PHIL1304 - Introduction to World Religions

- Complete at least 1 courses from the following:
  Speech Elective
    - SPCH1311 - Introduction to Speech Communication

- Complete at least 1 courses from the following:
  Component Area Option B (for Academic Core Curriculum)
    - SPCH1311 - Introduction to Speech Communication
    - SPCH1315 - Public Speaking (3)
    - SPCH1318 - Interpersonal Communication
    - SPCH1321 - Business & Professional Communication

- Complete at least 1 courses from the following:
  Math Elective for Math AS
    - MATH1316 - Plane Trigonometry(3)
    - MATH1332 - Contemporary Mathematics (Quantitative Reasoning)(3)
    - MATH1314 - College Algebra (3 SCH version)(3)
    - MATH2318 - Linear Algebra (3)

- Complete at least 1 courses from the following:
  Social/Behavioral Science Elective
    - HIST1301 - United States History I(3)
    - HIST1302 - United States History II(3)
    - HIST2312 - Western Civilization II(3)

    - PSYC2314 - Lifespan Growth & Development(3)

Mechatronics Technology

Description

Because industrial applications are becoming increasingly multidisciplinary, today’s technicians need skills that cross a variety of disciplines. Mechatronics courses combine various disciplines to teach students a holistic approach to developing solutions for engineering applications. Skills found under the Mechatronics Technology umbrella include practical knowledge in the integration of electrical systems, fluid power, electronics, computer controls, programmable logic controllers (PLCs), instrumentation, robotics and information technology.
Mechatronics Technology - Basic Electromechanical Automation (PLC) (AM) OSA

Locations

Occupational Safety & Environmental Compliance

Description
The Occupational Safety and Environmental Compliance Technology (OSE) offers in-depth study of Occupational Safety and Health Administration regulations, Environmental Protection Agency regulations, and other pertinent federal, state and local standards. Safety and environmental compliance professionals are responsible for interpreting and implementing regulations, policies and procedures, as well as enforcing government safety and environmental mandates. Compliance professionals use the knowledge gained through the OSE program to develop, improve and manage a company’s safety and environmental system to prevent injuries, reduce accidents and protect the environment while minimizing the impact to economic progress.

The Occupational Safety and Environmental Compliance Technology curriculum includes instruction on hazardous waste operations; compliance with regulatory agencies, including submitting regulatory reports and documents; conducting safety training; and performing inspections and compliance audits. Students also learn how to develop OSHA- and EPA-related programs such as hazard communication, permit-required confined space entry, respiratory protection, lockout/tagout, environmental sampling plans, stormwater pollution prevention plans, phase I site assessments, and emergency response plans. Students will learn to anticipate, recognize, evaluate and control industrial health hazards to help build and maintain a safe work culture and protect the environment.

Locations
Waco
Breckenridge
Fort Bend County

Program Requirements
Semester 1
11 Total Credits
- Complete all of the following
  - Complete the following:
    - EPCT1243 - Treatment, Remediation, and Disposal Techniques (2)
    - EPCT1307 - Introduction to Environmental Safety and Health (3)
    - OSHT1305 - OSHA Regulations - Construction Industry (3)
  - Complete at least 3 credits from the following:
    - ENGL1301 - Composition I (3)
    - ENGL2311 - Technical & Business Writing (3)

Semester 2
13 Total Credits
- Complete the following:
  - OSHT1313 - Accident Prevention, Inspection, & Investigation (3)
  - ITSC1309 - Integrated Software Applications I (3)
  - OSHT2401 - OSHA Regulations - General Industry (4)
  - ACGM3HFA - Gen Ed Humanities/Fine Arts Elective (3)

Semester 3
12 Total Credits
- Complete the following:
  - EPCT2331 - Industrial Hygiene Applications (3)
  - ACGM3SB5 - Gen Ed Social/Behavioral Science Elective (3)
  - EPCT1344 - Environmental Sampling and Analysis (3)
  - ACGM3GED - Gen Ed Elective (3)

Semester 4
12 Total Credits
- Complete the following:
  - EPCT1205 - Environmental Regulations Overview (2)
  - EPCT2337 - Site Assessment (3)
  - ACGM3MNS - Gen Ed Math/Natural Science Elective (3)
  - OSHT1209 - Physical Hazards Control (2)
  - OSHT2209 - Safety Program Management (2)

Semester 5
12 Total Credits
- Complete the following:
  - EPCT1301 - Hazardous Waste Operations and Emergency Response (HAZWOPER) Training and Related Topics (3)
  - OSHT2370 - Safety and Health First Aid Certification (3)
  - OSHT2388 - Internship - Occupational Safety and Health Technology/Technician (3)
  - OSHT2320 - Safety Training Presentation Techniques (3)

- CHEM 1112 Prerequisite(s): CHEM 1312 (Corequisite)
- CHEM 1312 Prerequisite(s): CHEM 1111, CHEM 1311, CHEM 1112 (Corequisite)
- MATH 2414 Prerequisite(s): MATH 2413
- PHYS 2125 Prerequisite(s): PHYS 2325 (Corequisite)
- PHYS 2325 Prerequisite(s): MATH 2413, PHYS 2125 (Corequisite)

Plumbing & Pipefitting Technology

Description

Plumbing & Pipefitting Technology is designed to help students learn the ins and outs of this important, well-paying field. This specialization can help you get on your way in a hurry through a one-year intensive training program to help you build the skill base needed to succeed in the industry. The Plumbing & Pipefitting Technology certificate progresses from basic to advanced coursework in plumbing, piping, construction, fabrication and more. And at TSTC, your college credits can count toward the hours needed to obtain a state license.

Plumbing & Pipefitting Technology - Basic Plumbing OSA

Locations

Waco

Program Requirements

Semester 1
9 Total Credits

- Complete the following:
  - PFPB1323 - Plumbing Codes I (3)
  - PFPB2308 - Piping Standards and Materials (3)
  - PFPB2309 - Residential Construction Plumbing I (3)

Grand Total Credits: 9
Program Requirements

Semester 1
15 Total Credits

- Complete the following:
  - PFPB1306 - Basic Blueprint Reading for Plumbers (3)
  - PFPB1323 - Plumbing Codes I (3)
  - PFPB2308 - Piping Standards and Materials (3)
  - PFPB2309 - Residential Construction Plumbing I (3)
  - PFPB1321 - Plumbing Maintenance and Repair (3)

Grand Total Credits: **15**

Capstone

- Complete the following:
  - PFPB1323 - Plumbing Codes I (3)
**Program Requirements**

**Semester 1**
12 Total Credits

- Complete the following:
  - PFPB1306 - Basic Blueprint Reading for Plumbers (3)
  - PFPB1323 - Plumbing Codes I (3)
  - PFPB2349 - Field Measuring, Sketching, and Layout (3)
  - OSHT1305 - OSHA Regulations - Construction Industry (3)

**Semester 2**
12 Total Credits

- Complete the following:
  - PFPB1321 - Plumbing Maintenance and Repair (3)
  - PFPB1347 - Backflow Prevention (3)
  - PFPB2309 - Residential Construction Plumbing I (3)
  - PFPB1319 - Commercial Plumbing I (3)

**Semester 3**
12 Total Credits

- Complete the following:
  - CBFM1303 - Boiler Maintenance (3)
  - PFPB2345 - Residential Construction Plumbing II (3)
  - CNBT1302 - Mechanical, Electrical & Plumbing Systems in Construction I (3)
  - ACGM3SBS - Gen Ed Social/Behavioral Science Elective (3)

**Semester 4**
12 Total Credits

- Complete all of the following
  - Complete the following:
    - CNBT1346 - Construction Estimating I (3)
    - BMGT1309 - Information and Project Management (3)
  - Complete at least 3 credits from the following:
    - ENGL1301 - Composition I (3)
    - ENGL2307 - Creative Writing I (3)
  - Complete the following:
    - ACGM3MNS - Gen Ed Math/Natural Science Elective (3)

**Semester 5**
12 Total Credits

- Complete the following:
  - PFPB2357 - Plumbing Codes II (3)
  - PFPB2315 - Intermediate Technologies for Piping Trades (3)
  - ACGM3GED - Gen Ed Elective (3)
  - ACGM3HFA - Gen Ed Humanities/Fine Arts Elective (3)

**Degree Plan Credits 60**

**Capstone**

- Complete the following:
  - PFPB2357 - Plumbing Codes II (3)

**Pre/Corequisites**

- PFPB 1319 Prerequisite(s): PFPB 1323, PFPB 2349, PFPB 1306
- PFPB 2345 Prerequisite(s): PFPB 2309

**Elective Options**

- Complete at least 1 courses from the following:
  - Social/Behavioral Science Elective
    - HIST1301 - United States History I (3)
    - HIST1302 - United States History II (3)

  - PFPB1682 - Cooperative Education - Plumbing Technology/Plumber (6)

**Precision Machining Technology**

**Description**

Persons interested in becoming machinists should be mechanically inclined and have good problem-solving abilities. They must be able to work independently and perform highly precise and accurate work that requires concentration and physical effort. Precision Machining Technology at TSTC guides students through a series of machine operation courses to develop and challenge their skills using conventional and computer numerical controlled (CNC) machines. Students also learn about the various materials used in today's manufacturing industry. Machinists use the following machines: horizontal and vertical mills, engine lathes, drill presses, saws, heat treat furnaces, and surface and pedestal grinders. Students learn to program and operate computer-aided machines such as CNC mills and lathes, and learn related skills such as precision measurement, blueprint reading and the heat treatment of metals. A capstone course challenges students' creativity by providing them with the opportunity to design and build complex machinery.

Process Operations

Description

A process technician is a key member of a team responsible for planning, analyzing and controlling the production of products, from the acquisition of raw materials through the production and distribution of products to customers in a variety of process industries. Process operations technicians are responsible for efficient and safe operation of all process equipment within the plant, monitoring of all process and utility systems and equipment to ensure they operate within their proper parameters, collection of product and utility samples and performing lab analysis to ensure products meet specifications, preparation of equipment and systems for maintenance activities, and more. Process Operations students will learn the function and use of pumps, tanks, valves and instrumentation associated with various process systems; knowledge of process variables, indicators and controllers; troubleshooting tools and troubleshooting steps to solve problems in a simple process system. They will be able to demonstrate the proper use of safety, health and environmental equipment.

**Robotics & Industrial Controls Technology**

**Description**

TSTC's Robotics Technology program prepares students for a job in this exploding career field. This option emphasizes the study of complex mechanical systems in computer-integrated manufacturing or CIM environments. Focusing on automated manufacturing processes and the role of robots and associated supporting equipment, coursework covers motion programming, vision and conveyor systems, computer networking, PLC programming, automated sorting, sensor systems, and computer integration.
Program Requirements

Semester 1
12 Total Credits

- Complete the following:
  - CETT1303 - DC Circuits (3)
  - DFTG1309 - Basic Computer-Aided Drafting (3)
  - RBTC1343 - Robotics (3)
  - MATH1314 - College Algebra (3 SCH version) (3)

Semester 2
12 Total Credits

- Complete all of the following
  - Complete the following:
    - CETT1305 - AC Circuits (3)
    - ELPT1341 - Motor Control (3)
    - RBTC1347 - Electro-Mechanical Devices (3)
  - Complete at least 3 credits from the following:
    - ENGL1301 - Composition I (3)
    - ENGL2311 - Technical & Business Writing (3)

Semester 3
12 Total Credits

- Complete all of the following
  - Complete at least 3 credits from the following:
    - PHYS1310 - Elementary Physics (3)
    - PHYS1315 - Physical Science I (lecture) (3)
  - Complete the following:
    - RBTC1301 - Programmable Logic Controllers (3)
    - RBTC1355 - Sensors (3)
    - RBTC2339 - Robot Programming and Diagnostics (3)

Semester 4
12 Total Credits

- Complete all of the following
  - Complete the following:
    - RBTC1341 - Vision Systems (3)
    - RBTC1345 - Robot Interfacing (3)
    - ACGM3SBS - Gen Ed Social/Behavioral Science Elective (3)
  - Complete at least 3 credits from the following:
    - RBTC1371 - Industrial Motors and Drives (3)
    - CETT1325 - Digital Fundamentals (3)

Semester 5
12 Total Credits

- Complete all of the following
  - Complete at least 3 credits from the following:
    - RBTC2375 - Human Machine Interface Programming and Interfacing (3)
    - RBTC2335 - Numerical Controlled/Computer Numerical Control Programming (3)
  - Complete the following:
    - RBTC2345 - Robot Application, Set-up, and Testing (3)
    - RBTC2347 - Computer Integrated Manufacturing (3)
    - ACGM3HFA - Gen Ed Humanities/Fine Arts Elective (3)

Degree Plan Credits 60
Capstone

complete the following:

- RBTC2345 - Robot Application, Set-up, and Testing (3)
- RBTC2347 - Computer Integrated Manufacturing (3)

Pre/Corequisites

- RBTC 1343 Prerequisite(s): CETT 1303 or IEIR 1302
- CETT 1305 Prerequisite(s): CETT 1303 or IEIR 1302
- ELPT 1341 Prerequisite(s): AACT 1371 or ELPT 1311 or CETT 1303 or IEIR 1371
- RBTC 1301 Prerequisite(s): ELPT 1341
- RBTC 1355 Prerequisite(s): RBTC 2339, RBTC 1347
- RBTC 2339 Prerequisite(s): RBTC 1343
- RBTC 1341 Prerequisite(s): RBTC 2339
- RBTC 1345 Prerequisite(s): RBTC 2339, RBTC 1347, RBTC 1301
- RBTC 1371 Prerequisite(s): RBTC 1301, ELPT 1341
- CETT 1325 Prerequisite(s): CETT 1302, CETT 1303, IEIR 1302, IEIR 1304, IEIR 1371 or CETT 1305
- RBTC 2375, RBTC 2335, RBTC 2345, RBTC 2347 Prerequisite(s): RBTC 1345, RBTC 1301

Elective Options

- Complete at least 1 courses from the following:
  Social/Behavioral Science Elective
    - HIST1301 - United States History I(3)
    - HIST1302 - United States History II(3)
    - HIST2312 - Western Civilization II(3)
    - DHYG1301 - Orofacial Anatomy, Histology & Embryology(3)
    - GOVT2305 - Federal Government (Federal constitution & topics)(3)
    - GOVT2306 - Texas Government (Texas constitution & topics)(3)
    - ANTH2346 - General Anthropology
    - ECON1301 - Introduction to Economics(3)
    - ECON2301 - Principles of Macroeconomics (3)
    - ECON2302 - Principles of Microeconomics (3)
    - GEOG1302 - Human Geography
    - GEOG1303 - World Regional Geography
    - PSYC1100 - Learning Framework (1)
    - PSYC2301 - General Psychology (3)
    - PSYC2314 - Lifespan Growth & Development(3)

- Complete at least 1 courses from the following:
  Humanities/Fine Arts Elective
    - HUMA1301 - Introduction to Humanities I
    - HUMA2319 - American Minority Studies (3)
    - HUMA2323 - World Cultures
    - PHIL1301 - Introduction to Philosophy
    - PHIL1304 - Introduction to World Religions
    - PHIL2303 - Introduction to Formal Logic
    - PHIL2306 - Introduction to Ethics
    - ARTS1301 - Art Appreciation
    - ARTS2326 - Sculpture I(3)

Solar Energy Technology

Description
Harnessing the sun’s power to convert it into electricity is not a new concept, but only in recent years has the technology really taken off. The rising cost of fossil fuels on both the pocketbook and the environment has spurred interest in renewable resources such as solar energy. Perhaps that’s why the future looks so bright for those in the solar energy industry. TSTC is one of just a handful of colleges in the nation to offer an associate degree in Solar Energy Technology. TSTC students get access to a live learning lab on the 216-kilowatt solar roof of TSTC’s Electronics Center. Combined with knowledgeable, experienced staff and an advisory committee of solar industry professionals, you can get the education and experience you need for a successful, exciting career in Solar Energy Technology.

Solar Energy Technology - Solar Energy Technology AAS

Locations
Waco

Program Requirements

Semester 1
15 Total Credits
- Complete the following:
  - ELPT1325 - National Electrical Code I (3)
  - ELPT1311 - Basic Electrical Theory (3)
  - RBPT1370 - Building Envelope Inspection (3)
  - SOLR1371 - Introduction to Solar and Alternative Energy Technologies (3)
  - SOLR2377 - Codes for Alternative Energy, Efficiency & Conservation (3)

Semester 2
15 Total Credits
- Complete the following:
  - ELPT1329 - Residential Wiring (3)
  - RBPT2325 - Energy Rating Systems for Homes (3)
  - ELPT1357 - Industrial Wiring (3)
  - RBPT2359 - Residential Building Performance Consulting (3)
  - SOLR1372 - Foundations of Solar Photovoltaic Power Generation (3)

Semester 3
15 Total Credits
- Complete the following:
  - ELPT1345 - Commercial Wiring (3)
  - OSHT1305 - OSHA Regulations - Construction Industry (3)
  - ENGL1301 - Composition I (3)
  - ACGM3GED - Gen Ed Elective (3)
  - ACGM3HFA - Gen Ed Humanities/Fine Arts Elective (3)

Semester 4
15 Total Credits
- Complete all of the following
  - Complete at least 3 credits from the following:
    - DFTG1313 - Drafting for Specific Occupations (3)
    - CNBT1300 - Residential and Light Commercial Blueprint Reading (3)
  - Complete the following:
    - SOLR2375 - Solar System Design, Installation, Troubleshooting & Repair (3)
    - SOLR2376 - Special Projects in Solar Energy Systems (3)
    - ACGM3GED - Gen Ed Elective (3)
    - ACGM3SBS - Gen Ed Social/Behavioral Science Elective (3)

Degree Plan Credits 60
Capstone

- Complete the following:
  - SOLR2375 - Solar System Design, Installation, Troubleshooting & Repair (3)
  - SOLR2376 - Special Projects in Solar Energy Systems (3)

Elective Options

- Complete 1 General Education Elective as recommended by program
- Complete at least 1 courses from the following:
  Humanities/Fine Arts Elective
  - HUMA1301 - Introduction to Humanities I
  - HUMA2319 - American Minority Studies (3)
  - HUMA2323 - World Cultures
  - PHIL1301 - Introduction to Philosophy
  - PHIL1304 - Introduction to World Religions
  - PHIL2303 - Introduction to Formal Logic
  - PHIL2306 - Introduction to Ethics
  - ARTS1301 - Art Appreciation
  - ARTS2326 - Sculpture I (3)
  - ARTS2326 - Sculpture I (3)
  - MUSI1306 - Music Appreciation
- Complete at least 1 courses from the following:
  Math/Natural Science Elective
  - MATH1314 - College Algebra (3 SCH version)(3)
  - MATH1316 - Plane Trigonometry (3)
  - MATH1325 - Calculus for Business & Social Sciences (3)

- PSYC2301 - General Psychology (3)
- PSYC2314 - Lifespan Growth & Development (3)
Surgical Technology

Description

Surgical technologists assist in operations under the supervision of surgeons, registered nurses or other surgical personnel. Before an operation, surgical technologists help set up the operating room with surgical instruments, equipment and sterile solutions. During surgery, technologists pass instruments and other sterile supplies to surgeons and surgeon assistants. They may hold retractors, cut sutures, and help count sponges, needles, supplies and instruments. Surgical technologists help prepare, care for and dispose of specimens taken for laboratory analysis and may help apply dressings. This program provides classroom education and supervised clinical experience. Studies cover the care and safety of patients during surgery, aseptic techniques and surgical procedures. Students also learn to sterilize instruments, prevent and control infection, and handle special drugs, solutions, supplies and equipment. Surgical technologists must possess manual dexterity to handle instruments efficiently and quickly. They also must be conscientious, orderly, and emotionally stable to handle the demands of the operating room environment. Technologists must respond quickly and have a full understanding of the procedures so that they may anticipate the needs of surgeons without having to be asked for instruments or supplies.

Surgical Technology - Sterile Processing OSA

Program Requirements

Semester 1
10 Total Credits

- Complete the following:
  - HITT1305 - Medical Terminology I (3)
  - BIOL2301 - Anatomy & Physiology I (lecture) (3)
  - BIOL2101 - Anatomy & Physiology I (lab) (1)
  - MATH1314 - College Algebra (3 SCH version) (3)

Semester 2
10 Total Credits

- Complete the following:
  - BIOL2302 - Anatomy & Physiology II (lecture) (3)
  - BIOL2102 - Anatomy & Physiology II (lab) (1)
  - ENGL1301 - Composition I (3)
  - SPCHX3XX - Gen Ed Speech Elective (3)

Semester 3
10 Total Credits

- Complete the following:
  - BIOL2320 - Microbiology for Non-Science Majors (lecture) (3)
  - BIOL2120 - Microbiology for Non-Science Majors Laboratory (lab) (1)
  - PSYC2301 - General Psychology (3)
  - ACGM3HFA - Gen Ed Humanities/Fine Arts Elective (3)

Semester 4
12 Total Credits

- Complete the following:
  - SRGT1405 - Introduction to Surgical Technology (4)
  - SRGT1409 - Fundamentals of Perioperative Concepts and Techniques (4)
  - SRGT1491 - Special Topics in Surgical/Operating Room TECHNICIAN (4)

Semester 5
10 Total Credits

- Complete the following:
  - SRGT1244 - Technological Sciences for the Surgical Technologist (2)
  - SRGT1441 - Surgical Procedures I (4)
  - SRGT1461 - Clinical - Surgical Technology/Technologist (4)

Semester 6
8 Total Credits

- Complete the following:
  - SRGT1442 - Surgical Procedures II (4)
  - SRGT2462 - Clinical - Surgical Technology/Technologist (4)

Grand Total Credits: 60

Capstone

- Complete the following:
  - SRGT2462 - Clinical - Surgical Technology/Technologist (4)

Pre/Corequisites

- SRGT 1461 Prerequisite(s): SRGT 1491
- SRGT 2462 Prerequisite(s): SRGT 1461
Elective Options

- Complete at least 1 course from the following:
  - Speech Elective
    - SPCH1311 - Introduction to Speech Communication
    - SPCH1311 - Introduction to Speech Communication
    - SPCH1311 - Introduction to Speech Communication
    - SPCH1311 - Introduction to Speech Communication

- Complete at least 1 course from the following:
  - Humanities/Fine Arts Elective
    - HUMA1301 - Introduction to Humanities I
    - HUMA2319 - American Minority Studies (3)
    - HUMA2323 - World Cultures
    - PHIL1301 - Introduction to Philosophy

    - ARTS2326 - Sculpture I (3)
    - ARTS2326 - Sculpture I (3)
    - MUSI1306 - Music Appreciation

Vocational Nursing

Description

The nursing profession is a large part of the high-demand health care field. In the Vocational Nursing program, students participate in an innovative learning environment that helps develop their caregiving skills. Instruction consists of classroom, simulation learning labs, interactive online sessions, virtual clinicals and on-site health care clinicals. In the simulation learning lab, students practice the skills and techniques introduced in their classes, and they will be challenged to work through real-world scenarios. After time in the simulation learning labs, students move to clinical sites at hospitals, nursing homes and doctor's offices where they experience the reality and pace of the nursing profession.

The Vocational Nursing program is a progressive learning program with each class built on knowledge from previous classes. It is necessary for student to pass each class before moving on to the next level. In order to progress in the vocational nursing program, a student must make an average of 80% or higher in each nursing course with the exception of A&P I and II, in which a grade of 70 or higher is acceptable.

Graduates of the Vocational Nursing program have many employment opportunities to consider, including hospitals, nursing homes, home health care, doctor's offices and insurance companies.

Requirements to enter the nursing programs differ from those of other programs. Limited numbers of students are accepted. The admission rating scale and application packet criteria will be used to determine acceptance. See the application packet for details. The Vocational Nursing application packet may be accessed at tstc.edu.

Web Design & Development

Description

Web designers and developers work within a variety of settings to gather information, program content and design a site that is effective and easy to use. The associate degree and certificate programs in Web Design and Development offer targeted coursework in website design, production, programming, applications, and maintenance, as well as the practical hands-on experience needed to understand the technology. The program includes curriculum specific to graphic and web design, web development, computer science and computer networking. The curriculum also covers languages and software such as HTML, JavaScript, PHP, CSS, Python and MySQL. Students not only learn instruction in web page design and composition, but also develop a portfolio and participate in a real-world project that moves them to the top of the class when employers seek candidates.

Semester 4
12 Total Credits

- Complete the following:
  - IMED2309 - Internet Commerce (3)
  - IMED2345 - Interactive Digital Media II (3)
  - IMED2313 - Project Analysis and Design (3)
  - ACGM35B5 - Gen Ed Social/Behavioral Science Elective (3)

Semester 5
12 Total Credits

- Complete the following:
  - IMED2311 - Portfolio Development (3)
  - IMED2351 - Digital Media Programming (3)
  - IMED2388 - Internship - Digital Communication and Media/Multimedia (3)
  - ACGM3HFA - Gen Ed Humanities/Fine Arts Elective (3)

Degree Plan Credits 60

Capstone

- Complete the following:
  - IMED2388 - Internship - Digital Communication and Media/Multimedia (3)
  - IMED2311 - Portfolio Development (3)

Pre/Corequisites

- IMED 1316 Prerequisite(s): ARTC 1302 (Prerequisite or Corequisite) or ITSE 1311 (Prerequisite or Corequisite) or IMED 1371 (Prerequisite or Corequisite)
- ITSE 2313, IMED 2315 Prerequisite(s): IMED 1316
- ITSE 2302 Prerequisite(s): ITSE 1311
- ITSE 1306 Prerequisite(s): ITSE 1303 (Prerequisite or Corequisite), ITSE 2302
- IMED 2345, IMED 2351 Prerequisite(s): ITSE 2302
- IMED 2311, IMED 2388 Prerequisite(s): ITSE 2313, IMED 2309, IMED 2315
- IMED 2388 Prerequisite(s): ITSE 2313, IMED 2309, IMED 2315
Elective Options

- Complete at least 1 courses from the following:
  - Mathematics Elective
    - MATH1314 - College Algebra (3 SCH version) (3)
    - MATH1316 - Plane Trigonometry (3)
    - MATH1325 - Calculus for Business & Social Sciences (3)
    - MATH1332 - Contemporary Mathematics (Quantitative Reasoning) (3)
    - MATH1342 - Elementary Statistical Methods (3)
    - MATH1350 - Math - Teachers I Fundamentals of Math I (3)
    - MATH1351 - Fundamentals of Mathematics II (3)
    - MATH2312 - Pre-Calculus Math (3 SCH version) (3)
    - MATH2313 - Calculus I (3)
    - MATH2318 - Linear Algebra (3)
    - MATH2320 - Differential Equations (3 SCH version) (3)
    - MATH2342 - Elementary Statistical Methods (3)
    - MATH2313 - Calculus I (3)
    - MATH2414 - Calculus II (4 SCH version) (4)
    - MATH2415 - Calculus III (4 SCH version) (4)
  - Complete at least 1 courses from the following:
    - Elective
  - Complete at least 1 courses from the following:
    - Social/Behavioral Science Elective
      - HIST1301 - United States History I (3)
      - HIST1302 - United States History II (3)
      - HIST2312 - Western Civilization II (3)
      - DHYG1301 - Orofacial Anatomy, Histology & Embryology (3)
      - GOVT2305 - Federal Government (Federal constitution & topics) (3)
      - GOVT2306 - Texas Government (Texas constitution & topics) (3)
      - ANTH2346 - General Anthropology
      - ECON1301 - Introduction to Economics (3)
      - ECON2301 - Principles of Macroeconomics (3)
      - ECON2302 - Principles of Microeconomics (3)
      - GEOG1302 - Human Geography
      - GEOG1303 - World Regional Geography
      - PSYC1100 - Learning Framework (1)
      - PSYC2301 - General Psychology (3)
      - PSYC2314 - Lifespan Growth & Development (3)
  - Complete at least 1 courses from the following:
    - Humanities/Fine Arts Elective
      - HUMA1301 - Introduction to Humanities I
      - HUMA2319 - American Minority Studies (3)
      - HUMA2323 - World Cultures
      - PHIL1301 - Introduction to Philosophy
      - PHIL1304 - Introduction to World Religions
      - PHIL2303 - Introduction to Formal Logic
      - PHIL2306 - Introduction to Ethics
      - ARTS1301 - Art Appreciation
      - ARTS2326 - Sculpture I (3)
      - ARTS2326 - Sculpture II (3)
      - MUSI1306 - Music Appreciation

Welding Technology

Description

The Welding Technology programs at TSTC emphasize the development of actual, hands-on welding, layout and fitting skills. With extensive exposure to welding practices and principles, students can better understand not only how welding processes work, but also why certain welding processes and techniques are used. Welding Technology offers students instruction on plasma torches for oxy-acetylene and air carbon arc cutting. Students also gain extensive skills and knowledge through simulated industrial welder qualification tests with the following processes: SMAW, GMAW, FCAW (gas and self-shielded), GTAW and SAW. With general welding or specialized programs such as Welding Technology AAS, Structural Cert1 or Structural and Pipe Welding available, there are many different options for those wanting to enter the welding industry. For quicker entry into the industry, certificates are available.
Welding Technology - Basic Welding - Multiple Processes (AM) OSA

Locations
Waco
East Williamson County
Harlingen
Sweetwater
Fort Bend County
Abilene
Brownwood
Breckenridge
North Texas
Marshall

Program Requirements
Semester 1
12 Total Credits
- Complete the following:
  - WLDG1428 - Introduction to Shielded Metal Arc Welding (SMAW) (4)
  - WLDG1407 - Introduction to Welding Using Multiple Processes (4)
  - WLDG1434 - Introduction to Gas Tungsten Arc (GTAW) Welding (4)

Grand Total Credits: 12

Pre/Corequisites
- WLDG 1434 Prerequisite(s): WLDG 1407

Program Requirements

Semester 1
14 Total Credits

- Complete the following:
  - TECM1303 - Technical Calculations (3)
  - WLDG1313 - Introduction to Blueprint Reading for Welders (3)
  - WLDG1407 - Introduction to Welding Using Multiple Processes (4)
  - WLDG1428 - Introduction to Shielded Metal Arc Welding (SMAW) (4)

Semester 2
12 Total Credits

- Complete the following:
  - WLDG1417 - Introduction to Layout and Fabrication (4)
  - WLDG1434 - Introduction to Gas Tungsten Arc (GTAW) Welding (4)
  - WLDG1457 - Intermediate Shielded Metal Arc Welding (SMAW) (4)

Semester 3
12 Total Credits

- Complete the following:
  - WLDG2413 - Intermediate Welding Using Multiple Processes (4)
  - WLDG2435 - Advanced Layout and Fabrication (4)
  - WLDG2443 - Advanced Shielded Metal Arc Welding (SMAW) (4)

Grand Total Credits: 38

Capstone

- Complete the following:
  - WLDG2413 - Intermediate Welding Using Multiple Processes (4)

Pre/Corequisites

- WLDG 1417 Prerequisite(s): WLDG 1313 (Prerequisite or Corequisite)
- WLDG 1434, WLDG 2413 Prerequisite(s): WLDG 1407
- WLDG 1457 Prerequisite(s): WLDG 1428

**Wind Energy Technology**

**Description**

As a wind energy technician, your options are sky-high. You can work at turbine construction and manufacturing sites, in the distribution and generation industries, at utility companies, or on wind farms anywhere in across the country. At TSTC you will learn to conduct efficiency studies and manage personnel, materials and machines in factories, offices and production sites. You will also prepare machinery and equipment layouts, plan workflow for turbine construction and maintenance, conduct statistical studies of product quality and time usage, and analyze production costs. Upon successful completion of our program, you’ll be qualified to operate and maintain the systems that make a wind turbine function.

Courses

Accounting

ACCT2301 - Principles of Financial Accounting

Course Title
Principles of Financial Accounting

Academic Level
Undergraduate

Description
This course is an introduction to the fundamental concepts of financial accounting as prescribed by U.S. generally accepted accounting principles (GAAP) as applied to transactions and events that affect business organizations. Students will examine the procedures and systems to accumulate, analyze, measure, and record financial transactions. Students will use recorded financial information to prepare a balance sheet, income statement, statement of cash flows, and statement of shareholders' equity to communicate the business entity's results of operations and financial position to users of financial information who are external to the company. Students will study the nature of assets, liabilities, and owners' equity while learning to use reported financial information for purposes of making decisions about the company. Students will be exposed to International Financial Reporting Standards (IFRS).

TECM1091 - Sp Top Applied Math, Gen.

Course Title
Sp Top Applied Math, Gen.

Academic Level
Continuing Education

Description
Topics address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student.

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0
TECM1303 - Technical Calculations

Course Title
Technical Calculations

Academic Level
Undergraduate

Description
Specific mathematical calculations required by business, industry, and health occupations.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3

TECM1349 - Technical Math Applications

Course Title
Technical Math Applications

Academic Level
Undergraduate

Description
Trigonometry and geometry as used in a variety of technical settings. Includes the use of plane and solid geometry to solve areas and volumes encountered in industry.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3

Architecture
ARCE1303 - Architectural Materials and Methods of Construction

Course Title
Architectural Materials and Methods of Construction

Academic Level
Undergraduate

Description
Properties, specifications, vendor references, and uses of materials as related to architectural systems of structures.

Lecture Hours
2

Lab Hours
2

Credits
3

Semester Credit Hours
3

Prerequisites
◆ Complete the following:

ARCE1321 - Architectural Illustration

Course Title
Architectural Illustration

Academic Level
Undergraduate

Description
Architectural drawing and sketching. Emphasizes architectural structures in 3-D or pictorially either by hand or computer software.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
◆ Complete the following:
  ◆ DFTG1309 - Basic Computer-Aided Drafting (3)

Corequisites
◆ Completed or concurrently enrolled in:
  ◆ DFTG1309 - Basic Computer-Aided Drafting (3)
ARCE1342 - Codes, Specifications, and Contract Documents

Course Title
Codes, Specifications, and Contract Documents

Academic Level
Undergraduate

Description
Study of ordinances, codes, and legal documents as they relate to specifications and drawing. Discussion of owner-architect-contractor responsibilities, duties, and legal relationships.

Lecture Hours
2

Lab Hours
3

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - ARCE1303 - Architectural Materials and Methods of Construction (3)

Corequisites
- Completed or concurrently enrolled in:
  - ARCE1303 - Architectural Materials and Methods of Construction (3)
ARCE1352 - Structural Drafting

Course Title
Structural Drafting

Academic Level
Undergraduate

Description
A study of structural systems including concrete foundations and frames, wood framing and trusses, and structural steel framing systems. Includes detailing of concrete, wood, and steel to meet industry standards including the American Institute of Steel Construction and The American Concrete Institute.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - DFTG2328 - Architectural Drafting - Commercial (3)

ARCE2052 - Mechanical and Electrical Systems

Course Title
Mechanical and Electrical Systems

Academic Level
Continuing Education

Description
The properties of building materials (assemblies), specifications, codes, vendor references, and uses of mechanical, plumbing, conveying, and electrical systems as they relate to architecture for residential and commercial construction.

Lecture Hours
0

Lab Hours
5

Semester Credit Hours
0
ARCE2352 - Mechanical and Electrical Systems

Course Title
Mechanical and Electrical Systems

Academic Level
Undergraduate

Description
The properties of building materials (assemblies), specifications, codes, vendor references, and uses of mechanical, plumbing, conveying, and electrical systems as they relate to architecture for residential and commercial construction.

  - DFTG2328 - Architectural Drafting - Commercial (3)

Arts

ARTS1301 - Art Appreciation

Course Title
Art Appreciation

Academic Level
Undergraduate

Description
A general introduction to the visual arts designed to create an appreciation of the vocabulary, media, techniques, and purposes of the creative process. Students will critically interpret and evaluate works of art within formal, cultural, and historical contexts.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3
ARTS1304 - Art History II
Course Title
Art History II
Academic Level
Undergraduate
Description
A chronological analysis of the historical and cultural contexts of the visual arts from the 14th century to the present day.

Auctioneering
**AUCT2001 - License Renewal for Auctioneer**

**Course Title**

License Renewal for Auctioneer

**Academic Level**

Continuing Education

**Description**

Refresher course in the universal standards of auctioneering practices and the various state and federal statutes that govern the licensing of auctioneers for the purpose of license renewal. Includes the study of the Texas Auctioneer Law, professionalism, conduct, ethics, deceptive trade practice law, and other applicable laws.

ABDR1203 - Vehicle Design and Structural Analysis

Course Title
Vehicle Design and Structural Analysis

Academic Level
Undergraduate

Description
An introduction to the collision repair industry with emphasis on safety, professionalism, and vehicle structural design.

Lecture Hours
1

Lab Hours
2

Credits
2

Semester Credit Hours
2

ABDR1207 - Collision Repair Welding

Course Title
Collision Repair Welding

Academic Level
Undergraduate

Description
A study of collision repair welding and cutting procedures.

Lecture Hours
1

Lab Hours
4

Credits
2

Semester Credit Hours
2
ABDR1215 - Vehicle Trim and Hardware

Course Title
Vehicle Trim and Hardware

Academic Level
Undergraduate

Description
A study of vehicle trim and glass service.

Lecture Hours
1

Lab Hours
2

Credits
2

Semester Credit Hours
2

ABDR1266 - Practicum

Course Title
Practicum

Academic Level
Undergraduate

Description
Practical, general workplace training supported by an individualized learning plan developed by the employer, college, and student.

Lecture Hours

ABDR1307 - Collision Repair Welding

**Course Title**
Collision Repair Welding

**Academic Level**
Undergraduate

**Description**
A study of industry and standard welding and cutting procedures.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3

**Prerequisites**
- Complete the following:
  - ABDR1215 - Vehicle Trim and Hardware (2)
ABDR1323 - Front and Rear Wheel Alignment

Course Title

Front and Rear Wheel Alignment

Academic Level

Undergraduate

Description

Study of vehicle steering components including alignment, tire rotation, and balancing.

Lecture Hours

2

Lab Hours

4

Credits

3

Semester Credit Hours

3

Prerequisites

- Complete the following:
  - ABDR2435 - Structural Analysis and Damage Repair IV (4)

ABDR1331 - Basic Refinishing

Course Title

Basic Refinishing

Academic Level

Undergraduate

Description

An introduction to current refinishing products, shop safety, and equipment used in the automotive refinishing industry. Emphasis on surface preparation, masking techniques, and refinishing of trim and replacement parts.

Lecture Hours

2

Lab Hours

4

Credits

3

Semester Credit Hours

3
ABDR1349 - Automotive Plastic and Sheet Molded Compound Repair

Course Title
Automotive Plastic and Sheet Molded Compound Repair

Academic Level
Undergraduate

Description
A comprehensive course in repair of interior and exterior plastics including the use of various types of adhesives.

Lecture Hours
2

Lab Hours
3

Credits
3

Semester Credit Hours
3

Corequisites
- Taken the following:
  - ABDR1431 - Basic Refinishing (4)
  - AACT2373 - Factory I/O (3)
  - ABDR2449 - Advanced Refinishing (4)
  - ABDR1203 - Vehicle Design and Structural Analysis (2)

Grand Total Credits: 13

ABDR1359 - Sheet Metal Fabrication I

Course Title
Sheet Metal Fabrication I

Academic Level
Undergraduate

Description
A study of the basic shaping techniques required for fabricating sheet metal parts and pieces. Discussion will include custom cars and street rods.

Lecture Hours
2

Lab Hours
3

Credits
3

Semester Credit Hours
3
ABDR1371 - Basic Paint Techniques, Equipment & Environmental Practices

Course Title
Basic Paint Techniques, Equipment & Environmental Practices

Academic Level
Undergraduate

Description
An introduction to current refinishing products, equipment and procedures used in the automotive refinishing industry on damaged panels. Emphasis on surface preparation, corrosion protection, masking techniques, block sanding techniques, and refinishing repaired panels.

Lecture Hours
1

Lab Hours
6

Credits
3

Semester Credit Hours
3

ABDR1411 - Vehicle Measurement and Damage Repair Procedures

Course Title
Vehicle Measurement and Damage Repair Procedures

Academic Level
Undergraduate

Description
Introduction to vehicle measurement and structural alignment equipment.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4
ABDR1419 - Basic Metal Repair

Course Title
Basic Metal Repair

Academic Level
Undergraduate

Description
Covers basic metal principles and working techniques including proper tool usage and product application.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4

ABDR1431 - Basic Refinishing

Course Title
Basic Refinishing

Academic Level
Undergraduate

Description
An introduction to current refinishing products, shop safety, and equipment used in the automotive refinishing industry. Emphasis on surface preparation, masking techniques, and refinishing of trim and replacement parts.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4

Prerequisites
- Complete the following:
  - ABDR1371 - Basic Paint Techniques, Equipment & Environmental Practices (3)
ABDR1441 - Struct Analysis & Damage Repair I

Course Title
Struct Analysis & Damage Repair I

Academic Level
Undergraduate

Description
Expanded training in the roughing and shaping procedures on automotive sheet metal necessary to perform body repairs. Emphasis on the alignment of component parts such as doors, hood, front-end assemblies, and deck lids.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4

ABDR1442 - Structural Analysis and Damage Repair II

Course Title
Structural Analysis and Damage Repair II

Academic Level
Undergraduate

Description
Continuation of general repair and replacement procedures for damaged structural parts and collision damage.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4

Prerequisites
* Complete the following:
  * ABDR1323 - Front and Rear Wheel Alignment (3)
  * ABDR1419 - Basic Metal Repair (4)
  * ABDR2435 - Structural Analysis and Damage Repair IV (4)
ABDR1458 - Intermediate Refinishing

**Course Title**
Intermediate Refinishing

**Academic Level**
Undergraduate

**Description**
Training in mixing and spraying of automotive topcoats. Emphasis on formula ingredient, reducing, thinning, and special spraying techniques. Introduction to partial panel refinishing techniques and current industry paint removal techniques.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
4

**Semester Credit Hours**
4

**Prerequisites**
- Complete the following:
  - ABDR1371 - Basic Paint Techniques, Equipment & Environmental Practices (3)

ABDR1481 - Cooperative Education - Autobody/Collision and Repair Technology/Technician

**Course Title**
Cooperative Education - Autobody/Collision and Repair Technology/Technician

**Academic Level**
Undergraduate

**Description**
Career-related activities encountered in the student's area of specialization offered through an individualized agreement among the college, employer, and student. Under the supervision of the college and the employer, the student combines classroom learning with work experience. Includes a lecture component.

**Lecture Hours**
1

**Lab Hours**
0

**Semester Credit Hours**
4
ABDR1542 - Structural Analysis and Damage Repair II

**Course Title**
Structural Analysis and Damage Repair II

**Academic Level**
Undergraduate

**Description**
Continuation of general repair and replacement procedures for damaged structural parts and collision damage.

**Lecture Hours**
3

**Lab Hours**
6

**Credits**
5

**Semester Credit Hours**
5

ABDR2255 - Collision Repair Estimating

**Course Title**
Collision Repair Estimating

**Academic Level**
Undergraduate

**Description**
An advanced course in collision estimating and development of a damage report utilizing estimating software.

**Lecture Hours**
1

**Lab Hours**
2

**Credits**
2

**Semester Credit Hours**
2
ABDR2270 - Advanced Application Processes of Refinishing

Course Title
Advanced Application Processes of Refinishing

Academic Level
Undergraduate

Description
An advanced course in the practical application of acquired refinishing skills. Use industry relevant estimating programs and interpret work orders to create and implement a repair plan on live projects. Repairs will be completed by application of theory, concepts and skills involving specialized materials, tools, equipment, procedures, regulations, laws and interactions with the instructor/customer; and will demonstrate ethical behavior, safety practices, interpersonal and teamwork skills and appropriate written and verbal communication skills using the terminology of collision repair industry and the instructor/customer.

1

**Lab Hours**
0

**Credits**
2

**Semester Credit Hours**
2

**Prerequisites**
- Complete the following:
  - ABDR2449 - Advanced Refinishing (4)
  - ABDR2551 - Specialized Refinishing Techniques (5)

ABDR2305 - Sheet Metal Fab II

**Course Title**
Sheet Metal Fab II

**Academic Level**
Undergraduate

**Description**
A study of the advanced shaping techniques required for fabricating sheet metal parts and pieces. Discussion will include custom cars and street rods.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3
ABDR2345 - Vehicle Safety Systems

Course Title
Vehicle Safety Systems

Academic Level
Undergraduate

Description
Theory and operation of air bags and other passive and non-passive restraint systems including automotive anti-lock systems and diagnostic methods used in the collision repair industry.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

ABDR2357 - Collision Repair Shop Management

Course Title
Collision Repair Shop Management

Academic Level
Undergraduate

Description
Examination of shop management functions and decision-making processes including planning, organizing, leading and staffing used in collision repair shops to ensure operational profitability.

Lecture Hours
2

Lab Hours
3

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - ABDR2255 - Collision Repair Estimating (2)
ABDR2359 - Structural Sectioning

Course Title
Structural Sectioning

Academic Level
Undergraduate

Description
Skill development in the practical application of welded panel replacement and structural sectioning procedures as well as practical equipment applications in structural vehicle straightening, alignment, welding, and corrosion protection.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - ABDR1307 - Collision Repair Welding (3)
  - ABDR1419 - Basic Metal Repair (4)
  - ABDR2435 - Structural Analysis and Damage Repair IV (4)

ABDR2371 - Refinishing Process I

Course Title
Refinishing Process I

Academic Level
Undergraduate

Description
The theory and practical application of spray booth and vehicle pre-spray preparation. Remove and perform final finishing. Apply decals and stripes with emphasis on paint problems and remedies.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - ABDR1458 - Intermediate Refinishing (4)
  - ABDR1431 - Basic Refinishing (4)
ABDR2380 - Cooperative Education - Autobody/Collision and Repair Technology/Technician

Course Title
Cooperative Education - Autobody/Collision and Repair Technology/Technician

Academic Level
Undergraduate

Description
Career-related activities encountered in the student's area of specialization offered through an individualized agreement among the college, employer, and student. Under the supervision of the college and the employer, the student combines classroom learning with work experience. Includes a lecture component.

ABDR2402 - Auto Body Mechanical & Electrical Srvc. Service

Course Title
Auto Body Mechanical & Electrical Srvc. Service

Academic Level
Undergraduate

Description
A course in the repair, replacement, and/or service of collision damaged mechanical or electrical systems. Topics include drive train removal, reinstallation and service; cooling system service and repair; exhaust system service; and emission control systems. Additional topics include wire and connector repair, reading wiring diagrams and troubleshooting.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4

ABDR2435 - Structural Analysis and Damage Repair IV

Course Title
Structural Analysis and Damage Repair IV

Academic Level
Undergraduate

Description
Continuation of skills development in the repair and replacement of major body units.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4

Prerequisites
- Complete the following:
  - ABDR1215 - Vehicle Trim and Hardware (2)
ABDR2447 - Advanced Collision Repair Welding

Course Title
Advanced Collision Repair Welding

Academic Level
Undergraduate

Description
Skill development in the use of advanced welding and cutting processes. Emphasizes current welding procedures and specific repair requirements for specialized metals.

Lecture Hours
2

Lab Hours
4

Credits
4

Semester Credit Hours
4

Prerequisites
◆ Complete the following:
  ◆ ABDR1307 - Collision Repair Welding (3)

ABDR2449 - Advanced Refinishing

Course Title
Advanced Refinishing

Academic Level
Undergraduate

Description
Application of multi-stage refinishing techniques. Advanced skill development solving refinishing problems. Application of multi-stage refinishing techniques with emphasis on formula mixing and special spraying techniques.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4

Prerequisites
◆ Complete the following:
  ◆ ABDR1458 - Intermediate Refinishing (4)
  ◆ ABDR1431 - Basic Refinishing (4)
ABDR2453 - Color Analysis and Paint Matching

**Course Title**
Color Analysis and Paint Matching

**Academic Level**
Undergraduate

**Description**
Advanced course in color theory, analysis, tinting, and blending techniques for acceptable paint matching.

**Lecture Hours**
2

**Lab Hours**
6

**Credits**
4

**Semester Credit Hours**
4

**Prerequisites**
- Complete the following:
  - ABDR2449 - Advanced Refinishing (4)
  - ABDR2551 - Specialized Refinishing Techniques (5)

ABDR2502 - Auto Body Mechanical and Electrical Service

**Course Title**
Auto Body Mechanical and Electrical Service

**Academic Level**
Undergraduate

**Description**
A course in the repair, replacement, and/or service of collision damaged mechanical or electrical systems. Topics include drive train removal, reinstallation and service; cooling system service and repair; exhaust system service; and emission control systems. Additional topics include wire and connector repair, reading wiring diagrams, and troubleshooting.

  - ABDR1458 - Intermediate Refinishing (4)
  - ABDR1431 - Basic Refinishing (4)

Automated Office

POFI1001 - Computer Applications I

Course Title
Computer Applications I

Academic Level
Continuing Education

Description
Overview of computer office applications including current terminology and technology. Introduction to computer hardware, software applications, and procedures.

Lecture Hours
2

Lab Hours
2

Semester Credit Hours
0
POFI1004 - Computer Fundamentals

Course Title
Computer Fundamentals

Academic Level
Continuing Education

Description
Computer applications specific to business-related software. Emphasizes the concurrent development of office skills and computer knowledge.

Lecture Hours
2

Lab Hours
0

Semester Credit Hours
0

POFI1005 - Intro. to Ms Publisher 2007

Course Title
Intro. to Ms Publisher 2007

Academic Level
Continuing Education

Description
Desktop publishing terminology, text editing, and use of design principles to create business documents.

Lecture Hours

AACT1373 - Administrative Skills for Technicians

**Course Title**
Administrative Skills for Technicians

**Academic Level**
Undergraduate

**Description**
An introductory course to automation administration skills. The course covers general office administration programs, equipment interpretation data, design of technical documentation and communication skills use in industry.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3

AACT1374 - Electronics Fundamentals in Automation II

**Course Title**
Electronics Fundamentals in Automation II

**Academic Level**
Undergraduate

**Description**
Advanced study of the fundamentals of electronics used in automation to include transistors, filters, diodes, IGBTs, SCRs and optic electronics, and encoders

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3

**Prerequisites**
- Complete the following:
  - AACT1371 - Electronics Fundamentals in Automation (3)
AACT1375 - Principles of Motion, Measurement and Position I

Course Title

Principles of Motion, Measurement and Position I

Academic Level

Undergraduate

Description

This course explores theoretical concepts in motor control. Emphasis in different systems design, protection control devices, close and open loop control. In-depth coverage of different motors designs and control systems.

Lecture Hours

2

Lab Hours

4

Credits

3

Semester Credit Hours

3

Prerequisites

◆ Complete the following:
  ◆ AACT1371 - Electronics Fundamentals in Automation (3)

AACT1376 - Intro to Process Control Devices

Course Title

Intro to Process Control Devices

Academic Level

Undergraduate

Description

Overview of process control applications. Introduction process controls programming, electrical devices, mechanical systems and calibration.

Lecture Hours

2

Lab Hours

4

Credits

3

Semester Credit Hours

3

Prerequisites

◆ Complete the following:
  ◆ AACT1371 - Electronics Fundamentals in Automation (3)
AACT2371 - Automation Control Systems Interfacing I

Course Title
Automation Control Systems Interfacing I

Academic Level
Undergraduate

Description
An introductory course to automation wiring to address industrial needs for connecting devices as they apply to industry. Includes basic interfacing programming, wiring methods, color coding identification, communications wiring and the troubleshooting of wiring faults in Automation.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - AACT1376 - Intro to Process Control Devices (3)

AACT2372 - Automation Control Systems Interfacing II

Course Title
Automation Control Systems Interfacing II

Academic Level
Undergraduate

Description
This course explores theoretical concepts of communications protocols programming. Emphasis in connecting devices as they apply to industry, and concepts of networking, data collection, and troubleshooting of Industrial Networks.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - AACT2371 - Automation Control Systems Interfacing I (3)
AACT2373 - Factory I/O  
**Course Title**  
Factory I/O  

**Academic Level**  
Undergraduate  

**Description**  
A capstone course that provides students the opportunity to apply the knowledge and skills gained in the program. The course will be taken after completing specific specialized courses in the program to include programmable logic controller, Automation Control Systems Interfacing and Application of Industrial Automatic Controls.

**Lecture Hours**  
2  

**Lab Hours**  
4  

**Credits**  
3  

**Semester Credit Hours**  
3  

**Prerequisites**  
- Complete the following:  
  - ELPT2319 - Programmable Logic Controllers I (3)  

AACT2374 - PLC Automation II  
**Course Title**  
PLC Automation II  

**Academic Level**  
Undergraduate  

**Description**  
Advanced applications of programmable logic controllers as used in automated manufacturing utilizing various programming techniques and protocols. Emphasis on device interconnectivity, design, implementation, troubleshooting, and interfacing to equipment.

**Lecture Hours**  
2  

**Lab Hours**  
4  

**Credits**  
3  

**Semester Credit Hours**  
3  

**Prerequisites**  
- Complete the following:  
  - AACT2376 - PLC Automation I (3)
AACT2375 - Principles of Motion, Measurement and Position II

Course Title
Principles of Motion, Measurement and Position II

Academic Level
Undergraduate

Description
This course covers the principles of motion control devices used in industry. Topics include the design, development, and current applications of motion control devices systems including their configuration, operation, and control. Upon completion students will be able to wire and program different control devices used in automation for motion control.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - AACT2371 - Automation Control Systems Interfacing I (3)

AACT2376 - PLC Automation I

Course Title
PLC Automation I

Academic Level
Undergraduate

Description
Basic course in programmable logic controller with emphasis on automated systems. In-depth coverage of hardware identification, basic ladder programming and basic wiring of inputs and outputs.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - AACT1375 - Principles of Motion, Measurement and Position I (3)
Automotive

AUMT1305 - Introduction to Automotive Technology

Course Title
Introduction to Automotive Technology

Academic Level
Undergraduate

Description
An introduction to the automotive industry including automotive history, safety practices, shop equipment and tools, vehicle subsystems, service publications, professional responsibilities, and basic automotive maintenance. May be taught manufacturer specific.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

AUMT1307 - Automotive Electrical Systems

Course Title
Automotive Electrical Systems

Academic Level
Undergraduate

Description
An overview of automotive electrical systems including topics in operational theory, testing, diagnosis, and repair of, charging and starting systems, and electrical accessories. Emphasis on electrical principles schematic diagrams, and service manuals. May be taught manufacturer specific.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
AUMT1310 - Automotive Brake Systems

Course Title
Automotive Brake Systems

Academic Level
Undergraduate

Description
Operation and repair of drum/disc type brake systems. Topics include brake theory, diagnosis, and repair of power, manual, anti-lock brake systems, and parking brakes. May be taught with manufacturer specific instructions.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

AUMT1312 - Basic Automotive Service

Course Title
Basic Automotive Service

Academic Level
Undergraduate

Description
Basic automotive service. Includes compliance with safety and hazardous material handling procedures and maintenance of shop equipment.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
AUMT1319 - Automotive Engine Repair

**Course Title**
Automotive Engine Repair

**Academic Level**
Undergraduate

**Description**
Fundamentals of engine operation, diagnosis and repair. Emphasis on identification, inspection, measurements, disassembly, repair, and reassembly of the engine. May be taught manufacturer specific.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3

AUMT1345 - Automotive Climate Control Systems

**Course Title**
Automotive Climate Control Systems

**Academic Level**
Undergraduate

**Description**
Diagnosis and repair of manual/electronic climate control systems. Includes the refrigeration cycle and EPA guidelines for refrigerant handling. May be taught manufacturer specific.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3

**Prerequisites**
- Complete all of the following
  - Complete the following:
    - AUMT1307 - Automotive Electrical Systems (3)
  - Complete at least 1 of the following:
    - AUMT1201 - Introduction and Theory of Automotive Technology (2)
    - AUMT1305 - Introduction to Automotive Technology (3)

**Corequisites**
- Complete the following:
  - AUMT1307 - Automotive Electrical Systems (3)
AUMT1380 - Cooperative Education - Automobile/Automotive Mechanics Technology/Technician

Course Title
Cooperative Education - Automobile/Automotive Mechanics Technology/Technician

Academic Level
Undergraduate

Description
Career-related activities encountered in the student's area of specialization offered through an individualized agreement among the college, employer, and student. Under the supervision of the college and the employer, the student combines classroom learning with work experience. Includes a lecture component.

AUMT1410 - Automotive Brake Systems
Course Title
Automotive Brake Systems

Academic Level
Undergraduate

Description
Operation and repair of drum/disc type brake systems. Topics include brake theory, diagnosis, and repair of power, manual, anti-lock brake systems, and parking brakes. May be taught with manufacturer specific instructions.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4

AUMT1416 - Automotive Suspension and Steering Systems
Course Title
Automotive Suspension and Steering Systems

Academic Level
Undergraduate

Description
Diagnosis and repair of automotive suspension and steering systems including electronically controlled systems. Includes component repair, alignment procedures and tire and wheel service. May be taught manufacturer specific.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4
AUMT1419 - Automotive Engine Repair

Course Title
Automotive Engine Repair

Academic Level
Undergraduate

Description
Fundamentals of engine operation, diagnosis and repair. Emphasis on identification, inspection, measurements, and disassembly, repair, and reassembly of the engine. May be taught manufacturer specific.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4

Prerequisites
- Complete the following:
  - AUMT1305 - Introduction to Automotive Technology (3)

AUMT1471 - Introduction and Theory of Tesla Vehicles

Course Title
Introduction and Theory of Tesla Vehicles

Academic Level
Undergraduate

Description
This course is intended to educate the entry-level technician to the Tesla Motors advanced automotive technology. Topics studied will include, but not limited to: safety when working with or around high voltage systems, basic electrical systems, basic vehicle service procedures, and applying soft skills used in the Tesla automotive field.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4
AUMT1472 - Automotive Electrical, Chassis, Driver Assist Systems Theory

Course Title
Automotive Electrical, Chassis, Driver Assist Systems Theory

Academic Level
Undergraduate

Description
This course is intended to educate the entry-level technician to the Tesla Motors advanced automotive technology. Topics studied will include, but not limited to: safety when working with or around high voltage systems, regeneration braking, electric vehicle applications and their integrated systems.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4

AUMT1473 - Automotive Electronics Theory

Course Title
Automotive Electronics Theory

Academic Level
Undergraduate

Description
This course is intended to educate the entry-level technician to the Tesla Motors advanced automotive technology. Topics studied will include, but not limited to: safety when working with or around high voltage systems, inverter power transfer, battery technologies, battery management systems, High Voltage Bus & Charging, Pack Connector & Penthouse controls and Autonomous technology.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4
AUMT1474 - Infotainment Systems and Service Center Skills

Course Title
Infotainment Systems and Service Center Skills

Academic Level
Undergraduate

Description
This course is intended to educate the entry-level technician to the Tesla Motors advanced automotive technology. Topics studied will include, but not limited to: safety when working with or around high voltage systems, infotainment systems and subsystems. Work activities at the Tesla Service Center.

AUMT2301 - Automotive Management

Course Title
Automotive Management

Academic Level
Undergraduate

Description
Study of human and customer relations, and customer satisfaction in the automotive service industry. Emphasis on management and building relationships between the service department and the customer.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3
AUMT2302 - Automotive Compression Ignition Engines & Fuel Systems

Course Title
Automotive Compression Ignition Engines & Fuel Systems

Academic Level
Undergraduate

Description
Diagnosis and repair of modern light-duty automotive compression ignition engines and related systems. Includes the use of advanced engine performance diagnostic equipment.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - AUMT2417 - Automotive Engine Performance Analysis I (4)

AUMT2307 - Hybrid Systems Diagnostics

Course Title
Hybrid Systems Diagnostics

Academic Level
Undergraduate

Description
An advanced study of hybrid vehicles and the unique characteristics of hybrid systems. Includes hybrid safety procedures and diagnosis and repair of hybrid systems.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - AUMT2413 - Automotive Drive Train and Axles (4)
AUMT2310 - Automotive Service Consultant

Course Title
Automotive Service Consultant

Academic Level
Undergraduate

Description
Automotive service consulting skills and procedures. Includes vehicle identification, product knowledge, shop operations, warranty service contracts, communications, customer relations, internal relations, and sales skills. Emphasizes courtesy, professionalism, and communications.

Lecture Hours
2

Lab Hours
2

Credits
3

Semester Credit Hours
3

AUMT2313 - Automotive Drive Train and Axles

Course Title
Automotive Drive Train and Axles

Academic Level
Undergraduate

Description
A study of automotive clutches, clutch operation devices, manual transmissions/ transaxles, and differentials with emphasis on diagnosis and repair. May be taught with manufacturer specific instructions.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
AUMT2321 - Automotive Electrical Diagnosis and Repair

Course Title
Automotive Electrical Diagnosis and Repair

Academic Level
Undergraduate

Description
Repair of automotive electrical subsystems, lighting, instrumentation, and accessories. Emphasis on accurate diagnosis and proper repair methods using various troubleshooting skills and techniques. May be taught manufacturer specific.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

AUMT2328 - Automotive Service

Course Title
Automotive Service

Academic Level
Undergraduate

Description
Mastery of automotive service including competencies covered in related courses. May be taught manufacturer specific.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - AUMT2413 - Automotive Drive Train and Axles (4)
  - AUMT2417 - Automotive Engine Performance Analysis I (4)
  - AUMT2321 - Automotive Electrical Diagnosis and Repair (3)
AUMT2337 - Automotive Electronics

**Course Title**
Automotive Electronics

**Academic Level**
Undergraduate

**Description**
Study of electronic principles applied to microcomputers and communication systems. Includes digital fundamentals, and use of electronic test equipment. May be taught manufacturer specific.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3

**Prerequisites**
- Complete the following:
  - AUMT2321 - Automotive Electrical Diagnosis and Repair (3)

AUMT2357 - Automotive Alternative Fuels

**Course Title**
Automotive Alternative Fuels

**Academic Level**
Undergraduate

**Description**
A study of the composition and use of various alternative automobile fuels including retrofit procedures and applications, emission standards, availability, and cost effectiveness. Overview of federal and state regulations concerning fuels.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

AUMT2417 - Automotive Engine Performance Analysis I

Course Title
Automotive Engine Performance Analysis I

Academic Level
Undergraduate

Description
Theory, operation, diagnosis of drivability concerns, and repair of ignition and fuel delivery systems. Use of current engine performance diagnostic equipment. May be taught with manufacturer specific instructions.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4

Prerequisites
- Complete all of the following
  - Complete at least 3 credits from the following:
    - AUMT1201 - Introduction and Theory of Automotive Technology (2)
    - AUMT1305 - Introduction to Automotive Technology (3)
  - Complete the following:
    - AUMT1307 - Automotive Electrical Systems (3)
    - AUMT1419 - Automotive Engine Repair (4)

Corequisites
- Complete the following:
  - AUMT1419 - Automotive Engine Repair (4)
AUMT2425 - Automotive Automatic Transmission and Transaxle

Course Title
Automatic Transmission and Transaxle

Academic Level
Undergraduate

Description
A study of the operation, hydraulic circuits and electronic controls of modern automatic transmissions and automatic transaxles. Diagnosis, disassembly, and assembly procedures with emphasis on the use of special tools and repair techniques. May be taught manufacturer specific.

Lecture Hours
2

Lab Hours
6

AERM1112 - Aviation Drawings

Course Title
Aviation Drawings

Academic Level
Undergraduate

Description
Fundamentals of aviation drawings applied to aircraft principles and operations as required by the Federal Aviation Administration for airframe and powerplant mechanics.

Lecture Hours
0

Lab Hours
2

Credits
1

Semester Credit Hours
1
AERM1153 - Aircraft Welding

Course Title
Aircraft Welding

Academic Level
Undergraduate

Description
Skill development in repair procedures for steel, magnesium, brass, and aluminum materials. Includes the selection and application of appropriate methods of welding, brazing, and soldering. Fundamentals of safety procedures also addressed.

Lecture Hours
0

Lab Hours
2

Credits
1

Semester Credit Hours
1

Prerequisites
- Complete the following:
  - AERM1203 - Shop Practices (2)

AERM1203 - Shop Practices

Course Title
Shop Practices

Academic Level
Undergraduate

Description
An introduction to shop safety, the correct use of hand tools, equipment and precision measurement, identification of aircraft hardware, and the fabrication of fluid lines and tubing. Emphasis on procedures for testing, heat treating, and inspection of aircraft structures.

Lecture Hours
1

Lab Hours
4

Credits
2

Semester Credit Hours
2
AERM1205 - Weight and Balance
Course Title
Weight and Balance

Academic Level
Undergraduate

Description
An introduction to Federal Aviation Administration (FAA) required subjects relating to the weighing of aircraft, the performance of weight and balance calculations, and appropriate maintenance record entries.

Lecture Hours
1

Lab Hours
2

Credits
2

Semester Credit Hours
2

AERM1208 - Federal Aviation Regulations
Course Title
Federal Aviation Regulations

Academic Level
Undergraduate

Description
A course in the use and understanding of Federal Aviation Administration (FAA) and aircraft manufacturers' publications, forms, and records; and the exercise of mechanic privileges within prescribed limitations.

Lecture Hours
1

Lab Hours
4

Credits
2

Semester Credit Hours
2
AERM1210 - Ground Operations

Course Title
Ground Operations

Academic Level
Undergraduate

Description
An introductory course in fuels, servicing methods, safety procedures, aircraft movement, securing and operations of aircraft, external power equipment, aircraft cleaning, and corrosion control.

Lecture Hours
1

Lab Hours
3

Credits
2

Semester Credit Hours
2

AERM1240 - Aircraft Propellers

Course Title
Aircraft Propellers

Academic Level
Undergraduate

Description
Fundamentals of propeller design, function, and construction. Skill development in inspection, servicing, and repair of fixed-pitch, constant-speed, and feathering propellers and governing systems. Instruction in removal, balancing, and installation of propellers and fundamentals of safety are also addressed.

Lecture Hours
1

Lab Hours
4

Credits
2

Semester Credit Hours
2

Prerequisites
- Complete at least 1 of the following:
  - AERM1109 - Aviation Physics (1)
  - AERM1315 - Aviation Science (3)
AERM1241 - Wood, Fabric, and Finishes

Course Title
Wood, Fabric, and Finishes

Academic Level
Undergraduate

Description
A course in the use and care of various covering materials, finishes, and wood structures including approved methods and procedures. Safety also addressed.

Lecture Hours
1

Lab Hours
3

Credits
2

Semester Credit Hours
2

AERM1243 - Instruments and Navigation/Communication

Course Title
Instruments and Navigation/Communication

Academic Level
Undergraduate

Description
A study of aircraft instruments and electronic flight instrument systems including testing and installing instruments; inspecting, checking, and troubleshooting navigation and communication systems; and inspecting and repairing antennas and electronic equipment installations.

Lecture Hours
1

Lab Hours
2

Credits
2

Semester Credit Hours
2

Prerequisites
- Complete at least 1 of the following:
  - AERM1314 - Basic Electricity (3)
  - AERM1414 - Basic Electricity (4)
AERM1247 - Airframe Auxiliary Systems

Course Title
Airframe Auxiliary Systems

Academic Level
Undergraduate

Description
A comprehensive study of airframe auxiliary systems including cabin atmospheric control systems, ice and rain control systems for aircraft and engines, and fire detection and protection systems. Fundamentals of safety procedures also addressed.

Lecture Hours
1

Lab Hours
4

Credits
2

Semester Credit Hours
2

AERM1253 - Aircraft Welding

Course Title
Aircraft Welding

Academic Level
Undergraduate

Description
Skill development in repair procedures for steel, magnesium, brass, and aluminum materials. Includes the selection and application of appropriate methods of welding, brazing, and soldering. Fundamentals of safety procedures also addressed.

Lecture Hours
1

Lab Hours
2

Credits
2

Semester Credit Hours
2
AERM1254 - Aircraft Composites

Course Title
Aircraft Composites

Academic Level
Undergraduate

Description
Comprehensive concepts of the inspection and repair of composite, fabric, core, and laminated structural materials including doors, windows, bonded structures, and interior furnishings. Safety procedures to include the handling and storage of composite materials will also be addressed.

Lecture Hours
1

Lab Hours
4

Credits
2

Semester Credit Hours
2

AERM1314 - Basic Electricity

Course Title
Basic Electricity

Academic Level
Undergraduate

Description
A study of aircraft electrical systems and their requirements including the use of ammeter, voltmeter, and ohmmeter; series and parallel circuits; inductance and capacitance; magnetism; converting alternating current (AC) to direct current (DC); controlling devices; maintenance and servicing of aircraft batteries; and reading and interpreting aircraft electrical diagrams to include solid state devices and logic functions. Fundamentals of electrical safety also addressed.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
AERM1315 - Aviation Science

Course Title
Aviation Science

Academic Level
Undergraduate

Description
Fundamentals of mathematics, physics, and drawings as they apply to aircraft principles and operations as required by the Federal Aviation Administration (FAA) for airframe and powerplant mechanics.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

AERM1340 - Aircraft Propellers

Course Title
Aircraft Propellers

Academic Level
Undergraduate

Description
Fundamentals of propeller design, function, and construction. Skill development in inspection, servicing, and repair of fixed-pitch, constant-speed, and feathering propellers and governing systems. Instruction in removal, balancing, and installation of propellers and fundamentals of safety are also addressed.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
AERM1343 - Instruments and Navigation/Communication

**Course Title**

Instruments and Navigation/Communication

**Academic Level**

Undergraduate

**Description**

A study of aircraft instruments and electronic flight instrument systems including testing and installing instruments; inspecting, checking, and troubleshooting navigation and communication systems; and inspecting and repairing antennas and electronic equipment installations.

**Lecture Hours**

2

**Lab Hours**

2

**Credits**

3

**Semester Credit Hours**

3

---

AERM1344 - Aircraft Reciprocating Engines

**Course Title**

Aircraft Reciprocating Engines

**Academic Level**

Undergraduate

**Description**

A study of reciprocating engines and their development, operating principles, and theory. Instruction in engine instruments, lubricating, and exhaust systems. Fundamentals of safety will also be addressed.

**Lecture Hours**

2

**Lab Hours**

4

**Credits**

3

**Semester Credit Hours**

3
AERM1345 - Airframe Electrical Systems

Course Title
Airframe Electrical Systems

Academic Level
Undergraduate

Description
A study of airframe electrical systems including installation, removal, disassembly, and repair of electrical components and related wiring. Fundamentals of electrical safety also addressed.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete at least 1 of the following:
  - AERM1314 - Basic Electricity (3)
  - AERM1414 - Basic Electricity (4)
AERM1347 - Airframe Auxiliary Systems

Course Title

Airframe Auxiliary Systems

Academic Level

Undergraduate

Description

Skill development in repair procedures for steel, magnesium, brass, and aluminum materials. Includes the selection and application of appropriate methods of welding, brazing, and soldering. Fundamentals of safety procedures also addressed.

Lecture Hours

1

Lab Hours

5

Credits

3

Semester Credit Hours

3

Prerequisites

- Complete 1 of the following
  - Complete the following:
    - AERM1315 - Aviation Science (3)
    - AERM1314 - Basic Electricity (3)
  - Complete at least 1 of the following:
    - AERM1109 - Aviation Physics (1)
    - AERM1414 - Basic Electricity (4)

AERM1350 - Landing Gear Systems

Course Title

Landing Gear Systems

Academic Level

Undergraduate

Description

General principles of inspection, servicing, overhaul, and repair of fixed and retractable landing gear systems and the operation and repair of position and warning systems. Includes coverage of systems, components, operation, and fundamentals of safety procedures.

Lecture Hours

2

Lab Hours

3

Credits

3

Semester Credit Hours

3
AERM1351 - Aircraft Turbine Engine Theory

Course Title
Aircraft Turbine Engine Theory

Academic Level
Undergraduate

Description
General principles of theory, history, and servicing of turbine engines to include lubrication, instrumentation, auxiliary power units, and exhaust systems. Fundamentals of safety procedures are also addressed.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete at least 1 of the following:
  - AERM1109 - Aviation Physics (1)
  - AERM1315 - Aviation Science (3)
AERM1352 - Aircraft Sheet Metal

Course Title
Aircraft Sheet Metal

Academic Level
Undergraduate

Description
Skill development in inspection and repair of sheet metal structures including forming, lay out, and bending of sheet metal and identification, selection, and installation of rivets and fasteners. Fundamentals of safety procedures also addressed.

Lecture Hours
1

Lab Hours
7

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete all of the following
  - Complete the following:
    - AERM1107 - Aviation Mathematics (1)
    - AERM1112 - Aviation Drawings (1)
    - AERM1203 - Shop Practices (2)
  - Complete at least 1 of the following:
    - AERM1203 - Shop Practices (2)
    - AERM1315 - Aviation Science (3)
AERM1356 - Aircraft Powerplant Electrical

**Course Title**
Aircraft Powerplant Electrical

**Academic Level**
Undergraduate

**Description**
General principles of theory, operation, and maintenance of powerplant electrical systems including ignition, starting, and fire protection systems. Fundamentals of safety procedures will also be addressed.

**Lecture Hours**
1

**Lab Hours**
7

**Credits**
3

**Semester Credit Hours**
3

**Prerequisites**
- Complete at least 1 of the following:
  - AERM1314 - Basic Electricity (3)
  - AERM1414 - Basic Electricity (4)

AERM1357 - Fuel Metering and Induction Systems

**Course Title**
Fuel Metering and Induction Systems

**Academic Level**
Undergraduate

**Description**
Skill development in fuel metering and induction systems used on reciprocating and turbine engines including fuel metering systems, carburetors, induction systems, heat exchangers, and cooling systems. Fundamentals of safety procedures will also be addressed.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3

**Prerequisites**
- Complete at least 1 of the following:
  - AERM1109 - Aviation Physics (1)
  - AERM1315 - Aviation Science (3)
AERM1414 - Basic Electricity

Course Title
Basic Electricity

Academic Level
Undergraduate

Description
A study of aircraft electrical systems and their voltmeter, and ohmmeter; series and parallel circuits; inductance and capacitance; magnetism; converting alternating current (AC) to direct current (DC); controlling devices; maintenance and servicing of aircraft batteries; and reading and interpreting aircraft electrical diagrams to include solid state devices and logic functions. Fundamentals of safety also addressed.

No Rules
Grand Total Credits: 0

AERM1444 - Aircraft Reciprocating Engines

Course Title
Aircraft Reciprocating Engines

Academic Level
Undergraduate

Description
Reciprocating engines, their development, operating principles, and theory. Includes engine instruments, lubrication, and exhaust systems. Also addresses fundamentals of safety.

Lecture Hours
3

Lab Hours
4

Credits
4

Semester Credit Hours
4

Prerequisites
- Complete at least 1 of the following:
  - AERM1109 - Aviation Physics (1)
  - AERM1315 - Aviation Science (3)
AERM1449 - Hydraulic, Pneumatic, and Fuel Systems

Course Title
Hydraulic, Pneumatic, and Fuel Systems

Academic Level
Undergraduate

Description
Skill development in inspecting, servicing, and maintaining aircraft fluid systems including hydraulics, pneumatics, and fuel. Application of concepts through detailed maintenance procedures. Fundamentals of safety procedures also addressed.

Lecture Hours
3

Lab Hours
4

Credits
4

Semester Credit Hours
4

Prerequisites
♦ Complete at least 1 of the following:
  ♦ AERM1109 - Aviation Physics (1)
  ♦ AERM1315 - Aviation Science (3)

AERM1452 - Aircraft Sheet Metal

Course Title
Aircraft Sheet Metal

Academic Level
Undergraduate

Description
Skill development in inspection and repair of sheet metal structures including forming, lay out, and bending of sheet metal and identification, selection, and installation of rivets and fasteners. Fundamentals of safety procedures also addressed.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4
AERM1456 - Aircraft Powerplant Electrical

Course Title
Aircraft Powerplant Electrical

Academic Level
Undergraduate

Description
General principles of theory, operation, and maintenance of powerplant electrical systems including ignition, starting, and fire protection systems. Fundamentals of safety procedures will also be addressed.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4

AERM2230 - FAA Review - Airframe

Course Title
FAA Review - Airframe

Academic Level
Undergraduate

Description
Review of Federal Aviation Administration subject matter in the General and Airframe curricula with an emphasis on enhancing knowledge and physical skills in preparing for the FAA-required computer, oral and practical examinations.

Lecture Hours
1

Lab Hours
3

Credits
2

Semester Credit Hours
2
AERM2231 - Airframe Inspection

Course Title
Airframe Inspection

Academic Level
Undergraduate

Description
In-depth coverage of methods and procedures to perform airframe conformity and air worthiness inspections (including One Hundred Hour Inspections) in accordance with Federal Aviation Regulations and manufacturer's service information. Safety procedures will also be addressed.

Lecture Hours
1

Lab Hours
4

Credits
2

Semester Credit Hours
2

AERM2234 - FAA Review - Powerplant

Course Title
FAA Review - Powerplant

Academic Level
Undergraduate

Description
Federal Aviation Administration subject matter in the General and Powerplant curricula with an emphasis on enhancing knowledge and physical skills in preparing for the FAA-required computer, oral, and powerplant examinations.

Lecture Hours
1

Lab Hours
3

Credits
2

Semester Credit Hours
2
AERM2333 - Assembly and Rigging

Course Title
Assembly and Rigging

Academic Level
Undergraduate

Description
A comprehensive study of the assembly and rigging of fixed and rotary-wing aircraft including structural alignment, balancing and rigging of control systems, and assembly of aircraft components. Fundamentals of safety procedures are also addressed.

Lecture Hours
2

Lab Hours
3

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete at least 1 of the following:
  - AERM1109 - Aviation Physics (1)
  - AERM1315 - Aviation Science (3)

AERM2341 - Powerplant and Auxiliary Power Units

Course Title
Powerplant and Auxiliary Power Units

Academic Level
Undergraduate

Description
Advanced concepts of auxiliary power unit (APU) and powerplant systems and components. Safety procedures will also be addressed.

Lecture Hours
2

Lab Hours
2

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete at least 1 of the following:
  - AERM1109 - Aviation Physics (1)
  - AERM1315 - Aviation Science (3)
AERM2351 - Aircraft Turbine Engine Overhaul

Course Title
Aircraft Turbine Engine Overhaul

Academic Level
Undergraduate

Description
Comprehensive study in inspection, disassembly, reassembly, and replacement of gas turbine engines, sections, and components including operational troubleshooting, analysis, and safety.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
◆ Complete the following:
   ◆ AERM1351 - Aircraft Turbine Engine Theory (3)

AERM2352 - Aircraft Powerplant Inspection

Course Title
Aircraft Powerplant Inspection

Academic Level
Undergraduate

Description
In depth coverage of methods and procedures to perform powerplant conformity and airworthiness inspections (including one hundred hour inspections) in accordance with Federal Aviation Regulations and manufacturer's information. Safety procedures will also be addressed.

Lecture Hours
2

Lab Hours
3

Credits
3

Semester Credit Hours
3
AERM2447 - Aircraft Reciprocating Engine Overhaul

**Course Title**
Aircraft Reciprocating Engine Overhaul

**Academic Level**
Undergraduate

**Description**
A comprehensive study of reciprocating engine overhaul including measurement and inspection procedures. Instruction in removal and installation, inspections, checks, servicing, repair of engines, and safety procedures will also be addressed.

**Lecture Hours**
2

**Lab Hours**
6

**Credits**
4

**Semester Credit Hours**
4

**Prerequisites**
- Complete the following:
  - AERM1444 - Aircraft Reciprocating Engines (4)

---

Aviation/Pilot, Flight Instruc

AIRP1015 - Private Flight

**Course Title**
Private Flight

**Academic Level**
Continuing Education

**Description**
Flight training to prepare the student for the completion of the Federal Aviation Administration private pilot certificate, including dual and solo flight in the areas of maneuvers and cross-country navigation.

**Lecture Hours**
2

**Lab Hours**
0

**Semester Credit Hours**
0
AIRP1017 - Private Pilot Ground School
Course Title
Private Pilot Ground School

Academic Level
Continuing Education

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0

AIRP1175 - Intermediate Flight
Course Title
Intermediate Flight

Academic Level
Undergraduate

Description
Provides students with flight hours and skills necessary to fulfill solo cross-country hours required for the Federal Aviation Administration Commercial Pilot, single engine land, airplane certificate.

Lecture Hours
0

Lab Hours
3

Credits
1

Semester Credit Hours
1

Prerequisites
• Complete the following:
  • AIRP1215 - Private Flight  (2)
AIRP1215 - Private Flight

Course Title
Private Flight

Academic Level
Undergraduate

Description
Flight and ground training to prepare the student for the completion of the Federal Aviation Administration private pilot certificate.

Lecture Hours
0

Lab Hours
5

Credits
2

Semester Credit Hours
2

AIRP1255 - Intermediate Flight

Course Title
Intermediate Flight

Academic Level
Undergraduate

Description
Provides students with flight hours and skills necessary to fulfill solo cross-country hours required for the Federal Aviation Administration Commercial Pilot, single engine land, airplane certificate.

Lecture Hours
0

Lab Hours
5

Credits
2

Semester Credit Hours
2
AIRP1301 - Air Navigation
Course Title
Air Navigation

Academic Level
Undergraduate

Description
Instruction in Visual Flight rules navigation in the National Airspace System. Topics include, flight computers, plotters, and navigation logs and publications. Qualifies as part of a program leading to Federal Aviation Administration Private Pilot certification.

Lecture Hours
2

Lab Hours
2

Credits
3

Semester Credit Hours
3

AIRP1307 - Aviation Meteorology
Course Title
Aviation Meteorology

Academic Level
Undergraduate

Description
In-depth coverage of meteorological phenomena affecting aircraft flight. Topics include basic concepts of aviation meteorology in the study of temperature, pressure, moisture, stability, clouds, air masses, fronts, thunderstorms, icing, and fog. Also includes analysis and use of weather data for flight planning.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3
AIRP1341 - Advanced Air Navigation

Course Title
Advanced Air Navigation

Academic Level
Undergraduate

Description
Skill development in advanced airplane systems and performance including radio navigation and cross-country flight planning. Includes an introduction to instrument flight operations and navigation. This course may be used as part of a program leading to Federal Aviation Administration certification.

Lecture Hours
2

Lab Hours
2

Credits
3

Semester Credit Hours
3

AIRP1343 - Aerodynamics

Course Title
Aerodynamics

Academic Level
Undergraduate

Description
Study of the general principles of the physical laws of flight. Topics include physical terms and the four forces of flight: lift, weight, thrust, and drag. Aircraft design, stability control, and high-speed flight characteristics are also included.

Lecture Hours
2

Lab Hours
2

Credits
3

Semester Credit Hours
3
AIRP1345 - Aviation Safety

Course Title
Aviation Safety

Academic Level
Undergraduate

Description
A study of the fundamentals essential to the safety of flight. A survey of the aviation industry including decision-making factors, accident reporting, accident investigation, air traffic systems, and aircraft technologies.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3

AIRP1373 - Helicopter Aerodynamics

Course Title
Helicopter Aerodynamics

Academic Level
Undergraduate

Description

Lecture Hours
2

Lab Hours
2

Credits
3

Semester Credit Hours
3
AIRP1417 - Private Pilot Ground School

Course Title
Private Pilot Ground School

Academic Level
Undergraduate

Description
Basic ground school for the Federal Aviation Administration Private Pilot Certificate, providing the student with the necessary aeronautical knowledge that can be used for private pilot certification. Topics include principles of flight, radio procedures, weather, navigation, aerodynamics, and Federal Aviation Administration regulations.

Lecture Hours
3

Lab Hours
2

Credits
4

Semester Credit Hours
4

AIRP1451 - Instrument Ground School

Course Title
Instrument Ground School

Academic Level
Undergraduate

Description
A study of basic instrument radio and navigation fundamentals used in instrument flight. Topics include a description and practical use of navigation systems and instruments, charts used for instrument flight, and Federal Aviation Administration regulations. Qualifies as part of a program leading to Federal Aviation Administration certification.

Lecture Hours
3

Lab Hours
2

Credits
4

Semester Credit Hours
4
AIRP1471 - Helicopter Instrument Ground School

**Course Title**
Helicopter Instrument Ground School

**Academic Level**
Undergraduate

**Description**
A study of basic instrument radio and navigation fundamentals used in instrument helicopter flight. Topics include a description and practical use of navigation systems and instruments, charts used for instrument flight, and Federal Aviation Administration regulations. Qualifies as part of a program leading to Federal Aviation Administration certification.

**Lecture Hours**
3

**Lab Hours**
2

**Credits**
4

**Semester Credit Hours**
4

AIRP2039 - Commercial Flight

**Course Title**
Commercial Flight

**Academic Level**
Continuing Education

**Description**
Flight instruction necessary to qualify for the Federal Aviation Administration Commercial Pilot Certificate. Instruction includes both dual and solo flight training to prepare the student for mastery of all commercial pilot maneuvers.

**Lecture Hours**
2

**Lab Hours**
0

**Semester Credit Hours**
0
AIRP2043 - Flight Instructor - Multiengine Airplane

**Course Title**
Flight Instructor - Multiengine Airplane

**Academic Level**
Continuing Education

**Description**
Flight instruction necessary to qualify for the Federal Aviation Administration Flight Instructor - Multiengine Airplane Rating. Includes combined ground and flight instruction and analysis of flight maneuvers.

**Lecture Hours**
2

**Lab Hours**
0

**Semester Credit Hours**
0

AIRP2050 - Instrument Flight

**Course Title**
Instrument Flight

**Academic Level**
Continuing Education

**Description**
Preparation for completion of the Federal Aviation Administration Instrument Pilot Rating with mastery of all instrument flight procedures.

**Lecture Hours**
2

AIRP2172 - Flight Instructor-Instrument Helicopter

Course Title
Flight Instructor-Instrument Helicopter

Academic Level
Undergraduate

Description
Skill development in the fundamentals of teaching and learning in a helicopter oriented environment. Introduction to the techniques of instruction and analysis of helicopter flight maneuvers. Topics include helicopter flight instructor responsibilities and Federal Aviation Regulations relating to the instructor rating.

Lecture Hours
0

Lab Hours
3

Credits
1

Semester Credit Hours
1

AIRP2175 - Human Factors in Aviation

Course Title
Human Factors in Aviation

Academic Level
Undergraduate

Description
Instruction in flight physiology, the decision-making process, pilot health maintenance, psychological aspects of flight, human behavior as related to the aircraft flight deck, and aeromedical information of significance to flight crews.

Lecture Hours
1

Lab Hours
0

Credits
1

Semester Credit Hours

AIRP2236 - Certified Flight Instructor - Flight

Course Title
Certified Flight Instructor - Flight

Academic Level
Undergraduate

Description
Flight and ground instruction required to qualify for the Federal Aviation Administration Certified Flight Instructor - Airplane certificate.

Lecture Hours
0

Lab Hours
5

Credits
2

Semester Credit Hours
2

Prerequisites
Complete the following:
- AIRP2239 - Commercial Flight (2)

AIRP2239 - Commercial Flight

Course Title
Commercial Flight

Academic Level
Undergraduate

Description
Flight instruction necessary to qualify for the Federal Aviation Administration Commercial Pilot Certificate. Instruction includes both dual and solo flight training to prepare the student to perform commercial pilot maneuvers.

Lecture Hours
0

Lab Hours
5

Credits
2

Semester Credit Hours
2

Prerequisites
Complete the following:
- AIRP2250 - Instrument Flight (2)
AIRP2242 - Flight Instrument-Instruction Airplane

Course Title
Flight Instrument-Instruction Airplane

Academic Level
Undergraduate

Description
Flight and ground instruction required to qualify for the Federal Aviation Administration Certified Flight Instructor--Instrument Airplane certificate.

Lecture Hours
0

Lab Hours
5

Credits
2

Semester Credit Hours
2

AIRP2250 - Instrument Flight

Course Title
Instrument Flight

Academic Level
Undergraduate

Description
Preparation for completion of the Federal Aviation Administration Instrument Pilot Rating with mastery of all instrument flight procedures.

Lecture Hours
0

Lab Hours
5

Credits
2

Semester Credit Hours
2

Prerequisites
- Complete the following:
  - AIRP1215 - Private Flight (2)
AIRP2251 - Multiengine Flight

Course Title
Multiengine Flight

Academic Level
Undergraduate

Description
Preparation for the multiengine class rating which will be added to a current pilot certificate. Includes explanation and demonstration of all required Federal Aviation Administration normal and emergency operations and procedures.

Lecture Hours
0

Lab Hours
5

Credits
2

Semester Credit Hours
2

Prerequisites
- Complete the following:
  - AIRP2239 - Commercial Flight (2)

AIRP2273 - Helicopter Commercial Flight

Course Title
Helicopter Commercial Flight

Academic Level
Undergraduate

Description
Helicopter flight instruction necessary to qualify for the Federal Aviation Administration Commercial Pilot Certificate. Instruction includes both dual and solo flight training to prepare the student to perform commercial helicopter pilot maneuvers.

Lecture Hours
0

Lab Hours
5

Credits
2

Semester Credit Hours
2
AIRP2274 - Helicopter Certified Flight Instructor

Course Title
Helicopter Certified Flight Instructor

Academic Level
Undergraduate

Description
Helicopter flight and ground school instruction required to qualify for the Federal Aviation Administration Certified Flight Instructor-Helicopter certificate.

Lecture Hours
0

Lab Hours
5

Credits
2

Semester Credit Hours
2

AIRP2275 - Agricultural Aircraft Operations Flight

Course Title
Agricultural Aircraft Operations Flight

Academic Level
Undergraduate

Description
Flight and ground training to prepare the student for safe agricultural aerial application operations. The student will meet requirements for 14 CFR 137.19(e) upon completion of the course.

Lecture Hours
0

Lab Hours
5

Credits
2

Semester Credit Hours
2
AIRP2331 - Advanced Meteorology

Course Title
Advanced Meteorology

Academic Level
Undergraduate

Description
Preparation for advanced aviation students to apply knowledge of varying meteorological factors including weather hazards to flight, techniques for minimizing weather hazards, and aviation weather services.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3

AIRP2333 - Aircraft Systems

Course Title
Aircraft Systems

Academic Level
Undergraduate

Description
Study of the general principles, operation, and application of pneumatic, hydraulic, electrical, fuel, environmental, protection, and warning systems. Emphasis on subsystems and control systems.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3
AIRP2337 - Commercial Ground School

Course Title
Commercial Ground School

Academic Level
Undergraduate

Description
A study of advanced aviation topics used for Federal Aviation Administration certification at the commercial pilot level. Includes preparation for the Federal Aviation Administration Commercial Airplane Practical test.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3

AIRP2349 - Instructor Ground School

Course Title
Instructor Ground School

Academic Level
Undergraduate

Description
Skill development in the fundamentals of teaching and learning in an aviation-oriented environment. Introduction to the techniques of instruction and analysis of flight maneuvers. Topics include flight instructor responsibilities and Federal Aviation Regulations relating to the instructor rating.

Lecture Hours
2

Lab Hours
2

Credits
3

Semester Credit Hours
3
AIRP2355 - Propulsion Systems

Course Title
Propulsion Systems

Academic Level
Undergraduate

Description
In-depth coverage of aircraft engine theory and principles of operation of various types of aircraft engines. Topics include propellers, superchargers, engine accessories, controls, and instrumentation.

Lecture Hours
3

Lab Hours
1

Credits
3

Semester Credit Hours
3

AIRP2357 - Turbine Aircraft Systems Ground School

Course Title
Turbine Aircraft Systems Ground School

Academic Level
Undergraduate

Description
Instruction in the systems of specific turbine aircraft. Emphasis on the "glass cockpit", auxiliary power, aircraft systems, and the first officer's operational role.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3
**AIRP2370 - Helicopter Systems**

**Course Title**
Helicopter Systems

**Academic Level**
Undergraduate

**Description**
Study of helicopter general principles, operation, and application of pneumatic, hydraulic, electrical, fuel, environmental, protection, and warning systems found in helicopters. Emphasis on subsystems, control, and rotor systems.

**Lecture Hours**
2

**Lab Hours**
2

**Credits**
3

**Semester Credit Hours**
3

**AIRP2371 - Helicopter Instructor Ground School**

**Course Title**
Helicopter Instructor Ground School

**Academic Level**
Undergraduate

**Description**
Skill development in the fundamentals of teaching and learning in a helicopter oriented environment. Introduction to the techniques of instruction and analysis of helicopter flight maneuvers. Topics include helicopter flight instructor responsibilities and Federal Aviation Regulations relating to the instructor rating.

**Lecture Hours**
2

**Lab Hours**
2

**Credits**
3

**Semester Credit Hours**
3
AIRP2374 - Helicopter Instrument Ground School

Course Title
Helicopter Instrument Ground School

Academic Level
Undergraduate

Description
A study of basic instrument radio and navigation fundamentals used in instrument helicopter flight. Topics include a description and practical use of navigation systems and instruments, charts used for instrument flight, and Federal Aviation Administration regulations. Qualifies as part of a program leading to Federal Aviation Administration certification.

Lecture Hours
2

Lab Hours
3

Credits
3

Semester Credit Hours
3

AIRP2375 - Agricultural Aircraft Operations Ground School

Course Title
Agricultural Aircraft Operations Ground School

Academic Level
Undergraduate

Description
A study of aerial application techniques as it applies to aiding the agricultural industry. Topics include aerial application maneuvers, agricultural aviation GPS systems, regulations applicable to aerial application, and aerial application dispersal equipment. Includes preparation for the Texas Department of Agriculture Commercial Pesticide Applicator License exams.

Lecture Hours
3

Lab Hours
1

Credits
3

Semester Credit Hours
3
**AIRP2376 - Helicopter Propulsion Systems**

**Course Title**
- Helicopter Propulsion Systems

**Academic Level**
- Undergraduate

**Description**
- In-depth coverage of aircraft engine theory and principles of operation of various types of helicopter engines. Topics include engine components, rotors, engine accessories, engine controls, and helicopter engine instrumentation to include glass cockpit instrumentation.

**Lecture Hours**
- 3

**AIRP2449 - Instructor Ground School**

**Course Title**
- Instructor Ground School

**Academic Level**
- Undergraduate

**Description**
- Skill development in the fundamentals of teaching and learning in an aviation-oriented environment. Introduction to the techniques of instruction and analysis of flight maneuvers. Preparation for the Federal Aviation Administration Airman Certification Standards for Certified Flight Instructor.

**Lecture Hours**
- 3

**Lab Hours**
- 2

**Avionics**
AVNC1303 - Introduction to Aviation Electronic Systems

**Course Title**
Introduction to Aviation Electronic Systems

**Academic Level**
Undergraduate

**Description**
An introduction to the relationship between aviation electronic systems and aircraft flight and navigational systems with emphasis on the operation and function of the systems.

**Lecture Hours**
3

**Lab Hours**
0

**Credits**
3

**Semester Credit Hours**

AVNC1306 - FAA Regulations for Avionics Certified Repair Station

**Course Title**
FAA Regulations for Avionics Certified Repair Station

**Academic Level**
Undergraduate

**Description**
This course provides practical experience in the day-to-day operations of a Federal Aviation Administration Certified Repair Station. Students will perform tasks which will include completion of repair station and FAA forms and records, maintenance of technical data and servicing equipment.

**Lecture Hours**
3

**Lab Hours**
0

**Credits**

AVNC1343 - Aviation Electrical and Electronic Systems Installation

Course Title
Aviation Electrical and Electronic Systems Installation

Academic Level
Undergraduate

Description
A comprehensive study of and practical experience in the installation of avionic systems in aircraft, mounting electronic equipment, construction and installation of electrical wiring and cables, proper use of tools, selection of materials, and safety.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

AVNC1353 - Operational Testing of Aviation Electronic Systems

Course Title
Operational Testing of Aviation Electronic Systems

Academic Level
Undergraduate

Description

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
AVNC1391 - Installation & Operational Testing of Avionics & Pitot-Static Systems

Course Title
Installation & Operational Testing of Avionics & Pitot-Static Systems

Academic Level
Undergraduate

Description
A practical experience in the planning and execution, and testing of avionics and pitot-static installations. Advanced test equipment will be used where required.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

AVNC2304 - Foundations in Avionics Equipment Component Level Repairs

Course Title
Foundations in Avionics Equipment Component Level Repairs

Academic Level
Undergraduate

Description
In-depth study of common circuit designs found in modern avionics equipment as well as a study of the electronics theory needed to troubleshoot these circuits.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
AVNC2308 - Aviation Electrical and Electronics Systems Installation II

Course Title
Aviation Electrical and Electronics Systems Installation II

Academic Level
Undergraduate

Description
A continuation of AVNC 1343. This course is designed as a study of practical experience in the installation of avionics systems in aircraft, mounting electronic equipment, construction and installation of electrical wiring and cables, proper use of tools, and selection of materials.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

AVNC2345 - Aviation Navigational Equipment Component Level Repair

Course Title
Aviation Navigational Equipment Component Level Repair

Academic Level
Undergraduate

Description
Skills development in component level repair of modern aviation navigational systems including Very High Frequency Omni Range (VOR) and Instrument Landing Systems (ILS). Emphasis on equipment block diagram and specialized test equipment will be covered in detail.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
AVNC2350 - Aviation Pulsed RF Equipment Component Level Repair

Course Title
Aviation Pulsed RF Equipment Component Level Repair

Academic Level
Undergraduate

Description
Skills development in component level repair of modern aviation pulsed Radio Frequency (RF) systems. Emphasis on equipment block diagram and specialized test equipment will be covered.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

AVNC2355 - Advanced Aviation Electronics Troubleshooting

Course Title
Advanced Aviation Electronics Troubleshooting

Academic Level
Undergraduate

Description
A capstone course designed for students to demonstrate acquired knowledge of avionics systems as well as display techniques required to troubleshoot those systems. The student will face component level repair scenarios.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
AVNC2357 - Aviation Communication Component Level Repair

Course Title
Aviation Communication Component Level Repair

Academic Level
Undergraduate

Description
Skills development in component level repair of modern aviation communications and audio equipment. Emphasis on equipment block diagram and specialized test equipment will be covered.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Baker/Pastry Chef

PSTR1301 - Fundamentals of Baking

Course Title
Fundamentals of Baking

Academic Level
Undergraduate

Description
Fundamentals of baking including dough, quick breads, pies, cakes, cookies, and tarts. Instruction in flours, fillings, and ingredients. Topics include baking terminology, tool and equipment use, formula conversions, functions of ingredients, and the evaluation of baked products.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - CHEF1205 - Sanitation and Safety (2)
  - IFWA1205 - Food Service Equipment and Planning (2)
  - IFWA1401 - Food Preparation I (4)
PSTR2431 - Advanced Pastry Shop

Course Title
Advanced Pastry Shop

Academic Level
Undergraduate

Description
A study of classical desserts, French and international pastries, hot and cold desserts, ice creams and ices, chocolate work, and decorations. Emphasis on advanced techniques.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4

Prerequisites
- Complete the following:
  - PSTR1301 - Fundamentals of Baking (3)

Banking / Finance

Biology

BIOL1106 - Biology for Science Majors Laboratory I (lab)

Course Title
Biology for Science Majors Laboratory I (lab)

Academic Level
Undergraduate

Description
This laboratory-based course accompanies Biology 1306, Biology for Science Majors I. Laboratory activities will reinforce the fundamental principles of living organisms, including physical and chemical properties of life, organization, function, evolutionary adaptation, and classification. Study and examination of the concepts of cytology, reproduction, genetics, and scientific reasoning are included.

BIOL1107 - Biology for Science Majors II Lab

Course Title
Biology for Science Majors II Lab

Academic Level
Undergraduate

Description
This laboratory-based course accompanies Biology 1307, Biology for Science Majors II. Laboratory activities will reinforce study of the diversity and classification of life, including animals, plants, protists, fungi, and prokaryotes. Special emphasis will be given to anatomy, physiology, ecology, and evolution of plants and animals.

Lecture Hours

BIOL1111 - General Botany Lab

Course Title
General Botany Lab

Academic Level
Undergraduate

Description
This laboratory-based course accompanies Biology 1311, General Botany. Laboratory activities will reinforce fundamental biological concepts relevant to plant physiology, life cycle, growth and development, structure and function, and cellular and molecular metabolism. The role of plants in the environment, evolution, and phylogeny of major plant groups, algae, and fungi. (This course is intended for science majors.)

Lecture Hours

BIOL1322 - Nutrition & Diet Therapy

Course Title
Nutrition & Diet Therapy

Academic Level
Undergraduate

Description
This course introduces general nutritional concepts in health and disease and includes practical applications of that knowledge. Special emphasis is given to nutrients and nutritional processes including functions, food sources, digestion, absorption, and metabolism. Food safety, availability, and nutritional information including food labels, advertising, and nationally established guidelines are addressed.

BIOL2301 - Anatomy & Physiology I (lecture)

Course Title
Anatomy & Physiology I (lecture)

Academic Level
Undergraduate

Description
Anatomy and Physiology I is the first part of a two course sequence. It is a study of the structure and function of the human body including cells, tissues and organs of the following systems: integumentary, skeletal, muscular, nervous and special senses. Emphasis is on interrelationships among systems and regulation of physiological functions involved in maintaining homeostasis.

BIOL2320 - Microbiology for Non-Science Majors (lecture)

**Course Title**
Microbiology for Non-Science Majors (lecture)

**Academic Level**
Undergraduate

**Description**
This course covers basic microbiology and immunology and is primarily directed at pre-nursing, pre-allied health, and non-science majors. It provides an introduction to historical concepts of the nature of microorganisms, microbial diversity, the importance of microorganisms and acellular agents in the biosphere, and their roles in human and animal diseases. Major topics include bacterial structure as well as growth, physiology, genetics, and biochemistry of microorganisms. Emphasis is on medical microbiology, infectious diseases, and public health.

BIOM1250 - Diagnostic Ultrasound Imaging System

Course Title
Diagnostic Ultrasound Imaging System

Academic Level
Undergraduate

Description
Diagnostic ultrasound imaging systems. Covers basic systems troubleshooting and problem solving.

Lecture Hours
1

Lab Hours
4

Credits
2

Semester Credit Hours
2
BIOM1270 - Shop Skills for Biomedical Equipment Technicians

Course Title
Shop Skills for Biomedical Equipment Technicians

Academic Level
Undergraduate

Description
Skill development in the common repair tools and repair techniques used by the Biomedical Equipment Technician in the healthcare.

Lecture Hours
1

Lab Hours
4

Credits
2

Semester Credit Hours
2

BIOM1291 - Special Topics in Biomedical Engineering-Related Technology/Technician

Course Title
Special Topics in Biomedical Engineering-Related Technology/Technician

Academic Level
Undergraduate

Description
A study of theory, principles and application of the effective administration of technology in the Health care environment with emphasis on the practical understanding of current technology trends and their implications on health care. Topics include codes/standards, computer networks, technology administration/integration and the effective servicing of technology.

Lecture Hours
1

Lab Hours
4

Credits
2

Semester Credit Hours
2
BIOM1309 - Applied Biomedical Equipment Technology

Course Title
Applied Biomedical Equipment Technology

Academic Level
Undergraduate

Description
Introduction to biomedical instrumentation as related to anatomy and physiology. Includes medical devices for monitoring, diagnosis, and treatment of anatomical systems.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

BIOM1315 - Medical Equipment Networks

Course Title
Medical Equipment Networks

Academic Level
Undergraduate

Description
Identification of basic principles of medical equipment networking. Hardware, software, and connectivity issues of medical equipment in healthcare facilities will be covered.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - BIOM1373 - Medical Software and Hardware (3)
BIOM1341 - Medical Circuits/Troubleshooting

Course Title
Medical Circuits/Troubleshooting

Academic Level
Undergraduate

Description
Development of skills in troubleshooting of medical electronic circuits and utilization of test equipment.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - CETT1303 - DC Circuits (3)
  - CETT1305 - AC Circuits (3)

BIOM1350 - Diagnostic Ultrasound Imaging System

Course Title
Diagnostic Ultrasound Imaging System

Academic Level
Undergraduate

Description
Diagnostic ultrasound imaging systems. Covers basic systems troubleshooting and problem solving.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - CETT1303 - DC Circuits (3)
  - CETT1305 - AC Circuits (3)
BIOM1355 - Medical Electronic Applications

Course Title
Medical Electronic Applications

Academic Level
Undergraduate

Description
Presentation of sensors, transducers, and supporting circuits used in medical instrumentation devices.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - BIOM2301 - Safety in Health Care Facilities (3)

BIOM1373 - Medical Software and Hardware

Course Title
Medical Software and Hardware

Academic Level
Undergraduate

Description
Overview of common medical equipment software, hardware, and operating system maintenance.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
BIOM2215 - Physiological Instruments I

Course Title
Physiological Instruments I

Academic Level
Undergraduate

Description
Theory of operation, circuit analysis, and troubleshooting physiological instruments.

Lecture Hours
1

Lab Hours
4

Credits
2

Semester Credit Hours
2

Prerequisites
- Complete the following:
  - BIOM2301 - Safety in Health Care Facilities (3)

BIOM2231 - Biomedical Clinical Instrumentation

Course Title
Biomedical Clinical Instrumentation

Academic Level
Undergraduate

Description
A study of theory, application, and principles of operation of instruments commonly used in a medical laboratory.

Lecture Hours
1

Lab Hours
4

Credits
2

Semester Credit Hours
2
BIOM2239 - Physiological Instruments II

Course Title
Physiological Instruments II

Academic Level
Undergraduate

Description
Graphic display recording devices. Includes defibrillators and multi-purpose diagnostic equipment.

Lecture Hours
1

Lab Hours
4

Credits
2

Semester Credit Hours
2

Prerequisites
❖ Complete the following:
    ❖ BIOM2301 - Safety in Health Care Facilities (3)

Corequisites
❖ Completed or concurrently enrolled in:
    ❖ BIOM2215 - Physiological Instruments I (2)

BIOM2301 - Safety in Health Care Facilities

Course Title
Safety in Health Care Facilities

Academic Level
Undergraduate

Description
Study of codes, standards and management principles related to biomedical instrumentation. Emphasizes application of safety test equipment, preventive maintenance procedures, and documentation of work performed.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
❖ Complete the following:
    ❖ CETT1303 - DC Circuits (3)
    ❖ CETT1305 - AC Circuits (3)
BIOM2311 - General Medical Equipment I
Course Title
General Medical Equipment I

Academic Level
Undergraduate

Description
Analysis of selected current paths from a larger schematic. Discussion of equipment and disassembly and reassembly of equipment.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - CETT1303 - DC Circuits (3)
  - CETT1305 - AC Circuits (3)

BIOM2319 - Fundamentals of X-Ray and Medical Imaging Systems
Course Title
Fundamentals of X-Ray and Medical Imaging Systems

Academic Level
Undergraduate

Description
Radiation theory and safety hazards, fundamental circuits, and application of X-ray systems including circuit analysis and troubleshooting.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - CETT1303 - DC Circuits (3)
  - CETT1305 - AC Circuits (3)
BIOM2333 - Digital Radiography

Course Title
Digital Radiography

Academic Level
Undergraduate

Description
General principles of digital radiography systems. Fundamentals of problem solving, troubleshooting, and analysis of image quality are emphasized.

3

Prerequisites
♦ Complete the following:
  ♦ BIOM2319 - Fundamentals of X-Ray and Medical Imaging Systems (3)

BIOM2343 - General Medical Equipment II

Course Title
General Medical Equipment II

Academic Level
Undergraduate

Description
Theory and principles of operation of a variety of basic electro-mechanical equipment with emphasis on repair and service of actual medical equipment.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
♦ Complete the following:
  ♦ BIOM2301 - Safety in Health Care Facilities (3)
BIOM2345 - Advanced Imaging Systems

Course Title
Advanced Imaging Systems

Academic Level
Undergraduate

Description
Principles of operation and repair of computerized tomography (CT), magnetic resonance imaging (MRI), single photon emission computerized tomography, and other advanced imaging modalities.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - BIOM2319 - Fundamentals of X-Ray and Medical Imaging Systems (3)

BIOM2347 - RF/X-Ray System

Course Title
RF/X-Ray System

Academic Level
Undergraduate

Description
Principles of radiographic and fluoroscopic systems.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - BIOM2319 - Fundamentals of X-Ray and Medical Imaging Systems (3)
BIOM2377 - Medical Imaging Communication & Storage

Course Title
Medical Imaging Communication & Storage

Academic Level
Undergraduate

Description
A course in medical imaging communication and storage systems, including Digital Imaging Communication (DICOM) standards and Picture Archiving and Communication Systems (PACS). Image transfer via DICOM standard to PACS and printers, including modality (X-ray, Computerized Tomography, and Ultrasound) and PACS function, configuration, and troubleshooting, is covered.

Bus Sys Netwrk, Unix
ITCC1340 - CCNA 2: Routing and Switching Essentials

Course Title

CCNA 2: Routing and Switching Essentials

Academic Level

Undergraduate

Description

Describes the architecture, components, and basic operation of routers and explains the basic principles of routing and routing protocols. It also provides an in-depth understanding of how switches operate and are implemented in the LAN environment for small and large networks.

Lecture Hours

2

Lab Hours

4

Credits

3

Semester Credit Hours

3

ITCC1344 - CCNA 2: Switching, Routing, and Wireless Essentials

Course Title

CCNA 2: Switching, Routing, and Wireless Essentials

Academic Level

Undergraduate

Description

Describes the architecture, components, and operations of routers and switches in small networks and introduces wireless local area networks (WLAN) and security concepts; provides an in-depth understanding of how routers and switches operate and are implemented in the LAN environment.

Lecture Hours

2

Lab Hours

4

- Complete the following:
  - ITCC1314 - CCNA 1: Introduction to Networks (3)
ITCC1391 - Special Topics in System, Networking, and LAN/WAN Management "Wireless Infrastructure/IoT"

Course Title
Special Topics in System, Networking, and LAN/WAN Management "Wireless Infrastructure/IoT"

Academic Level
Undergraduate

Description
Mac OS X covers, but is not limited to, installation, automation, customizing the operating system, supporting applications, and setting up peripherals. This is an Apple Training Series which serves as both a self-paced learning tool and the official curriculum for the Mac OS X Support Essentials certification program.

ITCC2312 - CCNA 3: Scaling Networks

Course Title
CCNA 3: Scaling Networks

Academic Level
Undergraduate

Description
CCNA R&S: Scaling Networks (ScaN) covers the architecture, components, and operations of routers and switches in larger and more complex networks. Students learn how to configure routers and switches using advanced protocols.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
ITCC2313 - CCNA 4: Connecting Networks

Course Title
CCNA 4: Connecting Networks

Academic Level
Undergraduate

Description
WAN technologies and network services required by converged applications in a complex network; enables students to understand the selection criteria of network devices and WAN technologies to meet network requirements.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

ITCC2320 - CCNA 3: Enterprise Networking, Security, and Automation

Course Title
CCNA 3: Enterprise Networking, Security, and Automation

Academic Level
Undergraduate

Description
Describes the architecture, components, operations, and security to scale for large, complex networks, including wide area network (WAN) technologies. Emphasizes network security concepts and introduces network virtualization and automation.

Lecture Hours
2

Lab Hours
4

Credits
3

BMGT1331 - Production and Operations Management

Course Title
Production and Operations Management

Academic Level
Undergraduate

Description
Fundamentals of techniques used in the practice of production and operations management. Includes location, design, and resource allocation.

Lecture Hours
2

Lab Hours
2

Credits
3

Semester Credit Hours
3

BMGT2331 - Principles of Quality Management

Course Title
Principles of Quality Management

Academic Level
Undergraduate

Description
Includes planning and implementing quality programs in an organization and analyzing cost/benefit of quality. Also covers the impact of employee empowerment.

Lecture Hours
2

Lab Hours
2

Credits
3

Semester Credit Hours
3
BMGT2341 - Strategic Management

Course Title
Strategic Management

Academic Level
Undergraduate

Description
Strategic management process, including analysis of how organizations develop and implement a strategy for achieving organizational objectives in a changing environment.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

BMGT2347 - Critical Thinking and Problem Solving

Course Title
Critical Thinking and Problem Solving

Academic Level
Undergraduate

Description
Interpreting data for problem solving and recommending corrective action. Emphasis on a structured approach to critical thinking and problem solving in a team environment.

BUSG1301 - Business Principles

Course Title
Business Principles

Academic Level
Undergraduate

Description
This course provides a survey of economic systems, forms of business ownership, and considerations for running a business. Students will learn various aspects of business, management, and leadership functions; organizational considerations; and decision-making processes. Financial topics are introduced, including accounting, money and banking, and securities markets. Also included are discussions of business challenges in the legal and regulatory environment, business ethics, social responsibility, and international business. Emphasized is the dynamic role of business in everyday life.

CHEM2123 - Organic Chemistry I Lab

Course Title

Organic Chemistry I Lab

Academic Level

Undergraduate

Description

This laboratory-based course accompanies CHEM 2323, Organic Chemistry I. Laboratory activities will reinforce fundamental principles of organic chemistry, including the structure, bonding, properties, and reactivity of organic molecules; and properties and behavior of organic compounds and their derivatives. Emphasis is placed on organic synthesis and mechanisms. Includes study of covalent and ionic bonding, nomenclature, stereochemistry, structure and reactivity, reaction mechanisms, functional groups, and synthesis of simple molecules. Methods for the purification and identification of organic compounds will be examined.

CDEC1321 - The Infant and Toddler

**Course Title**
The Infant and Toddler

**Academic Level**
Undergraduate

**Description**
A study of appropriate infant and toddler programs (birth to age 3), including an overview of development, quality routines, learning environments, materials and activities, and teaching/guidance techniques.

**Lecture Hours**
3

**Lab Hours**
0

**Credits**
3

**Semester Credit Hours**
3

---

CDEC1356 - Emergent Literacy for Early Childhood

**Course Title**
Emergent Literacy for Early Childhood

**Academic Level**
Undergraduate

**Description**
An exploration of principles, methods, and materials for teaching language and literacy through a play-based integrated curriculum to children from birth through age eight.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3
CDEC1359 - Children with Special Needs

Course Title
Children with Special Needs

Academic Level
Undergraduate

Description
A survey of information regarding children with special needs including possible causes and characteristics of exceptionalities, intervention strategies, available resources, referral processes, the advocacy role, and legislative issues.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

CDEC2340 - Instructional Techniques for Children with Special Needs

Course Title
Instructional Techniques for Children with Special Needs

Academic Level
Undergraduate

Description
Exploration of development and implementation of curriculum for children with special needs.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

College Success
### TSTC1101 - College Success

**Course Title**
College Success  

**Academic Level**
Undergraduate  

**Description**
Essential elements of student learning success at TSTC.  

**Lecture Hours**
1  

**Lab Hours**
1  

**Credits**
1  

**Semester Credit Hours**
1

### TSTC1102 - Professional Skills & Success

**Course Title**
Professional Skills & Success  

**Academic Level**
Undergraduate  

**Description**
Preparation for career success including professional and employability skills, interpersonal skills, and communication.  

**Lecture Hours**
1  

**Lab Hours**
1  

**Credits**
1

**Commercial Photography**
PHTC1004 - Introductory Professional Photography

Course Title
Introductory Professional Photography

Academic Level
Continuing Education

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0

PHTC1011 - Fundamentals of Photography

Course Title
Fundamentals of Photography

Academic Level
Continuing Education

Description
An introduction to camera operation and image production, composition, flash usage, and use of exposure meters and filters.

Lecture Hours
10

Lab Hours
0

Semester Credit Hours
0
PHTC1311 - Fundamentals of Photography

**Course Title**
Fundamentals of Photography

**Academic Level**
Undergraduate

**Description**
An introduction to camera operation and image production, composition, flash usage, and use of exposure meters and filters.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3

**Prerequisites**
- Complete the following:
  - ARTC1302 - Digital Imaging I (3)

PHTC1340 - Photographic Retouching I

**Course Title**
Photographic Retouching I

**Academic Level**
Undergraduate

**Description**
An overview of retouching techniques to enhance photographic media. Includes restoration and coloration.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3
PHTC1343 - Expressive Photography

Course Title
Expressive Photography

Academic Level
Undergraduate

Description
A study of formal, professional, and individual uses of photography by applying photographic technology to personalized needs. Emphasis on creative visual thinking and problem solving and the exploration of personal vision.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

PHTC1345 - Illustrative Photography I

Course Title
Illustrative Photography I

Academic Level
Undergraduate

Description
Instruction in the technical aspects involved in commercial photography. Topics include lighting equipment, techniques of production photography, reproduction principles, illustrative techniques, and advertising.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
PHTC1353 - Portraiture I

Course Title
Portraiture I

Academic Level
Undergraduate

Description
Skill development in the photographic principles of portrait lighting, posing, and subject rapport.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

PHTC1371 - Commercial Photography

Course Title
Commercial Photography

Academic Level
Undergraduate

Description
The study and utilization of professional commercial photography techniques, including the use of industry standard software, professional lighting techniques, and the emulation of an industry environment utilizing sample employers and clients.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
PHTC1391 - Special Topics in Commercial Photography

Course Title
Special Topics in Commercial Photography

Academic Level
Undergraduate

Description
The study and utilization of professional commercial photography techniques, including the use of industry standard software, professional lighting techniques, and the emulation of an industry environment utilizing sample employers and clients.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

PHTC2340 - Photographic Studio Management

Course Title
Photographic Studio Management

Academic Level
Undergraduate

Description
In-depth study of photography business management, pricing, market analysis, promotion, networking, job acquisition, and photographic equipment analysis.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Commercial Vehicle Operation
CVOP1001 - Commercial Drivers License Driving

Course Title
Commercial Drivers License Driving

Academic Level
Continuing Education

Description
Overview of the State of Texas Class A Commercial Drivers License driving test. In-depth coverage of in-cab air brake test, proper shifting, right and left-hand turns, movement in traffic, parking of a tractor trailer, highway and city driving, and backward movement and control.

Lecture Hours
0

Lab Hours
2

Semester Credit Hours
0

CVOP1005 - Commercial Drivers License Written Skill

Course Title
Commercial Drivers License Written Skill

Academic Level
Continuing Education

Description
Overview of the State of Texas Class A Commercial Drivers License written test. In-depth coverage of air brakes, combination vehicle, doubles and triples, tankers, and hazardous materials. Includes preparation for mastery of the Commercial Drivers License written examination.

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0
CVOP1011 - Driving Skills for Transporting Passengers

Course Title
Driving Skills for Transporting Passengers

Academic Level
Continuing Education

Description
Overview of the State of Texas Class A or Class B Commercial Drivers License driving test. In-depth coverage of the in-cab air brake test, proper shifting, right and left hand turns, movement in traffic, parking of a vehicle designed to transport passengers, highway and city driving, and backward movement and control.

Lecture Hours

Continuing Education

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0
CVOP1091 - Special Topics in Truck, Bus and Other C

Course Title
Special Topics in Truck, Bus and Other C

Academic Level
Continuing Education

Description
Topics address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency.

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0

CVOP1091 - St Truck, bus/Other Comm. Vehicle Operat

Course Title
St Truck, bus/Other Comm. Vehicle Operat

Academic Level
Continuing Education

Lecture Hours
0

Lab Hours
2

Semester Credit Hours
0
CVOP1301 - Commercial Drivers License Driving Skills

Course Title
Commercial Drivers License Driving Skills

Academic Level
Undergraduate

Description
Overview of the State of Texas Class A Commercial Driver's License driving test. In-depth coverage of in-cab air brake test, proper shifting, right and left-hand turns, movement in traffic, parking of a tractor trailer, highway and city driving, and backward movement and control.

Lecture Hours
2

Lab Hours
3

Credits
3

Semester Credit Hours
3

CVOP1305 - Commercial Drivers License Written Skills

Course Title
Commercial Drivers License Written Skills

Academic Level
Undergraduate

Description
Overview of the State of Texas Class A Commercial Driver's License written test. In-depth coverage of general knowledge, air brakes, combination vehicle, doubles and triples, tankers, and hazardous materials. Includes preparation for mastery of the Commercial Drivers License written examination.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
CVOP2005 - Fundamental Driving Skills

Course Title
Fundamental Driving Skills

Academic Level
Continuing Education

Description
Operation of a tractor-trailer combination. Emphasis on the safe maneuvering and control of the tractor-trailer in numerous traffic situations and sharing the highway with other vehicles.

Lecture Hours
1

Lab Hours
2

Semester Credit Hours
0

CVOP2037 - Advanced Driving Skills II

Course Title
Advanced Driving Skills II

Academic Level
Continuing Education

Description
Continuation of tractor-trailer operation in city and highway conditions. Emphasis on practical applications of space management techniques, improved methods for control in difficult traffic situations, and effective operation in various conditions.

Lecture Hours
5

Lab Hours
0

Semester Credit Hours
0

Communication System Installer
CSIR1002 - Telecomm. Integrated Systems

Course Title
Telecomm. Integrated Systems

Academic Level
Continuing Education

Lecture Hours
6

Lab Hours
0

Semester Credit Hours
0

CSIR1048 - Applied General Communication Circuits

Course Title
Applied General Communication Circuits

Academic Level
Continuing Education

Description
The basic theory of operation and troubleshooting of communication circuits used in radio communication electronics systems.

Lecture Hours
2

Lab Hours
0

Semester Credit Hours
0

CSIR1052 - Applied Industry Certifications

Course Title
Applied Industry Certifications

Academic Level
Continuing Education

Description
Preparation for the certifications required by industry.

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0
CSIR1055 - Industry Certifications

Course Title
Industry Certifications

Academic Level
Continuing Education

Description
Preparation for the Certifications Required by Industry.

Lecture Hours
1

Lab Hours
1

Semester Credit Hours
0

CSIR1059 - Digital Data Communication

Course Title
Digital Data Communication

Academic Level
Continuing Education

Description
Introduction to the theory and troubleshooting skills needed in the digital data communication field.

Lecture Hours
3

Lab Hours
0

Semester Credit Hours
0
CSIR1355 - Industry Certifications

Course Title
Industry Certifications

Academic Level
Undergraduate

Description
Preparation for the certifications required by industry.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete at least 1 of the following:
  - IEIR1371 - Electrical Principles and Applications (3)
  - CETT1302 - Electricity Principles (3)

Corequisites
No Rules

Grand Total Credits: 0

CSIR2051 - Fiber Optic Communication System Install

Course Title
Fiber Optic Communication System Install

Academic Level
Continuing Education

Description
Focus on installation, and repair of fiber optic communication systems including networks and peripherals. Topics include fiber optic technology, state-of-the-art networking systems, installation/repair of fiber optic systems, and testing equipment.

Lecture Hours
2

Lab Hours
0

Semester Credit Hours
0
CSIR2301 - Communication Electronics Components

Course Title
Communication Electronics Components

Academic Level
Undergraduate

Description
Introduction to the theory of vacuum tubes and solid-state devices.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete at least 1 of the following:
  - IEIR1371 - Electrical Principles and Applications (3)
  - CETT1302 - Electricity Principles (3)

Corequisites
No Rules
Grand Total Credits: 0

Community Health

CHLT1009 - Community Ethics

Course Title
Community Ethics

Academic Level
Continuing Education

Description
Discussion of the role of ethics as it pertains to health care and community settings including ethical decision-making.

Lecture Hours
3

Lab Hours
0

Semester Credit Hours
0

Computer
CETT1000 - Alternating Current (ac) Circuits

Course Title
Alternating Current (ac) Circuits

Academic Level
Continuing Education

Description
Fundamentals of alternating current.

Lecture Hours
1

Lab Hours
0

Semester Credit Hours
0

CETT1001 - Direct Current (dc) Circuits

Course Title
Direct Current (dc) Circuits

Academic Level
Continuing Education

Description
Fundamentals of direct current (DC).

Lecture Hours
1

Lab Hours
0

Semester Credit Hours
0

CETT1003 - Dc Circuits

Course Title
Dc Circuits

Academic Level
Continuing Education

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0
CETT1029 - Solid State Devices

Course Title
Solid State Devices

Academic Level
Continuing Education

Lecture Hours
0

Lab Hours
4

Semester Credit Hours
0

CETT1091 - Special Topics in Computer Engineering T

Course Title
Special Topics in Computer Engineering T

Academic Level
Continuing Education

Description
Topics address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency.

Lecture Hours
2

Lab Hours
4

Semester Credit Hours
0
CETT1302 - Electricity Principles

Course Title
Electricity Principles

Academic Level
Undergraduate

Description
Principles of electricity including proper use of test equipment, A/C and D/C circuits, and component theory and operations.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Corequisites
No Rules
Grand Total Credits: 0

CETT1303 - DC Circuits

Course Title
DC Circuits

Academic Level
Undergraduate

Description
A study of the fundamentals of direct current including Ohm's law, Kirchhoff's laws and circuit analysis techniques.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
CETT1305 - AC Circuits

Course Title
AC Circuits

Academic Level
Undergraduate

Description
A study of the fundamentals of alternating current including series and parallel AC circuits, phasors, capacitive and inductive networks, transformers, and resonance.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - CETT1303 - DC Circuits (3)

CETT1325 - Digital Fundamentals

Course Title
Digital Fundamentals

Academic Level
Undergraduate

Description
An entry level course in digital electronics to include numbering systems, logic gates, Boolean algebra, and combinational logic.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - CETT1303 - DC Circuits (3)
CETT1329 - Solid State Devices

Course Title
Solid State Devices

Academic Level
Undergraduate

Description
A study of diodes, transistor characteristics and other semiconductor devices, including analysis of static and dynamic characteristics, biasing techniques, and thermal considerations.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
♦ Complete all of the following
  ♦ Complete the following:
    ■ CETT1305 - AC Circuits (3)
  ♦ Complete at least 1 of the following:
    ■ IEIR1371 - Electrical Principles and Applications (3)
    ■ IEIR1304 - Alternating Current Circuits for Industrial Applications (3)

Corequisites
No Rules
Grand Total Credits: 0

CETT1341 - Solid State Circuits

Course Title
Solid State Circuits

Academic Level
Undergraduate

Description
A study of various semiconductor devices incorporated in circuits and their applications. Emphasis on circuit construction, measurements, and analysis.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
Computer & Information Science

ITSC1004 - Software App Skills Upgrade

Course Title
Software App Skills Upgrade

Academic Level
Continuing Education

Description
An introduction to selected application software. null October 31 2019 2:39 PM Garcia, Juan

Lecture Hours
2

Lab Hours
0

Semester Credit Hours
0

ITSC1007 - Unix Operating System I

Course Title
Unix Operating System I

Academic Level
Continuing Education

Description
A study of the UNIX operating system including multi-user concepts, terminal emulation, use of system editor, basic UNIX commands, and writing script files. Topics include introductory systems management concepts.

Lecture Hours
6

Lab Hours
0

Semester Credit Hours
0
ITSC1008 - Help Desk Support for Operating Systems

Course Title
Help Desk Support for Operating Systems

Academic Level
Continuing Education

Description
Fundamental operating system customer support.

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0

ITSC1018 - Intro to Project Manag Software

Course Title
Intro to Project Manag Software

Academic Level
Continuing Education

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0

ITSC1022 - Basic Computers

Course Title
Basic Computers

Academic Level
Continuing Education

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0
ITSC1025 - Personal Computer Hardware

Course Title
Personal Computer Hardware

Academic Level
Continuing Education

Description
A study of current personal computer hardware including personal computer assembly and upgrading, setup and configuration, and troubleshooting.

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0

ITSC1301 - Introduction to Computers

Course Title
Introduction to Computers

Academic Level
Undergraduate

Description
Overview of computer information systems. Introduces computer hardware, software, procedures, and human resources.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
ITSC1309 - Integrated Software Applications I

Course Title
Integrated Software Applications I

Academic Level
Undergraduate

Description
Introduction to business productivity software suites using word processing, spreadsheets, databases, and/or presentation software.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

ITSC1315 - Project Management Software

Course Title
Project Management Software

Academic Level
Undergraduate

Description
Use of project management software for developing a project plan including timelines, milestones, scheduling, life cycle phases, management frameworks, skills, processes, and tools.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
ITSC1316 - Linux Installation and Configuration

Course Title
Linux Installation and Configuration

Academic Level
Undergraduate

Description
Introduction to Linux operating system. Includes Linux installation, basic administration, utilities and commands, upgrading, networking, security, and application installation. Emphasizes hands-on setup, administration, and management of Linux.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete at least 1 of the following:
  - ITNW1358 - Network+ (3)
  - ITCC1314 - CCNA 1: Introduction to Networks (3)

ITSC1325 - Personal Computer Hardware

Course Title
Personal Computer Hardware

Academic Level
Undergraduate

Description
Current personal computer hardware including assembly, upgrading, setup, configuration, and troubleshooting.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
ITSC1342 - Shell Programming

Course Title
Shell Programming

Academic Level
Undergraduate

Description
Reading, writing, and debugging shell scripts. Development of scripts to automate frequently executed sequences of commands. Covers conditional logic, user interaction, loops, and menus to enhance the productivity and effectiveness of the user. Intended for programmers who are familiar with operating environments and reading and writing various shell scripts.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

ITSC2035 - Application Software Problem Solving

Course Title
Application Software Problem Solving

Academic Level
Continuing Education

Description
Utilization of appropriate application software to solve advanced problems and generate customized solutions.

Lecture Hours
3

Lab Hours
0

Semester Credit Hours
0
ITSC2321 - Integrated Software App II

Course Title
Integrated Software App II

Academic Level
Undergraduate

Description
Intermediate study of computer applications from business productivity software suites. Instruction in embedding data and linking and combining documents using word processing, spreadsheets, databases, and/or presentation media software.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

ITSC2370 - Final Project-Systems Administration

Course Title
Final Project-Systems Administration

Academic Level
Undergraduate

Description
Students will design and implement a systems administration plan for specified parameters utilizing knowledge and skill sets learned in the course of instruction. The students will be given a set of desired administrative outcomes and will implement current or impending technologies to obtain the desired administrative outcomes.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
ITSC2380 - Cooperative Education - Computer and Information Sciences, General

Course Title
Cooperative Education - Computer and Information Sciences, General

Academic Level
Undergraduate

Description
Career Related Activities Encountered in the Student's Area of Specialization Are Offered Through a Cooperative Agreement Between the College, Employer, and Student. Under Supervision of The College and the Employer the Student Combines Classroom Learning With Work Experience. Directly Related to a Technical Discipline, Specific Learning Objectives Guide the Student Through the Paid Work Experience. This Course May Be Repeated If Topics and Learning Outcomes Vary.

Lecture Hours
1

Lab Hours
0

Credits
3

Semester Credit Hours
3

ITSC2386 - Internship - Computer and Information Sciences, General

Course Title
Internship - Computer and Information Sciences, General

Academic Level
Undergraduate

Description
A work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. A learning plan is developed by the college and the employer.

Lecture Hours
0

Lab Hours
0

Credits
3

Semester Credit Hours
3
ITSC2425 - Advanced Linux

Course Title
Advanced Linux

Academic Level
Undergraduate

Description
Provides instruction in advance open-source Linux operating system. Develops directory services for clients, support users remotely, and install and configure network services.

Lecture Hours
2

Lab Hours
4

Credits
4

Semester Credit Hours
4

Prerequisites
- Complete the following:
  - ITSC1316 - Linux Installation and Configuration (3)

Computer/Information Sciences
INNEW2330 - Comprehensive Software Project: Planning and Design

**Course Title**
Comprehensive Software Project: Planning and Design

**Academic Level**
Undergraduate

**Description**
A comprehensive application of skills learned in previous courses in a simulated workplace. Covers the development, testing, and documenting of a complete software and/or hardware solution. This course may be used as a capstone course for a certificate or degree.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3

**Prerequisites**
- Complete all of the following
  - Complete the following:
    - ITSE2333 - Implementing a Database on Microsoft SQL Server (3)
  - Complete at least 1 of the following:
    - ITSE2353 - Advanced C# Programming (3)
    - ITSE2373 - Advanced Python (3)
INEW2332 - Comprehensive Software Project: Coding, Testing, and Implementation

Course Title

Comprehensive Software Project: Coding, Testing, and Implementation

Academic Level

Undergraduate

Description

A comprehensive application of skills learned in previous semesters in a simulated workplace. Includes coding, testing, maintenance, and documentation of a complete software and/or hardware solution. This course may be used as a capstone course for a certificate or degree.

Lecture Hours

2

Lab Hours

2

Credits

3

Semester Credit Hours

3

Prerequisites

- Complete all of the following
- Complete the following:
  - ITSE2333 - Implementing a Database on Microsoft SQL Server (3)
- Complete at least 1 of the following:
  - ITSE2353 - Advanced C# Programming (3)
  - ITSE2373 - Advanced Python (3)

INEW2334 - Advanced Web Programming

Course Title

Advanced Web Programming

Academic Level

Undergraduate

Description

Web programming using industry-standard languages and data stores.

Lecture Hours

2

Lab Hours

4

Credits

3

Semester Credit Hours

3
INEW2338 - Advanced Java Programming

Course Title
Advanced Java Programming

Academic Level
Undergraduate

Description
A continuation of Java programming techniques such as servlets, and advanced graphical functions.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - ITSE2317 - Java Programming (3)

Construction

CRPT1023 - Floor System

Course Title
Floor System

Academic Level
Continuing Education

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0
CRPT1029 - Introduction to Carpentry

Course Title
Introduction to Carpentry

Academic Level
Continuing Education

Description
An introduction to the carpentry trade including safety, tools, equipment, terminology, and methods.

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0

CRPT1311 - Roof Systems

Course Title
Roof Systems

Academic Level
Undergraduate

Description
Principles of design and construction of a roof system incorporating gable, hip, valley and intersections. Emphasis given to safe work practices and the use, and maintenance of tools and equipment.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
CRPT1315 - Wall Systems

**Course Title**
Wall Systems

**Academic Level**
Undergraduate

**Description**
Identification of components; construction of wall systems; safe work practices; and the use, and maintenance of tools and equipment.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3

CRPT1341 - Exterior Finish Systems

**Course Title**
Exterior Finish Systems

**Academic Level**
Undergraduate

**Description**
Installation of exterior finish systems and components including the placement and installation of cornice, windows, doors, siding, and flashing. Emphasis on safe work practices and the use, and maintenance of tools and equipment.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3
CRPT1371 - Basic Framing

Course Title
Basic Framing

Academic Level
Undergraduate

Description
Knowledge and skills required to erect wood and light metal frame structures with emphasis on layout, sequencing, strength of materials and construction; of floors, walls (interior and exterior), and roofs. Includes safety procedures for using hand tools, power tools, equipment and structural materials.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Construction/Building Inspect

CBFM1303 - Boiler Maintenance

Course Title
Boiler Maintenance

Academic Level
Undergraduate

Description
Boiler maintenance procedures with emphasis on the various components associated with boilers.

Lecture Hours
2

Lab Hours
2

Credits
3

Semester Credit Hours
3

Corequisites
No Rules

Grand Total Credits: 0
CBFM2013 - Building Maintenance Management

Course Title
Building Maintenance Management

Academic Level
Continuing Education

Description
Management and controls required to direct operations of the engineering and maintenance department. Includes planning and scheduling, delegating responsibilities, purchasing, problem-solving, management by objectives, supervisory training, in-service training, and budget preparation.

Lecture Hours
2

Lab Hours
0

Semester Credit Hours
0

Criminal Justice

CJCR2002 - Police Suicide, Detection & Intervention

Course Title
Police Suicide, Detection & Intervention

Academic Level
Continuing Education

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0
CJSA1325 - Criminology

Course Title
Criminology

Academic Level
Undergraduate

Description
Current theories and empirical research pertaining to crime and criminal behavior and its causes, methods of prevention, systems of punishment, and rehabilitation.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3

CJSA1327 - Fundamentals of Criminal Law

Course Title
Fundamentals of Criminal Law

Academic Level
Undergraduate

Description
A study of the nature of criminal law; philosophical and historical development; major definitions and concepts; classification of crime; elements of crimes and penalties using Texas statutes as illustrations; criminal responsibility.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3
CJSA1393 - Special Topics in Criminal Justice Studies

Course Title
Special Topics in Criminal Justice Studies

Academic Level
Undergraduate

Description
Topics address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

CJSA2000 - Professional Development: Criminal Justi

Course Title
Professional Development: Criminal Justi

Academic Level
Continuing Education

Description
Intensive training in an identified area(s) to meet continuing education and/or review/update requirements associated with professional licensure or certification. This course was designed to be repeated multiple times to improve student proficiency.

Lecture Hours
0

Lab Hours
0

Semester Credit Hours

Culinary Arts/Chef Training
CHEF1205 - Sanitation and Safety

Course Title
Sanitation and Safety

Academic Level
Undergraduate

Description
A study of personal cleanliness; sanitary practices in food preparation; causes, investigation, control of illness caused by food contamination (Hazard Analysis Critical Control Points); and work place safety standards.

Lecture Hours
1

Lab Hours
2

Credits
2

Semester Credit Hours
2

CHEF1340 - Meat Preparation and Cooking

Course Title
Meat Preparation and Cooking

Academic Level
Undergraduate

Description
Study of the preparation, storage, and cooking techniques for beef, pork, lamb, poultry, seafood, and game. Includes moist, dry, and combination heat preparation methods as related to both classical and modern methods of preparation of dishes.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - IFWA1427 - Food Preparation II (4)
CHEF1413 - Food Service Operations/Systems

Course Title
Food Service Operations/Systems

Academic Level
Undergraduate

Description
An overview of the information needs of food and lodging properties. Emphasis on front, back, and material management utilizing computer systems.

Lecture Hours
2

Lab Hours
4

Credits
4

Semester Credit Hours
4

CHEF1441 - American Regional Cuisine

Course Title
American Regional Cuisine

Academic Level
Undergraduate

Description
A study of the development of regional cuisine's in the United States with emphasis on the similarities in production and service systems. Application of skills to develop, organize, and build a portfolio of recipe strategies and production systems.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4

Prerequisites
- Complete the following:
  - IFWA1427 - Food Preparation II (4)
  - PSTR2431 - Advanced Pastry Shop (4)
CHEF1445 - International Cuisine  

Course Title  
International Cuisine  

Academic Level  
Undergraduate  

Description  
The study of classical cooking skills associated with the preparation and service of international and ethnic cuisines. Topics include similarities between food production systems used in the United States and other regions of the world.  

Lecture Hours  
2  

Lab Hours  
6  

Credits  
4  

Semester Credit Hours  
4  

Prerequisites  
- Complete the following:  
  - IFWA1427 - Food Preparation II (4)  
  - PSTR2431 - Advanced Pastry Shop (4)  

Data Processing  

ITSW1002 - Microsoft Excel

Semester Credit Hours  
0
ITSW1021 - Intro to Integrated Productivity Program  
**Course Title**  
Intro to Integrated Productivity Program  

**Academic Level**  
Continuing Education  

**Description**  
Integration of word processing, database, and spreadsheets. Includes formatting, file functions, printing, screen formats, data manipulation, record selection, indexing, sorting, moving, and copying.

**Lecture Hours**  
1  

**Lab Hours**  
1  

**Semester Credit Hours**  
0  

ITSW1030 - Ms Outlook  
**Course Title**  
Ms Outlook  

**Academic Level**  
Continuing Education  

**Lecture Hours**  
1  

**Lab Hours**  
0  

**Semester Credit Hours**  
0  

ITSW1037 - Introduction to Presentation Software  
**Course Title**  
Introduction to Presentation Software  

**Academic Level**  
Continuing Education  

**Description**  
Introduction to computerized presentation graphics that leads the participant through planning, design, and production of business graphics and charts. Presentation files are produced utilizing multimedia software.

**Lecture Hours**  
0  

**Lab Hours**  
0  

**Semester Credit Hours**  
0
ITSW1307 - Introduction to Database

Course Title
Introduction to Database

Academic Level
Undergraduate

Description
Introduction to database theory and the practical applications of a database.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

ITSW1310 - Introduction to Presentation Graphics Software

Course Title
Introduction to Presentation Graphics Software

Academic Level
Undergraduate

Description
Instruction in the utilization of presentation software to produce multimedia presentations. Graphics, text, sound, animation and/or video may be used in presentation development.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
ITSW2029 - Intermediate Spreadsheets II

Course Title
Intermediate Spreadsheets II

Academic Level
Continuing Education

Description
Techniques for customizing the spreadsheet environment by analyzing workbook data and creating worksheets and charts.

Lecture Hours
2

Lab Hours
0

Semester Credit Hours
0

ITSW2056 - Microsoft Powerpoint

Course Title
Microsoft Powerpoint

Academic Level
Continuing Education

Lecture Hours
0

Lab Hours

Dental Hygiene

DHYG1002 - Nitrous Oxide Sedation Monitoring

Course Title
Nitrous Oxide Sedation Monitoring

Academic Level
Continuing Education

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0
DHYG1207 - General and Dental Nutrition

**Course Title**
General and Dental Nutrition

**Academic Level**
Undergraduate

**Description**
General nutrition and nutritional biochemistry emphasizing the effect nutrition has on oral health.

**Lecture Hours**
2

**Lab Hours**
0

**Credits**
2

**Semester Credit Hours**
2

DHYG1211 - Periodontology

**Course Title**
Periodontology

**Academic Level**
Undergraduate

**Description**
Normal and diseased periodontium including the structural, functional, and environmental factors. Emphasis on etiology, pathology, treatment modalities, and therapeutic and preventive periodontics.

**Lecture Hours**
1

**Lab Hours**
3

**Credits**
2

**Semester Credit Hours**
2
DHYG1215 - Community Dentistry
Course Title
Community Dentistry

Academic Level
Undergraduate

Description
The principles and concepts of community public health and dental health education emphasizing community assessment, educational planning, implementation, and evaluation including methods and materials used in teaching dental health education in various community settings.

Lecture Hours
1

Lab Hours
4

Credits
2

Semester Credit Hours
2

DHYG1227 - Preventive Dental Hygiene Care
Course Title
Preventive Dental Hygiene Care

Academic Level
Undergraduate

Description
The role of the dental hygienist as a therapeutic oral health care provider with emphasis on concepts of disease management, health promotion, communication, and behavior modification.

Lecture Hours
1

Lab Hours
3

Credits
2

Semester Credit Hours
2
DHYG1235 - Pharmacology for the Dental Hygienist

Course Title
Pharmacology for the Dental Hygienist

Academic Level
Undergraduate

Description
Classification of drugs and their uses, actions, interactions, side effects, contraindications, with emphasis on dental applications.

Lecture Hours
1

Lab Hours
2

Credits
2

Semester Credit Hours
2

DHYG1239 - General and Oral Pathology

Course Title
General and Oral Pathology

Academic Level
Undergraduate

Description
Disturbances in human body development, diseases of the body, and disease prevention measures with emphasis on the oral cavity and associated structures.

Lecture Hours
1

Lab Hours
2

Credits
2

Semester Credit Hours
2
DHYG1260 - Clinical - Dental Hygiene/Hygienist

Course Title
Clinical - Dental Hygiene/Hygienist

Academic Level
Undergraduate

Description
A health-related work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional.

Lecture Hours
0

Lab Hours
0

Credits
2

Semester Credit Hours
2

Prerequisites
Complete the following:
- DHYG1331 - Preclinical Dental Hygiene (3)

DHYG1261 - Clinical - Dental Hygiene/Hygienist

Course Title
Clinical - Dental Hygiene/Hygienist

Academic Level
Undergraduate

Description
A health-related work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional.

Lecture Hours
0

Lab Hours
0

Credits
2

Semester Credit Hours
2

Prerequisites
Complete the following:
- DHYG1260 - Clinical - Dental Hygiene/Hygienist (2)
DHYG1301 - Orofacial Anatomy, Histology & Embryology

Course Title
Orofacial Anatomy, Histology & Embryology

Academic Level
Undergraduate

Description
The histology and embryology of oral tissues, gross anatomy of the head and neck, tooth morphology, and individual tooth identification.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

DHYG1304 - Dental Radiology

Course Title
Dental Radiology

Academic Level
Undergraduate

Description
Fundamentals of oral radiography, including techniques, interpretation, quality assurance, and ethics.

Lecture Hours
2

Lab Hours
3

Credits
3

Developmental Math
DMTH0009 - Supplemental Math Lab I  
**Course Title**  
Supplemental Math Lab I  

**Academic Level**  
Undergraduate  

**Description**  
This is a lab for students in NCBM 0009.  

**Lecture Hours**  
0  

**Lab Hours**  
2  

**Semester Credit Hours**  
0  

DMTH0010 - Supplemental Math Lab II  
**Course Title**  
Supplemental Math Lab II  

**Academic Level**  
Undergraduate  

**Description**  
This is a lab for students in NCBM 0010. Students completing this lab with a C or better have completed their TSI requirements for math.  

**Lecture Hours**  
0  

**Lab Hours**  
2  

**Semester Credit Hours**  
0
DMTH0100 - Introductory Algebra
Course Title
Introductory Algebra
Academic Level
Undergraduate
Description
This course covers introductory algebra topics.
Lecture Hours
3
Lab Hours
1
Semester Credit Hours
3

DMTH0200 - Intermediate Algebra
Course Title
Intermediate Algebra
Academic Level
Undergraduate
Description
A study of relations and functions, inequalities, algebraic expressions and equations (absolute value, polynomial, radical, rational), with a special emphasis on linear and quadratic expressions and equations. Students completing this course with a C or better have completed their TSI requirements for math.
Lecture Hours
3

Diesel Eng Mechanic & Repairer
DEMR1000 - Introduction to Shop Safety and Tools

Course Title
Introduction to Shop Safety and Tools

Academic Level
Continuing Education

Description
Shop safety, rules, basic shop tools, and test equipment.

Lecture Hours
0

Lab Hours
2

Semester Credit Hours
0

DEMR1010 - Diesel Engine Testing/Repair I

Course Title
Diesel Engine Testing/Repair I

Academic Level
Continuing Education

Description
An introduction to testing and repairing diesel engines including related systems and specialized tools.

Lecture Hours
3

Lab Hours
0

Semester Credit Hours
0
DEMR1021 - Power Train I
Course Title
Power Train I

Academic Level
Continuing Education

Description
Fundamental repair and theory of power trains including clutches transmissions drive shafts and differentials. Emphasis on inspection and repair.

Lecture Hours
3

Lab Hours
0

Semester Credit Hours
0

DEMR1023 - HVAC Troubleshooting & Repair
Course Title
HVAC Troubleshooting & Repair

Academic Level
Continuing Education

Description

Lecture Hours
0

Lab Hours
3

Semester Credit Hours
0
DEMR1027 - Tractor Trailer Ser/Repair

Course Title
Tractor Trailer Ser/Repair

Academic Level
Continuing Education

Description
An introduction to and familiarization with components and systems related to tractor trailer service. Emphasis on records required by the Department of Transportation.

Lecture Hours
1

Lab Hours
0

Semester Credit Hours
0

DEMR1225 - Small Air Cooled Engines

Course Title
Small Air Cooled Engines

Academic Level
Undergraduate

Description
Fundamentals of air cooled engines including repair and testing.

Lecture Hours
1

Lab Hours
2

Credits
2

Semester Credit Hours
2
DEMR1229 - Preventative Maintenance

**Course Title**
Preventative Maintenance

**Academic Level**
Undergraduate

**Description**
An introductory course designed to provide the student with basic knowledge of proper servicing practices. Content includes record keeping and condition of major systems.

**Lecture Hours**
1

**Lab Hours**
2

**Credits**
2

**Semester Credit Hours**
2

DEMR1301 - Shop Safety and Procedures

**Course Title**
Shop Safety and Procedures

**Academic Level**
Undergraduate

**Description**
A study of shop safety, rules, basic shop tools, and test equipment.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3
DEMR1305 - Basic Electrical Systems

Course Title
Basic Electrical Systems

Academic Level
Undergraduate

Description
Basic principles of electrical systems of diesel powered equipment with emphasis on starters, alternators, and batteries.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

DEMR1316 - Basic Hydraulics

Course Title
Basic Hydraulics

Academic Level
Undergraduate

Description
Fundamentals of hydraulics including components and related systems.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
DEMR1317 - Basic Brake Systems

Course Title
Basic Brake Systems

Academic Level
Undergraduate

Description
Basic principles of brake systems of diesel powered equipment. Emphasis on maintenance, repairs, and troubleshooting.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

DEMR1321 - Power Train I

Course Title
Power Train I

Academic Level
Undergraduate

Description
Fundamental repair and theory of power trains including clutches, transmissions, drive shafts, and differentials. Emphasis on inspection and repair.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
DEMR1323 - Heating, Ventilation, and Air Conditioning (HVAC) Troubleshooting and Repair

Course Title
Heating, Ventilation, and Air Conditioning (HVAC) Troubleshooting and Repair

Academic Level
Undergraduate

Description
Introduction to heating, ventilation, and air conditioning theory, testing, and repair. Emphasis on refrigerant reclamation, safety procedures, specialized tools, and repairs.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

DEMR1327 - Tractor Trailer Service and Repair

Course Title
Tractor Trailer Service and Repair

Academic Level
Undergraduate

Description
An introduction to and familiarization with components and systems related to tractor trailer service. Emphasis on records required by the Department of Transportation.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - DEMR1317 - Basic Brake Systems (3)
DEMR1329 - Preventative Maintenance

Course Title
Preventative Maintenance

Academic Level
Undergraduate

Description
An introductory course designed to provide the student with basic knowledge of proper servicing practices. Content includes record keeping and condition of major systems.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

DEMR1330 - Steering and Suspension I

Course Title
Steering and Suspension I

Academic Level
Undergraduate

Description
A study of design, function, maintenance, and repair of steering and suspension systems. Emphasis on troubleshooting and repair of failed components.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
DEMR1380 - Cooperative Education - Diesel Mechanics Technology/Technician

Course Title
Cooperative Education - Diesel Mechanics Technology/Technician

Academic Level
Undergraduate

Description
Career-related activities encountered in the student’s area of specialization offered through an individualized agreement among the college, employer, and student. Under the supervision of the college and the employer, the student combines classroom learning with work experience. Includes a lecture component.

Lecture Hours
1

Lab Hours
0

Credits
3

Semester Credit Hours
3

DEMR1410 - Diesel Engine Testing and Repair I

Course Title
Diesel Engine Testing and Repair I

Academic Level
Undergraduate

Description
An introduction to testing and repairing diesel engines including related systems and specialized tools.

Lecture Hours
2

Lab Hours
4

Credits
4

Semester Credit Hours
4
DEMR1416 - Basic Hydraulics

**Course Title**
Basic Hydraulics

**Academic Level**
Undergraduate

**Description**
Fundamentals of hydraulics including components and related systems

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
4

DEMR1421 - Power Train I

**Course Title**
Power Train I

**Academic Level**
Undergraduate

**Description**

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
4

**Semester Credit Hours**
4
DEMR1447 - Power Train II

Course Title
Power Train II

Academic Level
Undergraduate

Description
Continuation of fundamentals and theory of power train systems. Emphasis on disassembly, inspection, and repair of power train components.

Lecture Hours
2

Lab Hours
4

Credits
4

Semester Credit Hours
4

Prerequisites
- Complete at least 3 credits from the following:
  - DEMR1321 - Power Train I (3)
  - DEMR1421 - Power Train I (4)

DEMR1680 - Cooperative Education - Diesel Mechanics Technology/Technician

Course Title
Cooperative Education - Diesel Mechanics Technology/Technician

Academic Level
Undergraduate

Description
Career-related activities encountered in the student’s area of specialization offered through an individualized agreement among the college, employer, and student. Under the supervision of the college and the employer, the student combines classroom learning with work experience. Includes a lecture component.

Lecture Hours
1

Lab Hours
0

Credits
6

Semester Credit Hours
6
DEMR2012 - Diesel Engine Testing and Repair II

Course Title

Diesel Engine Testing and Repair II

Academic Level

Continuing Education

Description

Continuation of Diesel Engine Testing and Repair I Coverage of testing and repairing diesel engines including related systems and specialized tools.

Lecture Hours

3

Lab Hours

0

Semester Credit Hours

0

DEMR2031 - Advanced Brake Systems

Course Title

Advanced Brake Systems

Academic Level

Continuing Education

Description

An advanced brake system course for diesel powered equipment. Advanced concepts and schematics including anti-lock, air, pneumatic, and hydraulic brake systems and related components.

Lecture Hours

0

Lab Hours

0

Semester Credit Hours

0
DEMR2312 - Diesel Engine Testing and Repair II

Course Title
Diesel Engine Testing and Repair II

Academic Level
Undergraduate

Description
Continuation of Diesel Engine Testing and Repair I. Coverage of testing and repairing diesel engines including related systems and specialized tools.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

DEMR2332 - Electronic Controls

Course Title
Electronic Controls

Academic Level
Undergraduate

Description
Advanced skills in diagnostic and programming techniques of electronic control systems.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - DEMR1305 - Basic Electrical Systems (3)
  - DEMR2412 - Diesel Engine Testing and Repair II (4)
DEMR2334 - Advanced Diesel Tune-Up and Troubleshooting

Course Title
Advanced Diesel Tune-Up and Troubleshooting

Academic Level
Undergraduate

Description
Advanced concepts and skills required for tune-up and troubleshooting procedures of diesel engines. Emphasis on the science of diagnostics with a common sense approach.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete all of the following
  - Complete the following:
    - DEMR2412 - Diesel Engine Testing and Repair II (4)
  - Complete at least 1 of the following:
    - DEMR2312 - Diesel Engine Testing and Repair II (3)
    - DEMR2412 - Diesel Engine Testing and Repair II (4)

DEMR2335 - Advanced Hydraulics

Course Title
Advanced Hydraulics

Academic Level
Undergraduate

Description
Advanced study of hydraulic systems and components including diagnostics and testing of hydraulic systems.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete at least 1 of the following:
  - DEMR1316 - Basic Hydraulics (3)
  - DEMR1416 - Basic Hydraulics (4)
DEMR2344 - Automatic Power Shift and Hydrostatic Transmissions II

Course Title
Automatic Power Shift and Hydrostatic Transmissions II

Academic Level
Undergraduate

Description
Extended study of the operation, maintenance, and repair of automatic power shift hydrostatic transmissions.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete at least 1 of the following:
  - DEMR1321 - Power Train I (3)
  - DEMR2312 - Diesel Engine Testing and Repair II (3)
  - DEMR2412 - Diesel Engine Testing and Repair II (4)

DEMR2348 - Failure Analysis

Course Title
Failure Analysis

Academic Level
Undergraduate

Description
An advanced course designed for analysis of typical part failures on equipment.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
DEMR2412 - Diesel Engine Testing and Repair II

Course Title
Diesel Engine Testing and Repair II

Academic Level
Undergraduate

Description
Continuation of Diesel Engine Testing and Repair I. Coverage of testing and repairing diesel engines including related systems and specialized tools.

Lecture Hours
2

Lab Hours
4

Credits
4

Semester Credit Hours
4

Prerequisites
- Complete the following:
  - DEMR1410 - Diesel Engine Testing and Repair I (4)

Dietetics/Human Nutritional

FDNS1305 - Nutrition

Course Title
Nutrition

Academic Level
Undergraduate

Description
A study of nutrients including functions, food sources, digestion, absorption and metabolism with application to normal and preventive nutrition needs. Includes nutrient intake analysis, energy expenditure evaluation, and diet planning.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours

Drafting
DFTG1000 - Specialized Computer Aided Drafting Cad
Course Title
Specialized Computer Aided Drafting Cad

Academic Level
Continuing Education

Description
A supplemental course to Basic Computer-Aided Drafting using an alternative computer-aided drafting (CAD) software.

Lecture Hours
2

Lab Hours
0

Semester Credit Hours
0

DFTG1013 - Drafting for Specific Occupat
Course Title
Drafting for Specific Occupat

Academic Level
Continuing Education

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0

DFTG1022 - Basic Blueprint Reading
Course Title
Basic Blueprint Reading

Academic Level
Continuing Education

Description
Emphasis on accurate/efficient interpretation of symbols/graphic language required to produce working drawings

Lecture Hours
2

Lab Hours
0

Semester Credit Hours
0
DFTG1023 - Blueprint Reading for Sp Occup

Course Title
Blueprint Reading for Sp Occup

Academic Level
Continuing Education

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0

DFTG1310 - Specialized Basic Computer Aided Drafting (CAD)

Course Title
Specialized Basic Computer Aided Drafting (CAD)

Academic Level
Undergraduate

Description
A supplemental course to Basic Computer Aided Drafting using an alternative computer-aided drafting (CAD) software to create detail and working drawings.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
DFTG1313 - Drafting for Specific Occupations

Course Title
Drafting for Specific Occupations

Academic Level
Undergraduate

Description
Discussion of theory and practice with drafting methods and the terminology required to prepare working drawings in specific or various occupational fields.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

DFTG1317 - Architectural Drafting - Residential

Course Title
Architectural Drafting - Residential

Academic Level
Undergraduate

Description
Architectural drafting procedures, practices, terms, and symbols. Preparation of detailed working drawings for residential structures. Emphasis on light frame construction methods.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - ARCE1321 - Architectural Illustration (3)
DFTG1325 - Blueprint Reading and Sketching

Course Title
Blueprint Reading and Sketching

Academic Level
Undergraduate

Description
An introduction to reading and interpreting working drawings for fabrication processes and associated trades. Use of sketching techniques to create pictorial and multiple-view drawings.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Corequisites
No Rules
Grand Total Credits: 0

DFTG1329 - Electro-Mechanical Drafting

Course Title
Electro-Mechanical Drafting

Academic Level
Undergraduate

Description
A basic course including layout and design of electro-mechanical equipment from engineering notes and sketches.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
♦ Complete the following:
DFTG1330 - Civil Drafting 1

Course Title
Civil Drafting 1

Academic Level
Undergraduate

Description
Preparation of civil drawings including drafting methods and principles used in civil engineering.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
Complete the following:

DFTG1333 - Mechanical Drafting

Course Title
Mechanical Drafting

Academic Level
Undergraduate

Description
Study of mechanical drawings using dimensioning and tolerances, sectioning techniques, orthographic projection, and pictorial drawings.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
Complete the following:
DFTG1341 - Intermediate Technical Animation and Rendering

Course Title
Intermediate Technical Animation and Rendering

Academic Level
Undergraduate

Description
3-D modeling and rendering techniques including lighting, staging, camera, and special effects. Emphasizes 3-D modeling building blocks using primitives to create simple and complex architectural/mechanical models.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

DFTG1345 - Parametric Modeling and Design

Course Title
Parametric Modeling and Design

Academic Level
Undergraduate

Description
Parametric-based design software for 3D design and drafting.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Corequisites
No Rules

Grand Total Credits: 0
DFTG1357 - Specialized Intermediate Computer-Aided Drafting (CAD)

**Course Title**
Specialized Intermediate Computer-Aided Drafting (CAD)

**Academic Level**
Undergraduate

**Description**
A continuation of practices and techniques used in Specialized Basic Computer-Aided Drafting. Emphasizes advanced dimensioning techniques, the development and use of prototype drawings, construction of pictorial drawings, interfacing two-dimensional (2D) and/or three-dimensional (3D) environments and extracting data.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3

DFTG1358 - Electrical/Electronics Drafting

**Course Title**
Electrical/Electronics Drafting

**Academic Level**
Undergraduate

**Description**
Electrical and electronic drawings stressing modern representation used for block diagrams, schematic diagrams, logic diagrams, wiring/assembly drawings, printed circuit board layouts, motor control diagrams, power distribution diagrams, and electrical one-line diagrams.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3

**Prerequisites**
- Complete the following:
  - DFTG1329 - Electro-Mechanical Drafting (3)
DFTG1380 - Coop-Drafting

Course Title
Coop-Drafting

Academic Level
Undergraduate

Description
Career Related Activities Encountered in the Student's Area of Specialization Through a Cooperative Agreement Between the College, Employer, and Student. Under Supervision of the College And the Employer, the Student Combines Classroom Learning With Work Experience. Directly Related to a Technical Discipline, Specific Learning Objectives Guide the Student Through the Paid Work Experience. This Course May Be Repeated If Topics and Learning Outcomes Vary.

Lecture Hours
1

Lab Hours
0

Credits
3

Semester Credit Hours
3

DFTG1392 - Special Topics in Architectural Drafting and ArchitecturalCAD/CADD

Course Title
Special Topics in Architectural Drafting and ArchitecturalCAD/CADD

Academic Level
Undergraduate

Description
Topics address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
Complete the following:
- DFTG2328 - Architectural Drafting - Commercial (3)
DFTG1393 - Special Topics in Civil Drafting Civil Engineering CAD/CADD

Course Title
Special Topics in Civil Drafting Civil Engineering CAD/CADD

Academic Level
Undergraduate

Description
Topics address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - DFTG2321 - Topographical Drafting (3)

DFTG1395 - Special Topics in Mechanical Drafting and Mechanical Drafting Cad/Cadd

Course Title
Special Topics in Mechanical Drafting and Mechanical Drafting Cad/Cadd

Academic Level
Undergraduate

Description
Topics address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - DFTG2335 - Advanced Technologies in Mechanical Design and Drafting (3)
DFTG2050 - Online Geometric Dimensioning Tolerancing

Course Title
Online Geometric Dimensioning Tolerancing

Academic Level
Continuing Education

Lecture Hours
4

Lab Hours
0

Semester Credit Hours
0

DFTG2302 - Machine Drafting

Course Title
Machine Drafting

Academic Level
Undergraduate

Description
Production of detail and assembly drawings of machines, threads, gears, utilizing tolerances, limit dimensioning, and surface finishes.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - DFTG1333 - Mechanical Drafting (3)
DFTG2306 - Machine Design

**Course Title**
Machine Design

**Academic Level**
Undergraduate

**Description**
Theory and practice of design. Projects in problem-solving, including press fit, bolted and welded joints, and transmission components.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3

**Prerequisites**
- Complete the following:
  - DFTG2335 - Advanced Technologies in Mechanical Design and Drafting (3)

---

DFTG2312 - Technical Illustration and Presentation

**Course Title**
Technical Illustration and Presentation

**Academic Level**
Undergraduate

**Description**
Pictorial drawing including isometrics, obliques, perspectives, charts, and graphs. Emphasis on rendering and using different media.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3

**Prerequisites**
- Complete the following:
  - DFTG2328 - Architectural Drafting - Commercial (3)
DFTG2321 - Topographical Drafting

Course Title
Topographical Drafting

Academic Level
Undergraduate

Description
Plotting of surveyor's field notes. Includes drawing elevations, contour lines, plan and profiles, and laying out traverses.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - DFTG1330 - Civil Drafting 1 (3)

DFTG2323 - Pipe Drafting

Course Title
Pipe Drafting

Academic Level
Undergraduate

Description
A study of pipe fittings, symbols, specifications and their applications to a piping process system. Creation of symbols and their usage in flow diagrams, plans, elevations, and isometrics.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
DFTG2328 - Architectural Drafting - Commercial

Course Title
Architectural Drafting - Commercial

Academic Level
Undergraduate

Description
Architectural drafting procedures, practices, governing codes, terms and symbols, including the preparation of detailed working drawings for a commercial building, with emphasis on commercial construction methods.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - DFTG1317 - Architectural Drafting - Residential (3)

DFTG2330 - Civil Drafting

Course Title
Civil Drafting

Academic Level
Undergraduate

Description
An in-depth study of drafting methods and principles used in civil engineering.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
DFTG2331 - Adv Techn-Architect Design & Drafting Design and Drafting

Course Title
Adv Techn-Architect Design & Drafting Design and Drafting

Academic Level
Undergraduate

Description
Use of architectural specific software to execute the elements required in designing standard architectural exhibits utilizing custom features to create walls, windows and specific design requirements for construction in residential/commercial and industrial architecture.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - DFTG2328 - Architectural Drafting - Commercial (3)

DFTG2332 - Advanced Computer-Aided Drafting

Course Title
Advanced Computer-Aided Drafting

Academic Level
Undergraduate

Description
Application of advanced CAD techniques.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - DFTG2340 - Solid Modeling/Design (3)
DFTG2335 - Advanced Technologies in Mechanical Design and Drafting

Course Title
Advanced Technologies in Mechanical Design and Drafting

Academic Level
Undergraduate

Description
Use parametric-based software for mechanical design for advanced modeling and analysis.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - DFTG2302 - Machine Drafting (3)

DFTG2340 - Solid Modeling/Design

Course Title
Solid Modeling/Design

Academic Level
Undergraduate

Description
A computer-aided modeling course. Development of three-dimensional drawings and models from engineering sketches and orthographic drawings and utilization of three-dimensional models in design work.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - DFTG2302 - Machine Drafting (3)
DFTG2350 - Geometric Dimensioning and Tolerancing

**Course Title**

Geometric Dimensioning and Tolerancing

**Academic Level**

Undergraduate

**Description**

Geometric dimensioning and tolerancing, according to standards, application of various geometric dimensions and tolerances to production drawings.

**Lecture Hours**

2

**Lab Hours**

4

**Credits**

3

**Semester Credit Hours**

3

**Prerequisites**

- Complete the following:
  - DFTG2302 - Machine Drafting (3)

DFTG2357 - Advanced Technologies in Pipe Design and Drafting

**Course Title**

Advanced Technologies in Pipe Design and Drafting

**Academic Level**

Undergraduate

**Description**

Advanced design and production techniques using specialized process plant based design software.

**Lecture Hours**

2

**Lab Hours**

4

**Credits**

3

**Semester Credit Hours**

3

**Prerequisites**

- Complete the following:
  - DFTG1329 - Electro-Mechanical Drafting (3)
DFTG2380 - Cooperative Education Drafting and Design Technology/Technician

**Course Title**

Cooperative Education Drafting and Design Technology/Technician

**Academic Level**

Undergraduate

**Description**

Career Related Activities Encountered in the Student's Area of Specialization Are Offered Through a Cooperative Agreement Between the College, the Employer, and Student. Under Supervision Of the College and the Employer, the Student Combines Classroom Learning With Work Experience. Directly Related to a Technical Discipline, Specific Learning Objectives Guide the Student Through the Paid Work Experience. This Course May Be Repeated If Topics and Learning Outcomes Vary.

**Drug/Alcohol Abuse Counseling**
DAAC1304 - Pharmacology of Addiction

Course Title
Pharmacology of Addiction

Academic Level
Undergraduate

Description
Emphasizes pharmacological effects of addiction, tolerance, dependence, cross addiction, drug interaction, withdrawal, and recovery. Describes the psychological and physiological effects of substance use and behaviors.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3

DAAC1305 - Co-Occurring Disorders

Course Title
Co-Occurring Disorders

Academic Level
Undergraduate

Description
Provides students with an overview of co-occurring psychiatric and substance use disorders and their impact on the individual, family, and community. Includes an integrated approach to address the issues accompanying the illness.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3
DAAC1309 - Assessment of Substance-Related and Addictive Disorders

Course Title
Assessment of Substance-Related and Addictive Disorders

Academic Level
Undergraduate

Description
Exploration of procedures and tools used to identify substance-related and addictive disorders and assess a client's problems, strengths, deficits, and needs.

Lecture Hours
2

Lab Hours
2

Credits
3

Semester Credit Hours
3

DAAC1311 - Counseling Theories

Course Title
Counseling Theories

Academic Level
Undergraduate

Description
An examination of major theories and current treatment modalities used in the field of counseling.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3
DAAC1317 - Basic Counseling Skills

Course Title
Basic Counseling Skills

Academic Level
Undergraduate

Description
An overview and application of the basic counseling skills.

Lecture Hours
2

Lab Hours
2

Credits
3

Semester Credit Hours
3

DAAC1319 - Substance-Related and Addictive Disorders

Course Title
Substance-Related and Addictive Disorders

Academic Level
Undergraduate

Description
An overview of causes and consequences of substance-related and addictive disorders, the major drug classifications, and the counselor's code of ethics.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3
DAAC1391 - Spec Topics - Alcohol/Drug Abuse Counsel

Course Title
Spec Topics - Alcohol/Drug Abuse Counsel

Academic Level
Undergraduate

Description
Topics address recently identified current events, skills, knowledges, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency.

Lecture Hours
0

Lab Hours
0

DAAC2301 - Therapeutic Communities in a Criminal Justice Setting

Course Title
Therapeutic Communities in a Criminal Justice Setting

Academic Level
Undergraduate

Description
A study of therapeutic communities as an approach to rehabilitation of incarcerated substance users.

Lecture Hours
2

Lab Hours
2

Credits
3

Semester Credit Hours
3
DAAC2306 - Substance Abuse Prevention I

Course Title
Substance Abuse Prevention I

Academic Level
Undergraduate

Description
Examination of substance use disorder prevention.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3

DAAC2307 - Addicted Family Intervention

Course Title
Addicted Family Intervention

Academic Level
Undergraduate

Description
Examination of family systems focusing on the effects of addiction and recovery.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3
DAAC2341 - Counseling Alcohol and Other Drug Addictions

Course Title
Counseling Alcohol and Other Drug Addictions

Academic Level
Undergraduate

Description
Advanced examination of knowledge, skills, attitudes, techniques, confidentiality and ethical guidelines applied in the counseling, treatment, prevention, and recovery of substance use disorders.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3

DAAC2343 - Current Issues

Course Title
Current Issues

Academic Level
Undergraduate

Description
Examination of current issues related to substance use and addictive disorders.

Lecture Hours
3

Lab Hours
0

Early Childhood Education
TECA1318 - Wellness of the Young Child

**Course Title**
Wellness of the Young Child

**Academic Level**
Undergraduate

**Description**
A study of the factors that impact the well-being of the young child including healthy behavior, food, nutrition, fitness, and safety practices. Focuses on local and national standards and legal implications of relevant policies and regulations. Course content must be aligned as applicable with State Board for Educator Certification Pedagogy and Professional Responsibilities standards and coincide with the National Assessment of Educational Progress position statement related to developmentally appropriate practices for children from birth to age eight. Requires students to participate in field experiences with children from infancy through age 12 in a variety of settings with varied and diverse populations. Course includes a minimum of 16 hours of field experiences.

**Economics**
ECON1301 - Introduction to Economics

Course Title
Introduction to Economics

Academic Level
Undergraduate

Description
A survey of microeconomic and macroeconomic principles for non-business majors. Microeconomic topics will include supply and demand, consumer behavior, price and output decisions by firms under various market structures, factor markets, market failures, international trade, and exchange rates. Macroeconomic topics will include national income, unemployment, inflation, business cycles, aggregate supply and demand, monetary and fiscal policy, and economic growth.

Lecture Hours
3

Lab Hours

ELPT1329 - Residential Wiring

Course Title
Residential Wiring

Academic Level
Undergraduate

Description
Wiring methods for single family and multi-family dwellings. Includes load calculations, service entrance sizing, proper grounding techniques, and associated safety procedures.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

ELPT1340 - Master Electrician Exam Review I

Course Title
Master Electrician Exam Review I

Academic Level
Undergraduate

Description
Electrical theory, code calculations, and interpretations applicable to becoming a Master Electrician. Emphasizes residential, commercial, and industrial installations using the current edition of the National Electric Code (NEC) and local ordinances.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
ELPT1341 - Motor Control

Course Title
Motor Control

Academic Level
Undergraduate

Description
Operating principles of solid-state and conventional controls along with their practical applications. Includes braking, jogging, plugging, safety interlocks, wiring, and schematic diagram interpretations.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete at least 1 of the following:
  - AACT1371 - Electronics Fundamentals in Automation (3)
  - ELPT1311 - Basic Electrical Theory (3)
  - CETT1303 - DC Circuits (3)
  - IEIR1371 - Electrical Principles and Applications (3)

ELPT1345 - Commercial Wiring

Course Title
Commercial Wiring

Academic Level
Undergraduate

Description
Commercial wiring methods. Includes overcurrent protection, raceway panel board installation, proper grounding techniques, and associated safety procedures.

ELPT2305 - Motors and Transformers

Course Title
Motors and Transformers

Academic Level
Undergraduate

Description
Operation of single- and three-phase motors and transformers. Includes transformer banking, power factor correction, and protective devices.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

ELPT2319 - Programmable Logic Controllers I

Course Title
Programmable Logic Controllers I

Academic Level
Undergraduate

Description
Fundamental concepts of programmable logic controllers, principles of operation, and numbering systems as applied to electrical controls.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - ELPT1341 - Motor Control (3)
ELPT2323 - Transformers

Course Title
Transformers

Academic Level
Undergraduate

Description
Transformer types, construction, connections, protection, grounding, and associated safety procedures.

Lecture Hours
2

Lab Hours
3

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - ELPT2335 - Electrical Theory and Devices (3)

ELPT2331 - AC/DC Drives

Course Title
AC/DC Drives

Academic Level
Undergraduate

Description
Installation and maintenance of alternating current (AC) and direct current (DC) variable speed drives with emphasis on application, operating characteristics, and troubleshooting techniques.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
ELPT2335 - Electrical Theory and Devices

Course Title
Electrical Theory and Devices

Academic Level
Undergraduate

Description
Electrical and electronic measuring devices and their applications to the use of electrical power. Includes calculating and balancing single-phase and three-phase systems.

Lecture Hours
2

Lab Hours
3

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete at least 1 of the following:
  - CETT1305 - AC Circuits (3)
  - MATH1316 - Plane Trigonometry (3)

ELPT2339 - Electrical Power Distribution

Course Title
Electrical Power Distribution

Academic Level
Undergraduate

Description
Design, operation, and technical details of modern power distribution systems including generating equipment, transmission lines, plant distribution, and protective devices. Includes calculations of fault current, system load analysis, rates, and power economics.

Lecture Hours
2

Lab Hours
2

Credits
3

Semester Credit Hours
3
ELPT2343 - Electrical Systems Design
Course Title
Electrical Systems Design

Academic Level
Undergraduate

Description
Electrical design of commercial and/or industrial projects including building layout, types of equipment, placement, sizing of electrical equipment, and all electrical calculations according to the requirements of the National Electrical Code (NEC).

Lecture Hours
2

Lab Hours
3

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete all of the following
  - Complete the following:
    - DFTG1313 - Drafting for Specific Occupations (3)
  - Complete at least 1 of the following:
    - EEIR1309 - National Electrical Code (3)
    - ELPT2339 - Electrical Power Distribution (3)

ELPT2347 - Electrical Testing and Maintenance
Course Title
Electrical Testing and Maintenance

Academic Level
Undergraduate

Description
Proper and safe use of electrical power equipment test devices and the interpretation of test results. Includes protective relay testing and calibration, direct current (DC) testing, insulation power factor testing, and medium voltage switchgear.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
ELPT2355 - Programmable Logic Controllers II

Course Title
Programmable Logic Controllers II

Academic Level
Undergraduate

Description
Advanced concepts in programmable logic controllers and their applications and interfacing to industrial controls.

Lecture Hours
2

Lab Hours
2

Credits
3

Semester Credit Hours
3

Electromechanical Technician

ELMT1001 - Programmable Logic Controllers

Course Title
Programmable Logic Controllers

Academic Level
Continuing Education

Description
An introduction to programmable logic controllers as used in industrial environments including basic concepts, programming, applications, troubleshooting of ladder logic, and interfacing of equipment.

Lecture Hours
2

Lab Hours
4

Semester Credit Hours
0
ELMT1003 - Programmable Logic Controllers

**Course Title**
Programmable Logic Controllers

**Academic Level**
Continuing Education

**Lecture Hours**
0

**Lab Hours**
0

**Semester Credit Hours**
0

ELMT1091 - Special Topics in Electromechanical Technology/Technician

**Course Title**
Special Topics in Electromechanical Technology/Technician

**Academic Level**
Continuing Education

**Description**
Topics address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency.

**Lecture Hours**
7

**Lab Hours**
0

**Semester Credit Hours**
0
ELMT1301 - Programmable Logic Controllers

Course Title
Programmable Logic Controllers

Academic Level
Undergraduate

Description
An introduction to programmable logic controllers as used in industrial environments including basic concepts, programming, applications, troubleshooting of ladder logic, and interfacing of equipment.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - CETT1325 - Digital Fundamentals (3)

ELMT1305 - Basic Fluid Power

Course Title
Basic Fluid Power

Academic Level
Undergraduate

Description
Basic fluid power course covering pneumatic and hydraulic systems, fluid power symbols, operating theory, components, and basic electrical and manual controls.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
ELMT1373 - Pumps and Compressors Control  
**Course Title**  
Pumps and Compressors Control

**Academic Level**  
Undergraduate

**Description**  
This course explores study of the theory and operations of various types of pumps and compressors. Topics include mechanical circuit, electrical circuit with emphasis in 3 phase control, mechanical safety devices, flow control devices and pressure control devices.

**Lecture Hours**  
2

**Lab Hours**  
4

**Credits**  
3

**Semester Credit Hours**  
3

**Prerequisites**  
- Complete the following:  
  - CETT1303 - DC Circuits (3)

ELMT1374 - Introduction to Electromechanical System  
**Course Title**  
Introduction to Electromechanical System

**Academic Level**  
Undergraduate

**Description**  
Introduction to electro-mechanical systems, with emphasis safety and office documents.

**Lecture Hours**  
2

**Lab Hours**  
4

**Credits**  
3

**Semester Credit Hours**  
3
ELMT1391 - Special Topics in Electromechanical Technology/Technician

Course Title
Special Topics in Electromechanical Technology/Technician

Academic Level
Undergraduate

Description
Topics address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student.

Lecture Hours
1

Lab Hours
1

Credits
3

Semester Credit Hours
3

ELMT1405 - Basic Fluid Power

Course Title
Basic Fluid Power

Academic Level
Undergraduate

Description
Basic fluid power course covering pneumatic and hydraulic systems, fluid power symbols, operating theory, components, and basic electrical and manual controls.

Lecture Hours
2

Lab Hours
4

Credits
4

Semester Credit Hours
4
ELMT1491 - Special Topics in Electromechanical Technology/Technician

Course Title
Special Topics in Electromechanical Technology/Technician

Academic Level
Undergraduate

Description
This course is designed to familiarize the student with concepts in electro-mechanical technology specific to wind turbines.

Lecture Hours
2

Lab Hours
4

Credits
4

Semester Credit Hours
4

Prerequisites
- Complete the following:
  - ELMT2239 - Advanced Programmable Logic Controllers (2)

ELMT2039 - Advanced Prog Logic Controller

Course Title
Advanced Prog Logic Controller

Academic Level
Continuing Education

Lecture Hours
2

Lab Hours
0

Semester Credit Hours
0
ELMT2239 - Advanced Programmable Logic Controllers

**Course Title**

Advanced Programmable Logic Controllers

**Academic Level**

Undergraduate

**Description**

Advanced applications of programmable logic controllers as used in industrial environments including concepts of programming, industrial applications, troubleshooting ladder logic, and interfacing to equipment.

**Lecture Hours**

1

**Lab Hours**

4

**Credits**

2

**Semester Credit Hours**

2

**Prerequisites**

- Complete the following:
  - ELMT1301 - Programmable Logic Controllers (3)

---

ELMT2333 - Industrial Electronics

**Course Title**

Industrial Electronics

**Academic Level**

Undergraduate

**Description**

Devices, circuits, and systems primarily used in automated manufacturing and/or process control including computer controls and interfacing between mechanical, electrical, electronic, and computer equipment. Includes presentation of programming schemes.

**Lecture Hours**

2

**Lab Hours**

4

**Credits**

3

**Semester Credit Hours**

3
ELMT2335 - Certified Electronics Technician Training

Course Title
Certified Electronics Technician Training

Academic Level
Undergraduate

Description
Review of electronics concepts and principles in preparation for sitting for a certification examination administered by an outside organization or agency.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

ELMT2339 - Advanced Programmable Logic Controllers

Course Title
Advanced Programmable Logic Controllers

Academic Level
Undergraduate

Description
Advanced applications of programmable logic controllers as used in industrial environments including concepts of programming, industrial applications, troubleshooting ladder logic, and interfacing to equipment.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
ELMT2341 - Electromechanical Systems  
**Course Title**  
Electromechanical Systems  

**Academic Level**  
Undergraduate

**Description**  
Application of electromechanical systems. Emphasizes programmable control devices and solid state systems.

**Lecture Hours**  
2

**Lab Hours**  
4

**Credits**  
3

**Semester Credit Hours**  
3

**Prerequisites**  
- Complete the following:  
  - ELMT1374 - Introduction to Electromechanical System (3)

ELMT2371 - Industrial Control Power Device  
**Course Title**  
Industrial Control Power Device  

**Academic Level**  
Undergraduate

**Description**  
This course explores theoretical concepts in power devices control. Emphasis in 3 phase control, system design, protection control devices, wiring and troubleshooting. In-depth coverage of power devices applications.

**Lecture Hours**  
2

**Lab Hours**  
4

**Credits**  
3

**Semester Credit Hours**  
3

**Prerequisites**  
- Complete the following:  
  - CETT1305 - AC Circuits (3)
ELMT2372 - Process Control Systems

**Course Title**
Process Control Systems

**Academic Level**
Undergraduate

**Description**
Fundamental concepts of instrumentation process control. Course instruct students to program process control equipment, change controller parameter and analyze monitoring data.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3

**Prerequisites**
- Complete the following:
  - ELMT1373 - Pumps and Compressors Control (3)

ELMT2380 - Cooperative Education - Electromechanical Technology/Electromechanical Engineering Technology

**Course Title**
Cooperative Education - Electromechanical Technology/Electromechanical Engineering Technology

**Academic Level**
Undergraduate

**Description**
Career-related activities encountered in the student’s area of specialization offered through an individualized agreement among the college, employer, and student. Under the supervision of the college and the employer, the student combines classroom learning with work experience. Includes a lecture component.

**Lecture Hours**
1

**Lab Hours**
0

**Credits**
3

**Semester Credit Hours**
3
ELMT2480 - Cooperative Education - Electromechanical Technology/Electromechanical Engineering Technology

Course Title
Cooperative Education - Electromechanical Technology/Electromechanical Engineering Technology

Academic Level
Undergraduate

Description
Career-related activities encountered in the student's area of specialization offered through an individualized agreement among the college, employer, and student. Under the supervision of the college and the employer, the student combines classroom learning with work experience. Includes a lecture component.

Lecture Hours
1

Lab Hours
0

Credits
4

Semester Credit Hours
4

Prerequisites
- Complete the following:
  - ELMT2239 - Advanced Programmable Logic Controllers (2)
EEIR1309 - National Electrical Code

Course Title
National Electrical Code

Academic Level
Undergraduate

Description
Interpretation of the National Electrical Code for residential, commercial and industrial wiring. Emphasis on designing, constructing, and troubleshooting electrical systems.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - CETT1305 - AC Circuits (3)
  - ELPT1341 - Motor Control (3)

EEIR1371 - Electrical Principles and Applications

Course Title
Electrical Principles and Applications

Academic Level
Undergraduate

Description
Major topics include safety; the engineering subset of metric prefixes; engineering notation; electronic abbreviations; schematic symbols; resistor color codes; wire size and composition; Ohm’s Law, Watt’s Law, and Kirchhoff’s Laws; analysis of simple direct current and alternating current circuitry; and basic electrical devices including direct current motors, transformers, and passive filters. Laboratory sessions will stress use of test equipment including the digital multimeter and oscilloscope, construction of simple circuits, and troubleshooting techniques to determine faults in simple circuits.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
EEIR2388 - Internship - Industrial Electronics Technology/Technician

**Course Title**
Internship - Industrial Electronics Technology/Technician

**Academic Level**
Undergraduate

**Description**
A work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. A learning plan is developed by the college and the employer.

**Lecture Hours**
0

**Lab Hours**
0

**Credits**
3

**Semester Credit Hours**
3

IEIR1302 - Introduction to Direct Current Circuits

**Course Title**
Introduction to Direct Current Circuits

**Academic Level**
Undergraduate

**Description**

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3
IEIR1304 - Alternating Current Circuits for Industrial Applications

Course Title
Alternating Current Circuits for Industrial Applications

Academic Level
Undergraduate

Description
Fundamentals of Alternating Current Including Series and Parallel Circuits, Phasors, and Capacitive and Inductive Networks. Discussion of Circuit Analysis and Measurement

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

IEIR1371 - Electrical Principles and Applications

Course Title
Electrical Principles and Applications

Academic Level
Undergraduate

Description
Major topics include safety; the engineering subset of metric prefixes; engineering notation; electronic abbreviations; schematic symbols; resistor color codes; wire size and composition; Ohm’s Law, Watt’s Law, and Kirchhoff’s Laws; analysis of simple direct current and alternating current circuitry; and basic electrical devices including direct current motors, transformers, and passive filters. Laboratory sessions will stress use of test equipment including the digital multimeter and oscilloscope, construction of simple circuits, and troubleshooting techniques to determine faults in simple circuits.

Lab Hours
4

Credits
3

Semester Credit Hours
3
ITNW1000 - Network Technologies-Novell 5

Course Title
Network Technologies-Novell 5

Academic Level
Continuing Education

Description
Basic computer networking terminology and concepts, contemporary network services, transmission media, and protocols.

Lecture Hours
4

Lab Hours
0

Semester Credit Hours
0

ITNW1058 - Network+

Course Title
Network+

Academic Level
Continuing Education

Description
Prepares individuals for a career as a Network Engineer in the Information Technology support industry. Includes the various responsibilities and tasks required for service engineer to successfully perform in a specific environment. Prepares individuals to pass the Computing Technology Industry Association (CompTia) Network+ certification exam.

Lecture Hours
6

Lab Hours
0

Semester Credit Hours
0
ITNW1059 - World Wide Web

Course Title
World Wide Web

Academic Level
Continuing Education

Description
This course will focus on the use of the World Wide Web (WWW) and the creation of a home page. Web browsers and Hypertext Markup Language (HTML) are discussed.

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0

ITNW1308 - Implementing and Supporting Client Operating Systems

Course Title
Implementing and Supporting Client Operating Systems

Academic Level
Undergraduate

Description
The fundamentals of managing and configuring network clients.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
ITNW1309 - Fundamentals of Cloud Computing

Course Title
Fundamentals of Cloud Computing

Academic Level
Undergraduate

Description
Introduction to Cloud computing from a business and technical perspective, including Cloud concepts, services, architecture, system integration, connectivity, data center migration, administration, security, compliance and technical support. Coverage includes preparation for industry certifications. Topics may adapt to changes in industry practices.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

ITNW1313 - Computer Virtualization

Course Title
Computer Virtualization

Academic Level
Undergraduate

Description
Implement and support virtualization of clients of servers in a networked computing environment. This course explores installation, configuration, and management of computer virtualization workstation and servers.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
ITNW1325 - Fundamentals of Networking Technologies

Course Title
Fundamentals of Networking Technologies

Academic Level
Undergraduate

Description
Instruction in networking technologies and their implementation. Topics include the OSI reference model, network protocols, transmission media, and networking hardware and software.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

ITNW1345 - Implementing Network Directory Services

Course Title
Implementing Network Directory Services

Academic Level
Undergraduate

Description
In-depth coverage of the skills necessary to install, configure, and administer Network Directory service.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
ITNW1354 - Implementing and Supporting Servers

Course Title
Implementing and Supporting Servers

Academic Level
Undergraduate

Description
Implement, administer, and troubleshoot information systems that incorporate servers in a networked computing environment.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

ITNW1358 - Network+

Course Title
Network+

Academic Level
Undergraduate

Description
Assists individuals in preparing for the Computing Technology Industry Association (CompTIA) Network+ certification exam and career as a network professional.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
ITNW1380 - Coop-Bus Sys Nwk &tel

Course Title
Coop-Bus Sys Nwk &tel

Academic Level
Undergraduate

Description
Career Related Activities Encountered in the Student's Area of Specialization Are Offered Through a Cooperative Agreement Between the College, Employer, and Student. Under Supervision of The College and the Employer, the Student Combines Classroom Learning With Work Experience. Directly Related to a Technical Discipline, Specific Learning Objectives Guide the Student Through the Paid Work Experience. This Course May Be Repeated If Topics and Learning Outcomes Vary.

Lecture Hours
1

Lab Hours
0

Credits
3

Semester Credit Hours
3

ITNW1391 - Special Topics in Information Sciences and Systems

Course Title
Special Topics in Information Sciences and Systems

Academic Level
Undergraduate

Description
Topics address recently identified current events, skills, knowledges, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
ITNW1436 - Cloud Deployment & Infrastructure Management

Course Title
Cloud Deployment & Infrastructure Management

Academic Level
Undergraduate

Description
Focus on Cloud infrastructure, deployment, security models, and key considerations in migrating to Cloud computing. Includes the technologies and processes required to build on-premise and Cloud environments, including computation, storage, networking, virtualization, business continuity, security, and management.

Lecture Hours
2

Lab Hours
4

Credits
4

Semester Credit Hours
4

ITNW1680 - Coop-Bus Sys Net&tel

Course Title
Coop-Bus Sys Net&tel

Academic Level
Undergraduate

Description
Career Related Activities Encountered in the Student's Area of Specialization Are Offered Through a Cooperative Agreement Between the College, Employer, and Student. Under Supervision of The College and the Employer, the Student Combines Classroom Learning With Work Experience. Directly Related to a Technical Discipline, Specific Learning Objectives Guide the Student Through the Paid Work Experience. This Course May Be Repeated If Topics and Learning Outcomes Vary.

Lecture Hours
1

Lab Hours
0

Credits
6

Semester Credit Hours
6
ITNW2312 - Routers

Course Title
Routers

Academic Level
Undergraduate

Description
Router configuration for local area networks and wide area networks. Includes Internet Protocol (IP) addressing techniques and intermediate routing protocols.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - ITNW1325 - Fundamentals of Networking Technologies (3)

ITNW2321 - Networking with TCP/IP

Course Title
Networking with TCP/IP

Academic Level
Undergraduate

Description
Set up, configure, use, and support Transmission Control Protocol/Internet Protocol (TCP/IP) on networking operating systems.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - ITNW1325 - Fundamentals of Networking Technologies (3)
ITNW2335 - Network Troubleshooting and Support

Course Title
Network Troubleshooting and Support

Academic Level
Undergraduate

Description
Troubleshoot and support networks with emphasis on solving real world problems in a hands-on environment. Topics include troubleshooting and research techniques, available resources, and network management hard/software.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

ITNW2350 - Enterprise Network

Course Title
Enterprise Network

Academic Level
Undergraduate

Description
A case study in Convergence Technologies requiring a network engineer to study a problem and design a network solution for an enterprise network.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - ITSY2301 - Firewalls and Network Security (3)
ITNW2352 - Administering SQL Server

Course Title
Administering SQL Server

Academic Level
Undergraduate

Description
Administering SQL Server is a skills development course in the installation, configuration, administration, and troubleshooting of SQL Server client/server database management system version.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

ITNW2354 - Internet/Intranet Server

Course Title
Internet/Intranet Server

Academic Level
Undergraduate

Description
Advanced concepts in the designing, installing, and administration of an Internet/Intranet server.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - ITNW1345 - Implementing Network Directory Services (3)
  - ITSC1316 - Linux Installation and Configuration (3)
ITNW2355 - Server Virtualization
Course Title
Server Virtualization

Academic Level
Undergraduate

Description
An in-depth study of the installation, configuration, management and troubleshooting of a virtualized server environment.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
♦ Complete at least 1 of the following:
   ♦ ITNW1345 - Implementing Network Directory Services (3)
   ♦ ITNW1354 - Implementing and Supporting Servers (3)

ITNW2356 - Designing a Network Directory Infrastructure
Course Title
Designing a Network Directory Infrastructure

Academic Level
Undergraduate

Description
Design, implement, and support a network directory infrastructure in a multi-domain environment.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
ITNW2376 - Cloud Deployment & Infrastructure Management

Course Title
Cloud Deployment & Infrastructure Management

Academic Level
Undergraduate

Description
Deployment and management of scalable data centers, public and private cloud infrastructures, co-location strategies, energy consumption calculation, and disaster recovery planning using open source and commercial software.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

ITNW2380 - Cooperative Education - Computer Systems Networking and Telecommunications

Course Title
Cooperative Education - Computer Systems Networking and Telecommunications

Academic Level
Undergraduate

Description
Career-related activities encountered in the student's area of specialization offered through an individualized agreement among the college, employer, and student. Under the supervision of the college and the employer, the student combines classroom learning with work experience. Includes a lecture component.

Lecture Hours
1

Lab Hours
0

Credits
3

Semester Credit Hours
3
ITNW2427 - Advanced Cloud Concepts

Course Title
Advanced Cloud Concepts

Academic Level
Undergraduate

Description
Focus on enterprise Cloud architecture, with advanced topics including multi-Cloud platforms inclusive of computing, networking, storage, monitoring and database.

Lecture Hours
2

Lab Hours
4

Credits
4

Semester Credit Hours
4

Prerequisites
- Complete the following:
  - ITNW1436 - Cloud Deployment & Infrastructure Management (4)

ITNW2429 - Application Development for The Cloud

Course Title
Application Development for The Cloud

Academic Level
Undergraduate

Description
A practical study of Cloud computing architecture and service. Includes designing and developing Cloud based applications, web services, micro services, and APIs; programming for the Cloud using API calls; and building and deploying server-side applications for the Cloud.

Lecture Hours
2

Lab Hours
4

Credits
4

Semester Credit Hours
4

Prerequisites
- Complete the following:
  - ITNW1436 - Cloud Deployment & Infrastructure Management (4)
ITSE1001 - Web Design Tools

Course Title
Web Design Tools

Academic Level
Continuing Education

Description
Designing and publishing Web documents according to World Wide Web Consortium (W3C) standards. Includes graphic design issues and exploration of tools available for creating and editing Web documents.

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0

ITSE1002 - Intro to Computer Programming

Course Title
Intro to Computer Programming

Academic Level
Continuing Education

Description
Introduction to computer programming with emphasis on the fundamentals of design, development, testing, implementation, and documentation. Includes language syntax, data and file structures, input/output devices, and files.

Lecture Hours
8

Lab Hours
0

Semester Credit Hours
0

ITSE1007 - Intro to C++ Programming

Course Title
Intro to C++ Programming

Academic Level
Continuing Education

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0
ITSE1045 - Introduction to Oracle Sql

Course Title
Introduction to Oracle Sql

Academic Level
Continuing Education

Description
An introduction to the design and creation of relational databases using Oracle. Topics include storing, retrieving, updating, and displaying data using Structured Query Language (SQL).

Lecture Hours
8

Lab Hours
0

Semester Credit Hours
0

ITSE1091 - St in Computer Programming

Course Title
St in Computer Programming

Academic Level
Continuing Education

Description
Topics address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency.

Lecture Hours
7

Lab Hours
0

Semester Credit Hours
0
ITSE1094 - Special Topics in Computer Science

Course Title
Special Topics in Computer Science

Academic Level
Continuing Education

Description
Topics address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency.

Lecture Hours
6

Lab Hours
0

Semester Credit Hours
0

ITSE1301 - Web Design Tools

Course Title
Web Design Tools

Academic Level
Undergraduate

Description
Designing and publishing Web documents according to World Wide Web Consortium (W3C) standards. Emphasis on optimization of graphics and images and exploration of tools available for creating and editing Web documents.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
ITSE1302 - Computer Programming

Course Title
Computer Programming

Academic Level
Undergraduate

Description
Introduction to computer programming including design, development, testing, implementation, and documentation.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

ITSE1303 - Introduction to MySQL

Course Title
Introduction to MySQL

Academic Level
Undergraduate

Description
Introduction to fundamentals of SQL and relational databases.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
ITSE1306 - PHP Programming
Course Title
PHP Programming

Academic Level
Undergraduate

Description
Introduction to PHP including the design of web-based applications, arrays, strings, regular expressions, file input/output, e-mail and database interfaces, stream and network programming, debugging, and security.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - ITSE2302 - Intermediate Web Programming (3)

Corequisites
- Completed or concurrently enrolled in:
  - ITSE1303 - Introduction to MySQL (3)

ITSE1307 - Introduction to C++ Programming
Course Title
Introduction to C++ Programming

Academic Level
Undergraduate

Description
Introduction to computer programming using C++. Emphasis on the fundamentals of object-oriented design with development, testing, implementation, and documentation. Includes language syntax, data and file structures, input/output devices, and files.

Lecture Hours

Credits
3

Semester Credit Hours
3
ITSE1311 - Beginning Web Programming

Course Title
Beginning Web Programming

Academic Level
Undergraduate

Description
Skills development in web programming including mark-up and scripting languages.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

ITSE1329 - Programming Logic and Design

Course Title
Programming Logic and Design

Academic Level
Undergraduate

Description
Problem-solving applying structured techniques and representation of algorithms using design tools. Includes testing, evaluation, and documentation.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
ITSE1330 - Introduction to C# Programming

Course Title
Introduction to C# Programming

Academic Level
Undergraduate

Description
A study of C# syntax including data types, control structures, functions, syntax, and semantics of the language, classes, class relationships, and exception handling.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - INEW2338 - Advanced Java Programming (3)

ITSE1332 - Introduction to Visual Basic.NET Programming

Course Title
Introduction to Visual Basic.NET Programming

Academic Level
Undergraduate

Description
Introduction to Visual Basic.NET (VB.NET) including data types, control structures, functions, syntax, and semantics of the language, classes, class relationships, and exception handling.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
ITSE1333 - Mobile Applications Development

**Course Title**
Mobile Applications Development

**Academic Level**
Undergraduate

**Description**
An overview of different mobile platforms and their development environments.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3

**Prerequisites**
- Complete the following:
  - ITSE2317 - Java Programming (3)

ITSE1350 - System Analysis and Design

**Course Title**
System Analysis and Design

**Academic Level**
Undergraduate

**Description**
Introduction to the planning, design, and construction of computer information systems using the systems development life cycle and other appropriate design tools.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3
ITSE1373 - Intro to Python

Course Title
Intro to Python

Academic Level
Undergraduate

Description
This course will introduce Python Programming

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites

- INEW2338 - Advanced Java Programming (3)

ITSE1391 - Graphics Systems Development

Course Title
Graphics Systems Development

Academic Level
Undergraduate

Description
Topics address the development of client websites in a group format. Includes site design and development from conception to production.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3
ITSE1394 - Special Topics in Computer Science

Course Title
Special Topics in Computer Science

Academic Level
Undergraduate

Description
Topics address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

ITSE2031 - Advanced C++programming

Course Title
Advanced C++programming

Academic Level
Continuing Education

Lecture Hours
2

Lab Hours
4

Semester Credit Hours
0
ITSE2054 - Advanced Oracle PL/SQL

Course Title
Advanced Oracle PL/SQL

Academic Level
Continuing Education

Description
A continuation of Oracle SQL. Topics include hierarchical queries, set based queries, correlated subqueries, scripting, and scripting generation.

Lecture Hours
6

Lab Hours
0

Semester Credit Hours
0

ITSE2302 - Intermediate Web Programming

Course Title
Intermediate Web Programming

Academic Level
Undergraduate

Description
Server-side and client-side techniques for Web development.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - ITSE1311 - Beginning Web Programming (3)
ITSE2309 - Database Programming

Course Title
Database Programming

Academic Level
Undergraduate

Description
Database development using database programming techniques emphasizing database structures, modeling, and database access.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

ITSE2313 - Web Authoring

Course Title
Web Authoring

Academic Level
Undergraduate

Description
Instruction in designing and developing web pages that incorporate text, graphics, and other supporting elements using current technologies and authoring tools.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - IMED1316 - Web Design I (3)
ITSE2317 - Java Programming

Course Title
Java Programming

Academic Level
Undergraduate

Description
Introduction to object-oriented Java programming including the fundamental syntax and semantics of Java for applications and web applets.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - ITSE1302 - Computer Programming (3)

ITSE2331 - Advanced C++ Programming

Course Title
Advanced C++ Programming

Academic Level
Undergraduate

Description
Further application of C++ programming techniques including file access, abstract data structures, class inheritance, and other advanced techniques.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
ITSE2333 - Implementing a Database on Microsoft SQL Server

**Course Title**
Implementing a Database on Microsoft SQL Server

**Academic Level**
Undergraduate

**Description**
Skills development in the implementation of a database solution using Microsoft SQL Server client/server database management system.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3

**Prerequisites**
- Complete the following:
  - ITSE2309 - Database Programming (3)

ITSE2343 - Advanced Mobile Programming

**Course Title**
Advanced Mobile Programming

**Academic Level**
Undergraduate

**Description**
Programming for mobile devices including file access methods, data structures, modular programming, program testing and documentation.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3

**Prerequisites**
- Complete the following:
  - ITSE1333 - Mobile Applications Development (3)
ITSE2353 - Advanced C# Programming

Course Title
Advanced C# Programming

Academic Level
Undergraduate

Description
Continuation of C# programming using advanced features of the .NET Framework Class Library.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - ITSE1330 - Introduction to C# Programming (3)

ITSE2359 - Advanced Computer Programming

Course Title
Advanced Computer Programming

Academic Level
Undergraduate

Description
Advanced programming techniques including file access methods, data structures, modular programming, program testing and documentation.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete all of the following
  - Complete the following:
    - ITSE2333 - Implementing a Database on Microsoft SQL Server (3)
  - Complete at least 1 of the following:
    - ITSE2353 - Advanced C# Programming (3)
    - ITSE2373 - Advanced Python (3)
ITSE2373 - Advanced Python

Course Title
Advanced Python

Academic Level
Undergraduate

Description
This course will introduce advanced concepts of Python programming. Students will use python in conjunction with a cloud based database system to build programs for the Cloud.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - ITSE1373 - Intro to Python (3)
ITSE2380 - Cooperative Education - Computer Programming/Programmer, General

Course Title
Cooperative Education - Computer Programming/Programmer, General

Academic Level
Undergraduate

Description
Career Related Activities Encountered in the Student's Area of Specialization Are Offered Through a Cooperative Agreement Between the College, the Employer, and Student. Under Supervision Of the College and the Employer, the Student Combines Classroom Learning With Work Experience. Directly Related to a Technical Discipline, Specific Learning Objectives Guide the Student Through the Paid Work Experience. This Course May Be Repeated If Topics and Learning Outcomes Vary.

Lecture Hours
1

Lab Hours
0

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete all of the following
  - Complete the following:
    - ITSE2333 - Implementing a Database on Microsoft SQL Server (3)
  - Complete at least 1 of the following:
    - ITSE2353 - Advanced C# Programming (3)
    - ITSE2373 - Advanced Python (3)
ITSE2386 - Internship - Computer Programming/Programmer, General

Course Title
Internship - Computer Programming/Programmer, General

Academic Level
Undergraduate

Description
A work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. A learning plan is developed by the college and the employer.

Lecture Hours
0

Lab Hours
0

Credits
3

Semester Credit Hours
3

- Complete all of the following
  - Complete the following:
    - ITSE2333 - Implementing a Database on Microsoft SQL Server (3)
  - Complete at least 1 of the following:
    - ITSE2353 - Advanced C# Programming (3)
    - ITSE2373 - Advanced Python (3)

---

Emergency Medical Technology

EMSP1008 - Emergency Vehicle Operations

Course Title
Emergency Vehicle Operations

Academic Level
Continuing Education

Description
Instruction, demonstration, and driving range practice to prepare drivers of emergency vehicles to operate their vehicles safely in the emergency and non-emergency mode.

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0
EMSP1019 - Cpr Basic Life Support

Course Title
Cpr Basic Life Support

Academic Level
Continuing Education

Description
Instruction in lifesaving skills of respiratory (choking and near-drowning) and cardiac emergencies involving adults, children, and infants. Must meet requirements of certifying agency. Additional topics covered will include basic first aid certification training.

4

EMSP2444 - Cardiology

Course Title
Cardiology

Academic Level
Undergraduate

Description
Assessment and management of patients with cardiac emergencies. Includes single and multi-lead ECG interpretation.

Lecture Hours
3

Lab Hours
3

Credits
4

Semester Credit Hours
4
ENER1050 - Overview of Energy Industry

Course Title
Overview of Energy Industry

Academic Level
Continuing Education

Description
Introduction to the major sectors of the energy industry. Includes a comparison of energy industry careers.

Lecture Hours
3

Lab Hours
0

Semester Credit Hours
0

ENER1430 - Basic Mechanical Skills for Energy

Course Title
Basic Mechanical Skills for Energy

Academic Level
Undergraduate

Description
Basic mechanical skills using hand and power tools in an industrial environment. Topics include tool use and maintenance, lubrication, measuring, threads and fasteners, bench works, basic mechanical drawings, and basic shop calculations (English and metric). Also addresses rigging procedures to include chain falls, jacks, cable, fulcrum, port-a-power, and come-alongs.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours

ENTC1371 - Engineering Computer Graphics I

**Course Title**
Engineering Computer Graphics I

**Academic Level**
Undergraduate

**Description**
This course covers the fundamental concepts associated with engineering computer aided design graphics; CAD. Emphasis will be placed on both dimensional analysis and design for manufacturing ability of 3D models. Solid Edge Modeling Software will be utilized.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3
ENTC2310 - Machine Design

**Course Title**
Machine Design

**Academic Level**
Undergraduate

**Description**
Design considerations for machinery. Includes selection of mechanical components and machine construction principles.

**Lecture Hours**
1

**Lab Hours**
5

**Credits**
3

**Semester Credit Hours**
3

**Prerequisites**
- Complete the following:
  - MCHN1326 - Introduction to Computer-Aided Manufacturing (CAM) (3)
  - MCHN1371 - Engineering Computer Graphics I (3)

---

English

ENGL1301 - Composition I

**Course Title**
Composition I

**Academic Level**
Undergraduate

**Description**
Intensive study of and practice in writing processes, from invention and researching to drafting, revising, and editing, both individually and collaboratively. Emphasis on effective rhetorical choices, including audience, purpose, arrangement, and style. Focus on writing the academic essay as a vehicle for learning, communicating, and critical analysis.

**Lecture Hours**
3

**Lab Hours**
0

**Credits**
3

**Semester Credit Hours**
3
ENGL1302 - Composition II

Course Title
Composition II

Academic Level
Undergraduate

Description
Intensive study of and practice in the strategies and techniques for developing research-based expository and persuasive texts. Emphasis on effective and ethical rhetorical inquiry, including primary and secondary research methods; critical reading of verbal, visual, and multimedia texts; systematic evaluation, synthesis, and documentation of information sources; and critical thinking about evidence and conclusions.

EPCT2331 - Industrial Hygiene Applications
Course Title
Industrial Hygiene Applications

Academic Level
Undergraduate

Description
A study of the industrial environment and its relation to worker's health. This course provides training in anticipation, recognition, evaluation, and controlling health hazards—particularly chemical, physical, biological, and ergonomic factors existing in the workplace and having injurious effects on workers. The course also introduces training in instrumentation used in monitoring and measuring health hazards in the workplace and covers current issues in industrial hygiene.

PTAC1310 - Process Technology I - Equipment

Course Title
Process Technology I - Equipment

Academic Level
Undergraduate

Description
Introduction to the use of common processing equipment.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
PTAC1332 - Process Instrumentation I

Course Title
Process Instrumentation I

Academic Level
Undergraduate

Description
Study of the instruments and control systems used in the process industry including terminology, process variables, symbology, control loops, and basic troubleshooting.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours

PTAC1410 - Process Technology I - Equipment

Course Title
Process Technology I - Equipment

Academic Level
Undergraduate

Description
Instruction in the use of common process equipment.

Lecture Hours
3

Lab Hours
3

Credits
4

Semester Credit Hours
4

Prerequisites
- Complete the following:
  - PTAC1332 - Process Instrumentation I (3)
PTAC1454 - Industrial Processes

Course Title
Industrial Processes

Academic Level
Undergraduate

Description
The study of the common types of industrial processes.

Lecture Hours
3

Lab Hours
3

Credits
4

Semester Credit Hours
4

PTAC2314 - Principles of Quality

Course Title
Principles of Quality

Academic Level
Undergraduate

Description
Study of the background and application of quality concepts. Topics include team skills, quality tools, statistics, economics and continuous improvement.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
PTAC2336 - Process Instrumentation II

Course Title
Process Instrumentation II

Academic Level
Undergraduate

Description
Continued study of the instruments and control systems used in the process industries including terminology, process variables, symbology, control loops, and troubleshooting.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

PTAC2346 - Process Troubleshooting

Course Title
Process Troubleshooting

Academic Level
Undergraduate

Description
Instruction in the different types of troubleshooting techniques, procedures, and methods used to solve process problems.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
PTAC2386 - Internship - Process Technology/Technician

Course Title
Internship - Process Technology/Technician

Academic Level
Undergraduate

Description
A work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. A learning plan is developed by the college and the employer.

PTAC2420 - Process Technology II - Systems

**Course Title**
Process Technology II - Systems

**Academic Level**
Undergraduate

**Description**
A study of various process systems including related scientific principles.

**Lecture Hours**
2

**Lab Hours**
6

**Credits**
4

**Semester Credit Hours**
4

**Prerequisites**
- Complete the following:
  - PTAC1410 - Process Technology I - Equipment (4)

---

PTAC2438 - Process Technology III - Operations

**Course Title**
Process Technology III - Operations

**Academic Level**
Undergraduate

**Description**
This course emphasizes activities associated with the hands-on operations of process equipment.

**Lecture Hours**
2

**Lab Hours**
6

**Credits**
4

**Semester Credit Hours**
4
PTAC2446 - Process Troubleshooting

Course Title
Process Troubleshooting

Academic Level
Undergraduate

Description
Instruction in the different types of troubleshooting techniques, procedures, and methods used to solve process problems. Topics include application of data collection and analysis, cause-effect relationships, and reasoning.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours

Food & Beverage/Restaurant Management

RSTO1301 - Beverage Management

Course Title
Beverage Management

Academic Level
Undergraduate

Description
A study of the beverage service of the hospitality industry including spirits, wines, beers, and non-alcoholic beverages. Topics include purchasing, resource control, legislation, marketing, physical plant requirements, staffing, service, and the selection of wines to enhance foods.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3
RSTO1304 - Dining Room Service

**Course Title**
Dining Room Service

**Academic Level**
Undergraduate

**Description**
Introduces the principles, concepts, and systems of professional table service. Topics include dining room organization, scheduling, and management of food service personnel.

**Lecture Hours**
1

**Lab Hours**
7

**Credits**
3

**Semester Credit Hours**
3

**Prerequisites**
- Complete the following:
  - CHEF1205 - Sanitation and Safety (2)
  - IFWA1205 - Food Service Equipment and Planning (2)
  - IFWA1401 - Food Preparation I (4)

RSTO1313 - Hospitality Supervision

**Course Title**
Hospitality Supervision

**Academic Level**
Undergraduate

**Description**
Fundamentals of recruiting, selection, and training of food service and hospitality personnel. Topics include job descriptions, schedules, work improvement, motivation, applicable personnel laws and regulations. Emphasis on leadership development.

**Lecture Hours**
2

**Lab Hours**
2

**Credits**
3

**Semester Credit Hours**
3
RSTO1380 - Cooperative Education - Restaurant, Culinary, and Catering Management/Manager

Course Title
Cooperative Education - Restaurant, Culinary, and Catering Management/Manager

Academic Level
Undergraduate

Description
Career-related activities encountered in the student’s area of specialization offered through an individualized agreement among the college, employer, and student. Under the supervision of the college and the employer, the student combines classroom learning with work experience. Includes a lecture component.

RSTO2301 - Principles of Food & Beverage Controls

Course Title
Principles of Food & Beverage Controls

Academic Level
Undergraduate

Description
A study of financial principles and controls of food service operation including review of operation policies and procedures. Topics include financial budgeting and cost analysis emphasizing food and beverage labor costs, operational analysis, and international and regulatory reporting procedures.

Lecture Hours
2

Lab Hours
2

Credits
3

Semester Credit Hours
3

RSTO2407 - Catering

Course Title
Catering

Academic Level
Undergraduate

Description
Principles, techniques, and applications for both on-premises, off-premises, and group marketing of catering operations including food preparation, holding, and transporting techniques.

Lecture Hours
2

Lab Hours
4

Credits
4

Semester Credit Hours
4
RSTO2505 - Management of Food Production and Service

Course Title
Management of Food Production and Service

Academic Level
Undergraduate

Description
A study of quantity cookery and management problems pertaining to commercial and institutional food service, merchandising and variety in menu planning, and customer food preferences. Includes laboratory experiences in quantity food preparation and service.

Lecture Hours
2

Lab Hours
9

Credits
5

Semester Credit Hours
5

Prerequisites
- Complete the following:
  - CHEF1441 - American Regional Cuisine (4)
  - CHEF1445 - International Cuisine (4)
  - PSTR2431 - Advanced Pastry Shop (4)
  - RSTO1313 - Hospitality Supervision (3)

Corequisites
- Completed or concurrently enrolled in:
  - RSTO1313 - Hospitality Supervision (3)

Geography
GEOG1302 - Human Geography

**Course Title**
Human Geography

**Academic Level**
Undergraduate

**Description**
This course introduces students to fundamental concepts, skills, and practices of human geography. Place, space, and scale serve as a framework for understanding patterns of human experience. Topics for discussion may include globalization, population and migration, culture, diffusion, political and economic systems, language, religion, gender, and ethnicity.

**Lecture Hours**
3

**Lab Hours**
0

**Credits**
3

**Semester Credit Hours**
3

GEOG1303 - World Regional Geography

**Course Title**
World Regional Geography

**Academic Level**
Undergraduate

**Description**
This course is an introduction to the world's major regions seen through their defining physical, social, cultural, political, and economic features. These regions are examined in terms of their physical and human characteristics and their interactions. The course emphasizes relations among regions on issues such as trade, economic development, conflict, and the role of regions in the globalization process.

ARTC1310 - Design Concepts

**Course Title**
Design Concepts

**Academic Level**
Undergraduate

**Description**
Fundamental techniques in conceptualizing. Includes all procedures from initial research to creating strategies to finalize a solution.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3

**Prerequisites**
- Complete the following:
  - GRPH1359 - Vector Graphics for Production (3)

**Corequisites**
- Completed or concurrently enrolled in:
  - ARTC2313 - Digital Publishing II (3)
ARTC1313 - Digital Publishing I

Course Title
Digital Publishing I

Academic Level
Undergraduate

Description
The fundamentals of using digital layout as a primary publishing tool and the basic concepts and terminology associated with typography and page layout.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - ARTC1302 - Digital Imaging I (3)

ARTC1317 - Design Communication I

Course Title
Design Communication I

Academic Level
Undergraduate

Description
Study of design development relating to graphic design terminology, tools and media, and layout and design concepts. Topics include integration of type, images and other design elements, and developing computer skills in industry standard computer programs.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours

ARTC1327 - Typography

Course Title
Typography

Academic Level
Undergraduate

Description
A study of letterforms and typographic concepts as elements of graphic communication. Emphasis on developing a current, practical typographic knowledge based on industry standards.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

ARTC1349 - Art Direction I

Course Title
Art Direction I

Academic Level
Undergraduate

Description
Creation of projects in art direction for advertising graphic campaigns for products, services, or ideas. Topics include all campaign procedures from initial research and creative strategy to final execution and presentation of a comprehensive project.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - ARTC1327 - Typography (3)
  - GRPH1359 - Vector Graphics for Production (3)
ARTC1359 - Visual Design for New Media

Course Title
Visual Design for New Media

Academic Level
Undergraduate

Description
Visual design elements as they relate to new media. Emphasizes aesthetics and visual problem solving such as typographic issues, color management, hierarchy of information, image optimization, and effective layout.

Lecture Hours
2

Lab Hours
4

Credits
3

HITT2335 - Coding and Reimbursement Methodologies

Course Title
Coding and Reimbursement Methodologies

Academic Level
Undergraduate

Description
Advanced coding techniques with emphasis on case studies, health records, and federal regulations regarding prospective payment systems and methods of reimbursement.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - HITT1341 - Coding and Classification Systems (3)
HITT2339 - Health Information Organization and Supervision

Course Title
Health Information Organization and Supervision

Academic Level
Undergraduate

Description
Principles of organization and supervision of human, financial, and physical resources.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

HITT2346 - Advanced Medical Coding

Course Title
Advanced Medical Coding

Academic Level
Undergraduate

Description
Advanced concepts of ICD and CPT coding rules, conventions, and guidelines in complex case studies. Investigation of government regulations and changes in health care reporting.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - HITT1341 - Coding and Classification Systems (3)
  - HITT1342 - Ambulatory Coding (3)
HITT2360 - Clinical - Health Information/Medical Records Technology/Technician

Course Title
Clinical - Health Information/Medical Records Technology/Technician

Academic Level
Undergraduate

Description
Career-related activities encountered in the student's area of specialization offered through an individualized agreement among the college, employer, and student. Under the supervision of the college and the employer, the student combines classroom learning with work experience. Includes a lecture component.

**HITT2443 - Quality Assessment and Performance Improvement**

**Course Title**

Quality Assessment and Performance Improvement

**Academic Level**

Undergraduate

**Description**

Study of quality standards and methodologies in the health information management environment. Topics include licensing, accreditation, compilation and presentation of data in statistical formats, quality management and performance improvement functions, utilization management, risk management, and medical staff data quality issues, and approaches to assessing patient safety issues and implementation of quality management and reporting through electronic systems. Approaches to assessing patient safety issues and implementation of quality management and reporting through electronic systems.

HART1256 - EPA Recovery Certification Preparation

Course Title
EPA Recovery Certification Preparation

Academic Level
Undergraduate

Description
Certification training for HVAC refrigerant recovery and recycling. Instruction will provide a review of EPA guidelines for refrigerant recovery and recycling during the installation, service, and repair of all HVAC and refrigerant systems.

Lecture Hours
2

Lab Hours
0

Credits
2

Semester Credit Hours
2

HART1300 - H.V.A.C Duct Fabrication

Course Title
H.V.A.C Duct Fabrication

Academic Level
Undergraduate

Description
Layout and fabrication of HVAC duct systems using common tools and equipment of the trade.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
HART1301 - Basic Electricity for HVAC

Course Title
Basic Electricity for HVAC

Academic Level
Undergraduate

Description
Principles of electricity as required by HVAC, including proper use of test equipment, electrical circuits, and component theory and operation.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

HART1303 - Air Conditioning Control Principles

Course Title
Air Conditioning Control Principles

Academic Level
Undergraduate

Description
A basic study of HVAC and refrigeration controls; troubleshooting of control components; emphasis on use of wiring diagrams to analyze high and low voltage circuits; a review of Ohm's law as applied to air conditioning controls and circuits.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - HART1301 - Basic Electricity for HVAC (3)

Corequisites
- Completed or concurrently enrolled in:
  - HART1301 - Basic Electricity for HVAC (3)
HART1307 - Refrigeration Principles
Course Title
Refrigeration Principles

Academic Level
Undergraduate

Description
An introduction to the refrigeration cycle, heat transfer theory, temperature/pressure relationship, refrigerant handling, refrigeration components, and safety.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

HART1310 - HVAC Shop Practices and Tools
Course Title
HVAC Shop Practices and Tools

Academic Level
Undergraduate

Description
Tools and instruments used in the HVAC industry. Includes proper application, use and care of these tools, and tubing and piping practices.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
HART1341 - Residential Air Conditioning

Course Title
Residential Air Conditioning

Academic Level
Undergraduate

Description
A study of components, applications, and installation of mechanical air conditioning systems including operating conditions, troubleshooting, repair, and charging of air conditioning systems.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - HART1301 - Basic Electricity for HVAC (3)
  - HART1307 - Refrigeration Principles (3)
HART1345 - Gas and Electric Heating

Course Title
Gas and Electric Heating

Academic Level
Undergraduate

Description
Study of the procedures and principles used in servicing heating systems including gas fired furnaces and electric heating systems.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - HART1301 - Basic Electricity for HVAC (3)

Corequisites
- Completed or concurrently enrolled in:
  - HART1301 - Basic Electricity for HVAC (3)

HART1351 - Energy Management

Course Title
Energy Management

Academic Level
Undergraduate

Description
Study of basic heat transfer theory; sensible and latent heat loads; building envelope construction; insulation, lighting, and fenestration types; and conduct energy audit procedures. The course also develops energy audit recommendations based on local utility rates, building use, and construction. Laboratory activities include developing energy audit reports, installing energy saving devices, and measuring energy consumption.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours

**Semester Credit Hours**
0
HART2301 - Air Conditioning & Refrigeration Codes

Course Title
Air Conditioning & Refrigeration Codes

Academic Level
Undergraduate

Description
HVAC standards and concepts with emphasis on the understanding, and documentation of the codes and regulations required for the state mechanical contractors license and local codes.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

HART2302 - Commercial Air Conditioning System Design

Course Title
Commercial Air Conditioning System Design

Academic Level
Undergraduate

Description
Advanced study in essential elements of commercial air conditioning contracting including duct systems design; equipment selection using manufacturers' data; and preparation of shop drawings and submittals.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
HART2331 - Advanced Electricity for HVAC

Course Title
Advanced Electricity for HVAC

Academic Level
Undergraduate

Description
Advanced electrical instruction and skill building in installation and servicing of air conditioning and refrigeration equipment including detailed instruction in motors and power distribution motors, motor controls, and application of solid state devices.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - HART1303 - Air Conditioning Control Principles (3)

HART2334 - Advanced Air Conditioning Controls

Course Title
Advanced Air Conditioning Controls

Academic Level
Undergraduate

Description
Theory and application of electrical control devices, electromechanical controls, and/or pneumatic controls.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - HART2336 - Air Conditioning Troubleshooting (3)
HART2336 - Air Conditioning Troubleshooting

Course Title
Air Conditioning Troubleshooting

Academic Level
Undergraduate

Description
An advanced course in application of troubleshooting principles and use of test instruments to diagnose air conditioning and refrigeration components and system problems including conducting performance tests.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - HART1303 - Air Conditioning Control Principles (3)
  - HART1345 - Gas and Electric Heating (3)
  - HART1341 - Residential Air Conditioning (3)

Corequisites
- Completed or concurrently enrolled in:
  - HART1341 - Residential Air Conditioning (3)

HART2338 - Air Conditioning Installation and Startup

Course Title
Air Conditioning Installation and Startup

Academic Level
Undergraduate

Description
A study of air conditioning system installation, refrigerant piping, condensate disposal, and air cleaning equipment with emphasis on startup and performance testing.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
HART2341 - Commercial Air Conditioning
Course Title
Commercial Air Conditioning

Academic Level
Undergraduate

Description
A study of components, applications, and installation of air conditioning systems with capacities of 25 tons or less.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - HART1303 - Air Conditioning Control Principles (3)
  - HART1341 - Residential Air Conditioning (3)

HART2342 - Commercial Refrigeration
Course Title
Commercial Refrigeration

Academic Level
Undergraduate

Description
Theory and practical application in the maintenance of commercial refrigeration; medium, and low temperature applications and ice machines.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - HART1307 - Refrigeration Principles (3)
HART2343 - Industrial Air Conditioning

Course Title
Industrial Air Conditioning

Academic Level
Undergraduate

Description
A study of components, accessories, applications, and installation of air conditioning systems above 25 tons capacity.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - HART2336 - Air Conditioning Troubleshooting (3)

HART2345 - Residential Air Conditioning Systems Design

Course Title
Residential Air Conditioning Systems Design

Academic Level
Undergraduate

Description
Study of the properties of air and results of cooling, heating, humidifying or dehumidifying; heat gain and heat loss calculations including equipment selection and balancing the air system.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - HART2336 - Air Conditioning Troubleshooting (3)
HART2349 - Heat Pumps

Course Title
Heat Pumps

Academic Level
Undergraduate

Description
A study of heat pumps, heat pump control circuits, defrost controls, auxiliary heat, air flow, and other topics related to heat pump systems.

Lecture Hours
2

Lab Hours
2

Credits
3

Semester Credit Hours
3

Prerequisites
◆ Complete the following:
  ◆ HART1303 - Air Conditioning Control Principles (3)

Corequisites
◆ Completed or concurrently enrolled in:
  ◆ HART1341 - Residential Air Conditioning (3)

HART2350 - HVAC Zone Controls

Course Title
HVAC Zone Controls

Academic Level
Undergraduate

Description
Theory and application of HVAC residential Zone control devices, electromechanical controls, and/or pneumatic controls.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
◆ Complete the following:
  ◆ HART2336 - Air Conditioning Troubleshooting (3)
HART2357 - Specialized Commercial Refrigeration
Course Title
Specialized Commercial Refrigeration

Academic Level
Undergraduate

Description
An advanced course covering the components, accessories, and service of specialized refrigeration units, such as ice machines, soft-serve machines, cryogenics, and cascade systems.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - HART2336 - Air Conditioning Troubleshooting (3)

HART2358 - Testing, Adjusting, and Balancing HVAC Systems
Course Title
Testing, Adjusting, and Balancing HVAC Systems

Academic Level
Undergraduate

Description
A study in the process of checking and adjusting all the building environmental systems to produce the design objectives. Emphasis on efficiency and energy savings.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - HART2331 - Advanced Electricity for HVAC (3)
HART2380 - Cooperative Education HVAC

**Course Title**
Cooperative Education HVAC

**Academic Level**
Undergraduate

**Description**
Career-related activities encountered in the student's area of specialization offered through an individualized agreement among the college, employer, and student. Under the supervision of the college and the employer, the student combines classroom learning with work experience. Includes a lecture component.

**Heating, Air Cond, Ventilation**

RBPT1370 - Building Envelope Inspection

**Course Title**
Building Envelope Inspection

**Academic Level**
Undergraduate

**Description**
Outlines procedures for improving the comfort, durability and energy efficiency of residential homes shell or envelope. Emphasis on air leakage and sealing measures, insulation types, proper installation of doors and windows, moisture fundamentals, indoor pollutants, and health and safety issues encountered when making energy improvements.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**

RBPT2325 - Energy Rating Systems for Homes

Course Title

Energy Rating Systems for Homes

Academic Level

Undergraduate

Description

Use of computer software and rating criteria to evaluate and score homes using residential energy rating systems. Emphasizes gathering data from building plans, manufacturers' specifications, and onsite testing.

Lecture Hours

2

Lab Hours

4

Credits

3

Semester Credit Hours

3

RBPT2335 - Residential Environmental Quality

Course Title

Residential Environmental Quality

Academic Level

Undergraduate

Description

Methods for improving the indoor and outdoor environmental quality associated with homes. Emphasizes identifying materials, building practices, and human behavior both inside and outside the home that impact environmental quality. Includes best-practice strategies.

Lecture Hours

2

Lab Hours

4

Credits

3

Semester Credit Hours

3
RBPT2350 - Residential Retrofit Strategies

Course Title
Residential Retrofit Strategies

Academic Level
Undergraduate

Description
Evaluation of existing homes and retrofit strategies to improve energy efficiency and environmental quality. Includes retrofitting a home for onsite power generation. Covers using a whole-house approach to evaluate the effects of comfort, safety, indoor environmental quality, financial incentives, cost effectiveness, environmental impact, energy efficiency, and the movement of heat, moisture, and air through the building enclosure.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

RBPT2359 - Residential Building Performance Consulting

Course Title
Residential Building Performance Consulting

Academic Level
Undergraduate

Description
A summary of the skills needed to be a residential building performance specialist. Emphasizes onsite building testing, use of evaluation software and rating criteria, production of reports, and presentation of recommendations to improve residential building performance.

Lecture Hours
2

Lab Hours
4

Credits
3

HEMR1304 - Natural Gas Compression
Course Title
Natural Gas Compression

Academic Level
Undergraduate

Description
An introductory course in the principles of the operation of gas compressors and natural gas engines.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
HEMR1401 - Tracks and Undercarriages

Course Title
Tracks and Undercarriages

Academic Level
Undergraduate

Description
Concepts in operation and maintenance of final drive track systems and undercarriages used on track and wheel type equipment.

Lecture Hours
2

Lab Hours
4

Credits
4

Semester Credit Hours
4

History for Transfer

HIST1301 - United States History I

Course Title
United States History I

Academic Level
Undergraduate

Description
A survey of the social, political, economic, cultural, and intellectual history of the United States from the pre-Columbian era to the Civil War/Reconstruction period. United States History I includes the study of pre-Columbian, colonial, revolutionary, early national, slavery and sectionalism, and the Civil War/Reconstruction eras. Themes that may be addressed in United States History I include: American settlement and diversity, American culture, religion, civil and human rights, technological change, economic change, immigration and migration, and creation of the federal government.

Lecture Hours
3

Lab Hours
0

Credits

HIST2312 - Western Civilization II
Course Title
Western Civilization II

Academic Level
Undergraduate

Description
A survey of the social, political, economic, cultural, religious, and intellectual history of Europe and the Mediterranean world from the 17th century to the modern era. Themes that should be addressed in Western Civilization II include absolutism and constitutionalism, growth of nation states, the Enlightenment, revolutions, classical liberalism, industrialization, imperialism, global conflict, the Cold War, and globalism.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours

HIST2321 - World Civilizations I

Course Title
World Civilizations I

Academic Level
Undergraduate

Description
A survey of the social, political, economic, cultural, religious, and intellectual history of the world from the emergence of human cultures through the 15th century. The course examines major cultural regions of the world in Africa, the Americas, Asia, Europe, and Oceania and their global interactions over time. Themes include the emergence of early societies, the rise of civilizations, the development of political and legal systems, religion and philosophy, economic systems and trans-regional networks of exchange. The course emphasizes the development, interaction and impact of global exchange.

Horticulture

HORT1401 - Horticulture (lecture + Lab)

Course Title
Horticulture (lecture + Lab)

Academic Level
Undergraduate

Description
Structure, growth, and development of horticultural plants. Examination of environmental effects, basic principles of reproduction, production methods ranging from outdoor to controlled climates, nutrition, and pest management. Laboratory activities will reinforce the structure, growth, and development of horticultural plants.

Lecture Hours
3

Lab Hours
2

Credits
4

Semester Credit Hours
4
HALT1038 - Irrigation Water Management

Course Title
Irrigation Water Management

Academic Level
Continuing Education

Description
Application of the science of soil-water plant relations and climatic conditions to develop effective scheduling and management of irrigation water systems for residential, commercial, industrial, park, and golf courses. Water conservation issues, water policies and codes and other related matters will be discussed.

**Hydraulics**
HYDR1045 - Hydraulics and Pneumatics

Course Title
Hydraulics and Pneumatics

Academic Level
Continuing Education

Description
Discussion of the fundamentals of hydraulics and pneumatics, components of each system, and the operations, maintenance, and analysis of each system.

Lecture Hours
0

Lab Hours
4

Semester Credit Hours
0

HYDR1301 - Rigging and Conveying Systems

Course Title
Rigging and Conveying Systems

Academic Level
Undergraduate

Description
Introduction to directing and moving heavy objects, selecting the appropriate rigging equipment, in conjunction with the suitable hardware and lifting devices with an emphasis on inspection, care, and maintenance of rigging equipment.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
HYDR1305 - Basic Hydraulics

Course Title
Basic Hydraulics

Academic Level
Undergraduate

Description
Fundamentals of hydraulics including types of hydraulic pumps, cylinders, valves, motors, and related systems. Introduction to hydraulic schematic symbols as related to components.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

HYDR1345 - Hydraulics and Pneumatics

Course Title
Hydraulics and Pneumatics

Academic Level
Undergraduate

Description
Discussion of the fundamentals of hydraulics and pneumatics, components of each system, and the operations, maintenance, and analysis of each system.

INMT1317 - Industrial Automation  
**Course Title**  
Industrial Automation  

**Academic Level**  
Undergraduate  

**Description**  
Applications of industrial automation systems including identification of system requirements, equipment integration, motors, controllers, and sensors. Coverage of set-up, maintenance, and testing of the automated system.  

**Lecture Hours**  
2  

**Lab Hours**  
4  

**Credits**  
3  

**Semester Credit Hours**  
3  

**Prerequisites**  
- Complete the following:  
  - CETT1303 - DC Circuits (3)  
  - CETT1305 - AC Circuits (3)  

INMT1319 - Manufacturing Processes  
**Course Title**  
Manufacturing Processes  

**Academic Level**  
Undergraduate  

**Description**  
Exploration of a variety of methods used in manufacturing. Theory and application of processes including but not limited to metal forming, welding, machining, heat treating, plating, assembly procedures, and process control considerations, casting and injection molding.  

**Lecture Hours**  
2  

**Lab Hours**  
2  

**Credits**  
3  

**Semester Credit Hours**  
3
INMT1355 - Industrial Power Plant Systems

Course Title

Industrial Power Plant Systems

Academic Level

Undergraduate

Description

Study the principles of operation and maintenance of industrial power plants. Emphasis placed on component replacement, tune-up, and field adjustments of engine systems.

Lecture Hours

2

Lab Hours

4

Credits

3

Semester Credit Hours

3

Prerequisites

- Complete the following:
  - INMT1305 - Introduction to Industrial Maintenance (3)
INMT1371 - Industrial Manufacturing PLC Installation

**Course Title**
Industrial Manufacturing PLC Installation

**Academic Level**
Undergraduate

**Description**
A study into Programmable Logic Controllers (PLC's). Topics will include the installation of various PLC units, wiring requirements, proper shielding techniques, wiring of input and output components, troubleshooting PLC input's and output's, ladder logic design, programming, program installation, and program utilization for troubleshooting industrial systems.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3

**Prerequisites**
- Complete the following:
  - ELPT1341 - Motor Control (3)

**Corequisites**
- Completed or concurrently enrolled in:
  - ELPT1341 - Motor Control (3)

INMT2003 - Pumps, Compressors & Mechanical Drives

**Course Title**
Pumps, Compressors & Mechanical Drives

**Academic Level**
Continuing Education

**Description**
A study of the theory and operations of various types of pumps and compressors. Topics include mechanical power transmission systems including gears, v-belts, and chain drives.

**Lecture Hours**
4

**Lab Hours**
0

**Semester Credit Hours**
0
INMT2045 - Industrial Troubleshooting

Course Title
Industrial Troubleshooting

Academic Level
Continuing Education

Description
An advanced study of the techniques used in troubleshooting various types of industrial equipment to include mechanical, electrical, hydraulic, and pneumatic systems and their control devices. Emphasis will be placed on the use of schematics and diagrams in conjunction with proper troubleshooting procedures.

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0

INMT2301 - Machinery Installation

Course Title
Machinery Installation

Academic Level
Undergraduate

Description
Students utilize skills acquired in previous studies. Machinery foundation, locations, installation, and alignment activities are practiced and tested. Emphasis is on the various methods of shaft alignment including laser shaft alignment.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - INMT1305 - Introduction to Industrial Maintenance (3)
INMT2303 - Pumps, Compressors & Mechanical Drives
Course Title
Pumps, Compressors & Mechanical Drives

Academic Level
Undergraduate

Description
A study of the theory and operations of various types of pumps and compressors. Topics include mechanical power transmission systems including gears, v-belts, and chain drives.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
♦ Complete the following:
  ♦ INMT1305 - Introduction to Industrial Maintenance (3)

INMT2345 - Industrial Troubleshooting
Course Title
Industrial Troubleshooting

Academic Level
Undergraduate

Description
An advanced study of the techniques used in troubleshooting various types of industrial equipment to include mechanical, electrical, hydraulic, and pneumatic systems and their control devices. Emphasis will be placed on the use of schematics and diagrams in conjunction with proper troubleshooting procedures.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
♦ Complete the following:
  ♦ ELPT1341 - Motor Control (3)
Info Tech Digital Forensics

ITDF1300 - Introduction to Digital Forensics

Course Title
Introduction to Digital Forensics

Academic Level
Undergraduate

Description
A study of the application of digital forensic technology to collect, analyze, document, and present information while maintaining a documented chain of custody. Overview of ethics, crime, and other legal guidelines/regulations/laws. Includes overview of tools used for forensic analysis of digital devices in investigations.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

ITDF1305 - Digital Data Storage Forensics

Course Title
Digital Data Storage Forensics

Academic Level
Undergraduate

Description
Exploration, examination, and assessment of the characteristics and details of digital storage media used in computers systems and small-scale digital devices. Includes experimenting with various tools to reinforce identification of evidentiary data.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
ITDF1390 - Special Topics in Computer & Information Systems Security/Information Assurance

Course Title
Special Topics in Computer & Information Systems Security/Information Assurance

Academic Level
Undergraduate

Description
Topics address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

ITDF2320 - Digital Forensics Collection

Course Title
Digital Forensics Collection

Academic Level
Undergraduate

Description
A study of acquiring digital evidence from devices, networks and logs while preserving the evidentiary chain. Includes the legal aspects of the search and seizure of computers and related equipment/information.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
ITDF2325 - Digital Forensics Tools

Course Title
Digital Forensics Tools

Academic Level
Undergraduate

Description
Skills-based course in the applications of forensic analysis software. Tools used in this course may include EnCase, ILook, Forensic Tool Kit, write blockers, StegAlyzerSS, "X-Ways", ProDiscover Basic, and others.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

ITDF2330 - Digital Forensics Analysis

Course Title
Digital Forensics Analysis

Academic Level
Undergraduate

Description
Digital forensic analysis, report preparation, and evidence presentation. Emphasizes balancing legal and technical aspects of cases where digital forensics is employed.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
ITDF2335 - Comprehensive Digital Forensics Project
Course Title
Comprehensive Digital Forensics Project

Academic Level
Undergraduate

Description
Comprehensive application of skills learned in previous digital forensics courses in a simulated crime scene or workplace investigation. Includes collection, analysis, and presentation of digital data and evidence in a problem-based case study format. This course is used as a capstone course for a certificate or degree.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

ITDF2420 - Digital Forensics Collection
Course Title
Digital Forensics Collection

Academic Level
Undergraduate

Description
A study of acquiring digital evidence from devices, networks and logs while preserving the evidentiary chain. Includes the legal aspects of the search and seizure of computers and related equipment/information.

Lecture Hours
2

Lab Hours
4

Credits
4

Semester Credit Hours
4
**ITDF2425 - Digital Forensics Tools**

**Course Title**
Digital Forensics Tools

**Academic Level**
Undergraduate

**Description**
Skills-based course in the applications of forensic analysis software and hardware tools.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
4

**Semester Credit Hours**
4

**Prerequisites**
- Complete the following:
  - ITDF2420 - Digital Forensics Collection (4)

**ITDF2430 - Digital Forensics Analysis**

**Course Title**
Digital Forensics Analysis

**Academic Level**
Undergraduate

**Description**
Digital forensic analysis, report preparation, and evidence presentation. Emphasizes balancing legal and technical aspects of cases where digital forensics is employed.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
4

**Semester Credit Hours**
4

**Prerequisites**
- Complete the following:
  - ITDF2425 - Digital Forensics Tools (4)
ITDF2435 - Comprehensive Digital Forensics Project

**Course Title**
Comprehensive Digital Forensics Project

**Academic Level**
Undergraduate

**Description**
Comprehensive application of skills learned in previous digital forensics courses in a simulated crime scene or workplace investigation. Includes collection, analysis, and presentation of digital data and evidence in a problem-based case study format.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
4

**Semester Credit Hours**
4

---

**Information Technology Security**

ITSY1091 - Sp.Topics in Information Tech

**Course Title**
Sp.Topics in Information Tech

**Academic Level**
Continuing Education

**Lecture Hours**
0

**Lab Hours**
0

**Semester Credit Hours**
0
ITSY1342 - Information Technology Security

Course Title
Information Technology Security

Academic Level
Undergraduate

Description
Instruction in security for network hardware, software, and data, including physical security; backup procedures; relevant tools; encryption; and protection from viruses.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
◆ Complete at least 1 of the following:
  ◆ ITNW1345 - Implementing Network Directory Services (3)
  ◆ ITNW1354 - Implementing and Supporting Servers (3)

ITSY1374 - Secure Linux Administration

Course Title
Secure Linux Administration

Academic Level
Undergraduate

Description
Configure and manage security on Linux systems, to include Linux installation, basic administration, utilities and commands, upgrading system, networking, and application installation; Management and securing network services and hardening of the system OS to mitigate security risks; Introduction to common Linux-based open source security tools used to assess security vulnerabilities, analyze malware, and conduct penetration testing.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
◆ Complete the following:
  ◆ ITNW1354 - Implementing and Supporting Servers (3)
ITSY1375 - Security Scripting

**Course Title**
Security Scripting

**Academic Level**
Undergraduate

**Description**
Utilize scripting languages to create scripts that could be used for security assessments, data analysis (data manipulation; textual manipulation), and automating administrative security tasks.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3

**Prerequisites**
- Complete the following:
  - ITSY1374 - Secure Linux Administration (3)

ITSY2301 - Firewalls and Network Security

**Course Title**
Firewalls and Network Security

**Academic Level**
Undergraduate

**Description**
Identify elements of firewall design, types of security threats and responses to security attacks. Use Best Practices to design, implement, and monitor a network security plan. Examine security incident postmortem reporting and ongoing network security activities.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3

**Prerequisites**
- Complete the following:
  - ITNW2312 - Routers (3)
ITSY2330 - Intrusion Detection

Course Title
Intrusion Detection

Academic Level
Undergraduate

Description
Identify elements of firewall design, types of security threats and responses to security attacks. Use Best Practices to design, implement, and monitor a network security plan. Examine security incident postmortem reporting and ongoing network security activities.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - ITNW2321 - Networking with TCP/IP (3)

ITSY2343 - Computer System Forensics

Course Title
Computer System Forensics

Academic Level
Undergraduate

Description
In-depth study of system forensics including methodologies used for analysis of computer security breaches. Gather and evaluate evidence to perform postmortem analysis of a security breach.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - ITDF1300 - Introduction to Digital Forensics (3)
ITSY2359 - Security Assessment and Auditing

Course Title
Security Assessment and Auditing

Academic Level
Undergraduate

Description
Capstone experience for the security curriculum. Synthesizes technical material covered in prior courses to monitor, audit, analyze, and revise computer and network security systems to ensure appropriate levels of protection are in place to assure regulatory compliance.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - ITSY1342 - Information Technology Security (3)
  - ITSY2301 - Firewalls and Network Security (3)
  - ITSY1374 - Secure Linux Administration (3)

Institutional Food Workers/Adm

IFWA1050 - Processors & Manuf. CORE HACC

Course Title
Processors & Manuf. CORE HACC

Academic Level
Continuing Education

Description
Common food safety and sanitation practices that should be utilized in food establishments. Topics include keys to providing safe food, food safety hazards, standards for the food safety handler, purchasing and receiving safe food, storing food safely, keeping food safe during preparation and service, proper cleaning and sanitizing, and developing an Integrated Pest Management (IPM) program.

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0
IFWA1091 - Special Topics in Institutional Food Work

Course Title
Special Topics in Institutional Food Work

Academic Level
Continuing Education

Description
Topics address recently identified current events, skills, knowledges, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency.

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0

IFWA1205 - Food Service Equipment and Planning

Course Title
Food Service Equipment and Planning

Academic Level
Undergraduate

Description
A study of various types of food service equipment and the planning of equipment layout for product flow and efficient operation.

Lecture Hours
1

Lab Hours
3

Credits
2

Semester Credit Hours
2
IFWA1217 - Food Production and Planning

**Course Title**
Food Production and Planning

**Academic Level**
Undergraduate

**Description**
Skill development in basic mathematical operations and study of their applications in the food service industry. Topics include percentages, weights and measures, ratio and proportion, weights and measures conversions, determination of portion costs for menu items and complete menus, portion control, and the increase and decrease of standard recipes.

**Lecture Hours**
1

**Lab Hours**
2

**Credits**
2

**Semester Credit Hours**
2

IFWA1218 - Nutrition for the Food Service Professional

**Course Title**
Nutrition for the Food Service Professional

**Academic Level**
Undergraduate

**Description**
An introduction to nutrition including nutrients, digestion and metabolism, menu planning, recipe modification, dietary guidelines and restrictions, diet and disease, and healthy cooking techniques.

**Lecture Hours**
2

**Lab Hours**
0

**Credits**
2

**Semester Credit Hours**
2
IFWA1318 - Nutrition for the Food Service Prof Professional

**Course Title**
Nutrition for the Food Service Prof Professional

**Academic Level**
Undergraduate

**Description**
An introduction to nutrition including nutrients, digestion and metabolism, menu planning, recipe modification, dietary guidelines and restrictions, diet and disease, and healthy cooking techniques.

**Lecture Hours**
3

**Lab Hours**
0

**Credits**
3

**Semester Credit Hours**
3

IFWA1401 - Food Preparation I

**Course Title**
Food Preparation I

**Academic Level**
Undergraduate

**Description**
A study of the fundamental principles of food preparation and cookery. Emphasis on basic techniques of preparing soups, salads, dressings, sandwiches, beverages, vegetables, and cheese and egg cookery.

**Lecture Hours**
2

**Lab Hours**
8

**Credits**
4

**Semester Credit Hours**
4
IFWA1427 - Food Preparation II

Course Title
Food Preparation II

Academic Level
Undergraduate

Description
Continuation of the fundamental principles of food preparation. Emphasis on preparation of food items such as meats, poultry and fish.

Lecture Hours
2

Lab Hours
8

Credits
4

Semester Credit Hours
4

Prerequisites
- Complete the following:
  - CHEF1205 - Sanitation and Safety (2)
  - IFWA1205 - Food Service Equipment and Planning (2)
  - IFWA1401 - Food Preparation I (4)

---

Instructional Media Technology

IMED1002 - Web Page Creation I

Course Title
Web Page Creation I

Academic Level
Continuing Education

Description
Web page creation with graphic elements. Includes use of Web authoring software and study of websites and browsers.

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0
IMED1040 - Web Site Creation II

Course Title
Web Site Creation II

Academic Level
Continuing Education

Description
Publishing, design, and layout techniques for Websites. Utilizes techniques in animation, tables, and forms. Also includes application of tools for creating and editing a Website.

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0

IMED1316 - Web Design I

Course Title
Web Design I

Academic Level
Undergraduate

Description
Instruction in web design and related graphic design issues including mark-up languages, web sites, and browsers.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete at least 1 of the following:
  - ARTC1302 - Digital Imaging I (3)
  - ITSE1311 - Beginning Web Programming (3)
  - IMED1371 - Ui/Ux Design (3)

Corequisites
- Completed or concurrently enrolled in at least 1 of the following:
  - ARTC1302 - Digital Imaging I (3)
  - ITSE1311 - Beginning Web Programming (3)
  - IMED1371 - Ui/Ux Design (3)
**IMED1341 - Interface Design**

**Course Title**

Interface Design

**Academic Level**

Undergraduate

**Description**

Interface design process including selecting interfaces that are relative to a project's content and delivery system. Emphasis on aesthetic issues such as iconography, screen composition, colors, and typography.

**Lecture Hours**

2

**Lab Hours**

4

**Credits**

3

**Semester Credit Hours**

3

---

**IMED1345 - Interactive Digital Media I**

**Course Title**

Interactive Digital Media I

**Academic Level**

Undergraduate

**Description**

Exploration of the use of graphics and sound to create interactive digital media applications and/or animations using industry standard authoring software.

**Lecture Hours**

2

**Lab Hours**

4

**Credits**

3

**Semester Credit Hours**

3

**Prerequisites**

- Complete the following:
  - IMED1341 - Interface Design (3)
IMED1371 - Ui/Ux Design

Course Title
Ui/Ux Design

Academic Level
Undergraduate

Description
Application of user experience and user interface design within the context of web design. Instruction in user interface design with an emphasis on the visual, interactive elements of a website including buttons, icons, spacing, typography, color schemes, and responsive design.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

IMED2309 - Internet Commerce

Course Title
Internet Commerce

Academic Level
Undergraduate

Description
An overview of the Internet as a marketing and sales tool with emphasis on developing a prototype for electronic commerce.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - ITSE1306 - PHP Programming (3)
IMED2311 - Portfolio Development

Course Title
Portfolio Development

Academic Level
Undergraduate

Description
Preparation and enhancement of portfolio to meet professional standards, development of presentation skills, and improvement of job-seeking techniques.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - ITSE2313 - Web Authoring (3)
  - IMED2309 - Internet Commerce (3)
  - IMED2315 - Web Design II (3)

IMED2313 - Project Analysis and Design

Course Title
Project Analysis and Design

Academic Level
Undergraduate

Description
Application of the planning and production processes for digital media projects. Emphasis on copyright and other legal issues, content design and production management.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
IMED2315 - Web Design II

Course Title
Web Design II

Academic Level
Undergraduate

Description
A study of mark-up language and advanced layout techniques for creating web pages. Emphasis on identifying the target audience and producing web sites, according to accessibility standards, cultural appearance, and legal issues.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - ITSE1311 - Beginning Web Programming (3)

IMED2345 - Interactive Digital Media II

Course Title
Interactive Digital Media II

Academic Level
Undergraduate

Description
Instruction in the use of scripting languages to create interactive digital media applications.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - ITSE2302 - Intermediate Web Programming (3)
IMED2349 - Internet Server Management

Course Title
Internet Server Management

Academic Level
Undergraduate

Description
Web server software installation, configuration, and maintenance. Includes scripting and website optimization.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

IMED2351 - Digital Media Programming

Course Title
Digital Media Programming

Academic Level
Undergraduate

Description
Advanced topics in digital media programming including custom scripts for data tracking. Emphasis on developing digital media programs customized to the client's needs.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
IMED2359 - Interactive Web Elements

Course Title
Interactive Web Elements

Academic Level
Undergraduate

Description
Production of projects using current web development tools that may incorporate dynamic data, web graphics, animation, video and audio streaming.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - IMED1341 - Interface Design (3)

IMED2388 - Internship - Digital Communication and Media/Multimedia

Course Title
Internship - Digital Communication and Media/Multimedia

Academic Level
Undergraduate

Description
A work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. A learning plan is developed by the college and the employer.

Lecture Hours
0

Lab Hours
0

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - ITSE2313 - Web Authoring (3)
  - IMED2309 - Internet Commerce (3)
  - IMED2315 - Web Design II (3)
Instrumentation, Technician

INTC1005 - Introduction to Instrumentation Intro to Instrumentation

**Course Title**
Introduction to Instrumentation Intro to Instrumentation

**Academic Level**
Continuing Education

**Description**
A survey of the instrumentation field and the professional requirements of the instrumentation technician.

**Lecture Hours**
0

**Lab Hours**
3

**Semester Credit Hours**
0

INTC1305 - Introduction to Instrumentation

**Course Title**
Introduction to Instrumentation

**Academic Level**
Undergraduate

**Description**
A survey of the instrumentation field and the professional requirements of the instrumentation technician.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3

**Prerequisites**
- Complete the following:
  - CETT1303 - DC Circuits (3)

**Corequisites**
- Completed or concurrently enrolled in:
  - CETT1303 - DC Circuits (3)
INTC1341 - Principles of Automatic Control

Course Title
Principles of Automatic Control

Academic Level
Undergraduate

Description
Basic measurements, automatic control systems and design, closed loop systems, controllers, feedback, control modes, and control configurations.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

INTC1343 - Application of Industrial Automatic Controls

Course Title
Application of Industrial Automatic Controls

Academic Level
Undergraduate

Description
Automatic process control including measuring devices, analog and digital instrumentation, signal transmitters, recorders, alarms, controllers, control valves, and process and instrument diagrams. Includes connection and troubleshooting of loops.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
INTC1348 - Analytical Instrumentation

Course Title
Analytical Instrumentation

Academic Level
Undergraduate

Description
Analytical instruments emphasizing utilization in process applications. Includes, but not limited to, chromatography, pH, conductivity, and spectrophotometric instruments.

Lecture Hours
1

Lab Hours
5

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - INTC1341 - Principles of Automatic Control (3)

INTC1350 - Digital Measurement and Controls

Course Title
Digital Measurement and Controls

Academic Level
Undergraduate

Description
Basic measurement control instrumentation. Includes movement of digital data through common systems employing parallel and serial transfers.

Lecture Hours
1

Lab Hours
5

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - RBTC1301 - Programmable Logic Controllers (3)
INTC1355 - Unit Operations

Course Title
Unit Operations

Academic Level
Undergraduate

Description
Automatic control requirements of industrial processes. Includes control systems, control loop tuning, and analysis.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - INTC1341 - Principles of Automatic Control (3)

INTC1356 - Instrumentation Calibration

Course Title
Instrumentation Calibration

Academic Level
Undergraduate

Description
Techniques for configuring and calibrating transmitters, controllers, recorders, valves, and valve positioners.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - INTC1355 - Unit Operations (3)
INTC1357 - AC/DC Motor Control

**Course Title**
AC/DC Motor Control

**Academic Level**
Undergraduate

**Description**
A study of electric motors and motor control devices common to a modern industrial environment. A presentation of motor characteristics with emphasis on starting, speed control, and stopping systems.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3

---

INTC1358 - Flow and Measurement Calibration

**Course Title**
Flow and Measurement Calibration

**Academic Level**
Undergraduate

**Description**
Practical methods of flow measurements and flow integration. Emphasizes primary flow element selection and calculations in accordance with American Gas Association (AGA) and American Petroleum Institute (API) standards.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3
INTC1370 - Power Supply

Course Title
Power Supply

Academic Level
Undergraduate

Description
A study of automatic process control including measuring devices, analog and digital instrumentation, signal transmitters, recorders, alarms, controllers, control valves, and process and instrument drawings. Includes connection and troubleshooting of loops.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

INTC1380 - Coop Ed-Instrumentation Tech.

Course Title
Coop Ed-Instrumentation Tech.

Academic Level
Undergraduate

Description
Career-related activities encountered in the student's area of specialization offered through an individualized agreement among the college, employer, and student. Under the supervision of the college and the employer, the student combines classroom learning with work experience. Includes a lecture component.

Lecture Hours
1

Lab Hours
0

Credits
3

Semester Credit Hours
3
INTC1391 - Spec Topics in Instrumentation Technology

Course Title
Spec Topics in Instrumentation Technology

Academic Level
Undergraduate

Description
Topics address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

INTC2030 - Instrumentation Troubleshooting

Course Title
Instrumentation Troubleshooting

Academic Level
Continuing Education

Description
An in-depth coverage of the techniques of troubleshooting in a complex instrumented environment. Laboratory exercises require troubleshooting upsets in chemical processes.

Lecture Hours
0

Lab Hours
2

Semester Credit Hours
0
INTC2310 - Principles of Industrial Measurements II  
**Course Title**  
Principles of Industrial Measurements II  

**Academic Level**  
Undergraduate  

**Description**  
Additional principles of measurement. Includes devices used to measure process variables and basic control functions.  

**Lecture Hours**  
1  

**Lab Hours**  
5  

**Credits**  
3  

**Semester Credit Hours**  
3  

**Prerequisites**  
- Complete the following:  
  - INTC1355 - Unit Operations (3)  

---

INTC2330 - Instrumentation Systems Troubleshooting  
**Course Title**  
Instrumentation Systems Troubleshooting  

**Academic Level**  
Undergraduate  

**Description**  
Techniques for troubleshooting instrumentation systems in a process environment. Includes troubleshooting upsets in processes.  

**Lecture Hours**  
2  

**Lab Hours**  
4  

**Credits**  
3  

**Semester Credit Hours**  
3  

**Prerequisites**  
- Complete the following:  
  - INTC1343 - Application of Industrial Automatic Controls (3)
INTC2333 - Instrumentation Systems Installation

Course Title
Instrumentation Systems Installation

Academic Level
Undergraduate

Description
Synthesis, application, and integration of instrument installation components. Includes a comprehensive final project.

Lecture Hours
1

Lab Hours
5

Credits
3

Semester Credit Hours
3

Prerequisites
◆ Complete the following:
  ◆ INTC1355 - Unit Operations (3)

INTC2336 - Distributed Control and Programmable Logic

Course Title
Distributed Control and Programmable Logic

Academic Level
Undergraduate

Description
An overview of distributed control systems including configuration of programmable logic controllers, smart transmitters, and field communicators. Functions of digital systems in a process control environment.

Lecture Hours
1

Lab Hours
5

Credits
3

Semester Credit Hours
3

Prerequisites
◆ Complete the following:
  ◆ RBTC1301 - Programmable Logic Controllers (3)

Corequisites
◆ Completed or concurrently enrolled in:
  ◆ RBTC1301 - Programmable Logic Controllers (3)
INTC2339 - Instrument and Control Review  
**Course Title**  
Instrument and Control Review  
**Academic Level**  
Undergraduate  
**Description**  
An overview of instrument and control technology in preparation for industry employment and national testing.  
**Lecture Hours**  
2  
**Lab Hours**  
4  
**Credits**  
3  
**Semester Credit Hours**  
3  
**Prerequisites**  
- Complete the following:  
  - INTC1343 - Application of Industrial Automatic Controls (3)  

INTC2350 - Fieldbus Process Control Systems  
**Course Title**  
Fieldbus Process Control Systems  
**Academic Level**  
Undergraduate  
**Description**  
A comprehensive view of fieldbus systems using theory, applications, and hands-on experiences.  
**Lecture Hours**  
1  
**Lab Hours**  
5  
**Credits**  
3  
**Semester Credit Hours**  
3  
**Prerequisites**  
- Complete the following:  
  - INTC2333 - Instrumentation Systems Installation (3)  

**Integrated Reading/Writing**

INRW0100 - Integrated Reading/Writing I

Course Title
Integrated Reading/Writing I

Academic Level
Undergraduate

Description
This course covers introductory integrated reading and writing topics.

Lecture Hours
3

Lab Hours
1

Semester Credit Hours
3

INRW0200 - Integrated Reading/Writing II

Course Title
Integrated Reading/Writing II

Academic Level
Undergraduate

Description
Integration of critical reading and academic writing skills. Students completing this course with a C or better have completed their TSI requirements for reading and writing.

Lecture Hours
3

Lab Hours
1

Semester Credit Hours
3

Intro to Computing
COSC1336 - Programming Fundamentals I

Course Title
Programming Fundamentals I

Academic Level
Undergraduate

Description
Introduces the fundamental concepts of structured programming. Topics include software development methodology, data types, control structures, functions, arrays, and the mechanics of running, testing, and debugging. This course assumes computer literacy.

Lecture Hours
3

Lab Hours
1

Credits
3

Semester Credit Hours
3

COSC1337 - Programming Fundamentals II

Course Title
Programming Fundamentals II

Academic Level
Undergraduate

Description
This course focuses on the object-oriented programming paradigm, emphasizing the definition and use of classes along with fundamentals of object-oriented design. The course includes basic analysis of algorithms, searching and sorting techniques, and an introduction to software engineering processes. Students will apply techniques for testing and debugging software. (This course is included in the Field of Study Curriculum for Computer Science.)

Lecture Hours
3

Lab Hours
1

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - COSC1336 - Programming Fundamentals I (3)
COSC2325 - Computer Organization

Course Title
Computer Organization

Academic Level
Undergraduate

Description
The organization of computer systems is introduced using assembly language. Topics include basic concepts of computer architecture and organization, memory hierarchy, data types, computer arithmetic, control structures, interrupt handling, instruction sets, performance metrics, and the mechanics of testing and debugging computer systems. Embedded systems and device interfacing are introduced.

Lecture Hours
3

Lab Hours
1

Credits
3

Semester Credit Hours
3

Prerequisites
♦ Complete the following:
  ♦ COSC1336 - Programming Fundamentals I (3)

COSC2336 - Programming Fundamentals III

Course Title
Programming Fundamentals III

Academic Level
Undergraduate

Description
Further applications of programming techniques, introducing the fundamental concepts of data structures and algorithms. Topics include recursion, fundamental data structures (including stacks, queues, linked lists, hash tables, trees, and graphs), and algorithmic analysis. Prerequisite: COSC 1337/1437. (This course is included in the Field of Study Curriculum for Computer Science.)

Lecture Hours

CNBT1300 - Residential and Light Commercial Blueprint Reading

Course Title
Residential and Light Commercial Blueprint Reading

Academic Level
Undergraduate

Description
Introductory blueprint reading for residential and light commercial construction.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

CNBT1302 - Mechanical, Electrical & Plumbing Systems in Construction I

Course Title
Mechanical, Electrical & Plumbing Systems in Construction I

Academic Level
Undergraduate

Description
A presentation of the basic mechanical, plumbing, and electrical components in construction and their relationship to residential and light commercial buildings.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
CNBT1311 - Construction Methods and Materials I

Course Title
Construction Methods and Materials I

Academic Level
Undergraduate

Description
Introduction to construction materials and methods and their applications.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

CNBT1313 - Concrete I

Course Title
Concrete I

Academic Level
Undergraduate

Description
Various techniques for concrete utilization in residential and light commercial construction.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
CNBT1315 - Field Engineering I

Course Title
Field Engineering I

Academic Level
Undergraduate

Description
Surveying equipment, sketches, proper field note taking, methods of staking, layout of building site, and horizontal and vertical controls.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

CNBT1316 - Construction Technology I

Course Title
Construction Technology I

Academic Level
Undergraduate

Description
Introduction to site preparation, foundations, form work, safety, tools, and equipment.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
CNBT1342 - Building Codes and Inspections

**Course Title**
Building Codes and Inspections

**Academic Level**
Undergraduate

**Description**
Building codes and standards applicable to building construction and inspection processes.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3

---

CNBT1346 - Construction Estimating I

**Course Title**
Construction Estimating I

**Academic Level**
Undergraduate

**Description**
Fundamentals of estimating materials and labor costs in construction.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3
CNBT1350 - Construction Technology II

Course Title
Construction Technology II

Academic Level
Undergraduate

Description
Framing in residential and light commercial construction. Includes safety, tools, and equipment used in floor, wall, ceiling, and roof framing methods and systems.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

CNBT1359 - Project Scheduling

Course Title
Project Scheduling

Academic Level
Undergraduate

Description
A study of conventional scheduling using critical-path-method; precedence and arrow networks; bar charts; monthly reports; and fast track scheduling.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
CNBT1450 - Construction Technology II

Course Title
Construction Technology II

Academic Level
Undergraduate

Description
Demonstrate safety practices and procedures; use of tools and equipment associated with framing in construction; estimate material requirements from blueprints; and demonstrate methods used in framing.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4

Prerequisites
• Complete the following:
  • CNBT1316 - Construction Technology I (3)

CNBT1453 - Construction Technology III

Course Title
Construction Technology III

Academic Level
Undergraduate

Description
Exterior Trim and finish for residential and light commercial construction.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4

Prerequisites
• Complete the following:
  • CNBT1316 - Construction Technology I (3)
CNBT1680 - Cooperative Education - Construction Engineering Technology/Technician

Course Title
Cooperative Education - Construction Engineering Technology/Technician

Academic Level
Undergraduate

Description
Career-related activities encountered in the student's area of specialization offered through an individualized agreement among the college, employer, and student. Under the supervision of the college and the employer, the student combines classroom learning with work experience. Includes a lecture component.

Lecture Hours
1

Lab Hours

CNBT2310 - Commercial/Industrial Blueprint Reading 2-4-3

Course Title
Commercial/Industrial Blueprint Reading 2-4-3

Academic Level
Undergraduate

Description
Blueprint reading for commercial/industrial construction.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

CNBT2317 - Green Building

Course Title
Green Building

Academic Level
Undergraduate

Description
Methods and materials used for buildings that conserve energy, water, and human resources.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
CNBT2337 - Construction Estimating II  
**Course Title**  
Construction Estimating II  
**Academic Level**  
Undergraduate  
**Description**  
Advanced estimating concepts using computer software for construction and crafts.  
**Lecture Hours**  
2  
**Lab Hours**  
4  
**Credits**  
3  
**Semester Credit Hours**  
3

CNBT2339 - Construction Technology IV  
**Course Title**  
Construction Technology IV  
**Academic Level**  
Undergraduate  
**Description**  
Interior finish for residential and light commercial construction.  
**Lecture Hours**  
2  
**Lab Hours**  
4  
**Credits**  
3  
**Semester Credit Hours**  
3
CNBT2342 - Construction Management I

Course Title
Construction Management I

Academic Level
Undergraduate

Description
Management skills on the job site. Topics include written and oral communications, leadership and motivation, problem solving, and decision making.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

CNBT2344 - Construction Management II

Course Title
Construction Management II

Academic Level
Undergraduate

Description
A management course in contract documents, safety, planning, scheduling, production control, law and labor issues. Topics include contracts, planning, cost and production peripheral documents, and cost and work analysis.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
CNBT2439 - Construction Technology IV

Course Title
Construction Technology IV

Academic Level
Undergraduate

Description
Interior finish for residential and light commercial construction.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4

Prerequisites
◆ Complete the following:
  ◆ CNBT1316 - Construction Technology I (3)

---

Jailer

CJLE1010 - Texas Alcoholic Beverage Code

Course Title
Texas Alcoholic Beverage Code

Academic Level
Continuing Education

Description
Overview of the Texas Alcoholic Beverage Code and the Texas Alcoholic Beverage Commission.

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0
CJLE1011 - Basic Firearms

Course Title
Basic Firearms

Academic Level
Continuing Education

Description
Firearm safety, cleaning and care techniques, proper shooting principles, and firearm proficiency.

Law
LAWT1301 - Copyright and Ethical Issues
Course Title
Copyright and Ethical Issues

Academic Level
Undergraduate

Description
Introduction to basic copyright law and related ethical issues as they apply to creation and use of copyrighted material. Emphasis on practical application of copyright law through case studies.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Lineworker-Electrical Tran Systems

LNWK1211 - Climbing Skills
Course Title
Climbing Skills

Academic Level
Undergraduate

Description
Theory and application of pole climbing. Includes safety, climbing techniques, tool inspection, poles inspection, personal protective equipment, and fall protection.

Lecture Hours
1

Lab Hours
4

Credits
2

Semester Credit Hours
2
LNWK1231 - Transformer Connections

**Course Title**
Transformer Connections

**Academic Level**
Undergraduate

**Description**
An introduction to basic transformer connections and theory (including basic alternating current (AC) theory) and their direct application to single phase and three phase transformers. Students will study and practice basic transformer connections and fundamentals.

**Lecture Hours**
1

**Lab Hours**
4

**Credits**
2

**Semester Credit Hours**
2

---

LNWK1241 - Distribution Operations

**Course Title**
Distribution Operations

**Academic Level**
Undergraduate

**Description**
A study of the theoretical and practical operation of electric utility distribution systems. Topics include customer service voltages, capacitors, and coordination of protection equipment.

**Lecture Hours**
1

**Lab Hours**
3

**Credits**
2

**Semester Credit Hours**
2

**Prerequisites**
- Complete the following:
  - LNWK1311 - Climbing Skills (3)
LNWK1301 - Orientation and Line Skill Fundamentals

Course Title
Orientation and Line Skill Fundamentals

Academic Level
Undergraduate

Description
Examination of utility company operations. Topics include company structure, safety and distribution standards handbook, lineman's tools, vocabulary, and work procedures. Discussion of basic electrical systems including the history of power generation and distribution with emphasis on generating plants and substations.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

LNWK1311 - Climbing Skills

Course Title
Climbing Skills

Academic Level
Undergraduate

Description
Theory and application of pole climbing. Includes safety, climbing techniques, tool inspection, poles inspection, personal protective equipment, and fall protection.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
LNWK1331 - Transformer Connections

Course Title
Transformer Connections

Academic Level
Undergraduate

Description
An introduction to basic transformer connections and theory (including basic alternating current (AC) theory) and their
direct application to single phase and three phase transformers. Students will study and practice basic transformer
connections and fundamentals.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - LNWK1311 - Climbing Skills (3)

LNWK1370 - Rigging for Electrical Lineworker

Course Title
Rigging for Electrical Lineworker

Academic Level
Undergraduate

Description
Introduction to rigging and hoisting in the line industry. Includes selecting proper rigging equipment; rope knots and
splices; slings and hitches; signaling.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
LNWK1391 - Special Topics in Lineworker

**Course Title**
Special Topics in Lineworker

**Academic Level**
Undergraduate

**Description**
Topics address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency.

**Lecture Hours**
2

**Lab Hours**
3

**Credits**
3

**Semester Credit Hours**
3

**Prerequisites**
- Complete the following:
  - LNWK1311 - Climbing Skills (3)

LNWK1470 - Electrical Safety, Tools and Calculations

**Course Title**
Electrical Safety, Tools and Calculations

**Academic Level**
Undergraduate

**Description**
Introduction to electrical safety and use of tools; includes selection, use, and maintenance of tools; calculations used in line worker’s Industry.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
4

**Semester Credit Hours**
4

**Prerequisites**
- Complete the following:
  - LNWK1311 - Climbing Skills (3)
LNWK2024 - Troubleshooting Distribution Systems

Course Title
Troubleshooting Distribution Systems

Academic Level
Continuing Education

Description
Study of power outages and voltage complaints on distribution systems. Includes lockout-tagout procedures, safety grounds, backfeed, induced voltage, causes of outages, and analyzing voltage complaints.

Lecture Hours
3

Lab Hours
0

Semester Credit Hours
0

LNWK2321 - Live Line Safety

Course Title
Live Line Safety

Academic Level
Undergraduate

Description
Study of cover-up procedures and safety requirements for work on energized electrical circuits. Includes use, care, and inspection of cover-up material, recognizing nominal voltages and energized parts, approach distances, and safety.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - LNWK1311 - Climbing Skills (3)
LNWK2322 - Distribution Line Construction

Course Title
Distribution Line Construction

Academic Level
Undergraduate

Description
Study of electric distribution line construction. Includes reading staking sheets and framing specifications, tailboard discussions, pole framing and setting, installing conductors, transformers and other line equipment, and OSHA and NESC regulations.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - LNWK1311 - Climbing Skills (3)

LNWK2324 - Troubleshooting Distribution Systems

Course Title
Troubleshooting Distribution Systems

Academic Level
Undergraduate

Description
Study of power outages and voltage complaints on distribution systems. Includes lockout-tagout procedures, safety grounds, backfeed, induced voltage, causes of outages, and analyzing voltage complaints.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
LNWK2370 - Transmission and Underground Utilities

Course Title
Transmission and Underground Utilities

Academic Level
Undergraduate

Description
This is an overview of underground and transmission components, structures, equipment, and safety that relates directly to the distribution of high voltage electricity in the Electrical Lineworker Industry.

Lecture Hours
2

Lab Hours
3

Credits
3

Semester Credit Hours
3

LNWK2371 - Maintenance, Testing, and Reconducting For Lineworker

Course Title
Maintenance, Testing, and Reconducting For Lineworker

Academic Level
Undergraduate

Description
Proper and safe use of testing equipment for linemen industry and maintenance of test equipment and tools.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
LNWK2372 - Work Procedures and Safety in Electrical Lineworker

**Course Title**
Work Procedures and Safety in Electrical Lineworker

**Academic Level**
Undergraduate

**Description**
Identification and utilization of electrical systems; including safety and work procedures. Emphasis on ropes, knots, straps, braiding and common hand signals used for directing cranes for lineman use.

**Lecture Hours**
2

**Lab Hours**
3

**Credits**
3

**Semester Credit Hours**
3

**Prerequisites**
- Complete the following:
  - LNWK1311 - Climbing Skills (3)

---

Logistics & Materials Management

LMGT1325 - Warehouse and Distribution Center Management

**Course Title**
Warehouse and Distribution Center Management

**Academic Level**
Undergraduate

**Description**
Emphasis on physical distribution and total supply chain management. Includes warehouse operations management, hardware and software operations, bar codes, organizational effectiveness, just-in-time, and continuous replenishment.

**Lecture Hours**
2

**Lab Hours**
2

**Credits**
3

MCHN1032 - Bench Work and Layout

Course Title
Bench Work and Layout

Academic Level
Continuing Education

Description
An introduction to bench work and layout. Application of the use and theory of tools such as hand tools, height gages, pedestal grinders, and layout tools.

Lecture Hours
0

Lab Hours
4

Semester Credit Hours
0
MCHN1201 - Beginning Machine Shop

Course Title
Beginning Machine Shop

Academic Level
Undergraduate

Description
Fundamental machine shop safety, math, and measurement.

Lecture Hours
1

Lab Hours
3

Credits
2

Semester Credit Hours
2

MCHN1300 - Beginning Machine Shop

Course Title
Beginning Machine Shop

Academic Level
Undergraduate

Description
Fundamental machine shop safety, math, and measurement.

Lecture Hours
1

Lab Hours
5

Credits
3

Semester Credit Hours
3
MCHN1302 - Print Reading for Machining Trades
Course Title
Print Reading for Machining Trades

Academic Level
Undergraduate

Description
A study of blueprints for machining trades with emphasis on machine drawings.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

MCHN1320 - Precision Tools and Measurement
Course Title
Precision Tools and Measurement

Academic Level
Undergraduate

Description
An introduction to the modern science of dimensional metrology. Emphasis on the identification, selection, and application of various types of precision instruments associated with the machining trade. Practice of basic layout and piece part measurements while using standard measuring tools.

Lecture Hours
2

Lab Hours
4

MCHN1326 - Introduction to Computer-Aided Manufacturing (CAM)

Course Title
Introduction to Computer-Aided Manufacturing (CAM)

Academic Level
Undergraduate

Description
A study of Computer-Aided Manufacturing (CAM) software which is used to develop applications for manufacturing. Emphasis on tool geometry, tool selection, and the tool library.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete at least 1 of the following:
  - MCHN1371 - Engineering Computer Graphics I (3)
  - DFTG1309 - Basic Computer-Aided Drafting (3)

MCHN1338 - Basic Machine Shop I

Course Title
Basic Machine Shop I

Academic Level
Undergraduate

Description
A course that introduces the student to machining fundamentals. The student will use basic machine tools including the lathe, milling machine, drill press, power saw, and bench grinder. Machine terminology, theory, math, part layout, and bench work using common measuring tools is included. Emphasis is placed on shop safety, housekeeping, and preventative maintenance.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
MCHN1343 - Machine Shop Mathematics

Course Title
Machine Shop Mathematics

Academic Level
Undergraduate

Description
Designed to prepare the student with technical, applied mathematics that will be necessary in future machine shop-related courses.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

MCHN1371 - Engineering Computer Graphics I

Course Title
Engineering Computer Graphics I

Academic Level
Undergraduate

Description
This course covers the fundamental concepts associated with engineering computer aided design graphics; CAD. Emphasis will be placed on both dimensional analysis and design for manufacturing ability to D3 models. 3D Modeling Software will be utilized.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
MCHN1416 - Machine Tool Repair

Course Title
Machine Tool Repair

Academic Level
Undergraduate

Description
Basic repair of machine tools, disassembly, parts fabrication, and assembly of machine types, including related math, blueprint reading, and safety.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4

MCHN1438 - Basic Machine Shop I

Course Title
Basic Machine Shop I

Academic Level
Undergraduate

Description
A course that introduces the student to machining fundamentals. The student begins by using basic machine tools including the lathe, milling machine, drill press, power saw, and bench grinder. Machine terminology, theory, math, part layout, and bench work using common measuring tools is included. Emphasis is placed on shop safety, housekeeping, and preventative maintenance.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4

Prerequisites
- Complete the following:
  - MCHN1300 - Beginning Machine Shop (3)
MCHN1454 - Intermediate Machining II

Course Title
Intermediate Machining II

Academic Level
Undergraduate

Description
Development of job process plan to include operation of lathes, milling machines, drill presses, and power saws. Set-up, layout, and tool maintenance is included. Emphasis on shop safety and preventative maintenance.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4

Prerequisites
- Complete the following:
  - MCHN1438 - Basic Machine Shop I (4)

MCHN2002 - Intermediate Milling Operation

Course Title
Intermediate Milling Operation

Academic Level
Continuing Education

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0
MCHN2003 - Fund of Comp Num Cont Mach

Course Title
Fund of Comp Num Cont Mach

Academic Level
Continuing Education

Description
An introduction to G and M codes (RS274-D) necessary to program Computer Numerical Controlled (CNC) machines

Lecture Hours
3

Lab Hours
0

Semester Credit Hours
0

MCHN2004 - Intermediate Millwright

Course Title
Intermediate Millwright

Academic Level
Continuing Education

Description
Identification of common bearings and seals. Emphasis on design and installation of seals, bearings, and couplings.

Lecture Hours
6

Lab Hours
0

Semester Credit Hours
0
MCHN2035 - Advanced CNC Machining

**Course Title**
Advanced CNC Machining

**Academic Level**
Continuing Education

**Description**
The study of advanced CNC operation with an emphasis on programming and operations of machining and turning centers. CNC machines will include Fanuc, Mazak and others.

**Lecture Hours**
0

**Lab Hours**
0

**Semester Credit Hours**
0

MCHN2037 - Advanced Milling Operations

**Course Title**
Advanced Milling Operations

**Academic Level**
Continuing Education

**Lecture Hours**
9

**Lab Hours**
0

**Semester Credit Hours**
0
MCHN2303 - Fundamentals of Computer Numerical Controlled (CNC) Machine Controls

Course Title

Fundamentals of Computer Numerical Controlled (CNC) Machine Controls

Academic Level

Undergraduate

Description

Programming and operation of Computer Numerical Controlled (CNC) machine shop equipment.

Lecture Hours

2

Lab Hours

4

Credits

3

Semester Credit Hours

3

MCHN2335 - Advanced CNC Machining

Course Title

Advanced CNC Machining

Academic Level

Undergraduate

Description

The study of advanced CNC operation with an emphasis on programming and operations of machining and turning centers.

Lecture Hours

1

Lab Hours

5

Credits

3

Semester Credit Hours

3

Prerequisites

- Complete the following:
  - MCHN2303 - Fundamentals of Computer Numerical Controlled (CNC) Machine Controls (3)
MCHN2338 - Advanced Computer-Aided Manufacturing (CAM)

Course Title
Advanced Computer-Aided Manufacturing (CAM)

Academic Level
Undergraduate

Description
A study of advanced techniques in Computer-Aided Manufacturing (CAM).

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - MCHN1326 - Introduction to Computer-Aided Manufacturing (CAM) (3)

MCHN2341 - Advanced Machining I

Course Title
Advanced Machining I

Academic Level
Undergraduate

Description
A study of advanced lathe and milling operations. Emphasis on advanced cutting operations of the lathe and milling machines, including the use of special tooling, bench assembly, and materials identification.

Lecture Hours
1

Lab Hours
5

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - MCHN1454 - Intermediate Machining II (4)
MCHN2344 - Computerized Numerical Control Programming

Course Title
Computerized Numerical Control Programming

Academic Level
Undergraduate

Description
An introduction to G and M codes (RS274-D) necessary to program Computer Numerical Controlled (CNC) machines.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - MCHN1302 - Print Reading for Machining Trades (3)

MCHN2444 - Computerized Numerical Control Programmi CNC Programming (2-6-4)

Course Title
Computerized Numerical Control Programmi CNC Programming (2-6-4)

Academic Level
Undergraduate

Description
An introduction to G and M codes (RS274-D) necessary to program Computer Numerical Controlled (CNC) machines.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4
MCHN2471 - Specialized Equipment and Processes

Course Title
Specialized Equipment and Processes

Academic Level
Undergraduate

Description
An advanced course that incorporates conventional and computer numerical control equipment. Design and fabricate fixtures. Use metrology equipment and reverse engineering. Manufacture a project that shows proficiency in a variety of machining equipment and processes.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4

Prerequisites
- Complete the following:
  - MCHN1438 - Basic Machine Shop I (4)

Manufacturing Engineering Tech

MFGT1406 - Mechanical Principles in Automated Manufacturing

Course Title
Mechanical Principles in Automated Manufacturing

Academic Level
Undergraduate

Description
Overview of mechanical principles used in automated manufacturing. Includes common measurement methods, engineering drawings, and mechanical methods used in automated manufacturing.

Lecture Hours
2

Lab Hours
4

Credits
4

Semester Credit Hours
4
MFGT2459 - Industrial Automation II

Course Title
Industrial Automation II

Academic Level
Undergraduate

Description
Advanced topics in automated manufacturing. Includes electrical and electronic principles, electro-pneumatic and electro-hydraulic controls, logic control methods, and basic programming techniques.

Lecture Hours
3

Lab Hours
4

Credits
4

Semester Credit Hours
4

MRKG1301 - Customer Relationship Management
Course Title
Customer Relationship Management
Academic Level
Undergraduate
Description
General principles of customer relationship management including skills, knowledge, attitudes, and behaviors.
Lecture Hours
2
Lab Hours
2
Credits
3
Semester Credit Hours
3
MRKG2033 - Principles of Selling  
**Course Title**  
Principles of Selling  

**Academic Level**  
Continuing Education  

**Description**  
Overview of the selling process. Identification of the elements of the communication process between buyers and sellers. Examination of the legal and ethical issues of organizations which affect salespeople.  

**Lecture Hours**  
3  

**Lab Hours**  
0  

**Semester Credit Hours**  
0  

MRKG2349 - Advertising and Sales Promotion  
**Course Title**  
Advertising and Sales Promotion  

**Academic Level**  
Undergraduate  

**Description**  
Integrated marketing communications. Includes advertising principles and practices. Emphasizes multi-media of persuasive communication including buyer behavior, budgeting, and regulatory constraints.  

**Lecture Hours**  
3  

**Lab Hours**  
0  

**Credits**  
3  

**Semester Credit Hours**  
3  

**Prerequisites**  
- Complete the following:  
  - ARTC1302 - Digital Imaging I (3)  

---

**Mathematics**
MATH1314 - College Algebra (3 SCH version)

Course Title
College Algebra (3 SCH version)

Academic Level
Undergraduate

Description
In-depth study and applications of polynomial, rational, radical, exponential and logarithmic functions, and systems of equations using matrices. Additional topics such as sequences, series, probability, and conics may be included.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3

MATH1316 - Plane Trigonometry

Course Title
Plane Trigonometry

Academic Level
Undergraduate

Description
In-depth study and applications of trigonometry including definitions, identities, inverse functions, solutions of equations, graphing, and solving triangles. Additional topics such as vectors, polar coordinates and parametric equations may be included.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3
MATH1325 - Calculus for Business & Social Sciences

Course Title
Calculation for Business & Social Sciences

Academic Level
Undergraduate

Description
This course is the basic study of limits and continuity, differentiation, optimization and graphing, and integration of elementary functions, with emphasis on applications in business, economics, and social sciences. This course is not a substitute for MATH 2413, Calculus I.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3

MATH1332 - Contemporary Mathematics (Quantitative Reasoning)

Course Title
Contemporary Mathematics (Quantitative Reasoning)

Academic Level
Undergraduate

Description
Intended for Non STEM (Science, Technology, Engineering, and Mathematics) majors. Topics include introductory treatments of sets and logic, financial mathematics, probability and statistics with appropriate applications. Number sense, proportional reasoning, estimation, technology, and communication should be embedded throughout the course. Additional topics may be covered.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3
MATH1342 - Elementary Statistical Methods

Course Title
Elementary Statistical Methods

Academic Level
Undergraduate

Description
Collection, analysis, presentation and interpretation of data, and probability. Analysis includes descriptive statistics, correlation and regression, confidence intervals and hypothesis testing. Use of appropriate technology is recommended.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3

MATH1350 - Math - Teachers I Fundamentals of Math I

Course Title
Math - Teachers I Fundamentals of Math I

Academic Level
Undergraduate

Description
This course is intended to build or reinforce a foundation in fundamental mathematics concepts and skills. It includes the conceptual development of the following: sets, functions, numeration systems, number theory, and properties of the various number systems with an emphasis on problem solving and critical thinking.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3
MATH1351 - Fundamentals of Mathematics II

Course Title
Fundamentals of Mathematics II

Academic Level
Undergraduate

Description
Concepts of geometry, probability, and statistics, as well as applications of the algebraic properties of real numbers to concepts of measurement with an emphasis on problem solving and critical thinking. This course is designed specifically for students who seek middle grade (4 through 8) teacher certification.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3

MATH2312 - Pre-Calculus Math (3 SCH version)

Course Title
Pre-Calculus Math (3 SCH version)

Academic Level
Undergraduate

Description
In-depth combined study of algebra, trigonometry, and other topics for calculus readiness.

Lecture Hours
3

Lab Hours
1

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - MATH1314 - College Algebra (3 SCH version) (3)
MATH2313 - Calculus I
Course Title
Calculus I

Academic Level
Undergraduate

Description
Limits and continuity; the Fundamental Theorem of Calculus; definition of the derivative of a function and techniques of differentiation; applications of the derivative to maximizing or minimizing a function; the chain rule, mean value theorem, and rate of change problems; curve sketching; definite and indefinite integration of algebraic, trigonometric, and transcendental functions, with an application to calculation of areas.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3

MATH2318 - Linear Algebra
Course Title
Linear Algebra

Academic Level
Undergraduate

Description
Introduces and provides models for application of the concepts of vector algebra. Topics include finite dimensional vector spaces and their geometric significance; representing and solving systems of linear equations using multiple methods, including Gaussian elimination and matrix inversion; matrices; determinants; linear transformations; quadratic forms; eigenvalues and eigenvector; and applications in science and engineering.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3
MATH2320 - Differential Equations (3 SCH version)

Course Title
Differential Equations (3 SCH version)

Academic Level
Undergraduate

Description
Ordinary differential equations, including linear equations, systems of equations, equations with variable coefficients, existence and uniqueness of solutions, series solutions, singular points, transform methods, and boundary value problems; application of differential equations to real-world problems.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - MATH2414 - Calculus II (4 SCH version) (4)

MATH2342 - Elementary Statistical Methods

Course Title
Elementary Statistical Methods

Academic Level
Undergraduate

Description
Collection, analysis, presentation and interpretation of data, and probability. Analysis includes descriptive statistics, correlation and regression, confidence intervals and hypothesis testing. Use of appropriate technology is recommended.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours

MATH2413 - Calculus I (4 SCH version)

Course Title
Calculus I (4 SCH version)

Academic Level
Undergraduate

Description
Limits and continuity; the Fundamental Theorem of Calculus; definition of the derivative of a function and techniques of differentiation; applications of the derivative to maximizing or minimizing a function; the chain rule, mean value theorem, and rate of change problems; curve sketching; definite and indefinite integration of algebraic, trigonometric, and transcendental functions, with an application to calculation of areas.

Lecture Hours
3

Lab Hours
2

Credits
4

Semester Credit Hours
4

Prerequisites
- Complete at least 1 of the following:
  - MATH1316 - Plane Trigonometry (3)
  - MATH2312 - Pre-Calculus Math (3 SCH version) (3)

MATH2414 - Calculus II (4 SCH version)

Course Title
Calculus II (4 SCH version)

Academic Level
Undergraduate

Description
Differentiation and integration of transcendental functions; parametric equations and polar coordinates; techniques of integration; sequences and series; improper integrals.

Lecture Hours
3

Lab Hours
2

Credits
4

Semester Credit Hours
4

Prerequisites
- Complete the following:
  - MATH2413 - Calculus I (4 SCH version) (4)
MATH2415 - Calculus III (4 SCH version)

Course Title
Calculus III (4 SCH version)

Academic Level
Undergraduate

Description
Advanced topics in calculus, including vectors and vector-valued functions, partial differentiation, Lagrange multipliers, multiple integrals, and Jacobians; application of the line integral, including Green's Theorem, the Divergence Theorem, and Stokes' Theorem.

Lecture Hours
3

Lab Hours
2

Credits
4

Semester Credit Hours
4

Prerequisites
- Complete the following:
  - MATH2414 - Calculus II (4 SCH version) (4)

Mechatronics

MECH1370 - Introduction to Mechatronics

Course Title
Introduction to Mechatronics

Academic Level
Undergraduate

Description
Overview of mechatronics applications including controls, programming, electrical, and mechanical systems.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
MECH1371 - Industry Digital Devices

Course Title
Industry Digital Devices

Academic Level
Undergraduate

Description
A course interfacing digital devices using logic circuits, metering equipment and different numbering systems.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - CETT1303 - DC Circuits (3)

MECH1372 - Basic Programmable Logic Controllers

Course Title
Basic Programmable Logic Controllers

Academic Level
Undergraduate

Description
Basic course in programmable control systems with emphasis on basic program techniques to include hardware identification, basic ladder programming and PLC communications.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - CETT1305 - AC Circuits (3)
MECH1373 - Motion Control  
**Course Title**  
Motion Control  

**Academic Level**  
Undergraduate  

**Description**  
This course explores theoretical concepts in motor control. Emphasis in 3 phase across the line control, system design, protection control devices, wiring and troubleshooting. In-depth coverage of power and control voltages.  

**Lecture Hours**  
2  

**Lab Hours**  
4  

**Credits**  
3  

**Semester Credit Hours**  
3  

**Prerequisites**  
- Complete the following:  
  - CETT1305 - AC Circuits (3)  

MECH1471 - Hydraulic and Pneumatic Systems  
**Course Title**  
Hydraulic and Pneumatic Systems  

**Academic Level**  
Undergraduate  

**Description**  
A course that focuses on Hydraulic and Pneumatic power technology to include valves, actuators, pumps, motors and gauges to communicate with control devices in order to operate the system using network devices.  

**Lecture Hours**  
2  

**Lab Hours**  
4  

**Credits**  
4  

**Semester Credit Hours**  
4
MECH2370 - Industrial Process Controls

Course Title

Industrial Process Controls

Academic Level

Undergraduate

Description

Introduction to key concepts in automatic control and instrumentation of process plants. Applying industrial protocols (e.g. fieldbus, ethernet, modbus, profinet, profibus) to change controller parameters and read data from the controller. Use smart transmitters to relay instrumentation and final control elements performance status.

Lecture Hours

2

Lab Hours

4

Credits

3

Semester Credit Hours

3

Prerequisites

- Complete the following:
  - CETT1305 - AC Circuits (3)

MECH2372 - Essentials to Advance PLC

Course Title

Essentials to Advance PLC

Academic Level

Undergraduate

Description

Advanced applications of programmable logic controllers as used in industrial environments including concepts of networking, data collection, and troubleshooting of PLCs.

Lecture Hours

2

Lab Hours

4

Credits

3

Semester Credit Hours

3

Prerequisites

- Complete the following:
  - MECH1372 - Basic Programmable Logic Controllers (3)
MECH2373 - Industry 4.0 Project

**Course Title**
Industry 4.0 Project

**Academic Level**
Undergraduate

**Description**
A course that provides students the opportunity to apply the knowledge and skills in Industry 4.0. A project will be constructed to include programmable logic controller, industrial control devices and production control.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3

**Prerequisites**
- Complete the following:
  - MECH2472 - Communication Protocols (4)
  - MECH1373 - Motion Control (3)

---

MECH2374 - Robotics Communication

**Course Title**
Robotics Communication

**Academic Level**
Undergraduate

**Description**
Principles of robotics to include hardware/software components, interfacing, programing and troubleshooting of the robotic system. Course instruct students to program a robot to perform automated task.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3
MECH2375 - Production Control

Course Title
Production Control

Academic Level
Undergraduate

Description
This course defines the ability to apply technology in the principles and techniques in the design, planning, hardware and software of Industrial Production Control Systems.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - CETT1305 - AC Circuits (3)

MECH2378 - Internship-Mechatronics Technology

Course Title
Internship-Mechatronics Technology

Academic Level
Undergraduate

Description
A work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. A learning plan is developed by the college and the employer.

Lecture Hours
0

Lab Hours
0

Credits
3

Semester Credit Hours
3
MECH2471 - Industrial Control Devices

Course Title
Industrial Control Devices

Academic Level
Undergraduate

Description
This course covers the principles of control devices used in industry. Topics include the design, development, and current applications of automated control devices systems including their configuration, operation, and control. Upon completion students will be able to wire and program different control devices including PLC's and variable frequency drives, monitoring relays, protection relays and other devices locally at the device and through communications protocols.

Lecture Hours
2

Lab Hours
4

Credits
4

Semester Credit Hours
4

Prerequisites
- Complete the following:
  - MECH1373 - Motion Control (3)

MECH2472 - Communication Protocols

Course Title
Communication Protocols

Academic Level
Undergraduate

Description
An introductory course to communications protocols in order to address industrial needs for connecting devices as they apply to industry. Industrial and traditional communication working together with emerging technologies.

Lecture Hours
2

Lab Hours
4

Credits
4

Semester Credit Hours
4
MUSI1306 - Music Appreciation

Course Title
Music Appreciation

Academic Level
Undergraduate

Description
Understanding music through the study of cultural periods, major composers, and musical elements. Illustrated with audio recordings and live performances. (Does not apply to a music major degree.)

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours

RNSG1300 - Health Assessment Across the Lifespan

Course Title
Health Assessment Across the Lifespan

Academic Level
Undergraduate

Description
Development of skills and techniques required for a comprehensive nursing health assessment of patients across the lifespan. Includes assessment of patients' health promotion and maintenance, illness and injury prevention and restoration, and application of the nursing process within a legal/ethical framework. This course lends itself to either a blocked or integrated approach.

Lecture Hours
2

Lab Hours
2

Credits
3

Semester Credit Hours

RNSG1343 - Complex Concepts of Adult Health

Course Title
Complex Concepts of Adult Health

Academic Level
Undergraduate

Description
Integration of previous knowledge and skills related to common adult health needs into the continued development of the professional nurse as a provider of patient-centered care, patient safety advocate, member of health care team, and member of the profession in the care of adult patients and families with complex medical-surgical health care needs associated with body systems. Emphasis on complex knowledge, judgments, skills, and professional values within a legal/ethical framework. This course lends itself to a blocked approach.

RNSG1412 - Nursing Care of the Childbearing and Childrearing Family

Course Title

Nursing Care of the Childbearing and Childrearing Family

Academic Level

Undergraduate

Description

Study of the concepts related to the provision of nursing care for childbearing and childrearing families. Application of systematic problem-solving processes and critical thinking skills, including a focus on the childbearing family during the perinatal periods and the childrearing family from birth to adolescence; and competency in knowledge, judgment, skill, and professional values within a legal/ethical framework. This course lends itself to a blocked approach.

RNSG2432 - Enhanced Concepts of Adult Health

Course Title
Enhanced Concepts of Adult Health

Academic Level
Undergraduate

Description
Enhanced concepts and skills for developing professional competencies in complicated nursing care situations involving adult patients/families with multiple body system problems. Emphasizes critical thinking, clinical reasoning, and determining legal/ethical values for optimization of patient care in intermediate and acute care settings. This course lends itself to a blocked approach.

Phlebotomy (Blood Collection)

PLAB1023 - Phlebotomy

Course Title
Phlebotomy

Academic Level
Continuing Education

Description
Skill development in the performance of a variety of blood collection methods using proper techniques and universal precautions. Includes vacuum collection devices, syringes, capillary skin puncture, butterfly needles and blood culture, and specimen collection on adults, children, and infants. Emphasis on infection prevention, proper patient identification, labeling of specimens and quality assurance, specimen handling, processing, and accessioning. Topics include professionalism, ethics, and medical terminology.

Physics

**PHYS1101 - College Physics Laboratory I**

**Course Title**

College Physics Laboratory I

**Academic Level**

Undergraduate

**Description**

This laboratory-based course accompanies PHYS 1301, College Physics I. Laboratory activities will reinforce fundamental principles of physics, using algebra and trigonometry; the principles and applications of classical mechanics and thermodynamics, including harmonic motion, mechanical waves and sound, physical systems, Newton's Laws of Motion, and gravitation and other fundamental forces; emphasis will be on problem solving.

PFPB2345 - Residential Construction Plumbing II
Course Title
Residential Construction Plumbing II

Academic Level
Undergraduate

Description
Installation of residential plumbing fixtures used in single- and multi-family housing.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - PFPB2309 - Residential Construction Plumbing I (3)

PFPB2349 - Field Measuring, Sketching, and Layout
Course Title
Field Measuring, Sketching, and Layout

Academic Level
Undergraduate

Description
Field dimensioning, measuring, sketching, and layout of future process piping and the use, care, and setup of transit and level.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
PFPB2357 - Plumbing Codes II

Course Title
Plumbing Codes II

Academic Level
Undergraduate

Description
The application of state and local plumbing codes to potable water, waste water, and gas systems relating to residential and commercial settings.

VNSG1304 - Foundations of Nursing

Course Title
Foundations of Nursing

Academic Level
Undergraduate

Description
Introduction to the nursing profession including history, standards of practice, legal and ethical issues, and role of the vocational nurse. Topics include mental health, therapeutic communication, cultural and spiritual diversity, nursing process, and holistic awareness.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3
VNSG1327 - Essentials of Medication Administration

Course Title
Essentials of Medication Administration

Academic Level
Undergraduate

Description
General principles of medication administration including determination of dosage, preparation, safe administration, and documentation of multiple forms of drugs. Instruction includes various systems of measurement.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3

VNSG1329 - Medical-Surgical Nursing I

Course Title
Medical-Surgical Nursing I

Academic Level
Undergraduate

Description
Application of the nursing process to the care of the adult patient experiencing medical-surgical conditions along the health-illness continuum in a variety of health care settings.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3
VNSG1331 - Pharmacology

**Course Title**
Pharmacology

**Academic Level**
Undergraduate

**Description**
Fundamentals of medications and their diagnostic, therapeutic, and curative effects. Includes nursing interventions utilizing the nursing process.

**Lecture Hours**
3

**Lab Hours**
0

**Credits**
3

**Semester Credit Hours**
3

VNSG1334 - Pediatrics

**Course Title**
Pediatrics

**Academic Level**
Undergraduate

**Description**
Study of the care of the pediatric patient and family during health and disease. Emphasis on growth and developmental needs utilizing the nursing process.

**Lecture Hours**
3

**Lab Hours**
0

**Credits**
3

**Semester Credit Hours**
3
VNSG1402 - Applied Nursing Skills I

**Course Title**
Applied Nursing Skills I

**Academic Level**
Undergraduate

**Description**
Introduction to and application of primary nursing skills. Emphasis on utilization of the nursing process and related scientific principles.

**Lecture Hours**
3

**Lab Hours**
3

**Credits**
4

**Semester Credit Hours**
4

VNSG1432 - Medical-Surgical Nursing II

**Course Title**
Medical-Surgical Nursing II

**Academic Level**
Undergraduate

**Description**
Continuation of Medical-Surgical Nursing I with application of the nursing process to the care of the adult patient experiencing medical-surgical conditions along the health-illness continuum in a variety of health care settings.

**Lecture Hours**
3

**Lab Hours**
2

Pre-Engineering
ENGR1201 - Introduction to Engineering

**Course Title**

Introduction to Engineering

**Academic Level**

Undergraduate

**Description**

An introduction to the engineering profession with emphasis on technical communication and team-based engineering design.

**Lecture Hours**

2

**Lab Hours**

0

**Credits**

2

**Semester Credit Hours**

2

**Prerequisites**

- Complete the following:
  - MATH1314 - College Algebra (3 SCH version) (3)

ENGR1304 - Engineering Graphics I (3 Sch version)

**Course Title**

Engineering Graphics I (3 Sch version)

**Academic Level**

Undergraduate

**Description**

Introduction to computer-aided drafting using CAD software and sketching to generate two- and three-dimensional drawings based on the conventions of engineering graphical communication; topics include spatial relationships, multi-view projections and sectioning, dimensioning, graphical presentation of data, and fundamentals of computer graphics.

**Lecture Hours**

2

**Lab Hours**

4

**Credits**

3

**Semester Credit Hours**

3

**Prerequisites**

- Complete the following:
  - MATH1314 - College Algebra (3 SCH version) (3)
ENGR2105 - Electrical Circuits I Laboratory

Course Title
Electrical Circuits I Laboratory

Academic Level
Undergraduate

Description
Laboratory experiments supporting theoretical principles presented in ENGR 2305 involving DC and AC circuit theory, network theorems, time, and frequency domain circuit analysis. Introduction to principles and operation of basic laboratory equipment; laboratory report preparation.

Lecture Hours
0

Lab Hours
3

Credits
1

Semester Credit Hours
1

ENGR2301 - Engineering Mechanics - Statics (3 SCH version)

Course Title
Engineering Mechanics - Statics (3 SCH version)

Academic Level
Undergraduate

Description
Basic theory of engineering mechanics, using calculus, involving the description of forces, moments, and couples acting on stationary engineering structures; equilibrium in two and three dimensions; free-body diagrams; friction; centroids; centers of gravity; and moments of inertia. Prerequisite: the first calculus-based physics course. Corequisite: a second course in calculus.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3

Prerequisites

- Complete the following:
  - PHYS2325 - University Physics I (lecture) (3)
ENGR2302 - Engineering Mechanics - Dynamics (3 SCH version)

Course Title
Engineering Mechanics - Dynamics (3 SCH version)

Academic Level
Undergraduate

Description
Basic theory of engineering mechanics, using calculus, involving the motion of particles, rigid bodies, and systems of particles; Newton's Laws; work and energy relationships; principles of impulse and momentum; application of kinetics and kinematics to the solution of engineering problems.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - ENGR2301 - Engineering Mechanics - Statics (3 SCH version) (3)

ENGR2304 - Programming for Engineers

Course Title
Programming for Engineers

Academic Level
Undergraduate

Description
Programming principles and techniques for matrix and array operations, equation solving, and numeric simulations applied to engineering problems and visualization of engineering information; platforms include spreadsheets, symbolic algebra packages, engineering analysis software, and laboratory control software.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
ENGR2305 - Electrical Circuits I

Course Title
Electrical Circuits I

Academic Level
Undergraduate

Description
Principles of electrical circuits and systems. Basic circuit elements (resistance, inductance, mutual inductance, capacitance, independent and dependent controlled voltage, and current sources). Topology of electrical networks; Kirchhoff's laws; node and mesh analysis; DC circuit analysis; operational amplifiers; transient and sinusoidal steady-state analysis; AC circuit analysis; first- and second-order circuits; Bode plots; and use of computer simulation software to solve circuit problems

Lecture Hours
3

- Complete the following:
  - PHYS2325 - University Physics I (lecture) (3)
  - MATH2414 - Calculus II (4 SCH version) (4)

Psychology
PSYC1100 - Learning Framework

Course Title
Learning Framework

Academic Level
Undergraduate

Description
A study of the 1) research and theory in the psychology of learning, cognition, and motivation, 2) factors that impact learning, and 3) application of learning strategies. Theoretical models of strategic learning, cognition, and motivation serve as the conceptual basis for the introduction of college-level student academic strategies. Students use assessment instruments (e.g., learning inventories) to help them identify their own strengths and weaknesses as strategic learners. Students are ultimately expected to integrate and apply the learning skills discussed across their own academic programs and become effective and efficient learners. Students developing these skills should be able to continually draw from the theoretical models they have learned. (Crosslisted as EDUC 1300)

Prerequisites
- Complete the following:
  - HYDR1305 - Basic Hydraulics (3)

RBTC1341 - Vision Systems
Course Title
Vision Systems
Academic Level
Undergraduate
Description
An overview of machine vision systems, including terminology and components. Topics include optics, sensors, lighting, image analysis, and user interfaces.
Lecture Hours
2
Lab Hours
4
Credits
3
Semester Credit Hours
3
Prerequisites
- Complete the following:
  - RBTC2339 - Robot Programming and Diagnostics (3)
RBTC1343 - Robotics

Course Title
Robotics

Academic Level
Undergraduate

Description
Principles and applications of robots. Includes installation, interfacing, programming, maintenance, and safety of robots and robotic cells.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
◆ Complete at least 1 of the following:
  ◆ CETT1303 - DC Circuits (3)
  ◆ IEIR1302 - Introduction to Direct Current Circuits (3)

RBTC1345 - Robot Interfacing

Course Title
Robot Interfacing

Academic Level
Undergraduate

Description
A study of the basic principles of robot controllers, controller input/output, memory, and interfacing with computer integrated manufacturing.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
◆ Complete the following:
  ◆ RBTC2339 - Robot Programming and Diagnostics (3)
  ◆ RBTC1347 - Electro-Mechanical Devices (3)
  ◆ RBTC1301 - Programmable Logic Controllers (3)
RBTC1347 - Electro-Mechanical Devices

Course Title
Electro-Mechanical Devices

Academic Level
Undergraduate

Description
A study of electro-mechanical devices found in robotic systems. Includes transformers, switches, and solid state relays.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

RBTC1355 - Sensors

Course Title
Sensors

Academic Level
Undergraduate

Description
Study of basic principles of industrial sensors for automated systems. Emphasis on the operation and application of position, rate, proximity, opto-electronics, ranging, and pressure switches.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - RBTC2339 - Robot Programming and Diagnostics (3)
  - RBTC1347 - Electro-Mechanical Devices (3)
RBTC1371 - Industrial Motors and Drives

Course Title
Industrial Motors and Drives

Academic Level
Undergraduate

Description
Choosing, installation and troubleshooting of 3-phase motors and variable speed drives, with emphasis on wiring and controls of industrial motors.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - RBTC1301 - Programmable Logic Controllers (3)
  - ELPT1341 - Motor Control (3)

RBTC1391 - Special Topics in Robotics Technology

Course Title
Special Topics in Robotics Technology

Academic Level
Undergraduate

Description
This course will design and construct automated robotics systems for training.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
RBTC2335 - Numerical Controlled/Computer Numerical Control Programming

Course Title
Numerical Controlled/Computer Numerical Control Programming

Academic Level
Undergraduate

Description
A study of the principles and concepts of numerical control through computer applications, specifically in the area of programming for the control of machine tools in CIM.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - RBTC1345 - Robot Interfacing (3)
  - RBTC1355 - Sensors (3)

RBTC2339 - Robot Programming and Diagnostics

Course Title
Robot Programming and Diagnostics

Academic Level
Undergraduate

Description
Emphasis on the programming of industrial robots, the development of programming techniques, and the diagnosis of faults in systems.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - RBTC1343 - Robotics (3)
RBTC2345 - Robot Application, Set-up, and Testing

Course Title
Robot Application, Set-up, and Testing

Academic Level
Undergraduate

Description
A capstone course that provides the student with laboratory experience in the installation, set-up, and testing of robotic cells. Topics include maintenance.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - RBTC1345 - Robot Interfacing (3)
  - RBTC1355 - Sensors (3)

RBTC2347 - Computer Integrated Manufacturing

Course Title
Computer Integrated Manufacturing

Academic Level
Undergraduate

Description
The principles of computer integrated manufacturing, including case studies and implementation of process control techniques, CAD/CAM, operations, software, and networking for CIM systems.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - RBTC1345 - Robot Interfacing (3)
  - RBTC1355 - Sensors (3)
RBTC2375 - Human Machine Interface Programming and Interfacing

Course Title
Human Machine Interface Programming and Interfacing

Academic Level
Undergraduate

Description
An overview of Human Machine Interface (HMI) devices and their use in industrial automation. Programming HMIs for use with automated systems.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - RBTC1345 - Robot Interfacing (3)
  - RBTC1301 - Programmable Logic Controllers (3)

---

Safety and Health

OSHT1000 - Basic Safety and Health

Course Title
Basic Safety and Health

Academic Level
Continuing Education

Description
Basic concepts of safety and health.

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0
OSHT1003 - Workplace Safety

Course Title
Workplace Safety

Academic Level
Continuing Education

Description
Provides an introduction to specific training techniques involving the safe handling of blood and airborne pathogens as well as the general safety and security on the premises. Addresses the right to know and Manufacturers Safety Data Sheets (MSDS). Outlines Occupational Safety and Health regulations.

Lecture Hours
1

Lab Hours

OSHT1305 - OSHA Regulations - Construction Industry

Course Title
OSHA Regulations - Construction Industry

Academic Level
Undergraduate

Description
A study of Occupational Safety and Health Administration (OSHA) regulations pertinent to the construction industry.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
OSHT1307 - Construction Site Safety and Health

Course Title
Construction Site Safety and Health

Academic Level
Undergraduate

Description
Introduction to safety requirements for construction sites including occupational health and environmental co

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

OSHT1313 - Accident Prevention, Inspection, & Investigation

Course Title
Accident Prevention, Inspection, & Investigation

Academic Level
Undergraduate

Description
Provides a basis for understanding the nature of occupational hazard recognition, accident prevention, loss reduction, inspection techniques, and accident investigation analysis.

Lecture Hours
2

Lab Hours
3

Credits
3

Semester Credit Hours
3
OSHT1320 - Energy Industrial Safety

Course Title
Energy Industrial Safety

Academic Level
Undergraduate

Description
An overview for industrial workers of state/federal regulations and guidelines which require industrial safety training. Topics include the 29 C.F.R. 1910, 1926 and National Fire Protection Association (NFPA) 70E standards such as confined space entry, emergency action, lock out/tag out, arc flash, and other work related subjects.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

OSHT2001 - OSHA Regulations-General Industry

Course Title
OSHA Regulations-General Industry

Academic Level
Continuing Education

Description
A study of Occupational Safety and Health Administration (OSHA) regulations pertinent to general industry.

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0
OSHT2209 - Safety Program Management

Course Title
Safety Program Management

Academic Level
Undergraduate

Description
Examine the major safety management issues that affect the workplace including safety awareness, loss control, regulatory issues, and human behavior modification.

Lecture Hours
1

Lab Hours
4

Credits
2

Semester Credit Hours
2

OSHT2320 - Safety Training Presentation Techniques

Course Title
Safety Training Presentation Techniques

Academic Level
Undergraduate

Description
Principles of developing and presenting effective industrial/business training. Emphasis on instructor qualifications and responsibilities, principles of teaching including use of teaching aids and presentation skills.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
OSHT2370 - Safety and Health First Aid Certification

Course Title
Safety and Health First Aid Certification

Academic Level
Undergraduate

Description
This course is designed to offer the student certification in standard First Aid and Cardio-Pulmonary Resuscitation (CPR) along with a full understanding of the principles of emergency care. The student will learn on-scene planning as well as actions necessary to deal with accidents and injuries in an industrial setting. The student will learn physiology of the human body and the principles behind pressure points and actions taken in splint application and body immobilization.

Lecture Hours
2

Lab Hours
3

Credits
3

Semester Credit Hours
3

OSHT2388 - Internship - Occupational Safety and Health Technology/Technician

Course Title
Internship - Occupational Safety and Health Technology/Technician

Academic Level
Undergraduate

Description
A work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. A learning plan is developed by the college and the employer.

Lecture Hours
0

Lab Hours
0

Credits
3

Semester Credit Hours
3
OSHT2401 - OSHA Regulations - General Industry

Course Title
OSHA Regulations - General Industry

Academic Level
Undergraduate

Description
A study of Occupational Safety and Health Administration (OSHA) regulations pertinent to general industry.

Science

SCIT1000 - Human Anatomy & Physiology

Course Title
Human Anatomy & Physiology

Academic Level
Continuing Education

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0
SCIT1318 - Applied Physics

Course Title
Applied Physics

Academic Level
Undergraduate

Description
Introduction to physics for industrial applications including vectors, motion, mechanics, simple machines, matter, heat, and thermodynamics.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

SCIT1407 - Applied Human Anatomy and Physiology I

Course Title
Applied Human Anatomy and Physiology I

Academic Level
Undergraduate

Description
An applied systematic study of the structure and function of the human body. Includes anatomical terminology, cells, tissues, and the following systems: integumentary, skeletal, muscular, nervous, and endocrine. Emphasis on homeostasis.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4
SCIT1414 - Applied General Chemistry I

Course Title
Applied General Chemistry I

Academic Level
Undergraduate

Description
Applications of general chemistry emphasizing industry-related laboratory skills and competencies including laboratory safety and report writing. Addresses supporting chemical theories including atomic and molecular structure, nomenclature, chemical reactivity, gas laws, acids and bases, solutions, and an overview of organic chemistry.

Lecture Hours
3

Lab Hours
3

Credits
4

Semester Credit Hours
4

Small Engine Mechanic & Repair

SMER1434 - Small Engine Two Stroke Overhaul

Course Title
Small Engine Two Stroke Overhaul

Academic Level
Undergraduate

Description
Overhaul procedures for two stroke small engines as used in lawn and garden applications. Emphasis on proper shop procedures for overhaul of two stroke small engines.

Lecture Hours
2

Lab Hours
4

Credits
4

Semester Credit Hours
4
SMER1437 - Small Engine Four Stroke Engine

Course Title
Small Engine Four Stroke Engine

Academic Level
Undergraduate

Description
Overhaul procedures for four stroke small engines. Emphasis on shop procedures for overhauls.

Lecture Hours
2

Lab Hours
4

Credits
4

Semester Credit Hours
4

Sociology

SOCI1301 - Introduction to Sociology

Course Title
Introduction to Sociology

Academic Level
Undergraduate

Description
The scientific study of human society, including ways in which groups, social institutions, and individuals affect each other. Causes of social stability and social change are explored through the application of various theoretical perspectives, key concepts, and related research methods of sociology. Analysis of social issues in their institutional context may include topics such as social stratification, gender, race/ethnicity, and deviance.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3
SOCI1306 - Social Problems

Course Title
Social Problems

Academic Level
Undergraduate

Description
Application of sociological principles and theoretical perspectives to major social problems in contemporary society such as inequality, crime and violence, substance abuse, environmental issues, deviance, or family problems.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3

SOCI2319 - Minority Studies I

Course Title
Minority Studies I

Academic Level
Undergraduate

Description
This course studies minority-majority group relations, addressing their historical, cultural, social, economic, and institutional development in the United States. Both sociological and social psychological levels of analysis will be employed to discuss issues including experiences of minority groups within the context of their cultural heritage and tradition, as well as that of the dominant culture. Core concepts to be examined include (but are not limited to) social inequality, dominance/subordination, prejudice, and discrimination. Particular minority groups discussed may include those based on poverty, race/ethnicity, gender, sexual orientation, age, disability, or religion.

3

Solar Energy Technology
SOLR1272 - Found of Solar Photovoltaic Power Gener

Course Title
Found of Solar Photovoltaic Power Gener

Academic Level
Undergraduate

Description
Solar electrical power generation using photovoltaic (PV) equipment. Includes calculation of power generation and demand requirements, installation process for solar system components, and strategies for optimizing system performance and reliability.

Lecture Hours
1

Lab Hours
4

Credits
2

Semester Credit Hours
2

SOLR1273 - Foundations of Solar Thermal Systems

Course Title
Foundations of Solar Thermal Systems

Academic Level
Undergraduate

Description
Discusses industry terminology, safety issues, solar thermal systems design and installation procedures.

Lecture Hours
1

Lab Hours
4

Credits
2

Semester Credit Hours
2
SOLR1371 - Introduction to Solar and Alternative Energy Technologies

Course Title
Introduction to Solar and Alternative Energy Technologies

Academic Level
Undergraduate

Description
Introduction to Renewable Energy is an overview to the most common types of renewable energy with an emphasis on solar system types and applications. This course introduces solar system types, components, safety issues, and history.

SOLR1372 - Foundations of Solar Photovoltaic Power Generation

Course Title
Foundations of Solar Photovoltaic Power Generation

Academic Level
Undergraduate

Description
Solar electrical power generation using photovoltaic (PV) equipment. Includes calculation of power generation and demand requirements, installation process for solar system components, and strategies for optimizing system performance and reliability.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
SOLR1373 - Foundations of Solar Thermal Systems

Course Title
Foundations of Solar Thermal Systems

Academic Level
Undergraduate

Description
Discusses industry terminology, safety issues, solar thermal systems design and installation procedures.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

SOLR2175 - Solar Sys Des, Install, Trblshting & Rep

Course Title
Solar Sys Des, Install, Trblshting & Rep

Academic Level
Undergraduate

Description
Design considerations including site assessment and desired system operation, installation, commissioning, maintenance, operation, troubleshooting and repair, and decommissioning. Review of safety issues, personal protection equipment, and tools of the trade associated with installation, operation, maintenance, and troubleshooting and repair of solar systems.

SOLR2276 - Special Projects in Solar Energy Systems

Course Title

Special Projects in Solar Energy Systems

Academic Level

Undergraduate

Description

This course will provide the student with opportunities for solar installations and hands on experience. Photovoltaic Systems as well as Solar Thermal Systems will be addressed. Individual students will be given the responsibility of supervising the planning and installation of their own systems.

Lecture Hours

1

Lab Hours

4

Credits

2

Semester Credit Hours

2
SOLR2374 - Solar System Equipment & Components

Course Title
Solar System Equipment & Components

Academic Level
Undergraduate

Description
Design and operation of solar system equipment, components, subsystems, and balance of plant. Design considerations include environmental, architectural, structural, and legal requirements.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

SOLR2375 - Solar System Design, Installation, Troubleshooting & Repair

Course Title
Solar System Design, Installation, Troubleshooting & Repair

Academic Level
Undergraduate

Description
Design considerations including site assessment and desired system operation, installation, commissioning, maintenance, operation, troubleshooting and repair, and decommissioning. Review of safety issues, personal protection equipment, and tools of the trade associated with installation, operation, maintenance, and troubleshooting and repair of solar systems.

SOLR2377 - Codes for Alternative Energy, Efficiency & Conservation

**Course Title**
Codes for Alternative Energy, Efficiency & Conservation

**Academic Level**
Undergraduate

**Description**
Apply various building and energy codes to solar and other alternate energy system installations. Emphasis will be on safety features of the codes and how the installation methods affect installers, occupants as well as any emergency responders that may have contact with the system and the structure on which it is installed. Energy efficiency, energy conservation, and the concept of a whole structure approach will be covered.

Special Topics Petroleum
PRTT1003 - Drilling

**Course Title**
Drilling

**Academic Level**
Continuing Education

**Description**
A study of practices and procedures that are involved in drilling operations. Topics on rig equipment, casing design, fishing, and proper procedures to successfully drill a well are implemented. Instruction in volume calculations, hydrostatic pressures, formations pressures, and analyzing problems in downhill drilling operations.

**Lecture Hours**
10

**Lab Hours**
0

**Semester Credit Hours**
0

PRTT1006 - Drilling Fluids

**Course Title**
Drilling Fluids

**Academic Level**
Continuing Education

**Description**
A study of the functions and properties of the fluids used in drilling an oil or gas well. The various types of mud systems for different formations will be discussed and developed.

**Lecture Hours**
2

**Lab Hours**
0

**Semester Credit Hours**

**Speech**
SPCH1311 - Introduction to Speech Communication

Course Title
Introduction to Speech Communication

Academic Level
Undergraduate

Description
Introduces basic human communication principles and theories embedded in a variety of contexts including interpersonal, small group, and public speaking.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3

SPCH1315 - Public Speaking

Course Title
Public Speaking

Academic Level
Undergraduate

Description
Application of communication theory and practice to the public speaking context, with emphasis on audience analysis, speaker delivery, ethics of communication, cultural diversity, and speech organizational techniques to develop students' speaking abilities, as well as ability to effectively evaluate oral presentations.

Lecture Hours
3

Lab Hours
0

Credits

**Surg Tech**
SRGT1244 - Technological Sciences for the Surgical Technologist

Course Title
Technological Sciences for the Surgical Technologist

Academic Level
Undergraduate

Description
Specialized surgical modalities covered include endoscopy, microsurgery, therapeutic surgical energies, and other integrated science technologies.

Lecture Hours
2

Lab Hours
0

Credits
2

Semester Credit Hours
2

SRGT1405 - Introduction to Surgical Technology

Course Title
Introduction to Surgical Technology

Academic Level
Undergraduate

Description
Orientation to surgical technology theory, surgical pharmacology and anesthesia, and patient care concepts.

Lecture Hours
3

Lab Hours
2

Credits
4

Semester Credit Hours
4
SRGT1409 - Fundamentals of Perioperative Concepts and Techniques

Course Title
Fundamentals of Perioperative Concepts and Techniques

Academic Level
Undergraduate

Description
In-depth coverage of aseptic technique principles and practices, infectious processes, wound healing and creation and maintenance of the sterile field.

Lecture Hours
3

Lab Hours
2

Credits
4

Semester Credit Hours
4

SRGT1441 - Surgical Procedures I

Course Title
Surgical Procedures I

Academic Level
Undergraduate

Description
Introduction to surgical pathology and its relationship to surgical procedures. Emphasis on surgical procedures related to the general, OB/GYN genitourinary, and orthopedic surgical specialties incorporating instruments, equipment, and supplies required for safe patient care.

Lecture Hours
3

Lab Hours
3

Credits
4

Semester Credit Hours
4
SRGT1442 - Surgical Procedures II

Course Title
Surgical Procedures II

Academic Level
Undergraduate

Description
Introduction to surgical pathology and its relationship to surgical procedures. Emphasis on surgical procedures related to the thoracic, peripheral vascular, plastic/reconstructive, EENT, cardiac, and neurological surgical specialties incorporating instruments, equipment, and supplies required for safe patient care.

**Surveying**

SRVY1313 - Plane Surveying

**Course Title**
Plane Surveying

**Academic Level**
Undergraduate

**Description**
An introductory overview of surveying equipment and measurement techniques used in mapping. Emphasis on leveling and traversing.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3
SRVY1341 - Land Surveying
Course Title
Land Surveying
Academic Level
Undergraduate
Description
A study of the measurement and determination of boundaries, areas, shapes, location through traversing techniques. Instruction in a variety of adjustment methods using calculators and computers. Addresses methods of traversing and adjustment of errors according to prevailing professional standards.

Lecture Hours
2
Lab Hours
4
Credits

EDTC1307 - Introduction to Teaching Reading
Course Title
Introduction to Teaching Reading

Academic Level
Undergraduate

Description
General principles of reading instruction. Topics include emergent literacy, reading readiness, reading instruction, literacy-based environments, and a review of varied materials and techniques for teaching reading.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
EDTC1321 - Bilingual Education

Course Title
Bilingual Education

Academic Level
Undergraduate

Description
An overview of bilingual education. Topics include awareness of cultural diversity, assessment strategies, teaching techniques, instructional activity development, and historical/philosophical concepts of bilingual/bicultural education.

Lecture Hours
2

Lab Hours
2

Credits
3

Semester Credit Hours
3

EDTC1325 - Multicultural Education

Course Title
Multicultural Education

Academic Level
Undergraduate

Description
An examination of cultural diversity found in society and reflected in the classroom. Topics include the study of major cultures and their influence on lifestyle, behavior, learning, intercultural communication and teaching, as well as psychosocial stressors encountered by diverse cultural groups.

Lecture Hours
2

Lab Hours
2

Credits
3

Semester Credit Hours

EDTC1373 - Writing Problems

Course Title
Writing Problems

Academic Level
Undergraduate

Description
An in depth coverage of writing difficulties at the elementary level. Emphasis will be on the foundations and theories of writing at the elementary level, required curriculum to be taught, instructional techniques to utilize with students, models of teaching students, assessment techniques, and lesson planning strategies useful in working with the elementary student.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours

EDTC1374 - Teaching Math & Science in the Elementary School

Course Title
Teaching Math & Science in the Elementary School

Academic Level
Undergraduate

Description
Practical approaches for introducing math and science concepts in an elementary classroom lab environment with an emphasis on problem solving, inquiry, and critical thinking. Topics include basic math and science concepts and properties, diagnostic testing, pedagogy, and recognizing and recommending corrective teaching strategies.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
EDTC1375 - Issues in Special Needs Education

Course Title
Issues in Special Needs Education

Academic Level
Undergraduate

Description
An examination of current research, federal and state regulations, and programs for students with exceptionalities within the public school environment. Topics address methods for supporting instructional planning and the implementation of program goals and objectives.

Lecture Hours
3

Lab Hours
0

Credits
3

EDTC2000 - Verbal and Physical Conflict Resolution

Course Title
Verbal and Physical Conflict Resolution

Academic Level
Continuing Education

Description
Intensive training in an identified area(s) to meet continuing education and/or review/update requirements associated with professional licensure or certification. This course was designed to be repeated multiple times to improve student proficiency.

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0
EDTC2305 - Reading Problems

Course Title
Reading Problems

Academic Level
Undergraduate

Description
In-depth coverage of reading difficulties. Emphasis on the theories, strategies, recognition, and remediation of reading problems. Topics include assessment, direct instruction, and motivational/interactive literacy activities.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

EDTC2311 - Instructional Practices and Effective Learning Environments

Course Title
Instructional Practices and Effective Learning Environments

Academic Level
Undergraduate

Description
General principles for selecting developmentally appropriate strategies in core curriculum areas, planning the classroom environment, and instructional accommodations and modifications.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
EDTC2317 - Guiding Student Behavior

Course Title
Guiding Student Behavior

Academic Level
Undergraduate

Description
Developmentally appropriate and indirect guidance techniques for use in various school environments. Topics include identifying causes of inappropriate behavior, establishing and managing routines, the environment's role in promoting positive behavior, promoting self-esteem negotiation/conflict resolution strategies, and enhancing positive self-direction. Emphasis in implementation of a behavior management plan.

Visual & Performing Art, Animt

ARTV1345 - 3-D Modeling and Rendering I

Course Title
3-D Modeling and Rendering I

Academic Level
Undergraduate

Description
Techniques of three-dimensional (3-D) modeling utilizing industry standard software. Includes the creation and modification of 3-D geometric shapes, use of a variety of rendering techniques, camera, light sources, texture, and surface mapping.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - ARTC1302 - Digital Imaging I (3)
ARTV1351 - Digital Video

Course Title
Digital Video

Academic Level
Undergraduate

Description
Producing and editing video and sound for multimedia or web productions. Emphasizes capture, editing, and outputting of video using a digital video workstation.

Lecture Hours
2

Lab Hours
4

Credits

Welder/Welding Technologist
NDTE1310 - Liquid Penetrant/Magnetic Particle Testing

Course Title

Liquid Penetrant/Magnetic Particle Testing

Academic Level

Undergraduate

Description

Identify and select proper materials and equipment to perform a liquid penetrant test of a weldment; interpret the results of a liquid penetrant test to ascertain acceptability of the weldment; demonstrate knowledge of safety precautions relative to fire and toxic hazards; and identify and properly select equipment used in magnetic particle testing. Demonstrate knowledge of the principles of magnetic particle, magnetic fields, current requirements for testing and demagnetization; perform a magnetic particle examination on a weldment, following established procedures; and interpret the results of the above test to ascertain acceptability of the weldment.

Lecture Hours

2

Lab Hours

4

Credits

Semester Credit Hours

3

Prerequisites

- Complete the following:
  - WLDG2413 - Intermediate Welding Using Multiple Processes (4)

NDTE2001 - Advanced Ultrasonics

Course Title

Advanced Ultrasonics

Academic Level

Continuing Education

Description

Designed to strengthen the students' knowledge and skills in ultrasonic testing. Emphasis is on examination of plate and pipe welds, characterization of flaws, immersion testing, written practices, and procedures.

Lecture Hours

0

Lab Hours

0

Semester Credit Hours

0
**NDTE2311 - Preparation Welding Inspection (2-2-3)**

**Course Title**
Preparation Welding Inspection (2-2-3)

**Academic Level**
Undergraduate

**Description**
General principles of welding inspection including welding processes, terms and definitions, welding discontinuities, duties and responsibilities of inspectors, destructive and nondestructive testing, quality assurance/ quality control, welding codes and blueprints, procedures, and case studies. An overview of welding tools and equipment, metallurgy, chemistry, and joint design.

**Welding**

**WLDG1004 - Fundamentals of Oxy-Fuel Welding & Cutting**

**Course Title**
Fundamentals of Oxy-Fuel Welding & Cutting

**Academic Level**
Continuing Education

**Description**
Oxy-fuel welding and cutting equipment. Includes equipment safety, setup, and maintenance.

**Lecture Hours**
0

**Lab Hours**
0

**Semester Credit Hours**
0
WLDG1007 - Intro Welding Using Multiple Processes

Course Title
Intro Welding Using Multiple Processes

Academic Level
Continuing Education

Description
An overview of the basic welding processes, including oxy-fuel welding and cutting, shielded metal arc (SMAW), gas metal arc (GMAW), and gas tungsten arc welding (GTAW).

Lecture Hours
3

Lab Hours
0

Semester Credit Hours
0

WLDG1012 - Introduction to Flux Cored Arc Welding

Course Title
Introduction to Flux Cored Arc Welding

Academic Level
Continuing Education

Description
An overview of terminology, safety procedures, and equipment set-up. Practice in performing T-joints, lap joints, and butt joints using self-shielding and dual-shield electrodes.

Lecture Hours
3

Lab Hours
0

Semester Credit Hours
0
WLDG1017 - Introduction to Layout and Fabrication

Course Title
Introduction to Layout and Fabrication

Academic Level
Continuing Education

Description
A fundamental course in layout and fabrication related to the welding industry. Major emphasis on structural shapes and use in construction.

Lecture Hours
10

Lab Hours
0

Semester Credit Hours

WLDG1023 - Welding Safety, Tools, & Equip

Course Title
Welding Safety, Tools, & Equip

Academic Level
Continuing Education

Description
An introduction to welding careers and safety practice, including welding safety; OSHA and the Hazardous Communication Act; Material Safety Data Sheets (MSDS); basic mathematics; measuring systems; shop operations; use and care of precision measuring tools; and the use and care of hand and power tools. Instruction on various types of welding equipment and processes, basic welding gases, fluxes, rods, electrodes, symbols, and blueprints.

Lecture Hours
4

Lab Hours
0

Semester Credit Hours
0

WLDG1025 - Intro Oxy-Fuel Wldg & Cutting

Course Title
Intro Oxy-Fuel Wldg & Cutting

Academic Level
Continuing Education

Description
An Introduction to Oxy-Fuel Welding and Cutting, Safety, Setup And Maintenance of Oxy-Fuel Welding, and Cutting Equipment and Supplies.

Lecture Hours
1

Lab Hours
0

Semester Credit Hours
0
WLDG1028 - Intro to Shielded Arc Welding (smaw)

Course Title
Intro to Shielded Arc Welding (smaw)

Academic Level
Continuing Education

Description
An introduction to shielded metal arc welding process. Emphasis placed on power sources, electrode selection, oxy-fuel cutting, and various joint designs. Instruction provided in SMAW fillet welds in various positions.

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0

WLDG1030 - Introduction to Gas Metal Arc Welding (g)

Course Title
Introduction to Gas Metal Arc Welding (g)

Academic Level
Continuing Education

Description
A study of the principles of gas metal arc welding, setup and use of Gas Metal Arc Welding (GMAW) equipment, and safe use of tools/equipment. Instruction in various joint designs.

Lecture Hours
0

Lab Hours
0

Semester Credit Hours

WLDG1057 - Intermediate Smaw

Course Title
Intermediate Smaw

Academic Level
Continuing Education

Description
A Study of the Production of Various Fillets and Groove Welds. Preparation of Specimens for Testing in All Test Positions.

Lecture Hours
1

Lab Hours
0

Semester Credit Hours
0
WLDG1072 - Welding Internship

Course Title
Welding Internship

Academic Level
Continuing Education

Description
A basic, intermediate, or advanced type of non-health professions work-based instruction that helps students synthesize new knowledge, apply previous knowledge, or gain experience managing the workflow. Practical experience is simultaneously related to theory. Direct supervision is provided by the faculty or the work supervisor. An internship may be a paid or unpaid learning experience.

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0

WLDG1091 - Special Topics in Welding

Course Title
Special Topics in Welding

Academic Level
Continuing Education

Lecture Hours
2

Lab Hours
0

Semester Credit Hours
0
WLDG1313 - Introduction to Blueprint Reading for Welders

Course Title
Introduction to Blueprint Reading for Welders

Academic Level
Undergraduate

Description
A study of industrial blueprints. Emphasis placed on terminology, symbols, graphic description, and welding processes. Includes systems of measurement and industry standards. Also includes interpretation of plans and drawings used by industry to facilitate field application and production.

Lecture Hours
3

Lab Hours
0

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - WLDG1313 - Introduction to Blueprint Reading for Welders (3)

Corequisites
- Completed or concurrently enrolled in:
  - WLDG1313 - Introduction to Blueprint Reading for Welders (3)
WLDG1327 - Welding Codes and Standards

Course Title
Welding Codes and Standards

Academic Level
Undergraduate

Description
An in-depth study of welding codes and their development in accordance with structural standards, welding processes, destructive and nondestructive test methods.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - WLDG2413 - Intermediate Welding Using Multiple Processes (4)

WLDG1337 - Introduction to Welding Metallurgy

Course Title
Introduction to Welding Metallurgy

Academic Level
Undergraduate

Description
A study of ferrous and nonferrous metals from the ore to the finished product. Emphasis on metal alloys, heat treating, hard surfacing, welding techniques, forging, foundry processes, and mechanical properties of metal including hardness, machinability, and ductility.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
WLDG1391 - Special Topics in Welder/Welding Technologist

Course Title
Special Topics in Welder/Welding Technologist

Academic Level
Undergraduate

Description
Topics address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

WLDG1407 - Introduction to Welding Using Multiple Processes

Course Title
Introduction to Welding Using Multiple Processes

Academic Level
Undergraduate

Description
Basic welding techniques using some of the following processes: Oxy-fuel welding (OFW) and cutting, shielded metal arc welding (SMAW), gas metal arc welding (GMAW), and gas tungsten arc welding (GTAW).

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4
WLDG1412 - Intro to Flux Cored Arc Welding (fcaw)

**Course Title**
Intro to Flux Cored Arc Welding (fcaw)

**Academic Level**
Undergraduate

**Description**
An overview of terminology, safety procedures, and equipment set-up. Practice in performing T-joints, lap joints, and butt joints using Flux Cored Arc Welding (FCAW) equipment.

**Lecture Hours**
2

**Lab Hours**
6

**Credits**
4

**Semester Credit Hours**
4

---

WLDG1417 - Introduction to Layout and Fabrication

**Course Title**
Introduction to Layout and Fabrication

**Academic Level**
Undergraduate

**Description**
A fundamental course in layout and fabrication related to the welding industry. Major emphasis on structural shapes and use in construction.

**Lecture Hours**
2

**Lab Hours**
6

**Credits**
4

**Semester Credit Hours**
4

**Prerequisites**
- Complete the following:
  - WLDG1313 - Introduction to Blueprint Reading for Welders (3)
WLDG1428 - Introduction to Shielded Metal Arc Welding (SMAW)

**Course Title**
Introduction to Shielded Metal Arc Welding (SMAW)

**Academic Level**
Undergraduate

**Description**
An introduction to the shielded metal arc welding process. Emphasis placed on power sources, electrode selection, oxy-fuel cutting, and various joint designs. Instruction provided in SMAW fillet welds in various positions.

**Lecture Hours**
2

**Lab Hours**
6

**Credits**
4

**Semester Credit Hours**
4

WLDG1434 - Introduction to Gas Tungsten Arc (GTAW) Welding

**Course Title**
Introduction to Gas Tungsten Arc (GTAW) Welding

**Academic Level**
Undergraduate

**Description**
Principles of gas tungsten arc welding (GTAW), including setup, GTAW equipment. Instruction in various positions and joint designs.

**Lecture Hours**
2

**Lab Hours**
6

**Credits**
4

**Semester Credit Hours**
4

**Prerequisites**
- Complete the following:
  - WLDG1407 - Introduction to Welding Using Multiple Processes (4)
WLDG1435 - Introduction to Pipe Welding

Course Title
Introduction to Pipe Welding

Academic Level
Undergraduate

Description
An introduction to welding of pipe using the shielded metal arc welding process (SMAW), including electrode selection, equipment setup, and safe shop practices. Emphasis on weld positions 1G and 2G using various electrodes.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4

Prerequisites
- Complete the following:
  - WLDG2435 - Advanced Layout and Fabrication (4)

WLDG1453 - Intermediate Layout & Fabrication

Course Title
Intermediate Layout & Fabrication

Academic Level
Undergraduate

Description
An intermediate course in layout and fabrication. Includes design and production of shop layout and fabrication. Emphasis placed on symbols, blueprints, and written specifications

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4
WLDG1457 - Intermediate Shielded Metal Arc Welding (SMAW)

Course Title
Intermediate Shielded Metal Arc Welding (SMAW)

Academic Level
Undergraduate

Description
A study of the production of various fillets and groove welds. Preparation of specimens for testing in various positions.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4

Prerequisites
◆ Complete the following:
  ◆ WLDG1428 - Introduction to Shielded Metal Arc Welding (SMAW) (4)

WLDG2032 - Welding Automation

Course Title
Welding Automation

Academic Level
Continuing Education

Description
Overview of automated welding and cutting applications. Special emphasis on safe use and operation of equipment.

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0
WLDG2043 - Advanced Smaw

Course Title

Advanced Smaw

Academic Level

Continuing Education

Description

Advanced Topics Based on Accepted Welding Codes. Training Provided With Various Electrodes in Shielded Metal Arc Welding Processes With Open V-Groove Joints in All Positions.

Lecture Hours

1

Lab Hours

0

Semester Credit Hours

0

WLDG2047 - Advanced Gas Metal Arc Welding (gmaW)

Course Title

Advanced Gas Metal Arc Welding (gmaW)

Academic Level

Continuing Education

Description

Advanced topics in Gas Metal Arc Welding (GMAW). Includes welding in various positions.

Lecture Hours

6

Lab Hours

0

Semester Credit Hours

0

WLDG2051 - Adv Gas Tungsten Arc Welding

Course Title

Adv Gas Tungsten Arc Welding

Academic Level

Continuing Education

Lecture Hours

0

Lab Hours

0

Semester Credit Hours

0
WLDG2052 - Advanced Flux Cored Arc Welding

Course Title
Advanced Flux Cored Arc Welding

Academic Level
Continuing Education

Description
Advanced concepts of flux cored arc welding of structural and fabricated steel products. Skill development in multi-pass fillet and v-groove welding.

Lecture Hours
6

Lab Hours
0

Semester Credit Hours
0

WLDG2331 - Adv Blueprint Interpretation & Cost Anal Cost Analysis

Course Title
Adv Blueprint Interpretation & Cost Anal Cost Analysis

Academic Level
Undergraduate

Description
A continuation of the Blueprint for Welders course. Emphasis placed on inspection, cost analysis, and estimating.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3
WLDG2355 - Advanced Metallurgy

Course Title
Advanced Metallurgy

Academic Level
Undergraduate

Description
Advanced study of metallurgy as it applies to welding. Includes structure, identification, and testing of metals. Also covers temperature changes and their effect on welded metals, properties of metals, and factors affecting weldability of ferrous and nonferrous metals.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

WLDG2406 - Intermediate Pipe Welding

Course Title
Intermediate Pipe Welding

Academic Level
Undergraduate

Description
A comprehensive course on the welding of pipe using the shielded metal arc welding (SMAW) process. Welds will be done using various positions. Topics covered include electrode selection, equipment setup, and safe shop practices.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4

Prerequisites
- Complete the following:
  - WLDG2435 - Advanced Layout and Fabrication (4)
WLDG2413 - Intermediate Welding Using Multiple Processes

Course Title
Intermediate Welding Using Multiple Processes

Academic Level
Undergraduate

Description
Instruction using layout tools and blueprint reading with demonstration and guided practices with some of the following welding processes: Oxy-fuel gas cutting and welding, shield,etal arc welding (SMAW), gas metal arc welding (GMAW), flux-cored arc welding (FCAW), gas tungsten arc welding (GTAW), or any other approved welding process.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4

Prerequisites
- Complete the following:
  - WLDG1407 - Introduction to Welding Using Multiple Processes (4)

WLDG2432 - Welding Automation

Course Title
Welding Automation

Academic Level
Undergraduate

Description
Overview of automated welding and cutting applications. Special emphasis on safe use and operation of equipment.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4

Prerequisites
- Complete the following:
  - WLDG2413 - Intermediate Welding Using Multiple Processes (4)
WLDG2435 - Advanced Layout and Fabrication

Course Title
Advanced Layout and Fabrication

Academic Level
Undergraduate

Description
An advanced course in layout and fabrication. Includes production and fabrication of layout, tools, and processes. Emphasis on application of fabrication and layout skills.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4

Prerequisites
- Complete the following:
  - WLDG1417 - Introduction to Layout and Fabrication (4)

WLDG2443 - Advanced Shielded Metal Arc Welding (SMAW)

Course Title
Advanced Shielded Metal Arc Welding (SMAW)

Academic Level
Undergraduate

Description
Advanced topics based on accepted welding codes. Training provided with various electrodes in shielded metal arc welding processes with open V-groove joints in all positions.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4

Prerequisites
- Complete the following:
  - WLDG1457 - Intermediate Shielded Metal Arc Welding (SMAW) (4)
WLDG2447 - Advanced Gas Metal Arc Welding (gmaw)

Course Title
Advanced Gas Metal Arc Welding (gmaw)

Academic Level
Undergraduate

Description
Advanced topics in Gas Metal Arc Welding (GMAW). Includes welding in various positions.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4

Prerequisites
- Complete the following:
  - WLDG2413 - Intermediate Welding Using Multiple Processes (4)

WLDG2451 - Advanced Gas Tungsten Arc Welding (gtaw)

Course Title
Advanced Gas Tungsten Arc Welding (gtaw)

Academic Level
Undergraduate

Description
Advanced Topics in GTAW welding, including positions and directions.

Lecture Hours
2

Lab Hours
6

Credits
4

Semester Credit Hours
4

Prerequisites
- Complete the following:
  - WLDG2413 - Intermediate Welding Using Multiple Processes (4)
WLDG2452 - Advanced Flux Cored Arc Welding

**Course Title**
Advanced Flux Cored Arc Welding

**Academic Level**
Undergraduate

**Description**
Advanced concepts of flux cored arc welding of structural and fabricated steel products. Skill development of multi-pass fillet and v-groove welding.

**Lecture Hours**
2

**Lab Hours**
6

**Credits**
4

**Semester Credit Hours**
4

**Prerequisites**
- Complete the following:
  - WLDG2413 - Intermediate Welding Using Multiple Processes (4)

WLDG2453 - Advanced Pipe Welding

**Course Title**
Advanced Pipe Welding

**Academic Level**
Undergraduate

**Description**
Advanced topics involving welding of pipe using the shielded metal arc welding (SMAW) process. Topics include electrode selection, equipment setup, and safe shop practices. Emphasis on weld positions 5G and 6G using various electrodes.

**Lecture Hours**
2

**Lab Hours**
6

**Credits**
4

**Semester Credit Hours**
4

**Prerequisites**
- Complete the following:
  - WLDG2435 - Advanced Layout and Fabrication (4)
WIND1000 - Introduction to Wind Energy

Course Title
Introduction to Wind Energy

Academic Level
Continuing Education

Description
Introduction of the evolution of wind technology, wind farm design, and characteristics of energy sources.

Lecture Hours
0

Lab Hours
0

Semester Credit Hours
0

WIND1002 - Wind Safety

Course Title
Wind Safety

Academic Level
Continuing Education

Description
Introduction to safety procedures and practices relating to turbine towers. Includes first aid training and CPR certifications.

Lecture Hours
3

Lab Hours
0

Semester Credit Hours
0
WIND1300 - Introduction to Wind Energy

Course Title  
Introduction to Wind Energy

Academic Level  
Undergraduate

Description  
Introduction of wind technology, wind farm design, and wind power delivery.

Lecture Hours  
3

Lab Hours  
0

Credits  
3

Semester Credit Hours

WIND1302 - Wind Safety

Course Title  
Wind Safety

Academic Level  
Undergraduate

Description  
Introduction to safety procedures and practices relating to turbine towers. Includes first aid training and CPR certifications.

Lecture Hours  
2

Lab Hours  
2

Credits  
3

Semester Credit Hours  
3
WIND1371 - Safety At Height Training

Course Title
Safety At Height Training

Academic Level
Undergraduate

Description
Develop basic safety at height skills, gain knowledge of how to react to dangerous situations in the turbine, and learn emergency evacuation skills.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - CETT1325 - Digital Fundamentals (3)

WIND1391 - Special Topics in Electromechanical Technology/ Technician

Course Title
Special Topics in Electromechanical Technology/ Technician

Academic Level
Undergraduate

Description
Topics address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency.

Lecture Hours
2

Lab Hours
4

Credits
3

Semester Credit Hours

**WIND2310 - Wind Turbine Materials and Electro-Mechanical Equipment**

**Course Title**
Wind Turbine Materials and Electro-Mechanical Equipment

**Academic Level**
Undergraduate

**Description**
Identification and analysis of the components and systems of wind turbine.

**Lecture Hours**
2

**Lab Hours**
2

**Credits**
3

**Semester Credit Hours**
3

**Prerequisites**
- Complete the following:
  - WIND1300 - Introduction to Wind Energy (3)
  - WIND1302 - Wind Safety (3)
  - CETT1303 - DC Circuits (3)

**WIND2355 - Wind Turbine Troubleshooting and Repair**

**Course Title**
Wind Turbine Troubleshooting and Repair

**Academic Level**
Undergraduate

**Description**
Operation, maintenance, troubleshooting, and repair of wind turbine electro-mechanical systems.

**Lecture Hours**
2

**Lab Hours**
4

**Credits**
3

**Semester Credit Hours**
3

**Prerequisites**
- Complete the following:
  - CETT1305 - AC Circuits (3)
  - INMT1317 - Industrial Automation (3)
WIND2359 - Wind Power Delivery System

Course Title
Wind Power Delivery System

Academic Level
Undergraduate

Description
Components, equipment, and infrastructure used in the production and transmission of electricity as related to wind turbine power.

Lecture Hours
2

Lab Hours
3

Credits
3

Semester Credit Hours
3

Prerequisites
- Complete the following:
  - CETT1305 - AC Circuits (3)

WIND2455 - Wind Turbine Troubleshooting and Repair

Course Title
Wind Turbine Troubleshooting and Repair

Academic Level
Undergraduate

Description
Operation, maintenance, troubleshooting, and repair of wind turbine electro-mechanical systems.

Lecture Hours
2

Lab Hours
4

Credits
4

Semester Credit Hours

Faculty

Abshier, Charles
Instructor Diesel Mechanics Technology
AAS Texas State Technical College

Acevedo, Salvador
Instructor Biology
BS University of Texas Rio Grande Valley

Adams, Jonathan
Instructor Culinary Arts
AAS Le Cordon Bleu College of Culinary Arts

Aguila, Myriam
Instructor Education and Training
MEd University of Texas at Brownsville

Aguirri, Keith
Instructor Diesel Equipment Technology - Heavy Truck
CC Texas State Technical College

Ahumada, Manuel
Instructor Welding Technology
AAS Texas State Technical College

Alferez, Juan
Instructor Electromechanical Technology
AAS Texas State Technical College

Alfred, Julian
Instructor General Studies
AGS Central Texas College

Allen, Austin
Instructor Welding Technology
AAS Texas State Technical College

Alvarez, Jose
Instructor Physics
MS University of Detroit

Antilley, Lance
Instructor Industrial Systems
AAS Texas State Technical College
Ardalani, Kyumars
Associate Professor Mathematics
MS Texas A & M University

Avila, Manuel
Master Instructor Mathematics
BA Stephen F Austin State University

Bakus, Matthew
Instructor Advanced Pipe Welding
CC Texas State Technical College

Banda, Jose
Instructor Education and Training
MEd University of Texas Pan American

Baugh, John
Instructor Business Management Technology
BS LeTourneau University

Bazan, Pedro
Associate Professor Mathematics
MS University of Texas Pan American

Benitez, Edelmiro
Instructor Information Systems and Cybersecurity
BAT University of Texas at Brownsville

Benson, Russell
Instructor General Studies
AAS Odessa College

Betros, Steven
Senior Instructor Organizational Management
BS Paul Quinn College

Bibb, Jimmy
Instructor Plumbing & Pipefitting Technology
CC Texas State Technical College

Black, Kevin
Instructor Drafting & Design Technology
AAS Texas State Technical College Waco

Blackshear, Yvonne
Instructor Networking & IT Security
BS Texas A&M - Commerce
Blake, Gary  
Instructor Mechanical Engineering  
AAS Texas State Technical College

Block, Darren  
Instructor Mechanical Engineering  
AAS Texas State Technical College - Waco

Bonkoske, Jonathan  
Instructor Electrical Engineering  
BS ITT Technical Institute

Borden, Alley  
Instructor Physics with Computer Science  
BS Tarleton State University

Boyd, Shannon  
Instructor - Adjunct Nursing  
MS Hardin Simmons University

Brannen, David  
Instructor Heating, Ventilation, & Air Conditioning (HVAC)  
AAS Texas State Technical College

Breshears, Thomas  
Instructor Automotive Technology  
AAS Texas State Technical College

Briggs, Hiley  
Instructor Air Conditioning & Refrigeration Technology  
AAS Texas State Technical College - Waco

Brock, Jerod  
Instructor Diesel Equipment Technology-Construction Speci  
AAS Texas State Technical College - Waco

Brooks, Duston  
Instructor Computer Science  
BBA Hardin Simmons University

Brooks, Sarah  
Instructor Health Information Management Administration  
BS University of Cincinatti

Brown, Linnea  
Instructor Nursing  
MS Grand Canyon University
Brown, Michele
Instructor Food Service Management
BS Johnson Wales University

Browning, Yvonne
Associate Professor Urban Studies
MA Trinity University
Bryant, Elizabeth
Instructor Social Sciences
MA Southern University and A & M College

Bryant, James
Instructor Nursing
MS Walden University

Bryant, Joel
Senior Instructor Information Systems and Cybersecurity
BS ITT Technical Institute - Albany

Bufkin, Debra
Instructor Mathematics
MA Western Governors University Texas

Bundick, Patricia
Senior Instructor Psychology
BS Hardin Simmons University

Burke, Mason
Instructor Electrical Lineworker
CC Texas State Technical College - Waco

Burton, Dillon
Instructor Welding Technology
AAS Texas State Technical College - Waco

Buterbaugh, Stacie
Instructor Business Administration
BS Tarleton State University

Byrd, James
Instructor Business Administration
BBA Tarleton State University

Byrd, Shirley
Instructor Nursing
MS University of Texas Health Science Center

Cabarubio, Ayla
Instructor Culinary Arts
AAS South Texas College

Cabrera, Jorge
Instructor Air Conditioning & Refrigeration Technology
AAS Texas State Technical College - Harlingen

Calderon, Eutiquio
Instructor Computer Information System
BS University of Texas at Brownsville

Campbell, Jena
Instructor Marine Biology
PhD University of Texas Austin

Campos, Milton
Instructor - Dual Enrollment Automotive Technology
AAS Texas State Technical College

Cantu, Danira
Instructor - 9 Month English
MA University of Texas Pan American

Capps, Robert
Instructor Aviation Maintenance
AAS Hallmark College of Aeronautics

Carithers, Eric
Instructor Electrical Lineworker
AAS Texas State Technical College - Marshall

Carrillo, Jesse
Instructor Advanced Pipe Welding
CC Texas State Technical College

Castillo, Charles
Instructor Biology
MS University of Texas Pan American

Cervantez, Rudy
Instructor Automotive Technology
AAS Texas State Technical College - Waco

Chaffin, Tony
Instructor Building Construction Technology
MS Texas A & M University

Chaney, Edward
Instructor Industrial Systems
AAS Texas State Technical College - Marshall

Chapman, Haley
Instructor Business
MBA Stephen F Austin State University

Chawla, Om
Instructor Environmental Science
MS University of Houston - Clear Lake

Chirino, Hermes
Instructor Mechanical Engineering
MS University of Texas Rio Grande Valley

Clark, Bryan
Instructor Drafting & Design Technology
AAS Texas State Technical College - Waco

Clark, Martha
Instructor Computer-Aided Drafting and Design
AAS Texas State Technical College - Waco

Claus, Edna
Professor Educational Human Resource
PhD Texas A & M University

Cockrum, Kristin
Instructor Welding Tech - Welding Inspection
AAS Austin Community College

Collins, Curtis
Instructor Industrial Systems
AAS Texas State Technical College - Waco

Colunga-Hernandez,
Associate Professor Cybersecurity
MS Western International University

Conde, Lily
Instructor Dental Hygiene
BAT University of Texas Rio Grande Valley

Contois, Scott
Instructor Mathematics
MS Western Illinois University

Cooper, Meagan
Instructor Electrical Power and Controls
AAS Texas State Technical College - Waco
Coronado, Frank
Instructor Psychology
MA University of Texas at Brownsville

Cram, Nick
Instructor Bio Engineering
BS Texas A & M University

Creps, Emma
Instructor Culinary Arts
AAS South Texas College

Cross, Thomas
Instructor Aviation Maintenance
AAS Texas State Technical College - Harlingen

Cuellar, Rolando
Instructor Building Construction Technology
AAS Texas State Technical College - Harlingen

Cuellar, Teresa
Instructor - Adjunct Education and Training
MS Texas A & M University - Kingsville

Davidson, John
Senior Instructor English
MA University of Texas at Brownsville

Dawe, Jon
Master Instructor Automotive Technology
AAS Texas State Technical College - Waco

De la Cerda, Callie
Instructor Psychology
MA Texas State University

De la Fuente, Maria
Instructor - Dual Enrollment Family & Consumer Sciences
BS Texas A & M University - Kingsville

De Leon, Kimberly
Instructor Computer-Aided Drafting and Design
AAS Texas State Technical College - Harlingen

Decanini, Laura
Instructor Biology
MS University of Texas Rio Grande Valley

Del Angel, Maria
Instructor - 9 Month Applied Arts & Sciences
BAAS University of Texas at Brownsville

Delgado, Jenny
Instructor Health Information Technology
AAS Texas State Technical College - Harlingen

Demaree, David
Instructor Aircraft Pilot Training Technology
AAS Texas State Technical College - Waco

Desjardins, Tony
Instructor Curriculum & Instruction
EdD University of Houston

Diaz, Daniel
Instructor Industrial Systems
AAS Texas State Technical College - West Texas

Dobbs, Matthew
Instructor Diesel Equipment Technology
AAS Texas State Technical College

Duran, Omar
Instructor Culinary Arts
AAS Texas State Technical College - Waco

Elston, Jeffrey
Instructor Welding Technology
AAS Tarrant County College

Engel, David
Instructor General Studies
AA San Jacinto College

Filgo, Kelly
Instructor Aviation Maintenance
AAS Texas State Technical College - Waco

Flener, Samara
Instructor Welding Tech/Code Welding
AAS Austin Community College

Flippin, James
Instructor Micro Comp Appl/CDP
AAS McLennan Community College

Follis, Daniel
Instructor Cybersecurity
AAS Texas State Technical College - Waco

Folz, David
Instructor Diesel Equipment Technology
AAS Texas State Technical College

Ford, Abigail
Master Instructor, English
MA, University of Texas Pan American

Formacio-Serna, Em
Instructor, General Medicine
BS, Worldwide Education Consultant Services, Inc

Foster, Brandon
Instructor, Diesel Engine Mechanic and Repairer
AAS, Central Texas College

Fowler, Maxie
Instructor, Auto Collision & Management Technology
AAS, Texas State Technical College - Waco

Garcia, Ida
Dual Enrollment - PT, Education and Training
Med, University of Texas at Brownsville

Garcia, Odelia
Instructor, Education and Training
MS, Capella University

Garza, Rene
Instructor - 9 Month, Art
MA, University of Texas Pan American

Gay, Michael
Master Instructor, Interdisciplinary Studies
MA, University of Texas Pan American

Getman, Marta
Associate Professor, Psychology
MA, Baylor University

Gonzales, Michelle
Instructor, Nursing
AAS, Texas State Technical College - Harlingen

Gonzalez, Braulio
Instructor, Mechanical Engineering
BS, University of Texas Rio Grande Valley

Gonzalez, Isaac
Instructor, Machining Tech
AAS, Texas State Technical College - Harlingen

Gonzalez, Marilee
Instructor - Adjunct, Biology
BS, University of St. Francis

Goss, William
Instructor, Precision Machining Technology
CC, University of Texas Austin

Guajardo, Leo
Instructor, Aviation Maintenance
CC, Texas State Technical College - Harlingen

Gutierrez, Jesus
Instructor, English
MA, University of Oklahoma

Hall, Beth
Instructor, Mechanical Engineering
MS, University of Texas Austin

Hansen, Paul
Associate Professor, English
MA, University of Texas at Brownsville

Henderson, David
Instructor, Diesel Equipment Technology
AAS, Texas State Technical College

Hensley, John
Instructor - 9 Month, Social Work
MS, University of Texas Pan American

Henson, Justin
Instructor, Diesel Equipment Technology - Heavy Truck
AAS, Texas State Technical College

Hernandez, Luis
Instructor, Chemistry
PhD, New York University

Hernandez, Marisol
Instructor, Biology
MS, University of Texas Pan American

Hightower, JoLynn
Master Instructor, Accounting
BBA, Hardin Simmons University

Hill, Sue
Instructor, Occupational Education
MS, Texas A&M - Corpus Christi

Hogue, James
Instructor, Information Management Technology
MS, Air Force Institute of Technology

Hollis, Christina
Instructor, Advertising Design
BA, International Academy of Design & Technology - Tampa

Hope, Stephen
Instructor, Master Welder
CC, Tulsa Welding School

Human, Lucretia
Instructor - 9 Month, Education Technology
Med, University of Texas at Brownsville

Hurtubise, James
Dual Enrollment - PT, Automotive Technology
CC, Universal Technical Institute - Houston

James, Jesse
Instructor 9MO, Biology
MS, University of Texas at Tyler

Jones, Billie
Instructor, Liberal Arts
AA, Western Texas College

Jones, Casey
Instructor, Web Technologies
BS, Bellevue University

Jones, Eric
Certified Flight Instructor, Aircraft Pilot Training Technology
AAS, Texas State Technical College - Waco

Kahl, Carlyn E  
Master Instructor, History  
MA, Georgia College & State University

Kahler, Kent  
Instructor, Diesel Equipment Technology  
AAS, Texas State Technical College

Kimberley, Patricia  
Senior Instructor, Information Processing Technology  
AAS, Texas State Technical College - Waco

King, Winnie  
Instructor, Emergency Medical Services  
AAS, Texas State Technical College - Waco

Kirchmeier, John  
Instructor, Automotive Technology  
AAS, Texas State Technical College - Waco

Kirk, Richard  
Professor, Education Leadership  
EdD, University of Texas Pan American

Klix, Keith  
Instructor, Air Conditioning & Refrigeration Technology  
AAS, Texas State Technical College - Waco

Kluck, Kevin  
Instructor, Diesel Equipment Technology  
AAS, Texas State Technical College

Knudsen, Martin  
Associate Professor, App Tech Training & Dev  
MS, University of North Texas

Kunkler, Dane  
Instructor, Management  
MA, University of Phoenix

Larraga, Hector  
Instructor - Adjunct, Curriculum & Instruction  
Med, University of Texas at Brownsville

Larrazolo, Francisco  
Instructor, Health/Human Performance & Recreation
MEd, Baylor University

Limas, Ricardo
Instructor, Machining Tech
AAS, Texas State Technical College - Harlingen

Lloyd, Tony
Instructor - 9 Month, Electrical Systems Technology
AAS, Texas State Technical College - Waco

Lovelace, Robert
Master Instructor, Instrumentation Technology
AAS, Texas State Technical Institute

Loya, Miguel
Instructor, Drafting & Design Technology
AAS, Texas State Technical College - Harlingen

Lozano, Jose
Instructor, Computer Science
AAS, Texas State Technical College - Harlingen

Lucas, Christopher
Instructor, Air Conditioning & Refrigeration Technology
AAS, Texas State Technical College - Waco

Luna, Thelma
Instructor - Adjunct, Counseling & Guidance
MS, Texas A & M University - Kingsville

Macik, Henry
Instructor, Diesel Equipment Technology-Agriculture Special
AAS, Texas State Technical College

Marshall, Tracy
Senior Instructor, Management
AAA, Bee County College

Martin, Heath
Instructor, Elec/Comp Cont/Rbts
AAS, Texas State Technical College - Waco

Martin, Linda
Senior Instructor, Instrumentation Technology
BS, Abilene Christian University

Martin, Victoria
Instructor, Dental Hygiene
MS, Idaho State University

Mason, Michael
Instructor, Applied Arts & Sciences
BAAS, Texas A & M University

Mast, Jason
Instructor, Applied Physics
PhD, University of South Florida

McClenny, Rix
Instructor, Automotive Technology
AAS, Texas State Technical College - Waco

McGinnis, John
Instructor, Computer Science
BS, Dabney S Lancaster Community College

McKee, Philip
Instructor, Refinishing Specialist - Auto Collision
CC, Texas State Technical College - Waco

McLennan, Stuart
Instructor, Computer Information System
BS, Tarleton State University

McMahan, Brandon
Instructor, Instr/CompCtrls & Robotics
AAS, Texas State Technical College - Waco

Medina, Frank
Instructor - 9 Month, Air Conditioning & Refrigeration Tech
AAS, University of Texas at Brownsville

Medrano, Adrian
Instructor, Computer Networking and Systems Administration
AAS, Texas State Technical College - West Texas

Millington, James
Instructor, Applied Science
BS, Tarleton State University

Mills, Matthew
Instructor, Automotive Technology
AAS, Texas State Technical College - Waco

Mitchell, Dustin
Instructor, Electrical Lineworker
ND, Texas State Technical College - Waco

Moncus, Connie
Instructor, Business Administration
MBA, University of Texas at Brownsville

Monk, Leslie
Instructor, Career Technical Education
CC, Home Builders Institute

Murphy, Michael
Master Instructor, Mathematical Sciences
BA, University of Houston

Murrell, Brenda
Instructor, Industrial Systems
BS, University of Texas at Tyler

Myers, James
Instructor, Architectural/Civil Drafting Technology
AAS, Texas State Technical College - Waco

Nauman, Sam
Associate Professor-9 Month, Business Administration
MBA, Southern New Hampshire University

Necessary, Bryan
Instructor, Electrical Systems Technology
AAS, Texas State Technical College - Waco

Nesmith, Jan
Master Instructor, Computer Information System
BAT, University of Texas at Brownsville

Newhart, Angel
Instructor, Professional Pilot
BS, Tarleton State University

Nguyen, Dien
Instructor, Air Conditioning & Refrigeration Technology
AAS, Texas State Technical College - Waco

Nicholas, Gregory
Instructor, Master Welder
CC, Tulsa Welding School

Nieto, Javier
Instructor, Computer Science
MS, University of Texas Rio Grande Valley

Nizigiyimana, Deogr
Instructor, Precision Machining Technology
AAS, North Central Texas College

Nutt, John
Instructor, Industrial Maintenance
AAS, Texas State Technical College - Marshall

Obare, Charles
Instructor, Mathematical Sciences
MS, University of Texas Pan American

Ogden, Michael
Instructor, Diesel Equipment Technology
AAS, Texas State Technical College

Olney, Jeff
Instructor, Business
AAS, Cisco College

O’Neal, Patricia
Instructor, Mathematics
BS, Saint Mary College

Ortega, Eva
Instructor, Mathematics
BS, University of Texas at Brownsville

Owens, Jonathan
Instructor, Computer Networking and Systems Administration
AAS, Texas State Technical College - Waco

Palacios, Emanuel
Instructor, Computer Networking and Systems Administration
AAS, Texas State Technical College - Waco

Palady, Jayme
Instructor, Heating, Ventilation, & Air Conditioning (HVAC)
AAS, Texas State Technical College - Waco

Parks, Shelley
Instructor, Economics
BA, Baylor University

Parsee, Jerome
Instructor, Sociology  
MA, Prairie View A&M University

Pate, John  
Instructor, Computer Information System  
AAS, Texas State Technical College - Waco

Pawelek, Adrian  
Instructor, Restaurant and Culinary Management  
AAS, Central Texas College

Phillips, Andrew  
Instructor, Computer Science  
BBA, Hardin Simmons University

Phillips, Daniel  
Instructor, Diesel Equipment Technology-Construction Spec  
AAS, Texas State Technical College

Pickens, Richard  
Instructor, Automotive Technology  
AAS, Texas State Technical College - Waco

Pierce, Joe  
Master Instructor, Journalism  
BA, Sam Houston State University

Pitts, Ronnie  
Instructor, Emergency Medical Services  
AAS, Texas State Technical College - West Texas

Pizano, Samuel  
Instructor, Computer-Aided Drafting and Design  
AAS, Texas State Technical College - Harlingen

Porras, Paul  
Instructor, Culinary Arts  
AAS, Odessa College

Poston, Gregory  
Instructor, Air Conditioning & Refrigeration Technology  
AAS, Texas State Technical College - Waco

Price, Justin  
Instructor, Drafting & Design Technology  
AAS, Texas State Technical College - West Texas

Procopio, Jennifer
Instructor - 9 Month, Psychology
MS, University of Texas at Tyler

Proctor, Winona
Instructor, Nursing
MS, Chamberlain University

Propst, Michael
Instructor, General Studies
AA, McLennan Community College

Purcell, Teresa
Instructor, Economics
AAS, Texas State Technical College - West Texas

Ramirez, Beyda
Instructor, Interdisciplinary Studies in Allied Health
BS, University of Texas at Brownsville

Ramirez, Victor
Senior Instructor, Architecture
MS, University of Texas at Arlington

Ramirez, Yolanda
Instructor, Health Services
BAT, University of Texas at Brownsville

Reed, Patrick
Instructor, Welding/Mechanical Specialization
AAS, Northeast Texas Community College

Reeves, Brian
Instructor, Robotics
AAS, Texas State Technical College - Waco

Reyes, Adrienne
Instructor, Nursing
MS, Liberty University

Reyna, Jose
Instructor, Diesel Equipment Technology-Agriculture Special
AAS, Texas State Technical College - Waco

Reyna, Jose
Instructor, Diesel Equipment Technology-Heavy Truck Speci
AAS, Texas State Technical College - Waco

Reynolds, Laura
Instructor, Business  
MBA, West Texas A&M University

Reynolds, Thomas  
Instructor, Education and Training  
BS, East Carolina College

Reynolds, Thomas  
Instructor, Education and Training  
Med, North Texas State University

Rhoades, Julie  
Master Instructor, Business Administration  
BBA, Tarleton State University

Rice, Charlene  
Instructor, Nursing  
MS, Grand Canyon University

Roberts, Samuel  
Instructor, Industrial Maintenance  
AAS, Texas State Technical College - Marshall

Rocha, Aida  
Instructor, Instructional Technology  
Med, Wayland Baptist University

Rodriguez, Janie  
Instructor, Nursing  
MS, Cabrillo College

Rodriguez, Jennifer  
Associate Professor, Art  
MA, University of Texas Pan American

Ruble, Sherri  
Senior Instructor, Computer Networking and Systems Administration  
AAS, Texas State Technical College - Waco

Russell, Nancy  
Associate Professor, Art  
MS, Texas A & M University - Kingsville

Saldivar, Eduardo  
Instructor, Biology  
MS, University of Texas Pan American

Salinas, Christon
Instructor - 9 Month, Political Science  
MA, Texas State University

San Pedro, Anna  
Senior Instructor, Surgical Technology  
AAS, Texas State Technical College - Harlingen

Santos, Anthony  
Senior Instructor - 9 Month, Industrial Data Processing  
AAS, Texas State Technical College - Harlingen

Sargent, John  
Senior Instructor, Architectural Design & Engineering Graph  
MA, University of Illinois at Urbana-Champaign

Sauceda, Heather  
Instructor, Nursing  
AAS, South Texas College

Sauley, David  
Instructor - Adjunct, History  
MA, American Military University

Scalley, Timothy  
Instructor, Emergency Medical Services  
AAS, Texas State Technical College - Waco

Schaaf, Connie  
Instructor, Organizational Management  
EdD, Grand Canyon University

Scheler, Carol  
Senior Instructor - 9 Month, Computer Networking and Syst  
AAS, Texas State Technical College - Waco

Schier, Joshua  
Instructor, Networking & IT Security  
AAS, Texas State Technical College - Waco

Schmitt, Bruce  
Instructor, Automotive Technology  
AAS, Texas State Technical College - Waco

Scruggs, Cathy  
Instructor, Emergency Medical Services  
AAS, Texas State Technical College - West Texas
Senn, Jonathan
Instructor, Aviation Maintenance
AAS, Texas State Technical College - Waco

Sexton, Sharon
Associate Professor, Counseling & Guidance
Med, University of North Texas

Shields, Robert
Instructor, Electrical Technology
AAS, Houston Community College

Silva, Elvia
Master Instructor, Sociology
Med, University of Texas at Brownsville

Slagle, Steven
Instructor, Political Science
MA, University of Houston

Speckels, Jim
Instructor, Communications
MA, Angelo State University

Stampley, Josh
Instructor, Drafting & Design Technology
AAS, Kilgore College

Stancil, Karen
Instructor, Plant Molecular & Cellular Biology
PhD, University of Florida

Steelman, Terry
Instructor, Mechanical
AAS, Texas State Technical College - Waco

Steptoe, Ruby
Instructor, Pipe Welding Certificate
CC, Houston Community College

Stevens, Karen
Associate Professor, Computer Networking and Systems Ad
AAS, Texas State Technical College - Waco

Stewart, Heather
Instructor, English
MA, University of Texas Pan American
Stotts, Katrina
Instructor, Health Information Technology
AAS, Texas State Technical College - West Texas

Stranacher, Richard
Instructor, Diesel Equipment Technology
AAS, Texas State Technical College

Strange, Joseph
Instructor, Automotive Technology
AAS, Texas State Technical College - Waco

Szymoniak, Steven
Instructor, Business Administration
MBA, Columbia University

Taliancich, William
Senior Instructor, English
MA, University of Texas at Brownsville

Tamez, Amanda
Instructor - 9 Month, Mathematics
BS, University of Texas at Brownsville

Thomas, Miranda
Senior Instructor, Biology
MS, University of Texas at Arlington

Tijerina, Alicia
Instructor - Adjunct, Bilingual Education
Med, University of Texas Pan American

Torres, Tony
Instructor, Information Technology and Mobile Programming
BS, Liberty University

Townsend, Juanita
Instructor, Communications
MA, University of Texas Rio Grande Valley

Trainor, Linda
Instructor 9 Mo, English Teaching
BS, Weber State University

Trawick, Cynthiaanne
Instructor - Adjunct, Nursing Education and Administration
MS, University of Texas at Arlington
Tschirhart, Stephen  
Instructor - 9 Month, Professional Aeronautics  
BS, Embry Riddle Aeronautical University

Turner, Heather  
Senior Instructor, Educational Administration  
Med, Baylor University

Vaitl, Stephen  
Instructor, Chiropractic  
DOC, Cleveland Chiropractic College

Valadez, Micaela  
Instructor, History  
MA, University of Texas at San Antonio

Valdez, Magaly  
Instructor, Computer-Aided Drafting and Design  
AAS, Texas State Technical College

Van Cleave, Lisa  
Instructor, Leadership  
EdD, Hardin Simmons University

Van Demark, Adam  
Instructor - Adjunct, Air Conditioning & Refrigeration Technology  
AAS, Texas State Technical College

Vargas, Rick  
Instructor, Construction Supervision  
AAS, South Texas College

Vasquez, Jose  
Instructor, Auto Collision Technology  
AAS, Texas State Technical College

Vavra, JJ  
Master Instructor, Multimedia  
BA, University of Advancing Computer Technology

Vega, Yolanda  
Adjunct Instructor, Family Nursing Practitioner  
MS, Maryville University

Viera, Edgard  
Instructor, Flight Technology Program  
AAS, Central Texas College
Villarreal, Everardo
Instructor, Chemistry
MS, University of Texas Rio Grande Valley

Villarreal, Monica
Instructor, Communications
MA, University of Texas Pan American

Wade, Curt
Instructor, Electrical Power and Controls
AAS, Texas State Technical College

Wagner, Greg
Instructor, Air Conditioning & Refrigeration Technology
AAS, Texas State Technical College

Walker, John
Master Instructor, Nuclear Engineering Technology
BS, Thomas Edison State University

Ware, Steven
Instructor, English
AA, McLennan Community College

Warnasch, Craig
Instructor, Air Conditioning & Refrigeration Technology
CC, Texas State Technical College

Washington, John
Associate Professor, Information Systems Management
MBA, Keller Graduate School of Management

Watkins, Susie
Associate Professor, Instructional Technology
MA, Bellevue University

Weakley, Brian
Instructor, Electronic Technology
AAS, Texas A & M University

Weaver, Billy
Instructor, Air Conditioning & Refrigeration Technology
AAS, Texas State Technical College

Weems, Melissa
Instructor - Adjunct, Nursing
MS, University of Texas at El Paso
Weir, Shannon  
Instructor, Diesel Mechanics  
AAS, Texas State Technical College

White, Anneliese  
Associate Professor-9 Month, English  
MA, Texas State University

White, Joshua  
Instructor, Diesel Mechanics  
AAS, Texas State Technical College

Wilganowski, Kathr  
Instructor, Computer Science  
AAS, Texas State Technical College

Wilhite, George  
Associate Professor, English  
MA, University of Texas at San Antonio

Wilkins, David  
Instructor, Aviation Maintenance  
AAS, Texas State Technical College

Williams, George  
Instructor, Automotive Technology  
AAS, Texas State Technical College

Williams, Jeffrey  
Instructor, Industrial Systems  
AAS, Texas State Technical College

Wilson, Allen  
Instructor- Dual Enrollment, Automotive Technology  
CC, Tennessee Technology Center

Wimberley, Christa  
Instructor - 9 Month, Biology  
MS, University of Texas at Brownsville

Wingate, Jenny  
Instructor, Nursing  
BS, Tarleton State University

Wishon, Donna  
Master Instructor, Industrial Occupations  
BA, Tarleton State University
Withers, Paul
Senior Instructor, Elec/Comp Cont/Rbtcs
AAS, Texas State Technical College

Woods, Deborah
Instructor, Business Administration
BBA, Baker College

Wyche, Sessia
Instructor - 9 Month, Mathematics
MS, Texas A & M University - Kingsville

Zavala, Isaac
Instructor, Nursing
BS, Angelo State University

Zoerner, Patrick
Instructor, Wind Energy Technology
AAS, Texas State Technical College - Waco

Zoleta, Miguel
Instructor, Automotive Technology
AAS, Texas State Technical College
